***A nation's capability of self-sustainability is seen as the foremost marker for it to be considered a developed nation. Its self-sufficiency in agriculture, economy, health and education facilities for its citizens builds its sustainability. An ideal nation should be able to fulfil the basic needs for each of its citizen on its own. To achieve this level of self-sufficiency was one of India's former President Dr. A.P.J. Abdul Kalam's major aspirations for the country. Creating A Livable Planet is a volume especially compiled with an aim to preserve and spread Dr. Kalam's enlightening and informative ideas on the usage of right technology to benefit and improve India's agriculture, economy, atmosphere and health of citizens. region as well as non-native authors, and reflects the rich folklore and traditional culture of the subcontinent, its checkered history, and modern challenges. Reversing his parents' immigrant path, a young American-born writer returns to India and discovers an old country making itself new. Anand Giridharadas sensed something was afoot as his plane from America prepared to land in Bombay. An elderly passenger looked at him and said, "We're all trying to go that way," pointing to the rear. "You, you're going this way?" Giridharadas was returning to the land of his ancestors, amid an unlikely economic boom. But he was interested less in its gold rush than in its cultural upheaval, as a new generation has sought to reconcile old traditions and customs with new ambitions and dreams. In *India Calling*, Giridharadas brings to life the people and the dilemmas of India today, through the prism of his émigré family history and his childhood memories of India. He introduces us to entrepreneurs, radicals, industrialists, and religious seekers, but, most of all, to Indian families. He shows how parents and children, husbands and wives, cousins and siblings are reinventing relationships, bending the meaning of Indianness, and enduring the pangs of the old birthing the new. Through their stories, and his own, he

language Indian Children's Literature explores an emerging body of work that has thus far garnered little serious critical attention. Superle critically examines the ways Indian children's writers have represented childhood in relation to the Indian nation, Indian cultural identity, and Indian girlhood. From a framework of postcolonial and feminist theories, children's novels published between 1988 and 2008 in India are compared with those from the United Kingdom and North America from the same period, considering the differing ideologies and the current textual constructions of childhood at play in each. Broadly, Superle contends that over the past twenty years an aspirational view of childhood has developed in this literature—a view that positions children as powerful participants in the project of enabling positive social transformation. Her main argument, formed after recognizing several overarching thematic and structural patterns in more than one hundred texts, is that the novels comprise an aspirational literature with a transformative agenda: they imagine apparently empowered child characters who perform in diverse ways in the process of successfully creating and shaping the ideal Indian nation, their own well-adjusted bicultural identities in the diaspora, and/or their own empowered girlhoods. Michelle Superle is a Professor in the department of Communications at Okanagan College. She has taught children's literature, composition, and creative writing courses at various Canadian universities and has published articles in *Papers* and *IRCL*.

Teaching Young Children: Choices In Theory And

*Post-colonial and post-partition South Asia, one of the fastest-growing and yet one of the least integrated regions of the world, is marked by both optimism and pessimism. This intriguing dichotomy of strength and weakness, security and insecurity, hope and fear, connections and disconnects underpins South Asia's regionalism conundrum and gives birth to borders and boundaries - both material and mental - with a complex territoriality. The Janus-faced nature of South Asian borderlands - the inward nationalizing impulses entangled with the outward regional frontier-orientations - is a stark reminder that*

*history of mobility in this eco-geographical region is much older than the history of territoriality and colonial cartography and ethnography. This collection of meticulously researched, theoretically informed, case studies from South Asia provides useful insights into bordering, ordering and othering narratives as practices and performances that are intricately entangled with identity politics and security discourses. It shows how a sharper focus on subterranean subregionalism(s), border communities, popular geopolitics of enmity, and transborder challenges to sustainability, could open up spaces for new multiple (re)imaginings of borders at diverse scales and sights including sub-urban neighbourhoods, school textbooks/cinema and trans-border conservation initiatives. The chapters in this edited volume have been contributed by both renowned as well as young emerging scholars, looking into the borders and boundaries in South Asia. Each chapter offers new perspectives and insights into themes like trans-Himalayan borderlands, India-*

Presents the life and accomplishments of the Indian statesman and peacemaker, from his early life in British-controlled India to his nonviolent actions to achieve the nation's independence.

