

Healing Fiction: On Freud, Jung, Adler

Unfolding the Unconscious Psyche is a study of the creative arts and depth psychology, and the threads that run between the two. Edward Applebaum begins with works of art, in media including painting, music, literature and film, and pursues aspects of each towards an understanding of the unconscious psyche of the creator. By combining a study of the artistic work with the insight of depth psychology, Applebaum opens a dialogue between studies of works of art and their creators and the individuals who form the work’s audience. Each discussion is dictated by the artwork itself and is viewed from a variety of perspectives. Throughout the book the reader is encouraged to develop their own analytical technique: to follow the clues available, link threads together and analyse what they can see. The result demonstrates the value of dialogue in blending depth psychology with the arts, through examination of work by artists including Georgia O’Keefe, Ingmar Bergman, Frida Kahlo, Gustav Mahler and Virginia Woolf. Applebaum also seeks to correct misconceptions about the arts that have filtered into the study and practice of depth psychology since the earliest writings of Freud and Jung. This uniquely creative and insightful work will be absorbing reading for analytical and depth psychologists, students of analytical psychology, academics and scholars of the arts and anyone with an interest in the application of Jungian ideas.

For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics—the multidimensionality, immateriality, and non-locality of the unified field of energy and information—as a virtual reality. As a result, a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails. Exploring the Collective Unconscious in a Digital Age investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape. This book presents the idea that if the digital media-sphere proves to be structurally and functionally analogous to a dreamscape, the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science. This pivotal research-based publication is ideally designed for use by psychologists, theorists, researchers, and graduate-level students studying human cognition and the influence of the digital media revolution.

How can controversy promote mutual respect in analytical psychology? Analytical psychology is a broad church, and influences areas such as literature, cultural studies, and religion. However, in common with psychoanalysis, there are many different schools of thought and practice which have resulted in divisions within the field. Controversies in Analytical Psychology picks up on these and explores many of the most hotly contested issues in its and around analytical psychology. A group of leading international Jungian authors have contributed papers from contrasting perspectives on a series of key controversies. Some of these concern clinical issues such as what helps patients get better, or how closely analysts should work with the transference. Other contributions focus on the relationship between analytical psychology and other disciplines including evolutionary theory, linguistics, politics and religion. A critical eye is cast over Jungian theories and practices, and a number of questions are raised: ‘are they homophobic?’ ‘do they denigrate women?’ ‘do they confuse absolute with narrative truth?’ ‘are the frequency of sessions chosen for political rather than clinical reasons?’ Controversies in Analytical Psychology encourages critical thinking on a variety of issues, helping foster dialogue and investigation in a climate of mutual respect and understanding. It will be invaluable for Jungian analysts and psychoanalysts in training and practice and psychotherapists.

C.G. Jung and Literary Theory remedies a significant omission in literary studies by doing for Jung and poststructuralist literary theories what has been achieved for Freud and Lacan. Offering radically new Jungian theories of deconstruction, feminism, the body, sexuality, spirituality, postcolonialism, reader-response, the book also investigates the controversial occult and fascist heritage of Jung. By using the work of Derrida, Kristeva and Irigaray and examining Jungian fiction, this book transforms modern literary theory in ways which simultaneously critique Jung’s work.

Essays Toward a Poetics of Death

Emotional Tyranny and the Myth of Psychological Healing

This fascinating and accessible book offers a comprehensive overview of dream interpretation theory and modern dream science, presenting an argument for dreamwork as a means to better understand emotional challenges and achieve personal growth. Bridging the gap between cognitive-behavioral therapies, psychoanalysis and depth psychology, the book explores topics like lucid dreams, end-of-life dreams, cross-cultural dream analysis and Freudian and Jungian models of dream interpretation. The authors offer a new model for better understanding dreams based on symbol formation, narrative structure and current neurophysiology, with the aim of reinvigorating the way we value dreams and their importance to individuals and society. The Wisdom of Dreams can be of great interest to analysts and therapists, including psychiatrists, psychologists, sleep researchers, social workers and counselors, as well as anyone interested in working with their dreams for greater personal clarity and self-understanding.

"Extracted from Freud and psychoanalysis, volume 4 of the Collected works of C.G. Jung, pages 83-226"--T.p. verso.

