Running late for work one morning in September 1994, Tom Hargrove, communications director for an international agricultural aid organization in Cali, Colombia, was

mildly annoyed when he spotted a roadblock, or reten, manned by soldiers in fatigues. He chafed at the delay, but told himself that guerrillas and kidnapers didn't operate on a main highway in broad daylight. But Hargrove had been dreadfully mistaken. Despite his assertions that he worked for a non-profit agricultural agency, he was forced at gunpoint into a vehicle and driven into the mountains by communist narco-terrorists who believed he was a valuable hostage. For almost a year, Hargrove was held by the guerillas and moved from one remote location to another. To maintain his grip on sanity, he recorded his daily experiences in makeshift journals: in a checkbook; on children's notebooks; and on scraps of paper scrounged during his ordeal. Hargrove's story,

before the Second World War. Alvaro had visited the Soviet Union as a journalist, but was probably motivated to write this dystopian novel by aspects of modernity that concerned him, particularly the use of fear for political purposes which was not afflicting Russia alone. He was interested in the psychology of fear and the extent to which individuals and the crowd participate in their own regimentation. The names of countries, cities and leading political figures such as Stalin are never referred to, but as in the works of Orwell they are clearly identifiable from their descriptions: the author was writing in a Fascist country against a Fascist censor

and had to cut his cloth accordingly.

This is a dark novel, not quite as dark as 1984, but it is more claustrophobic. The feeling of inevitability is there from the first page, and it is experienced as we experience real life. The imagined truth takes us closer to where we really are. The travails of the love affair at the core of this novel quite possibly arise from perceptions that the regime exploits in a quite ad hoc manner. And it leads the reader through an extraordinary sequence of events and observations which encompass a vast range of emotions and ideas expressed in a unique prose style. The modern Leviathan appears to be a well-oiled machine, but towards the end

it becomes clear that this is merely an appearance of efficiency and omniscience, but appearances can be powerful. Alvaro is particularly interested in how the state uses quasireligious mechanisms and rituals to assert its power. The central character returns to the country after a long period abroad, and sees things initially through foreign eyes, living a life similar to the one Alvaro did when in Russia. He is not a natural rebel, and very much wants to fit in, but he finds this difficult to achieve. The regime boasts that it has an ally in history, but destiny is elusive, however much the characters feel that they are driven by it.

'The Rape of Europa' is one of Titian's great masterpieces, a work charged with eroticism and classical mystique behind which lies a tale as compelling as the painting itself. Here Charles FitzRoy weaves a unique account of its history and the painting's movement following the rise and fall of the countries in which it has been housed. The story ranges from its place at the court of King Philip II of Spain, through French revolution

For every government they serve, intelligence agencies are both a threat and a necessity. They often provide vital information for national security, but the secrets they possess can also be used against their own masters. This book introduces subversion paradox theory to provide a social scientific explanation of the unequal power dynamic resulting from an often fraught relationship between agencies and their 'masters'. The Fairy-Faith in Celtic Countries is a study by W. Y. Evans-Wentz, American anthropologist who studied Celtic mythology and folklore. He performed ethnographic fieldwork collecting fairy folklore in Wales, Scotland, Ireland, Cornwall, Brittany, and the Isle of Man, and in this book he published his degree thesis. His goal was to elucidate the phenomenon of the Celtic belief in

fairies. Some of the theories he came across are that the fairies were a cloistered race of dwarfs, that they are a product of our imagination, or that they are incorporeal spirits.

Democratic Miners traces the history of work and labor relations in the anthracite coal industry, focusing on conditions that led up to, and followed, the famous strike of 1902. That strike, an epic five-and-a-half-month struggle, led the federal government to intervene in a labor dispute for the first time in American history. Focusing on the workplace, Blatz puts the 1902 strike in the context of a turbulent half-century of labor-management relations. Those years saw the unionization of the anthracite fields under the United Mine Workers of America, amidst an evolving