Dr. Kalam was born and brought up in a multi-religious, multi-ethnic community, and this type of milieu had a profound effect on his personality. He gave equal respect to all faiths and religions; and he did not pay only lip-service to different religions. During his life, he visited the saints and seers of all faiths, discussed with them and learnt from them. He learnt what divinity and spirituality actually meant, and brought out a blended form. For him, religion is a connecting thread. He was quite at ease when he

In this book, we have made a solemn endeavour to read his mind, how he thought at every turn of his life; and this will help the readers to understand the intricacies of his thinking and how he was guided for a mission in his life. To understand him well, we have also narrated a number of incidents, accidents and events of his life, that would contribute to holistic understanding about him. He took up the challenges and worked on them wholeheartedly; whenever he failed, he overcame his negativity and came out a stronger man than ever. This is the beauty of his character, and this makes him one of the most popular public figures of all times. May his soul rest in peace! —K. Senthil Kumar, IAS

*Sierra Leone is in her final phase of a Post-civil War rebuilding after twelve years of what has been dubbed one of the most devastating civil conflicts in Modern African History. Since the advent and end of the conflict a lot has been written in the forms of documentaries, reportages, commentaries, satires and academic textbooks by journalists, academics, politicians, former heads of state and political analysts. However, this book- 'A New Perspective On Governance, Leadership, Conflict and Nation Building in Sierra Leone.', is different. It presents a new outlook in the sense that it is incisive, analytical, honest, educative and thought-provoking at the same time. The key message that runs through the veins of the theme is state renewal informed by new thinking spectacles that*

*efficiently configure the manner in which the management of state leadership and governance is articulated for the benefits of the common good. The author, Solomon E. Berewa was one of the key actors- Chief Government Negotiator and stakeholder of the peace deals in his capacity as Minister of Justice and Attorney General and Vice President of the Republic of Sierra Leone. He has written this masterpiece authoritatively by throwing fresh lights on the serious political issues and questions which have blurred the significance of the past and the present. Like any sincere agent of nation building, after a traumatic experience such as the one Sierra Leone went through, the rationale of the author is to build bridges across the board, political spectrums. In his estimation, it is only by looking into the past with open mind and sincerity, learn tangible lessons and act on them meticulously, that nations can be in position to surmount current challenges for the good and durability of a better tomorrow. Post-war Sierra Leone needs to have faith in this philosophy and crown it as the cornerstone in this crucial period of political and socio-economic renewal.*

This book presents early childhood students and staff with a broad and diverse range of teaching techniques to support children's learning. It examines 26 techniques ranging from simple ones, such as describing and listening, to more complex methods, such as deconstruction and scaffolding. The strategies selected are derived from the best current research knowledge about how young children learn. A detailed evaluation of each strategy enables childcare staff, early childhood teachers and students to expand their repertoire of teaching strategies and to critically evaluate their own teaching in early childhood settings. Vignettes and examples show how early childhood staff use the techniques to support children's learning and help to bring the discussion of each technique to life. Revised and updated in light of the latest research, new features include: \* Coverage of the phonics debate \* Addition of ICT content \* Questions for further discussion \* Revision to the chapter on problem solving \* Updated referencing throughout

the early twenty-first century. In this book, research leaders John Harriss, Craig Jeffrey and Trent Brown explore in depth the economic, social, and political changes occurring in India today, and their implications for the people of India and the world. Each of the book's fourteen chapters seeks to answer a key question: Is India's democracy under threat? Can India's Growth be sustained? How are youth changing India? Drawing on a wealth of scholarly and popular material as well as their own experience researching the country during this period of major transformation, the authors draw the reader into key debates about economic growth, poverty, environmental justice, the character of Indian democracy, rights and social movements, gender, caste, education, and foreign policy. India, they conclude, has undergone some extraordinary and positive changes since the early 1990s but deeply worrying threats remain: increasing authoritarianism, growing inequality, entrenched poverty, and environmental vulnerability. How India responds to these crucial challenges will shape the world's largest democracy for years to come.
