

## National Geographic Book Of Nature Poetry: More Than 200 Poems With Photographs That Float, Zoom, And Bloom! (Stories Poems)

*"A summary by famed marine biologist Sylvia Earle of the latest insights about the present state of the ocean and a look at how its future and that of humankind are inextricably bound"--- Collects the work of National Geographic's best photographers, featuring striking images of places, events, natural phenomena, and manmade heirlooms seldom seen by human eyes, including ancient cave art and volcanic lightning.*

*This jewel of a book is filled with wondrous facts about the world that will delight the senses, calm the mind, and awaken the soul.aThis perfect package provides peace, contemplation, and inspiration page after page with awe-inspiring facts about the world paired with breathtaking National Geographic nature and wildlife photography. Each striking image will allow readers to appreciate the wonder and beauty of the world around us.*

*One woman 10,000 miles on foot 6 countries 8 pairs of hiking boots 3,000 cups of tea 1,000 days and nights "The only way to survive three years of walking was to embrace the moment of now."---From Wild by Nature Not since Cheryl Strayed gifted us with her adventure on the Pacific Crest Trail in her memoir, Wild, has there been such a powerful epic adventure by a woman alone. In Wild by Nature, National Geographic Explorer Sarah Marquis takes you on the trail of her ten-thousand-mile solo hike across the remote Gobi desert from Siberia to Thailand, at which point she was transported by boat to complete the hike at her favorite tree in Australia. Against nearly insurmountable odds and relying on hunting and her own wits, Sarah Marquis survived the Mafia, drug dealers, thieves on horseback who harassed her tent every night for weeks, temperatures from subzero to scorching, life-threatening wildlife, a dengue fever delirium in the Laos jungle, tropic ringworm in northern Thailand, dehydration, and a life-threatening abscess. This is an incredible story of adventure, human ingenuity, persistence, and resilience that shows firsthand what it is to adventure as a woman in the most dangerous of circumstance, what it is to be truly alone in the wild, and why someone would challenge themselves with an expedition others would call crazy. For Marquis, her story is about freedom, being alive and wild by nature.*

National Geographic Kids Chapters: Hoops to Hippos!

Photographs of the Extraordinary

A Collection of Pictures, Poems, and Stories from Nature's Nursery

National Geographic Backyard Guide to the Birds of North America

The color of an apple, the colors of trees in fall, the sky so blue. Let's discover what other colorful surprises nature has all around us.

When words in verse are paired with the awesomeness of nature, something magical happens! Beloved former U.S. Poet Laureate J. Patrick Lewis curates an exuberant poetic celebration of the natural world in this stellar collection of nature poems. From trickling streams to deafening thrunderstorms to soaring mountains, discover majestic photography perfectly paired with contemporary (such as Billy Collins), classics (such as Robert Frost), and never-before-published works.

NBA star Boris Diaw of the San Antonio Spurs takes young readers on safari as he explores his off-court passion: wildlife photography! Join Diaw as he escapes from stampeding wildebeests, comes face-to-face with lions, and discovers why you should never come between a hippo and its watery home. Through engaging stories and photos by Diaw, readers will discover a whole new side to this basketball champ. National Geographic Kids Chapter books pick up where the best-selling National Geographic Readers series leaves off, offering young animal lovers who are ready for short chapters lively, exciting, full-color true stories!just right to carry in backpacks, share with friends, and read under the covers at night.

Richard Louv and nature movement is fueled by this fundamental idea: the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable. Richard Louv, from the new edition In his landmark work Last Child in the Woods, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child's healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children's lives and the rise in obesity, attention disorders, and depression. Louv's message has galvanized an international back-to-nature campaign to "Leave No Child Inside." His book will change the way you think about our future and the future of our children. [The] national movement to "leave no child inside" . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a "green hour" in each day. . . . The increased activism has been partly inspired by a best-selling book, Last Child in the Woods, and its author, Richard Louv. The Washington Post "Last Child in the Woods, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation." The Nation's Health "This book is an absolute must-read for parents." The Boston Globe Now includes A Field Guide with 100 Practical Actions We Can Take Discussion Points for Book Groups, Classrooms, and Communities

Photographs That Awe and Inspire

***From one majestic nature landscape to the next, this is an iconic collection of National Geographic's photography of the world's most beautiful locations that will immortalize the beauty of the great outdoors, showcasing evocative, and often unseen, images of extraordinary landscapes around the world. With vast deserts in twilight, snowcapped mountain ranges at the brink of dawn, a forest in the height of autumn colors, these indelible images will magnify the beauty, emotion, and depth that can be captured in the split second of a camera flash, taking readers on a spectacular visual journey and offering an elegant conduit to the world around them. Paired with illuminating insights from celebrated photographers, this beautiful book weaves a vibrant tapestry of images that readers will turn to again and again.***

