Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The Turkish Language Reform : A Catastrophic Success

American Paintings to 1945

The Encyclopaedia Britannica

Perfect for pre-schoolers, the Milet Mini Picture Dictionary is a board book version of the popular Milet Picture Dictionary. Featuring Sally Hagin's highly praised, bold and painterly artwork, the Milet Mini covers key subjects like colours, shapes, animals, plants and more. It includes four to five images with clear text, so it's perfect for identifying objects and learning words. A perfect stimulant for the child's creativity, this board book makes for an educational and visual treat!

This edition is the most updated since its inception, is the essential text for students and professionals working in and around epidemiology or using its methods. It covers subject areas - genetics, clinical epidemiology, public health practice/policy, preventive medicine, social sciences and methods for clinical research.

This is the first full account of the transformation of Ottoman Turkish into modern Turkish. It is based on the author's knowledge, experience and continuing study of the language, history, and people of Turkey. That transformation of the Turkish language is thorough-going piece of linguistics engineering in history. Its prelude came in 1928, when the Arabo-Persian alphabet was outlawed and replaced by the Latin alphabet. It began in earnest in 1930 when Atatürk declared: Turkish is one of the richest of languages, but it is being used with discrimination. The Turkish nation, which is well able to protect its territory and its sublime independence, must also liberate its language from the yoke of foreign languages. A government-sponsored campaign was waged to replace words of Arabic or Persian collected from popular speech, or resurrected from ancient texts, or coined from native roots and suffixes. The snag - identified by the author as one element in the catastrophic aspect of the reform - was that when these sources failed to provide the needed words, he invented them. The reform was central to the young republic's aspiration to be western and secular, but it did not please those who remained wedded to their mother tongue or to the Islamic past. The controversy is by no means over, but Ottoman Turkish acquaints the general reader with the often bizarre, sometimes tragicomic but never dull story of the reform, and provides a lively and incisive account for students of Turkish and the relations between culture, politics and language with some stimulating reflections on his own wide experience of Turkey and his personal knowledge of many of the leading actors. The general reader will not be at a disadvantage, because no Turkish word or quotation has been left untranslated. This book is important for the light it throws on the relations between politics and society, as much as it is for the study of linguistic change. It is not only scholarly and accessible; it is also an extremely good read.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as well as an e-book format originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader.

For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—*American Journal of Archaeology* "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."*—Library Journal*

An exploration of the contemporary influence of the Ottoman Empire on the wider world, as the author uncovers the new Ottoman legacy across Europe and the Middle East. Alev Scott's odyssey began when she looked beyond Turkey's borders for contemporary traces of the Ottoman Empire. Their 800 years of rule ended a century ago—and yet, travelling through twelve countries from Kosovo to Greece to Palestine, she uncovers a legacy that's vital and relevant; where medieval ethnic diversity meets twenty-first century nationalism—and displaced people seek new identities. It's a story of surprises. An acolyte of Erdogan in Christian-majority Serbia confirms the wide-reaching appeal of his authoritarian leadership. A Druze warlord explains the secretive religious faction in the heart of the Middle East. The palimpsest-like streets of Jerusalem's Old Town hint at the Ottoman co-existence of Muslims and Jews. And in Turkish Cyprus, Alev Scott rediscovers a childhood home. In every community, history is present as a dynamic force. Faced by questions of exile, diaspora and collective memory, Alev Scott searches for answers from the cafes of Beirut to the refugee camps of Lesbos. She uncovers in Erdogan's nouveau-Ottoman Turkey a version of the nostalgic utopias sold to disillusioned voters in Europe and America. And yet—as she relates with compassion, insight, and humor—diversity is the enduring, endangered heart of this fascinating region.
