The study of criminal victimisation has developed to the stage where by victimology is now regarded as a central component to the study of crime and criminology. This focus of concern has been matched by the growth and development of support services for the victim of crime alongside increasing political concern with similar issues. The central purpose of this book is to bring together leading scholars to produce an authoritative handbook on victims and victimology

Prosecution Service policy affirms that domestic abuse offences are ‘particularly serious’ and prosecutors are reminded that it will be rare that the ‘public interest’ will not require of such offences through the criminal courts. Seeking to unpick some of the discourses and perspectives that may have contributed to the current prosecutorial commitment, the book considers its emergence within the context of the women’s movement, feminist scholarship and an era of neoliberalism. Three empirical chapters explore the prosecution commitment on the one hand, and the impact on women’s lives on the other. The book’s

major concerns for society as a whole. This book provides a succinct, highly readable - and much needed - introduction to criminology for those who want to learn more, whether they are already studying the subject, thinking of doing so, or just interested to discover what criminology is about. Introducing Criminology begins by asking basic questions: what is crime? what is criminology?, before examining the ways in which crime has been studied, and looking at the main approaches and schools of thought within criminology and how these have been developed. The authors focus particularly upon attempts to

Legal Responses to Domestic Violence

The crime of manslaughter exists as a 'catch-all offence' to punish those who are blameworthy in causing the death of another but whose culpability falls short of that required for murder. Manslaughter is an extremely broad offence and it has a difficult task in ensuring that all those who warrant punishment for 'non-aggressive'

deaths are convicted. Simultaneously, it should not be too broad in covering those who do not warrant punishment for such deaths. There is little consistency in whether a particular dangerous activity leads to liability for a specific offence or for the generic offence of manslaughter when death is caused. This book examines the current law and includes a variety of perspectives on the subject with chapters on specific modes of killing as well as issues that permeate all areas. The first half of the book deals with issues such as how any special

offences for non-aggressive death should relate to a hierarchy of homicide offences. The second half deals with issues specific to different activities, which may or may not justify the creation of specific homicide offences. The book includes a comparative chapter on Australian law.

The modern public prosecutor is a figure both powerful and enigmatic. Legal scholars and criminologists often identify “three essential components” of criminal justice systems: police, courts and corrections. Yet increasingly, the

public prosecutor occupies a distinct role independent from any of these branches. Acting outside of the court, and therefore largely out of the public eye, the prosecutor's control over whether and what charges proceed to court can limit judicial discretion on sentencing, open pathways to alternative measures and even deny entry into the criminal justice system entirely. In this sense the prosecutor serves as a true "gatekeeper" to the criminal process. This book addresses key aspects of the evolving role of domestic and international prosecutors in

common law and civil law systems in the twenty-first century, and the challenges posed by this evolution. This collection of chapters from respected scholars takes an international, comparative approach and explores how these different legal systems have borrowed theorisations and articulations of the prosecutorial role from each other in adapting the office to changing conditions and expectations. The volume is structured around four main themes relating to the role of the modern prosecutor: the nature of the

disciplines develop and change does not invite any easy answer, with the task made all the more difficult given the highly politicised nature of some subjects and the volatile, evolving status of its institutions and practices. A case in point is criminal justice: at once fairly parochial, much criminal justice scholarship is now global in its reach and subject areas that are now accepted as central to its study - victims, restorative justice, security, privatization, terrorism, citizenship and migration (to name just a few) - were topics unknown to the discipline half a century ago. Indeed, most criminologists would have once stoutly denied that they had anything to

do with it. Likewise, some central topics of past criminological attention, like probation, have largely receded from academic attention and some central criminal justice institutions, like Borstal and corporal punishment, have, at least in Europe, been abolished. Although the rapidity and radical nature of this change make it quite impossible to predict what criminal justice will look like in fifty years' time, reflection on such developments may assist in understanding how it arrived at its current form and hint at what the future holds. The contributors to this volume have been invited to reflect on the impact Oxford criminology has had on the discipline,

He goes on to argue that after

Gender and Policing

Policing UK Honour-Based Abuse Crime

Gender and Policing is an innovative study of the real world of street policing and the gender issues which are a central part of this. Derived from extensive ethnographic research (involving police responses to gangland shootings, high speed car chases as well as more routine policing activities), this book examines the way police attitudes and beliefs combine to perpetuate a working culture which is dependent upon traditional conceptions of 'male' and 'female'. In doing so it challenges previously held assumptions about the way women are harassed, manipulated and constrained, focusing

rather on the more subtle impact of structures and norms within police culture. Gender and Policing will be of interest to all those concerned with questions of policing and gender, and occupational culture more generally, while the theoretical framework developed will provide an important foundation for strategies of reform. At the same time the book provides a vivid and richly textured picture of the realities of operational policing in contemporary Britain.