***"Highly informative and remarkably entertaining." --Elle From forest trails in Korea, to islands in Finland, to eucalyptus groves in California, Florence Williams investigates the science behind nature's positive effects on the brain. Delving into brand-new research, she uncovers the powers of the natural world to improve health, promote reflection and innovation, and strengthen our relationships. As our modern lives shift dramatically indoors, these ideas—and the answers they yield—are more urgent than ever.***

***Combines photography with lyrical text celebrating the animal world, in a compilation that includes works by such poets as Emily Dickinson, Robert Frost and Rudyard Kipling.***

***Introduces basic facts about plants with instructions for related experiments and projects.***

Bringing Nature Into Your Yard and Garden

Birds, Bees and Butterfiles

A Young Scientist's Guide to Faulty Freaks of Nature

Rare and Astonishing Photographs

***In this spirited memoir, world-renowned conservationist Enric Sala weaves fascinating tales of the natural world, revealing how connections in nature promise a thriving economy as well as a healthy planet. Enric Sala wants to change the world--and in this compelling book, he shows us how. Once we appreciate how nature works, he asserts, we will understand why conservation is economically wise and essential to our survival. Here Sala, director of National Geographic's Pristine Seas project (which has succeeded in protecting more than 5 million sq km of ocean), tells the story of his scientific awakening and his transition from academia to activism--as he puts it, he was tired of writing the obituary of the ocean. His revelations are surprising, sometimes counterintuitive: More sharks signal a healthier ocean; crop diversity, not intensive monoculture farming, is the key to feeding the planet. Using fascinating examples from his expeditions and those of other scientists, Sala shows the economic wisdom of making room for nature, even as the population becomes more urbanized. In a sober epilogue, he shows how saving nature can save us all, by reversing conditions that led to the coronavirus pandemic and preventing other global catastrophes. With a foreword from Prince Charles and an introduction from E. O. Wilson, this powerful book will change the way you think about our world--and our future.***

***Covers more than 150 species of North American birds and includes nearly 300 full-color photos, 150 range maps and 500 additional illustrations, as well as tips on feeding, birdhouses and creating bird-friendly backyard landscapes. Original.***

***Our Continent***

Filled with photographs and original artwork, a resource from one of the most trusted names in field guides showcases 900 species of North America's most common birds, mammals, insects, reptiles and amphibians, along with fish and other aquatic creatures. Includes 20 experiments for the sink, bathtub, and backyard! Are you intrigued by the effects of smog or methane clouds, the “Harry Potter” dinosaur, the Australian blue bird that screeches chainsaw noises, ocean “snot,” or the pink tentacles in the Korean dish where they swallow wriggling tentacles? Then strap on your hat for adventure and learn how planet Earth has been modified by the crazy chemistry of birdbrained biology and foolhardy physics of humans. The Young Scientist’s Guide to Faulty Freaks of Nature is your guide to some of the strangest science ever seen, and in it you’ll discover that some of the things scientists told you were “wrong” were actually right! Fictional hobbits? They are real! You’ll even meet an all-new creature called a “spider-goat.” So if you have a thirst for the weird, the wonderful, and the downright wacky, then this is the science book for you. James Doyle lives and works in Belfast, Ireland (most times!). You won’t find him on any social network sites and you won’t be able to track him. He is an expert in remaining “invisible” to the general public and the last eyewitness account of his whereabouts placed him at a remote outpost in the Himalayan mountains where he was setting out in search of the legendary Abominable Snowman. Andrew Brozyna is a book designer and illustrator living in Boulder County, Colorado. He nearly fell off a cliff while hiking, and he crashed the only two times he went mountain biking.

With 1,000 stickers and fantastic graphics and text, these high quality, superfun sticker books are a great way for kids to learn about animals and the natural world. The Baby Animals sticker book is chock-full of the cutest creatures on the planet: pandas, piglets, wolf cubs, ponies, polar bears, elephants, bunnies, kittens, puppies, and many more. With a fun, brightly colored design and loaded with animal facts and games--such as mazes, counting, matching and more--this book is sure to provide endless entertainment.

An exciting interactive title chock-full of stars, planets, aliens, and everything out of this world brings National Geographic Kids signature content to a sticker and activity book format. For kids who love our universe, this book features the coolest science kids can't get enough of: our planet Earth, cool asteroids, fun aliens, comets, and so much more. Packed with mazes, spelling and pattern games, drawing activities, and more, kids are sure to love these pages loaded with fun.

The Nature Fix: Why Nature Makes Us Happier, Healthier, and More Creative

Reptiles & Amphibians

National Geographic Kids Baby Animals Sticker Activity Book

Uses humour and real science to illuminate the gross, strange, morbid, and outright absurd realities of our bodies, our earth, and our universe.