This book, written in the genre of "Imaginal Psychology", presents the imaginal dimension of the mourning process. The "angels" it greets are the interior figures who greet the bereaved during the course of their mourning process. In memory, reverie, and dream, images of the dead return to heal and be healed. As the bereaved enter into relationship with these images, the grief in which they are sequestered is particularized and individualized into the precise nuances of significance which make mourning possible.

This ground-breaking and highly controversial book, Jeffrey Mousssaief Masson attacks the very foundations of modern psychotherapy from Freud to Jung, from Fritz Perls to Carl Rodgers. With passion and clarity, Against Therapy addresses the profession's core weaknesses, contending that, since therapy's aim is to change people, and this is achieved according to therapist's own notions and prejudices, the psychological process is necessarily corrupt. With a foreword by the eminent British psychologist Dorothy Rowe, this cogent and convincing book has shattering implications.

Man and His Symbols

Swiss-born Carl Gustav Jung (1875–1961) was one of the pioneers of psychology, largely responsible for the introduction of now-familiar psychological terms such as "introvert," "extrovert," and "collective unconscious." But in spite of this, Jung has often remained on the fringes of academic discourse. Seeking to understand Jung in view of not only his life, but also in light of his extensive reading and prolific writing, this new biography reclaims Jung as a major European thinker whose true significance has not been fully appreciated. Paul Bishop follows Jung from his early childhood to his years at the University of Basel and his close relationship—and eventual break—with Sigmund Freud. Exploring Jung's ideas, Bishop takes up the psychiatrist's suggestion that "the tragedies of Goethe's Faust and Nietzsche's Thus Spoke Zarathustra . . . mark the first glimmerings of a breakthrough of total experience in our Western hemisphere," engaging with Jung's scholarship to offer one of the fullest appreciations yet of his distinctive approach to culture. Bishop also considers the role that the Red Book, written between 1914 and 1930 but not published until 2009, played in the progression of Jung's thought, allowing Bishop to provide a new assessment of this divisive personality. Jung's attempt to synthesize the different parts of human life, Bishop argues, marks the man as one of the most important theorists of the twentieth century. Providing a compelling examination of the life of this highly influential figure, the concise and accessible Carl Jung will find a place on the shelves of students, scholars, and both clinical and amateur psychologists alike.

"West of the American Dream is a multifaceted account of the search. Christensen shares his feelings of culture shock in east-central Texas as he meets the cowboy version of the blue-collar Texan and his Mexican American neighbours. He introduces readers to the convoluted history of poetry in Texas, a tradition, started by women, that shifted from a focus on the land to the quotidian habits of urban living. Using a unique dissection of the public ritual of a poetry reading, Christensen assesses the origins of modern poetry, the value of imagination in modernist and postmodernist verse, and what Texas poets achieved and how their work evolved after World War II."--Jacket.

These days, we are ever more often confronted by overwhelming events. Searching for a way to understand them, we turn to mythic archetypes still present in our culture. The authors of these essays pose questions about the reliability of the archetypes found in tradition, history, and scattered mythologies. The essays in this collection deal with the presence of mythic time in modern speculative fiction, such as fantasy and alternate histories, and discuss major mythologemes and their functions in popular literature and extra-literary reality. The authors show how mythopoetic fiction becomes a (generally) modified mythic mirror in which we hope to see answers to vexing questions, or just a reality superior to the ordinary one. In the Mirror of the Past: Of Fantasy and History is a collection of seven essays by American and Polish authors, including Brian Atebery, Terri Doughy, and Marek Oziewicz, with Mircea Eliade's concept of "return from history to History" as their underlying theme.

Body, Mind and Healing After Jung

The Plural Turn in Jungian and Post-Jungian Studies

This book is Hillman's main analysis of analysis. He asks the basic question, "What does the soul want?" With insight and humor he answers, "It wants fictions that heal."

