*Presence-Based Coaching offers coaches a hands-on resource for developing the capacities and skills needed to be reliably present in all situations, and shows how to let go of habitual—and often ineffective—ways of responding. As author and leadership expert Doug Silsbee explains, once a coach has mastered the inner moves of directing their own attention, they can work to develop the same capability in their clients. The ability of a coach to facilitate lasting, sustainable development in leaders rests on the presence a coach offers to the coach-client relationship.*

*One of the start-up world's most in-demand executive coaches—hailed as the "CEO Whisperer" (Gimlet Media)—reveals why radical self-inquiry is critical to professional success and healthy relationships in all realms of life. Jerry Colonna helps start-up CEOs make peace with their demons, the psychological habits and behavioral patterns that have helped them to succeed—molding them into highly accomplished individuals—yet have been detrimental to their relationships and ultimate well-being. Now, this venture capitalist turned executive coach shares his unusual yet highly effective blend of Buddhism, Jungian therapy, and entrepreneurial straight talk to help leaders overcome their own psychological traumas. Reboot is a journey of radical self-inquiry, helping you to reset your life by sorting through the emotional baggage that is holding you back professionally, and even more important, in your relationships. Jerry has taught CEOs and their top teams to realize their potential by using the raw material of their lives to find meaning, to build healthy interpersonal bonds, and to become more compassionate and bold leaders. In Reboot, he inspires everyone to hold themselves responsible for their choices and for the possibility of truly achieving their dreams. Work does not have to destroy us. Work can be the way in which we achieve our fullest self, Jerry firmly believes. What we need, sometimes, is a chance to reset our goals and to reconnect with our deepest selves and with each other. Reboot moves and empowers us to begin this journey.*

*Today, coaching is recognized to be one of the most effective human resource development processes available, and it is becoming increasingly popular in organizations of all sizes. Faced with historically low levels of employee engagement (as little as 13% according to Gallup's latest survey), business leaders see coaching as key to unlocking the human talent, creativity, and innovation that is hiding in plain sight in their workplaces. And rather than bring in external coaches for this purpose, they want to integrate coaching into their company culture—a 2015 study by the International Coaching Federation (ICF) and the Human Capital Institute (HCI) found that 81% of organizations surveyed planned to train managers/leaders in coaching skills. The Master Coach is written for these leaders, and is perfectly positioned to become the definitive book on the topic. Drawing on the wealth of experience that has made Gregg Thompson and Bluepoint Leadership Development the choice of numerous Fortune 100 companies, it illuminates the essence of what it takes to be a great coach. The Master Coach will appeal to leaders at all organization levels, showing them how to make a significant shift in their attitudes, values and behaviors and become more coach-like in all of their daily interactions and conversations. The Master Coach is based on the simple but profound 3Cs Coaching Model. This proven approach asserts that to master the art of coaching one must have an exemplary Character that invites the trust of others, be able to form rapid Connections with others at deeply personal level, and have the ability to initiate and guide intense, attitude-changing Conversations. At every step, Thompson reminds readers that coaching is not merely about what the coach says or does; it is about who he or she is.*

A leadership consultant and neuropsychologist identify the universal habits of the heart and mind—the keys to unlocking our true potential, creating our best selves and eliminating behavior patterns that hold us back. Why is it so hard for leaders to coach employees who are struggling? Why do we repeat the same mistakes and negative behaviors? Common wisdom says you always have a choice in how you react or respond. But, as corporate consultant Stephen Klemich and clinical psychologist Mara Klemich contend, until you recognize why you make choices, and how the heart and the brain work together to shape your behavior, you can't change long-ingrained patterns and discover your best self. The Klemichs have developed a model backed by extensive research and data, and paired it with character-led personal development, to help you answer the "Why?" and eliminate behavior that is "below the line." In Above the Line, they argue that that the quality of your life flows from the attitudes of your heart. Offering wise, compassionate, and practical advice, this book explores the deep, fundamental drivers of human behavior that exist within your heart—the seat of your character. It reveals that all of these behaviors can be explained by four principles—humility, love, pride, and fear—which influence every facet of your life, for better or for worse. We are all designed for greatness, but so often our best self is pitted against our worst. The pressures of life are pulling our character below the line while our authentic self is drawing us to live above the line. When you fully understand that the four principles are at the root of your behavior, you can begin the journey to become your best self and navigate life more effectively and successfully. Filled with proven strategies, Above the Line will create lasting changes in your behavior and improve your life personally and professionally—so you can make a positive impact on the world around you.

