*This work examines how the wealthy classes have contributed to growing inequality in society and explains how the quest to increase wealth has hindered the country's economic growth as well as its efforts to solve its most pressing economic problems. In it the author, a Nobel Prize-winning economist puts forth a forceful argument against America's vicious circle of growing inequality. America currently has the most inequality, and the least equality of opportunity, among the advanced countries. While market forces play a role in this stark picture, politics has shaped those market forces. Here the author exposes the efforts of well-heeled interests to compound their wealth in ways that have stifled true, dynamic capitalism. Along the way he examines the effect of inequality on our economy, our democracy, and our system of justice. He explains how inequality affects and is affected by every aspect of national policy, and offers a vision for a more just and prosperous future, supported by a concrete program to achieve that vision.*

In the course of evolution, a great variety of root systems have learned to overcome the many physical, biochemical and biological problems brought about by soil. This development has made them a fascinating object of scientific study. This volume gives an overview of how roots have adapted to the soil environment and which roles they play in the soil ecosystem. The text describes the form and function of roots, their temporal and spatial distribution, and their turnover rate in various ecosystems. Subsequently, a physiological background is provided for basic functions, such as carbon acquisition, water and solute movement, and for their responses to three major abiotic stresses, i.e. hard soil structure, drought and flooding. The volume concludes with the interactions of roots with other organisms of the complex soil ecosystem, including symbiosis, competition, and the function of roots as a food source.

*It's Blue Monster's first day at Monster Academy and Little Green Monster thinks it's really funny to call him rude names. Fat face! Jelly belly! Spotty botty! So how come no one else is laughing? This book helps children learn an important lesson as to why you shouldn't call names, as well as have fun mixing and matching the monster body parts.*

*While Laura Ingraham was walking through a Northern Virginia shopping mall one Saturday afternoon, it all became clear to her. Everywhere she turned, she saw signs of the impending disaster: zombie teens texting each other across a café table; a man having his eyebrows threaded at a kiosk; a fiftyish woman shoe-horned into a tube top and skinny jeans; and a storefront ad featuring a Victoria's Secret model spilling out of her push-up bra and into the faces of young passersby. Ingraham wondered to herself, "Is this it? Is this what our forefathers fought for? What my parents struggled for? I wonder if Victoria's Secret is still having that two-for-one sale?" A menacing force surrounds us. We see it, we feel it, we know it. The country we love is in grave peril. While politicians and "experts" prattle on about the debt crisis at home, and terrorism abroad, a more insidious homegrown threat is emerging. It endangers our future and undermines our present. The uncomfortable truth is: We have become our own worst enemy. The culture we have created is now turning on us. We're on the verge of drowning in our ignorance, arrogance, gluttony . . . can you believe there are only three shots of vanilla in a Caramel Macchiato?!? Now in an act of patriotic intervention the most-listened-to woman in talk radio casts her satirical eye upon all that ails American society. In this sharp-witted, comic romp, Laura Ingraham takes you on a guided tour through ten levels of our cultural hell. You know we're in trouble when . . . • Airplane seats shrink—just as the passengers expand. • Celebrity baby names go from the peculiar (Apple, Stetson, and Daisy Boo) to the pathetic (Bamboo, Blanket, and Bronx). • People meticulously tend their virtual crops on Farmville, while their children eat takeout. • "Breaking News" usually means it happened yesterday. • The weddings last longer than the marriages. • Facebook has become a verb and reading has become an ancient art form. Of Thee I Zing is cultural commentary too funny to ignore, igniting a national conversation long past due. America, your cultural recovery begins here.*

**Usually authors write introductions for their books, although they know that not many readers will read it. Despite this, authors insist on writing an introduction and no publisher will publish a book without one. I would like to inform my dear readers that I have spent almost all of the first quarter of my life in a village in the Nile Delta, 65 km north of Cairo. The everyday scenery there was the beautiful green landscape dissected with canals full of running water. All of these were bordered with the huge sycamore, mulberry and acacia trees. The desert was something unknown to me at that time, except for the very basic information given in geography books, which explained that the desert is a place without water or cultivation. Some of my ideas about the desert came to me from the stories in the history of Islam and the desert lands where Islam originated. My real attraction to the desert developed in the last year of my under graduate studies. This was during the field courses in Ecology (Prof. A.M.**