"Generously illustrated and full of practical information, this approachable reference covers the wide world of birds, butterflies, and pollinating insects, including honeybees, and how to bring them into a yard and garden...What types of bird feed attract your favorite birds? Which flowers will bring the most butterflies into your backyard? What can you plant to promote the health of the beleaguered honeybee? All these questions and more will be answered amply in this beautiful gift book."---

An illustrated companion to the seven-hour National Geographic Channel special miniseries of the same name includes 250 breathtaking photos and describes all of the epic animal dramas that will be featured in the series. TV tie-in. 200,000 first printing.

They're SSSSLITHERY! SLIPPERY! They creep us out! But get to know them and you'll find snakes private, quiet types who just want a cool, shady place to call home. From the tip of their forked tongues, to skin that sheds, to the rattles on certain tails, these creatures have secrets all kids will love. Cool photos and fun facts slip us inside their surprising world.

Plants

A Natural History of North America

National Geographic Desk Reference to Nature's Medicine

Sublime Nature

More Than 200 Poems with Photographs That Float, Zoom, and Bloom!

True Stories of a Basketball Star on Safari

National Geographic Readers: Snakes!

An illustrated compendium of information on plants and their diverse therapeutic properties and benefits brings together folklore, scientific research, and medical theory to describe hundreds of plants, their origins and geographic distribution, cultivation, and medical applications. Reprint. 10,000 first printing.

An exquisite photo collection showcasing awe-inducing moments from around the world, including the aurora borealis, cities made of neon lights, a great wildebeest migration, a contortionist on display--and more. In life, there are certain sights that are as beautiful as they are unforgettable--from a majestic supercell to the secrets of a deep blue ice cave to the world's largest library. These fascinating spectacles shock us in their diversity, their complexity, and their epic scale, bringing us the miraculous beauty of our planet. Featuring more than 200 color images, including acclaimed photography from the National Geographic Image Collection, this volume presents a dazzling array of natural and manmade wonders, unusual phenomena, and amusing curiosities. Each page will enlighten and inspire, presenting our world at its best. In Before & After, Jan Thornhill's beautifully detailed illustrations depict nature's varied scenes as they change over spans of time, ranging from the subtle changes that occur in just one second to the dramatic transformations that occur over the course of a year. Before & After presents stunning two-page spreads showing a variety of settings teeming with life and change. Children will take a journey through a tropical coral reef, an African savanna, the Australian rain forest and in the final scene, the familiar setting of a schoolyard. Each spread cleverly doubles as a puzzle, with creatures identified in the border for readers to spot in the main picture. Children will take pleasure in the animal searches while spotting the changes that have occurred between one picture and the next. An innovative combination of art, information, puzzle and picture book, Before & After is a book to be treasured.

Photos of baby animals, along with poems and other writing, intended as stories to tell children. --

Little Kids First Big Book of Weather

National Geographic Greatest Landscapes

*Visions of Earth* raises a curtain on the wonders of the world and thrills us with nature's opulence and humanity's splendor. Each image alone exposes a nugget of our planet's magnificence; the totality of the collection goes beyond our imagination. Turning the pages, viewers are struck by the richness of life on Earth. One photograph is more awe-inspiring than the next--chosen by veteran National Geographic Magazine photo editors to present what is visually incredible. The photographs are drawn from the popular "Visions of Earth" feature in the magazine, (rated #1 by readers), from our own storied Image Collection, and from renowned photographers throughout the world, many never-before published. Enthralling images fill the book in a gallery of stunning landscapes, fascinating people, amazing animals, and unexpected glimpses of the usual and unusual. Puffins' beaks signal breeding time in Norway and a speckled emperor moth in South Africa diverts predators with an illusion. An elephant takes a morning dip in India's Andaman Sea while Siamese crocodiles race in Thailand and surfers in Australia relish a perfect day. Monks in Bhutan run to dinner and a little girl in red stands out among white-robed women in an Indonesian mosque. Spanish youth decked in colorful, oversize papier-mâché heads celebrate a festival in Catalonia and a flower of flame blooms from a man's kerosene-filled mouth in a Sikh celebration in India. Around the globe, amazing moments are captured in time, from a spray of flash frozen petal fragments in California to a truck show of chrome-covered and gleaming neon rigs half the world away in Japan. *Visions of Earth* is a welcome escape from the news of natural disasters, conflict, political upheaval, and social unrest that fills our lives. The book delights our senses, ignites our emotions, and renews our optimism, showcasing the many ways that our world is a marvel to behold and a privilege to call home.

Storms are SCARY! But it's cool to understand what's going on when Mother Nature gets angry. Why does the wind howl? Why does it rain for days? How do rivers overflow? Thunder and lightning, monsoons, hurricanes, tornadoes... the facts and photos in this book will blow you away!

Presents general information about different types of predators, looking at what they are, some of their methods of hunting, the characteristics of different species, their origins, and fun facts about them.--

"Explore healing properties of plants ; discover remedies to ailments ; uncover ways to stay healthy naturally"--Cover.