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here."

Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

In these pages, leadership coaches John Baird and Edward Sullivan share hundreds of hours of research and firsthand accounts of guiding leaders at some of the world's most respected big brands and small startups (Apple, Nike, Google, and Slack to name a few). They help their people to confront the fears that hold them back. They understand their own desires and what drives their people. They leverage their unique gifts and help people find their own. They connect with their core sense of purpose and help people find theirs. The key to achieving these behaviors is asking the right questions and having conversations that connect you and your employees on the deepest human level—conversations the authors coach you on how to navigate. Mike Krzyzewski, basketball coach at Duke University, shares the leadership lessons he has learned throughout his life from his childhood in a Polish Chicago neighborhood, to his days at the U.S. Military Academy, and his tenure at Duke.

Use this helpful book to learn about the leadership tools to fuel success, grow your team, and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title.

In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.

The Heart of Coaching Supervision takes us on a journey that starts with understanding who we are, and why we do what we do the way we do it, so that we can help those we work with understand themselves and their practice. The journey includes our background and personal and professional influences and considers the need for self-resourcing to resource others. It examines our being alongside our doing, to ensure that we can provide the best possible service to all those we work with. The book's highly experienced contributors provide a unique perspective on supervision's benefits. The chapters cover themes that support self-discovery and resourcing including the three Ps of supervision and coaching, diversity and inclusion, resourcing, working with intense emotions and the self as instrument. Nancy Kline's Thinking Environment® is explored in a supervision context alongside creative forms of reflective and expressive writing and resourcing through a peer supervision chain. The Heart of Coaching Supervision also includes ten engaging, international case studies, considering the role of supervision in depth. A key contribution to the field, the book is essential reading for all coaches and mentors, coaching supervisors and psychologists, managers in a coaching role and anyone in a helping profession or leadership position wanting to better understand the wide benefits of supervision. With more than 60 million athletes involved in sports in America, it is estimated that one coach will impact more people in one year than the average person does in a lifetime. Today's coach could be one of the greatest authoritative figures in the life of today's adolescent. So the question isn't whether coaches leave a legacy, but rather, what will that legacy be? Current trending research shows that only 15% of coaches are intentional about coaching beyond the skills and strategies of the game (1st Dimension). A 3-Dimensional Coach understands and harnesses the power of the coaching platform to coach the mind (2nd Dimension) and transform the heart (3rd Dimension). They can be the catalysts for internal transformation that guides both the coach and the athlete on a spiritual journey to finding purpose in our performance-based culture. Now that's a legacy! In 3D Coach, National Coaches Training Director Jeff Duke shares his own journey through the three dimensions of coaching and how it has impacted his life and those around him. He also shares the personal stories of coaches from all levels who have implemented the 3D concept into their own programs and who have pointed to Jesus Christ, the Master Coach, as the ultimate example of how to lead athletes to true significance.

The Heart of a Leader

Leading with the Heart

If your people know you care about them, they will move mountains. Employee engagement and loyalty expert Heather Younger outlines nine ways to manifest the radical power of caring support in the workplace. Heather Younger argues that if you are looking for increased productivity or employee engagement, you need to care for your employees first. People will go the extra mile for leaders who show they are genuinely concerned not just with what employees can do but with who they are and can become. But while most leaders think of themselves as care in consistent ways. Your employees will judge you by your actions, not your intentions. Based on Younger's interviews with over eighty leaders for her podcast Leadership with Heart—including Howard Behar, former president of the Starbucks Coffee Company; Judith Scharf, chief talent officer at MetLife; Garry Ridge, CEO and chairman of the board of the WD-40 Company; and Shawnté Cox Holland, head of culture and engagement at Vanguard—this book outlines nine ways that leaders can make all employees feel included and cared for. She even offers an assessment so you can measure your progress as a caring leader. But this is not a cookie-cutter approach: just as Monet and Picasso expressed themselves very differently, each leader should express caring in his or her own unique, personal style. Younger takes an often neglected, concrete and actionable. Leaders have the power to change the lives of those they lead. They shouldn't just want to care, they should see caring as imperative for the success of their employees and their organization.

