De re militari

"The only Latin art of war to survive, Vegetius' Epitome was for long an essential part of the medieval prince's military education. The core of his proposals, the maintenance of a highly-trained professional standing army and navy, was revolutionary for medieval Europe, while his theory of deterrence through strength remains the foundation of modern Western defence policy. This annotated translation highlights the significance for his own age of Vegetius' advice, written just before the fall of the Roman Empire in the West, at a

time when economic weakness and political disintegration threatened to undermine the strategic defensive structure that had underpinned the Roman State for so long." "The main thrust of his reforms is to confront the problems of the fragmentation of the army, the barbarization of its personnel, the loss of professional skills, and the substitution of mercenaries for standing forces. The accent of the work is on the practicalities of recruiting and training new model armies (and navies) starting from scratch, and on the strategies appropriate to their use against the barbarian invaders of the period."--Jacket.

Libri Quatuor

Vegetius' late Roman text became a well-known and highly respected 'classic' in the Middle Ages, transformed by its readers into the authority on the waging of war. Christopher Allmand analyses the medieval afterlife of the De Re Militari, tracing the growing interest in the text from the Carolingian world to the late Middle Ages, suggesting how the written word may have influenced the development of military practice in that period. While emphasising

that success depended on a commander's ability to outwit the enemy with a carefully selected, well-trained and disciplined army, the De Re Militari inspired other unexpected developments, such as that of the 'national' army, and helped create a context in which the role of the soldier assumed greater social and political importance. Allmand explores the significance of the text and the changes it brought for those who accepted the implications of its central messages.
