This paper is a response to discussions of digitization at meetings of the National Humanities Alliance (NHA). NHA asked the Council on Library and Information Resources (CLIR) to evaluate the experiences of cultural institutions with digitization projects to date and to summarize what has been learned about the advantages and disadvantages of digitizing culturally significant materials. Findings revealed that digitization often raises expectations of benefits, cost reductions, and efficiencies that can be illusory and, if not viewed realistically, have the potential to put at risk the collections and services libraries have provided for decades. One such false expectation--that digital conversion has already or will shortly replace microfilming as the preferred medium for preservation reformatting--could result in irreversible losses of information. This paper defines digital information; identifies weaknesses of digitization as a preservation treatment; discusses the benefits and drawbacks of digital technology for access; and highlights issues institutions must consider in contemplating a digital conversion project. Written with elegance, warmth, and humor, this highly original "teaching memoir" by William Zinsser—renowned bestselling author of On Writing Well gives you the tools to organize and recover your past, and the confidence to believe in your life narrative. His method is to take you on a memoir of his own: 13 chapters in which he recalls dramatic, amusing, and often surprising moments in his long and varied life as a writer, editor, teacher, and traveler. Along the way, Zinsser pauses to explain the technical decisions he made as he wrote about his life. They are the same decisions you'll have to make as you write about your own life: matters of selection, condensation, focus, attitude, voice, and tone.

Reviewed by genealogy blogger Anna Mathews: "Each chapter in Marian's book is filled with great tips from her many years of experience in taking these steps herself. She shares many resources and stories along the way, showing us by example that organizing isn't taking away precious time from research, it can actually help us in our research, leading to discoveries we might not otherwise make." Reviewed by genealogy blogger Wendy Mathias: "Marian provides a PROCESS for making sure our years of hard work and treasures from our ancestors don't end up in a landfill. I emphasize PROCESS because the book is not a collection of handy-dandy tips and tricks. With what Marian calls 'the PASS system,' the overwhelming job of getting our 'stuff' ready to pass on is made logical and manageable."

This puplication looks at how the digital age is affecting the field of history for both scholars and students. The book does not seek either to applaud or condemn digital technologies, but takes a more conceptual view of how the field of history is being changed by the digital age.
