*The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy has been one of constant tension between mystification and demystification.*

This introductory book contains sufficient theory to lay the foundation for higher speeds.

African-American architects have been designing and building houses and public buildings since 1865. Although many of these structures survive today, the architects themselves are virtually unknown. This unique reference work brings their lives and work to light for the first time. Written by 100 experts ranging from architectural historians to archivists, this book contains 160 biographical, A-Z entries on African-American architects from the era of Emancipation to the end of World War II. Articles provide biographical facts about each architect, and commentary on his or her work. Practical and accessible, this reference is complemented by over 200 photographs and includes an appendix containing a list of buildings by geographic location and by architect.

Mobile Museums presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines – including the history of science, museum anthropology and postcolonial history - to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement.

Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By foregrounding questions of circulation, the chapters in Mobile Museums collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global,

with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today. Praise for Mobile Museums 'This book advances a paradigm shift in studies of museums and collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge – and have implications for the remobilisation of museums in the future.' – Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' – Arthur MacGregor

Have you ever opened up an economics textbook and looked for a definition of money? Chances are you haven't but if you have chances are you didn't find the definition. Introductory economics texts, and even advanced economics text, do a remarkably dismal job of revealing the nature of money. The closest the common man gets to a proper definition of money is that it is a medium of exchange, but a medium for exchanging what? To add to the problem, consider the fact that money is just pretty colored paper with no intrinsic value. It only becomes valuable because we (i.e. humans) give it value. But how do we give money value? Is it economics, politics, or black magic? The global economy is teetering on the brink of collapse and even the uber wealth admit it is true (as this Youtube interview demonstrates). Find out the truth about the nature of money and find out why debt and the easy way money can be accumulated is behind the growing crises of today. Find out what you need to know, and what we all need to do, to stave off global catastrophe. Discover the truth, save the world. "Read the Rocket Scientists Guide to Money and the Economy: Accumulation and Debt." Speedwriting for Notetaking and Study Skills offers an easy abbreviated writing system which helps students improve performance in notetaking, library skills, preparation of research papers, and minutes of meetings. Students learn to use letters of the alphabet, abbreviations, and other shortcuts to write faster. They also learn to be selective in what to put down, doing so in a useful format. The text also provides important aids to studying and reviewing effectively.
