It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. For the criminal justice system to work, adequate resources must be available for police, prosecutors

and public defense. This timely, incisive and important book by Professor Norman Lefstein looks carefully at one leg of the justice system's "three-legged stool" public defense and the chronic overload of cases faced by public defenders and other lawyers who represent the indigent.

Fortunately, the publication does far more than bemoan the current lack of adequate funding, staffing and other difficulties faced by public defense systems in the U.S. and offers concrete suggestions for dealing with these serious issues.

As one of the 'learned' professions requiring advanced learning and high principles, law enjoys a special standing in society. In return for its status and rank, the legal profession is expected to exhibit the highest levels of honesty, trust and morality, the very values which underpin the legal system itself. This, in turn, entrusts to legal education a particular problem of addressing, not only the substantive elements of the body of law, but a means through which the characteristics of the 'calling' of law are imparted and instilled. At a time when the very

essence of the legal profession is under threat, this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry; character over eloquence; and calling over skill. Chapters are grouped around the core content and key themes of Curiosity, Calling, Character and Conscientiousness, Contract, and Culture. The volume includes contributions from leading experts, drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues, providing insight, and provoking debate.

This long-established legislation handbook provides annotated commentary and clarification on the legal and practical implications of the latest insolvency legislation. It is the standard work for accountants, lawyers and government officers dealing with insolvency.

This book focuses on the rules regulating property and conveyancing which apply in the territory and is intended for use by the non-lawyer. The organizational structure and concise text

reflect this goal. For readers desiring additional information, an extensive notes section provides more comprehensive and detailed explanations as well as Chinese translations of key legal terms. As a survey, this text is appropriate for students of law, non-law professionals who need an overview of the subject, and general readers.

Media and Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industry both in terms of its practical application and its theoretical framework. It provides a clear, current and comprehensive account of this exciting subject. Fully updated and revised, this second edition is one of the first texts to contain a full analysis of the Leveson Inquiry and the implications for our press and media that are arising from it. The new edition contains; a new chapter analysing the Defamation Act 2013; the Digital Economy Act 2010 which aimed to toughen up against copyright infringement online and has been subject to parliamentary review since coming into power; and the liability of internet service providers, including recent cases such as Tamiz vs Google 2012, which goes some way to define the extent to which an ISP may or may not be found liable for their bloggers content. With integrated coverage of Scots and Northern Irish law, Media and Entertainment Law also highlights comparisons with similar overseas jurisdictions, such as with the liability of ISPs where there are differences in both US and European law, in order to help students demonstrate an awareness of media laws, which may then influence UK legislation. Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social networking sites, this text provides detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such

*as OFCOM and the new regulator for the UK's newspapers and magazines (and online editions), the Independent Press Standards Organisation (Ipsa). The text also provides the most comprehensive and up to date coverage of the law relating to Intellectual Property law for the entertainment industry with recent changes in EU law relating to performers' rights. 'Reorganization and Resistance' analyses the ways in which the legal professions of nine countries (England, France, the Netherlands, Germany, Canada, the US, Mexico, Australia and Korea) and one continent (South America) have confronted the internal and external political, economic and social upheavals of the past twenty years. It documents how change and resistance are inextricably tied together in an oppositional tension where the greater weight shifts gradually from one to the other, even shifts backwards at times, but in the long view runs in the direction of change. The most obvious instance almost everywhere is the struggle of women in legal professions where improvement is undeniable even as resistance is varied and stiff. The book charts the way

demographic shifts have changed the work of lawyers, the way that the revenue from law practice has been re-distributed, and the extent to which barriers based on race, class, religion and gender have shrunk or shifted. It describes how some professions have been forced by government or co-regulation with government to reorganize. It also documents how others have not kept pace with transformations in the economy and changes and challenges to legal education take center stage while demographic shifts and institutional reorganization are of much less importance.

It is a myth that either of the World Wars liberated women. The Sex Disqualification (Removal) Act of 1919 was one of the most significant pieces of legislation in modern Britain. It marked at once political watershed and a social revolution; the point at which women of 21 and over were recognised in law as being as competent as men. But were they? What actually happened when this bill was passed? This is the story of what happened next. Ladies Can't Climb Ladders focuses on the lives of six women - six pioneers - forging paths in the fields of medicine, law, academia, architecture, engineering and the church. Robinson's startling study into the public and private lives of these women sheds light not on the desires and ambitions of her subjects but how family and society responded to the working woman and what their legacy looks like today. This book is written in their honour. It is a book about live subjects: equal opportunity, the gender pay gap, and whether women can expect, or indeed deserve, to have it at all. 'An important and crackingly good read.' -

This book examines quality teaching in professional education in the fields of engineering and international knowledge structures. The second of a two-volume series, the editors and contributors structure the book around case studies which highlight the elements constituting good practice within professional education. While there is no one specific route to prepare well-qualified professionals, this volume explores the decisions the academics responsible for delivering this education make to ensure quality curricula. Ultimately, the key to effective preparations rests with the value employers place on the focus, emphasis and balance between the academic and practical in relation to their own expectations for skills that graduates must have. The second volume in this collection will appeal to students and scholars of professional pedagogy, and engineering pedagogy more specifically.

This book examines access to justice in summary criminal proceedings by considering the ability of defendants to play an active and effective role in the process. 'Access to justice' refers not just to the availability of legally aided representation, but also to the ability of defendants to understand and effectively participate in summary criminal proceedings more generally. It remains a vital principle of justice that justice should not only be

done, but should also be seen to be done by all participants in the process. The book is based on socio-legal research. The study is ethnographic, based on observation conducted in four magistrates' courts in South East England and interviews with both defence lawyers and Crown prosecutors. Setting out an argument that defendants have always been marginalised through particular features of magistrates' court proceedings (such as courtroom layout and patterns of behaviour among the professional workgroups in court), the political climate in relation to defendants and access to justice that has persisted since 2010 has further undermined the ability of defendants to play an active role in the process. Ultimately, this book argues that recent governments have demanded ever more efficiency and cost saving in criminal justice. In that context, principles that contribute to access to justice for defendants have been seriously undermined.
