Medicare is arguably Canada's most valued social program. As federally-supported medicare enters its second half-century, Medicare's Histories brings together leading social and health historians to reflect on the origins and evolution of medicare and the missed opportunities characterizing its past and present.

Embedding medicare in the diverse constituencies that have given it existence and meaning, contributors inquire into the strengths and weaknesses of publicly insured health care and critically examine medicare's unfinished role in achieving greater health equity for all people in Canada regardless of race, status, gender, class, age, and ability. Fundamental to the stories told in Medicare's Histories is the essential role played by communities of activists, critics, health professionals,

Contributors to this volume show how medicare has been shaped by politics (in the broadest sense of that word), identities, professional organizations, and social movements in Canada and abroad. Offshore Island Politics is a fascinating study of the constitutional and political development of the Isle of Man. The book analyses three broad aspects of twentieth-century political development: constitutional progress towards self-government, elections and public policy and the changing role of the state in Manx society. One of the most important

In contemporary societies children's racial identity is co-constructed in response to racial stereotyping with extended family, peers and teachers, and potent media sources. The studies in this volume take cognizance of earlier research into skin color and racial stereotyping, but advance its contemporary implications.

Developmental trajectories of racial attitudes of Black and White children, examining recent empirical research from the perspective of theorizing associated with experimental studies of stereotyped-threat are discussed. Reviewed are also the theoretical and empirical role of media images in influencing the race-related images as well as the PVEST theoretical model in considering the significance of parental racial messages and stories. The last paper argues that youth can be victimized by racial/cultural stereotyping despite being

How is the public mission of universities to change in the face of today's global challenges? How is the 21st Century university to balance its long-standing traditions and its commitment to teaching, research and commercialization with rapidly changing social needs and conditions worldwide? And how does the newly defined public role of the university reflect on changes to

Drori offer a new model of academic commitment and leadership in response to questions about the new public role of the university. Genocide denial not only abuses history and insults the victims but paves the way for future atrocities. Yet few, if any, books have offered a comparative overview and analysis of this problem. *Denial: The Final Stage of Genocide?* is a resource for understanding and countering denial. *Denial* spans a broad geographic and thematic range in its explorations of varied forms of denial—which is embedded in each stage of genocide. Ranging far beyond the most well-known cases of denial, this book offers original, pathbreaking arguments and

He knew nothing of celestial navigation or of the existence of the Pacific Ocean. He was a self-promoting and ambitious entrepreneur. His maps were a hybrid of fantasy and delusion. When he did make land, he enslaved the populace he found, encouraged genocide, and polluted relations between peoples. He ended his career in near lunacy. But Columbus had one asset that made all the difference, an inborn sense of the sea, of wind and weather, and of selecting the optimal course to get from A to B. Laurence Bergreen's energetic and bracing book gives the whole Columbus and most importantly, the whole of his career, not just the highlight of 1492. Columbus undertook three more voyages between 1494 and 1504, each designed to demonstrate that he could sail to China within a matter of

If the first voyage illustrates the rewards of exploration, this book shows how the subsequent voyages illustrate the costs - political, moral, and economic.

The end is nigh, and there is one small group willing to put their bodies in front of the insane. Sometimes, it isn't good people doing bad things but rather bad people without a conscience making decisions for the rest. Decisions that Molly has been fighting for years. This time, sacrifices will be made, and friends will line up shoulder to shoulder to stand against those who use fear to sway the masses. It is time to fully realize what must be done to Ascend. intimate history, or the individual experiences of those involved in the Great War. In *Commitment and Sacrifice*, Marilyn Shevin-Coetzee and Frans Coetzee provide just such an "intimate look" by bringing together previously unpublished diaries of five participants in the First World War and restoring to publication the diary of a sixth that has long been out of print. The six diaries address the war on the Western front and the Mediterranean, as well as behind the lines on the home front. Together, these diarists form a diverse group: John French, a British sapper who dug precarious tunnels

Through the personal reflections of these young men, we are transported into many

of the iconic episodes of the war, from the upheaval of mobilization through the great battles of Gallipoli, Verdun, and the Somme, as well as the less familiar "other ordeal" of internment and captivity. As members of the so-called Generation of 1914 (each was between nineteen and twenty-four years old), they shared an unwavering commitment to their countries' cause, and possessed a steadfast determination to persevere despite often appalling circumstances. Collectively, these diaries illuminate the sacrifices of war, whether willingly volunteered or stoically endured. That the diarists had the desire and
