In this newest coloring book by the author of the internationally bestselling *Fantastic Cities* (more than 400,000 copies in print), artist Steve McDonald uses his unique photo-based approach to create beautiful and intimately detailed line drawings of amazing collections of objects. Finding inspiration in the unusual (museum collections, antiques, and quirky toys) and the everyday (leaves, butterflies, vintage cameras, store product displays), McDonald creates playful and immersive illustrations that are as lovely as they are fun to color. The

quality of the large, crisp white pages are conducive to a range of applications, while a middle margin keeps all the artwork fully colorable. A dozen meditative mandalas created from the drawings round out this gorgeous adult coloring book.

To everything there is a season -- and in this, the time of the adult coloring book phenomenon, comes a seasonal celebration of mindfulness and creativity. And the pure joy of coloring in beautiful seasonal imagery. Color Your Year: A Changing Seasons Coloring Book is adapted from the very successful Color Your Year calendar line, with over 100,000 copies in print in only two years of publication. With their thoughtful -- and artful -- balance of very fine details and larger, graceful areas to color, these are images that have been extremely well received by fans. The quality of the paper also stands out: The stock is heavy, a perfect ground for colored pencils, crayons, and markers. And each image is printed on one side only, and perforated, so it can be removed and preserved if desired without disturbing another image. There are 46 exquisitely drawn images to color in, from spring flowers, bursting in bloom, to summer seashells and dragonflies, to the falling leaves and abundant harvests of autumn, to winter's crystalline beauty. Organized by season, with inspirational quotations throughout, each page is an invitation to unplug, pick up a pencil, and refresh both mind and spirit through the meditative act of coloring.

**A task a day to cure a broken heart. Esmé Peel is approaching thirty with some trepidation, but hope in her heart. If she can just get her long-term boyfriend Andrew to propose, she will have ticked everything off her 'things to do by the time you're 30' list. She didn't reckon on finding another woman's earring in her bed however, and soon she finds herself single, homeless and in need of a new plan. Her best friend Carys gives her the perfect present – The Single Girl's Calendar – which has a different cure for heartbreak every day: Day 1: Look and feel fabulous with a new hair style. Day 2: Step out of your comfort zone and try something new. Day 3: Reconnect with friends and enjoy! Despite thinking it's a bit of a gimmick, Esmé hasn't got any better ideas, so she puts the plan into action. By the end of week one she has four new male housemates, and despite a broken heart she is determined to show Andrew she can do more than survive, she can thrive.**

The Fall of a Great American City is the story of what is happening today in New York City and in many other cities across America. It is about how the crisis of affluence is now driving out everything we love most about cities: small shops, decent restaurants, public space, street life, affordable apartments, responsive government, beauty, idiosyncrasy, each other. This is the story of how we came to lose so much—how the places we love most were turned over to land bankers, billionaires, the worst people in the world, and criminal landlords—and how we can - and must - begin to take them back. Co-published with Harper's Magazine, where an earlier version of this essay was originally published in 2018. As New York City approaches the third decade of the twenty-first century, it is in imminent danger of becoming something it has never been before: unremarkable. By unremarkable I don't just mean periodic, slump-in-the-art-world, all-the-bands-suck, cinema-is-dead boring. I mean flatlining. No longer a significant cultural entity but a blank white screen of mere existence. I mean The-World's-Largest-Gated-Community-with-a-few-cupcake-shops. For the first-time in our history, creative-

**youngpeople- will-no-longer want-to-come-here boring. Even, New-York-is-over boring. Or worse, New York is like everywhere else. Unremarkable. This is not some new phenomenon, but a cancer that's been metastasizing on the city for decades now. Even worse, it's not something that anyone wants, except the landlords, and not even all of them. What's happening to New York now—what's already happened to most of Manhattan, its core, and what is happening in every American city of means, Boston, Washington, San Francisco, Seattle, you name it—is something that almost nobody wants, but everybody gets. As such, the current urban crisis exemplifies our wider crisis: an America where we believe that we no longer have any ability to control the systems we live under.**

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

*Cities are one of the most significant contributors to global climate change. The rapid speed at which urban centers use large amounts of resources adds to the global crisis and can lead to extreme local heat. The Urban Fix addresses how urban design, planning and policies can counter the threats of climate change, urban heat islands and overpopulation, helping cities take full advantage of their inherent advantages and new technologies to catalyze social, cultural and physical solutions to combat the epic, unprecedented challenges humanity faces. The book fills a conspicuous void in the international dialogue on climate change and heat islands by examining both the environmental benefits in developed countries and the population benefit in developing countries. Urban heat islands can be addressed in incremental, manageable steps, such as planting trees and painting roofs white, which provide a more concrete and proactive sense of progress for policymakers and practitioners. This book is invaluable to anyone searching for a better understanding of the impact of resilient cities in the monumental and urgent fight against climate change, and provides the tools to do so.*

When the people of Flint, Michigan, turned on their faucets in April 2014, the water pouring out was poisoned with lead

and other toxins. Through a series of disastrous decisions, the state government had switched the city ' s water supply to a source that corroded Flint ' s aging lead pipes.

Complaints about the foul-smelling water were dismissed: the residents of Flint, mostly poor and African American, were not seen as credible, even in matters of their own lives. It took eighteen months of activism by city residents and a band of dogged outsiders to force the state to admit that the water was poisonous. By that time, twelve people had died and Flint ' s children had suffered irreparable harm. The long battle for accountability and a humane response to this man-made disaster has only just begun. In the first full account of this American tragedy, Anna Clark's *The Poisoned City* recounts the gripping story of Flint ' s poisoned water through the people who caused it, suffered from it, and exposed it. It is a chronicle of one town, but could also be about any American city, all made precarious by the neglect of infrastructure and the erosion of democratic decision making. Places like Flint are set up to fail—and for the people who live and work in them, the consequences can be fatal.
