

National Geographic Readers: Elephants

An introduction to animal communication uses simple text and colorful photographs to look at how animals "talk" without using words.

Water can be hard to find on African savannas. Luckily, African elephants have unique ways to stay cool and hydrated with their wrinkly skin and throat pouches! In this title, simple text helps young readers explore all the ways these elephants have adapted to their dry biome. Special features showing range, conservation status, and diet visually support the text to aid in learning and comprehension.

From woolly mammoths to saber-toothed cats, prehistoric mammals once roamed Earth. With beautiful and engaging illustrations, authentic photos, and accessible text, kids will learn all about these mighty mammals in this level 2 reader.

You know fireflies glow in the dark, but did you know there are many other animals that make their own light? Dive deep into the ocean, soar high in the sky, and explore the forest and desert floors to discover animals that glow. Explore the wonderful world of bioluminescence and biofluorescence in this National Geographic Kids Co-reader. Learn how and why animals emit light. Discover their incredible colors in stunning photography of eels, corals, frogs, and more. National Geographic Kids Readers have been a hit in the beginning reader category, and this book builds upon that success with a new approach--parents and children reading together. With the same combination of careful text, brilliant photographs, and fun approach to high-interest subjects that has proved to be a winning formula with kids, National Geographic Co-readers provide one page of adult read-aloud and one page of kid read-aloud text on each spread, building toward a collaborative reading experience.

Great Migrations

Busy Elephants

National Geographic Readers: Saving Animal Babies

Whales

Safari

Examines several animals and their great migrations, ranging in size from the army ant to the sperm whale.

Steve Bloom is an internationally bestselling wildlife photographer and the author of Thames & Hudson's bestselling publication, *Elephant!*. Here, eighty of his stunning photographs and an entertaining text by David Henry Wilson capture every aspect of this wonderful creature's life and world. Why do elephants flap their ears? How much do they eat? Why do they roll in mud? This book answers these questions and many more, including intriguing facts about elephants' trunks, tusks and tails, their families and friends, what they get up to from dawn to dusk, and the special relationship between elephants and humans and elephants and other animals.

This exciting reader follows the story of the longest and the most demanding elephant migration on the planet. Living at the furthest corners of the hot and dry Sahara Desert, the very margins of where elephants can survive, hundreds of these great creatures make a dangerous but necessary journey as their main source of food and water dries up and they must go in search of more. Battling 120-degree heat, sandstorms, and fierce thunderstorms, these amazing animals travel 35 miles a day in a race against time in search of the bare essentials of life. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

From geckos to iguanas, komodo dragons to chameleons, lizards are about the most awesome animal around! They inhabit every continent except Antarctica. Some are lethal. Some change color. Some have suction cups on their feet. There is enough fascinating information about these animals to fill an entire library of readers! But we've taken the absolute coolest information about the coolest animal and compacted it in this fascinating level 2 reader, perfect for anyone who loves slippery, slimy, creepy, and crawly. This high-interest, educationally vetted series of beginning readers features the magnificent images of National Geographic, accompanied by texts written by experienced, skilled children's book authors. The inside back cover of the paperback edition is an interactive feature based upon the book. Level 1 books reinforce the content of the book with a kinesthetic learning activity. In Level 2 books readers complete a Cloze letter, or fun fill-in, with vocabulary words. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

NBA star Boris Diaw of the San Antonio Spurs takes young readers on safari as he explores his off-court passion: wildlife photography! Join Diaw as he escapes from stampeding wildebeests, comes face-to-face with lions, and discovers why you should never come between a hippo and its watery home. Through engaging stories and photos by Diaw, readers will discover a whole new side to this basketball champ. National Geographic Kids Chapter books pick up where the best-selling National Geographic Readers series leaves off, offering young animal lovers who are ready for short chapters lively, exciting, full-color true stories—just right to carry in backpacks, share with friends, and read under the covers at night.

The decline of elephant populations worldwide is happening very quickly and soon there may be no elephants left in the wild at all. Not only are these animals wonderful to see in their natural environments, but they also play an important role in the ecologies of Africa and Asia. Loss of the elephants would affect these environments very seriously. What is causing the decline in elephant populations? Can they be saved? How?

National Geographic Face to Face Readers is a high-interest series of books for confident, independent readers that have been adapted to a Key Stage 2 audience by education experts. The books pair magnificent National Geographic photographs with lively first-person text and fascinating facts about the natural world.

Join award-winning science writer Seymour Simon as he investigates the many characteristics and behaviors of one of the world's most beloved animals: the elephant! This nonfiction picture book is an excellent choice to share during homeschooling, in particular for children ages 6 to 8. It's a fun way to learn to read and as a supplement for activity books for children. From their ancient relatives, woolly mammoths and mastodons, to their amazingly versatile trunks and strong ivory tusks, elephants are some of the most fascinating animals on Earth. They are remarkably intelligent, demonstrate self-awareness, and feel familiar emotions like compassion and grief. With clear, simple text and stunning full-color photographs, readers will learn all about the largest land animals in the world! Perfect for young scientists' school reports, this book includes an author's note, a glossary, and an index and supports the Common Core State Standards.
