New York Times Bestseller Julie Lythcott-Haims is a national treasure. . . . A must-read for every parent who senses that there is a healthier and saner way to raise our children." -Madeline Levine, author of the New York Times bestsellers The Price of Privilege and Teach Your Children Well "For parents who want to foster hearty self-reliance instead of hollow self-esteem, How to Raise an Adult is the right book at the right time." -Daniel H. Pink, author of the New York Times bestsellers Drive and A Whole New Mind A provocative manifesto that exposes the harms of helicopter parenting and sets forth an alternate philosophy for raising preteens and teens to self-sufficient young adulthood In How to Raise an Adult, Julie Lythcott-Haims draws on research, on conversations with admissions officers, educators, and employers, and on her own insights as a mother and as a student dean to highlight the ways in which overparenting harms children, their stressed-out parents, and society at large. While empathizing with the parental hopes and, especially, fears that lead to overhelping, Lythcott-Haims offers practical alternative strategies that underline the importance of allowing children to make their own mistakes and develop the resilience, resourcefulness, and inner determination necessary for success. Relevant to parents of toddlers as well as of twentysomethings-and of special value to parents of teens-this book is a rallying cry for those who wish to ensure that the next generation can take charge of their own lives with competence and confidence.

Thousands of books have examined the effects of parents on their children. In All Joy and No Fun, award-winning journalist Jennifer Senior now asks: what are the effects of children on their parents? In All Joy and No Fun, award-winning journalist Jennifer Senior tries to tackle this question, isolating and analyzing the many ways in which children reshape their parents' lives, whether it's their marriages, their jobs, their habits, their hobbies, their friendships, or their internal senses of life. She argues that changes in the last half century have radically altered the roles of today's mothers and fathers, making their mandates at once more complex and far less clear. Recruiting from a wide variety of sources—in history, sociology, economics, psychology, philosophy, and anthropology—she dissects both the timeless strains of parenting and the ones that are brand new, and then brings her research to life in the homes of ordinary parents around the country. The result is an unforgettable series of family portraits, starting with parents of young children and progressing to parents of teens. Through lively and accessible storytelling, Senior follows these mothers and fathers as they wrestle with some of parenthood's deepest vexations—and luxuriate in some of its finest rewards. Meticulously researched yet imbued with emotional intelligence, All Joy and No Fun makes us reconsider some of our culture's most basic beliefs about parenthood, all while illuminating the profound ways children deepen and add purpose to our lives. By focusing on parenthood, rather than parenting, the book is original and essential reading for mothers and fathers of today—and tomorrow.

The Choices I Make

Fit Kids Make Happy Kids by Heather Villarreál [------]

Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€“which includes all primary caregiversâ€“are at the foundation of children’s well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child’s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents’ lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents’ use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Suggests ways in which parents can help children make and maintain friendships, including scheduling one-on-one play dates, encouraging good behavior, and overcoming hyperactivity. Raising kids to be socially conscious and embrace strong values can be difficult in today’s world. In Raising Kids Who Will Make a Difference, mother, counselor, and family-life educator Susan Vogt sets out to inspire, equip, and comfort parents in the awesome task of raising Catholic kids who will make positive contributions to our world. Using a delightful blend of honesty and humor, Vogt offers successful parenting strategies and straightforward discussions on important issues such as sexuality, substance abuse, materialism, racism, global awareness, and death.

Women who opt not to be mothers are frequently warned that they will regret their decision later in life, yet we rarely talk about the possibility that the opposite might also be true—that women who have children might regret it. Drawing on years of research interviewing women from a variety of socioeconomic, educational, and professional backgrounds, sociologist Orna Donath treats regret as a feminist issue: as regret marks the road not taken, we need to consider whether alternative paths for women currently are blocked off. She asks that we pay attention to what is forbidden by rules governing motherhood, time, and emotion, including the cultural assumption that motherhood is a "natural" role for women—for the sake of all women, not just those who regret becoming mothers. If we are disturbed by the idea that a woman might regret becoming a mother, Donath says, our response should not be to silence and shame these women; rather, we need to ask honest and difficult questions about how society pushes women into motherhood and why those who reconsider it are still seen as a danger to the status quo. Groundbreaking, thoughtful, and provocative, this is an especially needed book in our current political climate, as women's reproductive rights continue to be at the forefront of national debates.

How will you respond when your child makes a decision you don't agree with? Parents and kids will never agree on everything but what can mom and dad do when that decision—whether a matter of preference, spirituality, or morality—is something they think is totally wrong? Author and speaker Brenda Garrison knows all too well that how parents respond will either build a wall or a bridge between them and their child. Brenda and her husband were forced to answer this question when their oldest daughter Katie abruptly moved out of the house with no means of support. It was not an illegal or immoral decision, but it was one that wasn't good for her. Their determination to keep an open door of communication is documented not only by their story, but by comments from Katie in each chapter as she offers insights from her own

Also included are other family scenarios—everything from matters of preference to foolish, immoral, and even illegal decisions—as well as insights into different styles of parenting such as servant, checked-out, gotcha, scared, and controlling parents. With practical tips and relatable stories, Brenda shares how to model God's parenting style and explains the difference between the parent's responsibilities and the child's, then helps mom and dad discover ways to develop and nurture a relationship with their child that will last a lifetime.*