C. G. Jung has been and continues to be a pervasive yet often unacknowledged presence in twentieth-century art and intellectual life. This timely volume is the first comprehensive attempt to assess this presence and to demonstrate Jung's far-reaching cultural impact. The distinguished contributors represent a number of views, from traditional Jungian to the most contemporary post-Jungian stances, including feminist, non-Jungian, and anti-Jungian positions. Jung, as seen in this volume, addresses a wide range of contemporary issues related to creativity, gender, religion, popular culture, and hermeneutics. The essays reveal dimensions of his work that extend far beyond psychoanalytical theory and that show his hermeneutics to be a much more subtle and sophisticated methodology than previously allowed by his critics. This methodology appears, in fact, to have anticipated significant aspects of contemporary critical principles and practice. The contributors to the volume were among the participants in a major international conference sponsored by Hofstra University and the C. G. Jung Foundation of New York, held in 1986 at Hofstra University. They include Thomas Belmonte, Robert Bly, Joseph Campbell, Edward S. Casey, Stanley Diamond, Jean Erdman, Leslie Fiedler, James Hillman, Paul Kugler, Ibram Lassaw, Neil Levine, David L. Miller, Lucio Pozzi, Gilles Quispel, Robert Richenbourg, Carol Schreier Rupprecht, Andrew Samuels, Harold Schechter, and June Singer. Originally published in 1990, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Why do leading political figures arise when they do? Does sibling position determine political destiny? Originally published in 1992, a leading Jungian analyst at the time, Louis Stewart wrote an intriguing study of the influence of family and sibling position on the destiny of the individual and on the future of society. He shows how the four basic sibling positions are related to corresponding styles of political leadership, and uses examples of US presidents and UK prime ministers to illustrate his point. Stewart argues that world leaders owe their pre-eminence to a matching of political zeitgeist with sibling position within the family and he provides fascinating and persuasive material on major political figures, including Hitler, Saddam Hussein, Gorbachev, Stalin and Ghandi.

In Trauma and the Soul, Donald Kalsched continues the exploration he began in his first book, The Inner World of Trauma (1996)—this time going further into the mystical or spiritual moments that often occur around the intimacies of psychoanalytic work. Through extended clinical vignettes, including therapeutic dialogue and dreams, he shows how depth psychotherapy with trauma's survivors can open both analytic partners to "another world" of non-ordinary reality in which daimonic powers reside, both light and dark. This mytho-poetic world, he suggests, is not simply a defensive product of our struggle with the harsh realities of living as Freud suggested, but is an everlasting fact of human experience—a mystery that is often at the very center of the healing process, and yet at other times, strangely resists it. With these "two worlds" in focus, Kalsched explores a variety of themes as the builds, chapter by chapter, an integrated psycho-spiritual approach to trauma and its treatment including: Images of the lost soul-child in dreams and how this "lost soul" manifests itself in the waking world; the essential core of aliveness that is both protected and persecuted by the psyche's defenses; Dante's guided descent into the Inferno of Hell as a paradigm for the psychotherapy process and its inevitable struggle with self-destructive energies; childhood innocence and its central role in a person's spiritual life seen through the story of St. Exuper'y's The Little Prince; how clinical attention to implicit processes in the relational field, as well as discoveries in body-based affective neuroscience are making trauma treatment more effective; the life of C.G. Jung as it portrays his early trauma, his soul's retreat into an inner sanctuary, and his gradual recovery of wholeness through the integration of his divided self. This is a book that restores the mystery to psychoanalytic work. It tells stories of ordinary patients and ordinary psychotherapists who, through working together, glimpse the reality of the human soul and the depth of the spirit, and are changed by the experience. Trauma and the Soul will be of particular interest to practicing psychotherapists, psychoanalysts, analytical psychologists, and expressive arts therapists, including those with a "spiritual" orientation. Donald Kalsched is a Jungian analyst in private practice in Albuquerque, New Mexico, and a training analyst with the Inter-Regional Society of Jungian Analysts. He is the author of numerous articles in analytical psychology, and lectures widely on the subject of early trauma and its treatment. His books include The Inner World of Trauma (1996).

