The creation story has been hijacked. The subtle deceptions of the Serpent have caused skeptics and even believers to look upon the opening chapters of Genesis with a cynical eye. As a result many believe that Earth is a cosmic accident and that humanity is merely a product of time, matter and chance. However, Derrick McCarson counters the critics of the Bible with powerful new evidence from the world of astronomy, microbiology and physics which all point to the undeniable fact that we are here by Divine design. In Origins you will be challenged with fascinating information that confirms Genesis 1:1 and following. Content Includes: • Deep space discoveries which reveal • the first moments of creation • Wonders of the universe which point to a super-intelligent Creator • The reason why evil and suffering entered the world • DNA—the language of God • The amazing ingenuity of Noah ' s Ark A Dissertation Upon Worships, Legends and Divinities in Central and Western Asia, Europe, and Elsewhere, Before the Christian Era. Have you ever wondered where the Universe came from? Did it come from a big bang billions of years ago or did an Intelligence far beyond our own create it? If the Universe was created then why was it created and what's its purpose? What's man's purpose, where did we come from, did we evolve from primordial ooze, or were we created in the likeness of that same intelligence? Did this intelligence, this God, always exist? Where did he come from, how did he come into existence? Why would this God, this spirit, have the likeness of a man with arms, legs, and feet? Answers to these questions have eluded mankind since the dawn of time. Many theories have attempted to answer them but there are always flaws. Questions still remain. Questions such as, where did the matter and energy of this big bang come from, how could it just happen to be there? I believe that hidden deep in the pages of the Bible lay the answers to all of these questions, and for thousands of years no one has realized it nor been able to put it all together. However, after seven years of research I believe that this book can answer all of the above questions without leaving any loose ends. I believe that contained within the pages of this book lay the answers to all of mankind's deepest questions. Answers to questions such as, where did God come from, why was the Universe created, what is mankind's purpose, and the age-old question, which came first, the chicken or the egg? This little book can also tell you where we as a civilization are headed and what our ultimate fate will be, all from the Bible.

Despite the growing interest in olive oil, most people know very little about what it is or how it is made. This book provides a comprehensive treatment of olive oil from the tree to table, from a molecular and personal perspective. Growers often do not know what is happening at a molecular level or why certain practices produce superior or inferior results, for example, why adjusting a temperature rewards them with winning oils. This book aims to provide some of the answers as well as the importance of the chemicals responsible for the flavour and health effects. Readers will also get a deeper understanding of what makes an extra virgin olive oil authentic and how scientists are helping to fight fraud regarding this valuable commodity. Including anecdotes from growers of olives and producers of oils, the authors provide an accessible text for a wide audience from food science students to readers interested in the human story of olive oil production.

Arianism started as a movement in the 3rd century AD, maintaining that Jesus was less divine than God. Traditionally regarded as the archetypal Christian heresy, it was condemned in the famous Nicene Creed.

Human Interaction with the Divine, the Sacred, and the Deceased brings together cutting-edge empirical and theoretical contributions from scholars in fields including

psychology, theology, ethics, neuroscience, medicine, and philosophy, to examine how and why humans engage in, or even seek spiritual experiences and connection with the

immaterial world. In this richly interdisciplinary volume, Plante and Schwartz recognize

human interaction with the divine and departed as a cross-cultural and historical universal that continues to concern diverse disciplines. Accounting for variances in belief and human perception and use, the book is divided into four major sections: personal experience; theological consideration; medical, technological, and scientific considerations; and psychological considerations with chapters addressing phenomena including prayer, reincarnation, sensed presence, and divine revelations. Featuring scholars specializing in theology, psychology, medicine, neuroscience, and ethics, this book provides a thoughtful, compelling, evidence-based, and contemporary approach to gain a grounded perspective on current understandings of human interaction with the divine, the sacred, and the deceased. Of interest to believers, questioners, and unbelievers alike, this volume will be key reading for researchers, scholars, and academics engaged in the fields of religion and psychology, social psychology, behavioral neuroscience, and health psychology. Readers with a broader interest in spiritualism, religious and non-religious movements will also find the text of interest.

Can an outrageously immoral man or a scandalous woman teach morality or lead people to virtue? Does personal fallibility devalue one's words and deeds? Is it possible to separate the private from the public, to segregate individual failing from official function? Chaucer addressed these perennial issues through two problematic authority figures, the Pardoner and the Wife of Bath. The Pardoner dares to assume official roles to which he has no legal claim and for which he is quite unsuited. We are faced with the shocking consequences of the belief, standard for the time, that immorality is not necessarily a bar to effective ministry. Even more subversively, the Wife of Bath, who represents one of the most despised stereotypes in medieval literature, the sexually rapacious widow, dispenses wisdom of the highest order. This innovative book places these "fallible authors" within the full intellectual context that gave them meaning. Alastair Minnis magisterially examines the impact of Aristotelian thought on preaching theory, the controversial practice of granting indulgences, religious and medical categorizations of deviant bodies, theological attempts to rationalize sex within marriage, Wycliffite doctrine that made authority dependent on individual grace and raised the specter of Donatism, and heretical speculation concerning the possibility of female teachers. Chaucer's Pardoner and Wife of Bath are revealed as interconnected aspects of a single radical experiment wherein the relationship between objective authority and subjective fallibility is confronted as never before.

"Wrestling the Angel, Vol. I is the first in a two part study of the foundations of Mormon thought and practice, situated in the context of an overview of the Christian tradition. The book traces the essential contours of Mormon thought as it developed from Joseph Smith to the present. Terryl L. Givens, one of the nation's foremost Mormon scholars, offers a sweeping account of the history of Mormon belief, revealing that Mormonism is a tradition still very much in the process of formation."--Provided by the publisher.
