Severe Community Acquired Pneumonia is a book in which chapters are authored and the same topics discussed by North American and European experts. This approach provides a unique opportunity to view the different perspectives and points of view on this subject. Severe CAP is a common clinical problem encountered in the ICU setting. This book reviews topics concerning the pathogenesis, diagnosis and management of SCAP. The discussions on the role of alcohol in severe CAP and adjunctive therapies are important topics that further our understanding of this severe respiratory infection.

What do Mark Twain, David Beckham, Catherine Zeta-Jones, and Mother Teresa have in common? All have been enthusiastic fans of homeopathy, the alternative medical tradition that treats “like with like.” Homeopathy has an incredible history of support by many of the most respected people of the past 200 years, and modern science is finally catching up. In The Homeopathic Revolution, Dana Ullman blends vivid personal stories and quotes from these and other luminaries from a variety of eras and fields with a new definition of homeopathy as “nanopharmacology”—one that will help people, including skeptics, start to understand its value. After explaining why conventional medicine is inadequately scientific, why homeopathy makes sense and works, and why it is so threatening to conventional medicine and drug companies, Ullman lets legends like Coretta Scott King, Cindy Crawford, Bill Clinton, Vincent Van Gogh, and other practitioners weigh in on the subject. By writing about homeopathy’s heroes and telling their stories, Ullman is able to reference and describe important scientific studies in user-friendly language that verifies the value of this widely used but still misunderstood tradition.

The Faces of Homœopathy

With the increased popularity of alternative medicine, quality assurance and testing methods for alternative medicinal products has moved to the forefront of the field. And although regulation of these products varies from country to country, universally they are required satisfy the same quality requirements as the medicines used in allopathy. Filling the need for an authoritative resource, German Homoeopathic Pharmacopoeia contains monographs covering homoeopathic products and their related analytical and manufacturing techniques. Each monograph is uniformly structured supplying, where applicable: Origin Description Characteristics Identification Purity Tests Assays Basic dosage forms Manufacture Storage Completely revised and updated, the volumes put the latest information within easy reach. An extensive collection of manufacturing and testing techniques, German Homoeopathic Pharmacopoeia establishes standards to ensure the pharmaceutical quality and safety of homoeopathic medicinal products.

This volume examines the trends of early-age mortality across time and space and the methodological and theoretical problems inherent in such studies. The approach is interdisciplinary, with contributions from demography, biology, medicine, and economic and social history. The geographical range encompasses Europe, North America, Japan, and India. It makes clear the need for cautious treatment of historical data and points towards the design of techniques forappraising their quality, correcting distortions, and filling gaps.

This book traces the genesis, principles and practice of homeopathy, and discusses the reasons for its enduring popularity. Two hundred years ago, medicine had little to offer except blood letting and the administration of violent purgatives – practices which shortened the course of illness by hastening the death of the patient. Largely in reaction to what he correctly saw as the brutality and ineffectiveness of the medicine of his day, the eighteenth century German physician Samuel Hahnemann developed a system of therapeutics that he termed homeopathy. Ironically, while modern medicine has changed beyond recognition, homeopathy, with its roots in alchemy and metaphysics, continues to be practiced precisely as it was in Hahnemann’s day. Readers of this book will enjoy the story of homeopathy and its almost magical attraction, whilst learning much from the authors’ rational and scientific discussion of the biological, chemical and psychological questions that this treatment raises.

Medical expert Paul A. Offit, M.D., offers a scathing exposé of the alternative medicine industry, revealing how even though some popular therapies are remarkably helpful due to the placebo response, many of them are ineffective, expensive, and even deadly. Dr. Offit reveals how alternative medicine—an unregulated industry under no legal obligation to prove its claims or admit its risks—can actually be harmful to our health. Using dramatic real-life stories, Offit separates the sense from the nonsense, showing why any therapy—alternative or traditional—should be scrutinized. He also shows how some nontraditional methods can do a great deal of good, in some cases exceeding therapies offered by conventional practitioners. An outspoken advocate for science-based health advocacy who is not afraid to take on media celebrities who promote alternative practices, Dr. Offit advises, “There’s no such thing as alternative medicine. There’s only medicine that works and medicine that doesn’t.”