An Encounter With Texas

The Violence of Innocence

Against Therapy

Jung Contra Freud

Jung and the Unconscious Psyche

Routledge Library Editions: Jung

First published in 1967, the original blurb reads: This book is intended to give the intelligent lay reader a comprehensive view of the subject of psychotherapy, the treatment of nervous disorders by mental means. These disorders are of increasing importance on account of their wide-spread nature and of the misery they produce. It describes the development of psychotherapy as employed by the most primitive peoples and races, through animal magnetism and hypnotism to the more modern analytical schools of Freud, Jung and Adler. It sets out in particular to give the positive contributions of these various systems, although this does not preclude criticism of their weaknesses and more dubious theories. Dr Hadfield has had the widest experience, having treated psychoneurotic disorders for over fifty years, including the war neuroses in the two world wars, both in the Navy and in the Army; and, as Lecturer in the University of London in the subject for over forty years, he has had the opportunity to systematize the knowledge thus obtained. As a result of this experience he has come to conclusions as to the nature, causes and treatment of such disorders differing somewhat from those of the established Schools, and it is these findings which are given in the latter part of the book under the title, 'Direct Reductive Analysis'. The book will be useful to all those – teachers and parsons as well as medicals – who have to deal with human beings and their aberrations, and to them it is addressed.

This groundbreaking classic explores the necessity of connections between our life and soul and developing the main lines of the soul-making process. This collection of essays, written over a period of years, entertains the shared place of psyche and poetics. Dr. Slattery has explored the manner in which the psyche is poetic and how poetry is deeply psycho-mythical. Influenced in part by the archetypal psychologist James Hillman's idea of the "poetic basis of mind" that comprises the soul's foundation, Slattery's writing moves into the interactive field in which myth is the ground for both psyche and poetry. The essays develop a further understanding of what has been called mythopoesis, the fundamental myth-making and shaping capacity of the soul.

This unique book showcases the cutting-edge work of researchers in Jungian and post-Jungian studies, focusing on the advances being made at the University of Essex, UK, and operating as a Festschrift for Professor Andrew Samuels. The Plural Turn in Jungian and Post-Jungian Studies includes contributions from innovative authors who specialise in Jung but incorporate ideas from other psychoanalytic schools and from a range of disciplines. The book includes chapters which shed new light on concepts including alchemy, archetypes and individuation and which examine art, relationships and politics. It both honours the work of Andrew Samuels and sets the foundations of an 'Essex School' of Jungian studies. A wide-ranging collection, this book will be essential for academics and scholars of Jungian and post-Jungian studies. It will also be a key title for all readers with an interest in the work of Andrew Samuels.

Theory and Practice

Routledge Library Editions: Jung brings together as one set, or individual volumes, a series of previously out-of-print titles, originally published between 1927 and 1993. Covering a variety of areas this set reflects the continued interest in Jung and analytical psychology, showing how Jungian theory can have influence in many walks of life. It provides in one place a number of reference sources from a range of authors, showing the development of Jung's theories over time.

It is difficult to point to an aspect of Jungian psychology that does not touch on mind, body and healing in some way. In this book Ray Jones draws on the triad of body, mind and healing and (re)presents it as a domain of ongoing uncertainty within which Jung's answers stir up further questions. Contributors from both clinical and scholarly backgrounds offer a variety of cultural and historical perspectives. Areas of discussion include: the psychosomatic nature of patients' problems transference and counter-transference; a delicate balance between theory-centred and practice-oriented approaches Body, Mind and Healing After Jung is essential reading for all Jungians.

First published in 1990, James Hillman is one of the leading figures in archetypal psychology and one of the most creative minds in psychology. This anthology of his writings presents carefully selected, choice passages from many of his seminal essays and work on archetypal psychology. Fundamental themes in Hillman's thought form the chapters of the book: poetic basis of mind, psychological polytheism, dreams, love, therapy. The book is intended for the reader who wants an overview or introduction to his highly philosophy, alchemy and critical readings of Jung and Freud.

This work tracks Carl Jung's life and spiritual development as the embodiment of the way of the Tao. Jung was well acquainted with the body of Tao knowledge—in his later years he was close to and worked with Wilhelm, a translator of the I Ching. Rosen finds that Jung's life and his psychology reveal the Tao at work. His description of the natural world of the psyche is similar to the natural world as described by Taoists. The essence of both philosophies is that the integration of opposites, such as shadow/person or light/dark, is essential to the human condition.

