How to Be a Brilliant Teacher

Cofounder of Fast Company magazine and bestselling author of Mavericks at Work and Practically Radical shows how true business innovation can spring from the unlikeliest places. Far away from Silicon Valley, in familiar, traditional, even unglamorous fields, ordinary people are unleashing extraordinary advances that become amazing customers, energize employees, and create huge economic value. Their secret? They understand that the work of inventing the future doesn't just belong to geeks designing mobile apps and virtual-reality headsets, or to social-media entrepreneurs hoping to launch the next Facebook. Some of today's most compelling organizations are doing brilliant things in simple settings such as retail banks, office cleaning companies, department stores, small hospitals, and auto dealerships. William C. Taylor, cofounder of Fast Company and best-selling author of Practically Radical, traveled thousands of miles to visit these hotbeds of simple brilliance and unearth the principles and practices behind their success. He offers fascinating case studies and powerful lessons that you can apply to do ordinary things in extraordinary ways, regardless of your industry or profession. Consider, for instance, how... -Miami Beach's dazzling 1111 Lincoln Road reimaged the humble parking garage as a high-profile public space that hosts weddings, yoga classes, and celebrity gatherings. -USAA, the financial-services giant that provides soldiers and their families with insurance and banking products, inspires frontline employees to deliver legendary service by immersing them in military culture. -Pal's Sudden Service, a fast-food chain with a cult following, serves up burgers and fries with such speed and accuracy that companies from other industries pay to learn from its astonishing discipline. -Lincoln Electric, a manufacturer based in Euclid, Ohio, dominates its ultracompetitive markets with a fierce devotion to quality and productivity. But the key to its prosperity is a share-the-wealth model that gives everybody a sense of security and a piece of the action. It has maintained a strict no-layoff pledge since 1958. As Taylor writes: “The story of this book, its message for leaders who aim to do something important and build something great, is both simple and subversive: In a time of wrenching disruptions and exhilarating advances, of unrelenting turmoil and unlimited promise, the future is open to everybody. The thrill of breakthrough creativity and breakout performance . . . can be summoned in all sorts of industries and all walks of life, if leaders can reimagine what's possible in their fields.” Simply Brilliant shows you how.

The brilliant is always intelligent, but intelligence does not necessarily guarantee brilliancy. Only the people who use their intelligence smartly are able to make brilliant moves, which often brings about excellence, high grades, fast achievement, and positive social recognition. Memory Improvement Techniques is a combination of techniques by smart people to who became successful by tweaking simple activities and turning everything into productivity. Using these strategies, you don't need a high IQ to cultivate and manifest brilliancy in study or practice. All you need is to apply the strategies stated in the Memory Improvement Techniques book and you will be set for greater achievement through increased memory power. Written by Joshua Strachan, a world leading expert on mental brilliance, this book contains a step by step strategies for enhancing memory, improving smartness and also developing fast learning ability. Other things you are going to learn include... How to improve your social brilliance .Upgrading your mental coordination .How to remember fast .How to study effectively .Techniques to reduce the chances of forgetting things .How to be smarter among smart people .The memorization techniques that work Take the final step towards achieving the greater change, by employing strategies that actually work. How to be a Brilliant Mentor offers clear guidelines to enhance your mentoring, helping you to analyse your own practice and understand the complex and often ambiguous role of the mentor in school. Considering why you might become a mentor and what you can gain from the experience, it provides practical strategies and direct problem-solving to help you move promising trainees quickly beyond mere competence. It explores: collaborative working giving effective feedback emotional intelligence and developing and maintaining relationships dealing with critical incidents developing reflective practice what to do if relationships beak down the relationship between coaching and mentoring mentoring newly qualified teachers as well as trainees. Illustrated with the experiences of real trainees, How to be a Brilliant Mentor can be dipped into for innovative mentoring ideas or read from cover-to-cover as a short enjoyable course which will give you added confidence in your mentoring role. The book is a companion to How to be a Brilliant Trainee Teacher, also by Trevor Wright.

"Warning: Your career might be in danger of going off the rails. You probably have blind spots that are leaving you closer to the edge than you realize. Fortunately, Carter Cast has the solution. In this smart, engaging book he shows you how to avoid career derailment by becoming more self-aware, more agile, and more effective. This is the book you wish you had twenty years ago, which is why you should read it now." -- Daniel H. Pink, New York Times bestselling author of Drive and To Sell Is Human The Right -- and Wrong -- Stuff is a candid, unvarnished guide to the bumpy road to success. The shocking truth is that 98 percent of us have at least one career-derailment risk factor, and half to two-thirds actually go off the rails. And the reason why people get fired, demoted, or plateau is because they let the wrong stuff act out, not because they lack talent, energy, experience, or credentials. Carter Cast himself had all the right stuff for a brilliant career, when he was called into his boss's office and berated for being obstinate, resistant, and insubordinate. That defining moment led to a years-long effort to understand why he came so close to getting fired, and what it takes to build a successful career. His wide range of experiences as a rising, falling, and then rising star again at PepsiCo, an entrepreneur, the CEO of Walmart.com, and now a professor and venture capitalist enables him to identify the five archetypes found in every workplace. You'll recognize people you work with (maybe even yourself) in Captain Fantastic, the Solo Flyer, Version 1.0, the One-Trick Pony, and the Whirling Dervish, and, thanks to Cast's insights, they won't be able to trip up your future.