Are you the type of leader people want to follow? You can be—but first, you've got to understand what sets great leaders apart from all the rest. Certainly, leaders need people skills, execution skills, a deep knowledge of industry trends, the ability to articulate a vision, and more. But that's just the tip of the iceberg. What's below the waterline? What's deep inside the best leaders that makes them different? Mark Miller contends it is their leadership character. In his latest enlightening and entertaining business fable, he describes the five unique characteristics of great leaders and how to cultivate them. The Heart of Leadership begins with young and ambitious Blake Brown being passed over for a desperately wanted promotion, despite an outstanding individual performance. Confused and frustrated, he turns to his former mentor, Debbie Brown, to solve Blake's problem for him, she sends him on a quest to meet with five of his late father's colleagues, each of whom holds a piece of the puzzle he's trying to solve. As Blake puts the pieces together, he discovers that in the final analysis, a lack of skills isn't what holds people back. It's leadership character. Without demonstrated leadership character, however, a skill set will never be enough. Most often, when leaders fail to reach their full potential, it is an issue of the heart. This is Blake's ultimate revelation. This book shows us that leadership needn't be the purview of a few. It can be yours. The Heart of Leadership is a road map for every person who desires to make a difference in the lives of others and become a leader people want to follow.

A Guide to Using Reflective Inquiry

Reboot

From a founding member of the coaching movement comes a detailed guide to mastering one of a coach's toughest skills: thoughtfully reflecting clients' words and expressions back to them so they see themselves and their world through new eyes. "Coaches rely far too much on asking open-ended questions," says Marcia Reynolds. But questions only seek answers—inquiry provides insight. When, instead of just questions, clients hear their thoughts, opinions, and beliefs spoken by someone else, it prompts them to critically consider how their thinking affects their goals. Reynolds cites the latest brain science to show why reflective inquiry works and provides techniques, tips, and structures for creating breakthrough conversations. This book will free coaches from the cult of asking the magical question by offering five essential practices of reflective inquiry: focus on the person, not the problem; summarize what is heard and expressed; identify underlying beliefs and assumptions; unwrap the desired outcome; and articulate insights and commitments. Using these practices, combined with a respectful and caring presence, helps create a space where clients feel safe, seen, and valued for who they are. Coaches become change agents who actively recharge the human spirit. And clients naturally dive deeper and develop personalized solutions that may surprise even the coach.

Leadership and engagement expert Mark C. Crowley shows how trading in the old business playbook for heart-led leadership strategies will create purpose-driven, dedicated employees and higher levels of performance. Revised and updated to address the needs of those managing Gen Z and millennial employees in addition to the latest global research on employee engagement. In this thoroughly revised and updated edition of his now classic book, visionary Mark C. Crowley provides the roadmap workplace leaders the world over are seeking: How to most successfully and sustainably inspire and manage other human beings in the post-pandemic era. · Nearly 50 million workers quit their jobs in the U.S. alone in 2021—a record number likely to be exceeded in 2022. · While we might imagine that an opportunity to earn greater pay is the key driver of this "Great Resignation," research shows two-thirds of the reasons people leave jobs boil down to issues related to their engagement and overall well-being. · More specifically, people quit when they feel they aren't valued, respected, appreciated, coached—or cared about personally—by their manager and organization. · Thanks in large part to the COVID pandemic and a global reset of what matters most to people in their lives, human beings have profoundly evolved in what they need and want in exchange for their work. · Consequently, a radical change in employee expectations demands that organizations and managers rapidly pivot by embracing leadership practices that match the moment. · The remedy to the Great Resignation is to adopt more humane ways of managing people knowing they inherently lead to infinitely greater engagement not to mention optimal employee performance. · In this new and updated version

of his seminal and visionary book, Mark C. Crowley draws upon emerging medical and other scientific discoveries which prove it's the heart, not the mind, that drives human motivation and achievement. · While we've long been led to believe that human beings are essentially rational beings, new research shows that feelings and emotions far more often motivate human behavior and what people care about most and commit themselves to in their lives. · In light of this breakthrough understanding, it's become incumbent upon workplace managers to pay great attention to their employees' emotional experience at work—far greater attention than any of us ever believed necessary. · Ironically, most of us were told the heart has no place in workplace management. In fact, most of us were taught that the heart acts like Kryptonite in leadership: it inherently undermines a manager's effectiveness - and lowers performance. · What makes this book so remarkable is that it brilliantly contradicts all those traditional beliefs and proves why people naturally and instinctively respond to managers who care about them personally and support their deep human needs. · To be absolutely clear, there's nothing soft or weak about the Lead From The Heart philosophy. Instead, it represents the future of workplace management and a roadmap to driving uncommon engagement, productivity and profitability when organizations around the world are wanting it most. · Rich with inspiring stories and illuminating research, this book proves that when you lead people with a greater balance of mind and heart, people naturally follow. And they also excel.