Introduction to Psychotherapy

Modern Man in Search of a Soul is the perfect introduction to the theories and concepts of one of the most original and influential religious thinkers of the twentieth century. Lively and insightful, it covers all of his most significant themes, including man's need for a God and the mechanics of dream analysis. One of his most famous books, it perfectly captures the feelings of confusion that many sense today. Generation X might be a recent concept, but Jung spotted its forerunner over half a century ago. For anyone seeking meaning in today's world, Modern Man in Search of a Soul is a must.
From the inaugural class of the interdisciplinary program in the history of ideas, this unique collection follows a veridical trajectory to the frontiers of belief. Reeves' film becomes a conspiratorial caution drawing in a host of tragic players in the endgame of the Sixties. The Cornwall of Du Maurier's The Birds is ploughed to reveal the hidden psychic codes of our Blitz spirit. In a powerfully relevant occult rendering of a bruised Island, the myth of Churchill is dissected and re-animalised. New maps of hell are drawn by colliding the forensic vision of JG Ballard and Lovcraftian magic. Actors, witches and psychopaths maraud across a nightmare terrain of murderous herges and abandoned military bases; conflating creative research into a surreal documentary, history as hallucination. Geography becomes an alchemical alembic, a vale of soul-making distilled by the lysergic psychobiology of Stanislav Grof, the alcoholic lyricism of Malcolm Lowry, and the convulsive travolgues of the Marquis de Sade. If history is revealed as paranoid ritual, how do we escape its time traps to wild new imaginative geographies? The English Heretic collection is a darkly comical, urgently lyrical, mental escape hatch from the hells of our own making.

This book explores previously unexamined overlaps between the poetic imagination and the medical mind. It shows how appreciation of poetry can help us to engage with medicine in more intense ways based on 'defamiliarising' old habits and bringing poetic forms of 'close reading' to the clinic. Bleakley and Neilson carry out an extensive critical examination of the well-established practices of narrative medicine to show that non-narrative, lyrical poetry does different kind of work, previously unexamined, such as place eclipsing time. They articulate a groundbreaking 'lyrical medicine' that promotes aesthetic, ethical and political practices as well as noting the often-concealed metaphor cache of biomedicine. Demonstrating that ambiguity is a key resource in both poetry and medicine, the authors anatomise poetic and medical practices as forms of extended and situated cognition, grounded in close readings of singular contexts. They illustrate structural correspondences between poetic diction and clinical thinking, such as use of sound and metaphor. This provocative examination of the meaningful overlap between poetic and clinical work is an essential read for researchers and practitioners interested in extending the reach of medical and health humanities, narrative medicine, medical education and English literature.

The material realities that works of literary and visual art provide us are loosely the concern of these essays. Working methods are touched upon in some, as in my interviews with William Anastasi and Robert Kipriss. The intentionality of the artist, however, is never my concern, nor should it be of interest to the reader; the intentions cannot necessarily be derived from the work (as the New Critics reminded us long ago). Rather, to see and feel how the text or work of visual functions is our pleasant task. So we do not ask why, a dead-end question. How is the question that can lead to infinitely more rewarding discoveries.

Policy Implications of Evolutionary and Institutional Economics

West of the American Dream

Explores Jung's psychological concepts regarding the nature, function and importance of man's symbols as they appear on both the conscious and subconscious level

Rereads Jung in light of contemporary theoretical concerns, and offers a variety of examples of post-Jungian literary and cultural criticism.

In A Jungian Inquiry into the American Psyche: The Violence of Innocence, Ipek Burnett's penetrating cultural criticism enriched with psychoanalytical and Jungian insight offers a timely interrogation of national consciousness in the United States. Through evocative storytelling, Burnett unpacks the images and myths that run deep in the American psyche—from that of the New World, the city upon a hill, to the Manifest Destiny, the melting pot, and the pursuit of happiness. Against this backdrop, she investigates the vicious cycles of innocence and violence that have dominated American history and continue to reinforce systematic oppression in America, evident in racial and economic inequality, xenophobia, materialism, and more. Burnett's thought-provoking analysis exposes the ways in which psychological defenses such as historical amnesia, projection, denial, and dissociation work on a collective level, helping America avoid a confrontation with these violent truths of its past and present circumstances, and its national character. With its seamless multidisciplinary approach and revealing insight, this book will be of great interest to psychologists, scholars, and students of Jungian and post-Jungian thought, depth psychology, and cultural and American studies. Eloquent and accessible, it will engage readers who strive to be self-reflective, well-informed global citizens. .

