The rivers of America flow from mountains, forests, and grasslands with astonishing beauty, essential to all life. Many of the best of these streams have been safeguarded under the National Wild and Scenic Rivers Act of 1968--America's premier program for the protection of our finest natural waterways. Wild and Scenic Rivers celebrates this creative conservation initiative with 160 stunning photographs and a lively history involving citizen activists, scientists, dedicated public officials, and enlightened political leaders. In commemoration of the 50th anniversary of the National Wild and Scenic Rivers Act, award-winning author and photographer Tim Palmer illuminates the values of this irreplaceable system of free-flowing streams, probes its problems, and addresses its future. With a depth of experience dating almost to the inception of the wild and scenic rivers program, Palmer has captured the splendor and essence of our most extraordinary rivers with his camera, and he has told their remarkable story as no one else could do.

This book presents case studies that share important experiences regarding Integrated Water Resource Management (IWRM) in various countries. Following an introduction to theoretical concepts, responsibilities, and challenges, the subsequent chapters address, among other topics, an analysis of policies and regulations for water management in Brazil, the drivers that led California to adapt to the IWRM framework, and the international

regulations for water markets and water banking in Australia and Chile. The implications of climate change for water resource systems in Mexico are discussed, as well as management strategies from California that could potentially serve as IWRM adaptation schemes in Mexico. Critical cases from Guanacaste (Costa Rica), and from Zayandehrud River Basin and Lake Urmia (Iran) are reviewed in terms of management practices and solutions. The book also provides an overview of the current availability and use of water resources in South Korea, and discusses the management of and international water law instruments for transboundary groundwater in Africa.

In an era of climate change, deforestation, melting ice caps, poisoned environments, and species loss, many people are turning to the power of the arts and humanities for sustainable solutions to global ecological problems. Introduction to the Environmental Humanities offers a practical and accessible guide to this dynamic and interdisciplinary field. This book provides an overview of the Environmental Humanities' evolution from the activist movements of the early and mid-twentieth century to more recent debates over climate change, sustainability, energy policy, and habitat degradation in the Anthropocene era. The text introduces readers to seminal writings, artworks, campaigns, and movements while demystifying important terms such as the Anthropocene, environmental justice, nature, ecosystem, ecology, posthuman, and non-human. Emerging theoretical areas such as critical animal and plant studies, gender and queer studies, Indigenous studies, and energy studies are also presented. Organized by discipline, the book explores the role that the arts and humanities play in the future of the planet. Including case studies, discussion questions, annotated bibliographies, and links to online resources, this book offers a comprehensive

Nationally acclaimed photographer Chuck Haney (Portrait of San Francisco, Badlands Impressions) proudly presents his view of Montana in this beautiful, large-format collection from Farcountry Press. Montana Moments, Chuck's fourth photography book featuring his home state of Montana, offers a seemingly endless supply of flowing rivers, tranquil lakes, rugged mountain peaks, and rolling prairie. From key natural landmarks to idyllic western towns, Montana Moments serves as a fantastic photographic representation of the best hits of Big Sky Country.

Each of the 148 full-color Montana photographs is accompanied by educational and informative captions from the photographer. The perfect gift to memorialize a family vacation or show off your favorite state, Montana Moments is a perfect Big Sky celebration.

A new vision is sweeping through ecological science: The dense web of dependencies that makes up an ecosystem has gained an added dimension—the dimension of time. Every field, forest, and park is full of living organisms adapted for relationships with creatures that are now extinct. In a vivid narrative, Connie Barlow shows how the idea of "missing partners" in nature evolved from isolated, curious examples into an idea that is transforming how ecologists understand the entire flora and fauna of the Americas. This fascinating book will enrich and deepen the experience of anyone who enjoys a stroll through the woods or even down an urban sidewalk. But this knowledge has a dark side too: Barlow's "ghost stories" teach us that the ripples of biodiversity loss around us now are just the leading edge of what may well become perilous cascades of extinction.

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."

On a homestead in the rugged Missouri River Breaks of Montana, the Wortmans carve a brittle existence out of the sagebrush and gumbo, enduring the brutal weather, a harsh land, and dark family tragedies. This sweeping saga of homesteaders captures all the grit and determination of generations of the Wortman, Godsey, Gilmore, and Ness families as they move west from the Atlantic colonies to post-Civil War Missouri farms and on to the Montana Territory. Based on richly detailed family diaries and letters, *West to Montana* brings our American story to life in this classic family epic from author Christine Wortman-Engren.

This book is a printed edition of the Special Issue "New Water Regimes" that was published in *Resources*

Transport and sustainability are intrinsically linked. This book examines the links between transport, tourism, and sustainability by means of a series of large case studies covering several countries.