Many of us assume that our creative process is beyond our ability to influence, and pay attention to it only when it isn't working properly. For the most part, we go about our daily tasks and everything just "works." Until it doesn't. Adding to this lack of understanding is the rapidly accelerating pace of work. Each day we are face escalating expectations and a continual squeeze to do more with less. We are asked to produce an ever-increasing amount of brilliance in an ever-shrinking amount of time. There is an unspoken (or spoken) expectation that we'll be accessible 24/7, and as a result we frequently feel like we're "always on." Now business creativity expert Todd Henry explains how to unleash your creative potential. Whether you're a creative by trade or an "accidental creative," this book will help you quickly and effectively integrate new ideas into your daily life.

This "superb history" of artificial light traces the evolution of society—"invariably fascinating and often original. . . [it] amply lives up to its title" (Publishers Weekly, starred review). In Brilliant, Jane Brox explores humankind's ever-changing relationship to artificial light, from the stone lamps of the Pleistocene to the LEDs embedded in fabrics of the future. More than a survey of technological development, this sweeping history reveals how artificial light changed our world, and how those social and cultural changes in turn led to the pursuit of more ways of spreading, maintaining, and controlling light. Brox plumbs the class implications of light—who had it, who didn't—through the centuries when crude lamps and tall candles constricted waking hours. She identifies the need for light thrust us toward an environmental tipping point. Only decades later, gas street lights opened up the evening hours for leisure, which changed the ways we live and sleep and the world's ecosystems. Edison's bulbs produced a light that seemed to its users all but divorced from human effort or cost. And yet, as Brox's informative portrait of our current grid system shows, the cost is ever with us. Brilliant is infused with human voices, startling insights, and timely questions about how our future lives will be shaped by light

The Netherlands has been one of the world's most distinctive and sophisticated football cultures. From the birth of Total Football in the sixties, through two decades of World Cup near misses to the exiles who remake clubs like AC Milan, Barcelona, Arsenal and Chelsea in their own image, the Dutch have often been dazzlingly original and influential. The elements of their style (exquisite skills, adventurous attacking tactics, a unique blend of individual creativity and teamwork, weird patterns of self-destruction) reflect and embody the country's culture and history. This book lays bare the elegant, fractured soul of the Dutch Masters and the culture that spawned them by exploring and analysing its key ideas, institutions, personalities and history in the context of wider Dutch society.

A complete practical system for improving your memory with a unique journey map and 50 flash cards packed with tips, techniques and mind-expanding tests! In this highly original publishing package Dominic O'Brien reveals the secrets of mastering the art of memory and provides us with a basic tool kit for boosting our skills of memorization and recall. The kit consists of three components: a 88-page introduction to memory techniques that reveals the what, the why and the how of Dominic's proven methods; a pictorial memory journey map to be used in conjunction with the Journey Method, a basic and highly versatile memorization procedure that exploits the power of mental association to provide unforgettable cues for recall; and, lastly, a deck of 50 flash cards providing tips and techniques (and self-testing exercises) on one side, and, on the other, numbers and drawn objects to practise on, using the journey map or other tricks of the trade described in the book. The key to improving your memory is two-fold: knowing the expert methods devised by one of the most retentive and focused brains in the world, and practising them until you see marked improvements in your performance. This toolkit is all you will need to train yourself to be a memory maestro.

We all make mistakes. Nobody is perfect. And that includes five of the greatest scientists in history – Charles Darwin, William Thomson (Lord Kelvin), Linus Pauling, Fred Hoyle, Albert Einstein. But the mistakes that these great scientists made helped science to advance. Indeed, as Mario Livio explains in this fascinating book, science thrives on error; it advances when erroneous ideas are disproven. All five scientists were great geniuses and fascinating human beings. Their blunders were part of their genius and part of the scientific process. Livio brilliantly analyses their errors to show where they were wrong and right, but what makes his book so enjoyable to read is Livio's analysis of the psychology of these towering figures. Along the way the reader learns an enormous amount about the evolution of life on earth and in the universe, but from an unusual vantage point – the mistakes of great scientists rather than the achievements that made them famous.

Today's children will forge careers that look nothing like those their parents and grandparents knew. Even the definitions of "career" and "job" are changing as people create new businesses and services. Although these changes are well underway, our education system in the U.S. lags behind and still subscribes to the idea that content is king. This exclusive focus on content is reflected in what we test, how we teach, and even the toys we offer our children. Employers want to hire excellent communicators, critical thinkers, and innovators-in-short, they want brilliant people. So what can we do, as parents, to help our children be brilliant and successful? Golinkoff and Hirsh-Pasek provide a science-based framework for how we should be teaching children in and outside of school. Using fun and engaging examples, the authors introduce the 6Cs-collaboration, communication, content, critical thinking, creative innovation, and confidence-along with tips to optimize children's development in each area. These skills will make up the straight-A report card for success in the 21st century. Book jacket.