The Encyclopedia of Domestic Violence is a modern reference from the leading international scholars in domestic violence research. This ground-breaking project has created the first ever publication of an encyclopedia of domestic violence. The primary goal of the Encyclopedia is to provide information on a variety of traditional, as well as breakthrough, issues in this complex phenomenon. The coverage of the Encyclopedia is broad and diverse, encompassing the entire life span from infancy to old age. The entries include the traditional research areas, such as battered women, child abuse and dating violence. However, this Encyclopedia is unique in that it includes many understudied areas of domestic violence, such as ritual abuse-torture within families, domestic violence against women with

One of the key special features in this Encyclopedia is the cross-reference section at the end of each entry. This allows the reader the ability to continue their research of a particular topic. This book will be an easy-to-read reference guide on a host of topics, which are alphabetically arranged. Precautions have been taken to ensure that the Encyclopedia is not politically slanted; rather, it is hoped that it will serve as a basic guide to better understanding the myriad issues surrounding this labyrinthine topic. Topics covered include: Victims of Domestic Violence; Theoretical Perspectives and Correlates to Domestic Violence; Cross-Cultural Perspectives

book discusses the needs and expectations of victims and examines how their choices impact on decisions made by police and prosecutors. Many books on the criminal justice response to domestic violence start from the premise that withdrawal of complaints by victims and the subsequent discontinuance of cases, represents some kind of failure on the part of the agencies involved and that victims would benefit from greater determination by police to prosecute offenders wherever possible. Implicit in this approach is the assumption that the criminal justice system as it presently operates is capable of

sexual violence, 'domestic' violence, 'domestic' murder, male-on-male violence and child abuse. It explores how sexual and 'domestic' violence have been represented in the media, in the law and in criminal justice processes. Not only does the book present a comprehensive introduction to the field, it also offers reflective questions at the end of each chapter to enable the reader to integrate and interrogate the material covered. Chapter summaries and annotated bibliographies enhance the learning process by helping students to consolidate and

further investigate key points. This book is essential for students and academics in criminology, criminal justice, sociology and gender studies.

This book aims to examine legal responses to domestic violence in a holistic way. In England and Wales, as in other jurisdictions, much attention has been paid to the criminal justice response to domestic violence. The response of the civil justice system has not been ignored, but has been somewhat marginalized. Legal Responses to Domestic Violence takes a systematic

approach to examining legal responses, encompassing the full range of decision makers within the legal system to analyze developments in substantive law and practice, in particular the movement towards an integrated justice approach.

It is a common perception that violent crime is on the increase and social surveys record a growing fear of victimisation among the public. Yet not all violence is criminalised, and much criminal violence still goes unreported. Punishing Violence examines the series of decisions - by victims, police

officers, prosecutors and courts - which determine whether or not violent behaviour is criminalised. Antonia Cretney and Gwynn Davis examine the relationships underpinning violence, the reasons for violent acts and the factors militating against successful court prosecutions. In doing so, they provide an authoritative account of the reality of assault and identify a serious dislocation between the purposes of victims and the purposes of the justice system in the treatment of violent crime. Debating Restorative Justice

Domestic Violence and Criminal Justice

The empirical study of law, legal systems and legal institutions is widely viewed as one of the most exciting and important intellectual developments in the modern history of legal research. Motivated by a conviction that legal phenomena can and should be understood not only in normative terms but also as social practices of political, economic and ethical significance, empirical legal researchers have used quantitative and qualitative

methods to illuminate many aspects of law's meaning, operation and impact. In the 43 chapters of The Oxford Handbook of Empirical Legal Research leading scholars provide accessible and original discussions of the history, aims and methods of empirical research about law, as well as its achievements and potential. The Handbook has three parts. The first deals with the development and institutional context of empirical legal research. The second - and largest - part consists of critical accounts of empirical research on many aspects of the legal world - on criminal law, civil law, public law, regulatory law and international law; on lawyers, judicial institutions, legal procedures and evidence; and on legal