This collection is inspired by the coming retirement of Professor Wolfram Elsner. It presents cutting-edge economic research relevant to economic policies and policy-making, placing a strong focus on innovative perspectives. In a changing world that has been shaken by economic, social, financial, and ecological crises, it becomes increasingly clear that new approaches to economics are needed for both theoretical and empirical research; for applied economics as well as policy advice. At this point, it seems necessary to develop new methods, to reconsider theoretical foundations and especially to take into account the theoretical alternatives that have been advocated within the field of economics for many years. This collection seeks to accomplish this by including institutionalist, evolutionary, complexity, and other innovative perspectives. It thereby creates a unique selection of methodological and empirical approaches ranging from game theory to economic dynamics to empirical and historical-theoretical analyses. The interested reader will find careful reconsiderations of the historical development of institutional and evolutionary theories, enlightening theoretical contributions, interdisciplinary ideas, as well as insightful applications. The collection serves to highlight the common ground and the synergies between the various approaches and thereby to contribute to an emerging coherent framework of alternative theories in economics. This book is of interest to those who study political economy, economic theory and philosophy, as well as economic policy.

The Essential James Hillman

The Way of Integrity

The Tao of Jung

Towards a Lyrical Medicine

Mervyn Peake has been acclaimed as an author of fantasy and as an illustrator, but as yet has received little attention from literary critics. This book is the first to analyse all of Peake's works of fiction, including his two picture story books and novella as well as the Gormenghast series and Mr Pye. Alice Mills pinpoints the fictional quirks that render Mervyn Peake such a memorable fantasy writer, examining his literary works from Jungian, Freudian, Kristevan and post-Jungian perspectives. Stuckness in the Fiction of Mervyn Peake will be of interest to fantasy and students of fantasy as a genre, as well as those exploring the psychoanalysis of literary texts.

Edited by Murray Stein and Thomas Arzt, the essays in the series Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions are geared to the recognition that the posthumous publication of The Red Book: Liber Novus by C. G. Jung in 2009 was a meaningful gift to our contemporary world. "To give birth to the ancient in a new time is creation," Jung inscribed in his Red Book. The essays in this volume continue what was begun in Volume 1 of Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions by further contextualizing The Red Book culturally and interpreting it for our time. It is significant that this long sequestered work was published during a period in human history marked by disruption, cultural disintegration, broken boundaries, and acute anxiety. The Red Book offers an antidote for this collective illness and can be seen as a link in the aurea catena, the "golden chain" of spiritual wisdom extending down through the ages from biblical times, ancient Greek philosophy, early Christian and Jewish Gnosis, and alchemy. The Red Book is itself a work of creation that gives birth to the old in a new time. This is the second volume of a three-volume series set up on a global und multicultural level and includes essays from the following distinguished Jungian analysts and scholars: - Murray Stein and Thomas Arzt Introduction - John Beebe The Way Cultural Attitudes are Developed in Jung's Red Book - An "interview" - Kate Burns Soul's Desire to become New Jung's Journey, Our Initiation - GRe Ching Aging with The Red Book - Al Collins Dreaming The Red Book Onward: What Do the Dead Seek Today? - Lionel Corbett The Red Book and the Tao - John Douley Jung, the Nothing and the All - Randy Fentel Trickster: His Apocalyptic Brother, and a World's Unmaking. An Archetypal Reading of Donald Trump - Noo Schwartz Feuerstein India in The Red Book Overtones and Undertones - Grazina Gudaitė Integrating Horizontal and Vertical Dimensions of Experience under Postmodern Conditions - Len Khiesgi The Red Book of C.G. Jung and Russian Thought - Gunter Langwiesler A Lesson in Peacemaking: The Mystery of Self-Sacrifice in The Red Book - Keiron Le Grice The Metamorphosis of the Gods: Archetypal Astrology and the Transformation of the God-Image in The Red Book - Ann Chia-Yi Li The Receptive and the Creative: Jung's Red Book for Our Time in Light of Daoist Alchemy - Romano Madera The Quest for Meaning after God's Death in an Era of Chaos - Joerg Rasche On Salome and the Emancipation of Woman in The Red Book - J.
