"Mermaids are protected by the government under the Endangered Species Act, which means you aren't able to kill them even in self-defense. This is especially problematic if you happen to live in the isolated fishing village of Siren Cove, where there exists a healthy

population of mermaids in the surrounding waters that view you as the main source of protein in their diet. The only thing keeping these ravenous sea women at bay is the equally-dangerous supply of human livestock known as Food People. Normally, these "feeder

humans" are enough to keep the mermaid population happy and well-fed. But in Siren Cove, the mermaids are avoiding the human livestock and have returned to hunting the frightened local fishermen. It is up to Doctor Black, an eccentric representative of the

Food People Corporation, to investigate the matter and hopefully find a way to correct the mermaids' new eating patterns before the remaining villagers end up as fish food. But the more he digs, the more he discovers there are far stranger and more dangerous