The explosion of information about complementary and alternative medicine (CAM) has demanded the attention of health professionals and responsible consumers, in cluding the elderly. Increasingly, medical schools are providing education about CAM. This book brings together for academicians and interested mainstream practitio ners much of the current information on CAM and its role in the health of the elderly. The individual chapters are thoroughly researched and quite readable, even for patients and the lay public concerned with the state of the evidence and art supporting CAM’s role in prevention and management of illness and well-being. This book provides edu cators with much necessary information needed to prepare coursework and learning activities. Although definitive data are lacking regarding efficacy and even safety of CAM methodologies, many chapters in this book summarize the existing evidence in a us able way. The topics analyzed range from well-accepted therapies, such as vitamin E for dementia and zinc tablets for the common cold, to far less conventional therapies such as transcendental meditation. The conclusions are often surprising, but well-presented and defended. Even the most highly controversial areas, such as the use of acupuncture to treat low back pain and osteoarthritis of the knee, are thoroughly and fairly re viewed. Finally, the chapters address some of the political issues that challenge CAM. These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method, and some of the state-to-state variations in prac tice standards and licensure.

This volume includes the full Health Technology Assessment (HTA) report on effectiveness, appropriateness, safety and costs of homoeopathy in health care. The report was commissioned by the Swiss health authorities to inform decision-making on the further inclusion of homoeopathy in the list of services covered by statutory health insurance. Other studies carried out as part of the Swiss Complementary Medicine Evaluation Programme (PEK) caused a massive stir due to their schematic and exclusively quantitative (negative-)outcomes for homoeopathy. The present report, in contrast, offers a differentiated evaluation of the practice of homoeopathy in health care. It confirms homoeopathy as a valuable addition to the conventional medical landscape – a status it has been holding for a long time in practical health care.

Lyme Disease And Rife Machines With Critical Evaluation of Leading Alternative Therapies

WHY RIFE MACHINES? Lyme Disease is caused by Borrelia Burgdorferi, a spirochete bacteria similar to the bacteria that causes Syphilis . Lyme Disease is known as the “Great Imitator” – It can masquerade as Attention Deficit Disorder , Chronic Fatigue Syndrome , Fibromyalgia, Obsessive Compulsive Disorder , Alzheimer’s Disease , Schizophrenia , Depression , Multiple Sclerosis , arthritis , heart conditions, and more. The July, 2004 issue of Townsend Letter for Doctors and Patients indicates that Lyme Disease is thought to be the fastest spreading infectious disease in the world, with more than 200,000 new cases per year in the United States alone. Lyme Disease tests are notoriously inaccurate, leading to rampant under-diagnosis of the disease (See Appendix A). But even the people who are lucky enough to receive an accurate diagnosis do not always respond to antibiotic therapy. Aggressive antibiotic therapy, applied by a Lyme Literate Medical Doctor (LLMD), sometimes fails to provide a cure. Many patients take antibiotics for years, often in combinations of two or three drugs simultaneously – yet in some cases the infection becomes chronic anyway, and numerous Lyme Disease sufferers end up staying sick, losing their jobs, getting dropped by insurance companies, going broke, and losing hope. These monumentally discouraging obstacles facing Lyme Disease sufferers have led many of them to explore the rife machine treatment option, a promising electromagnetic therapy which often works after antibiotics fail.

Today, one out of every three Americans uses some form of alternative medicine, either along with their conventional (“standard,” “traditional”) medications or in place of them. One of the most controversial—as well as one of the most popular—alternatives is homeopathy, a wholly Western invention brought to America from Germany in 1827, nearly forty years before the discovery that germs cause disease. Homeopathy is a therapy that uses minute doses of natural substances—minerals, such as mercury or phosphorus; various plants, mushrooms, or bark; and insect, shellfish, and other animal products, such as Oscillocoocinum. These remedies mimic the symptoms of the sick person and are said to bring about relief by “entering” the body’s “vital force.” Many homeopaths believe that the greater the dilution, the greater the medical benefit, even though often not a single molecule of the original substance remains in the solution. In Copeland’s Cure, Natalie Robins tells the fascinating story of homeopathy in this country; how it came to be accepted because of the gentleness of its approach—Nathaniel Hawthorne and Henry Wadsworth Longfellow were outspoken advocates, as were Louisa May Alcott, Harriet Beecher Stowe, and Daniel Webster. We find out about the unusual war between alternative and conventional medicine that began in 1847, after the AMA banned homeopaths from membership even though their medical training was identical to that of doctors practicing traditional medicine. We learn how homeopaths were increasingly considered not to be “real” doctors, and how “real” doctors risked expulsion from the AMA if they even consulted with a homeopath. At the center of Copeland’s Cure is Royal Samuel Copeland, the now-forgotten maverick senator from New York who served from 1923 to 1938. Copeland was a student of both conventional and homeopathic medicine, an eye surgeon who became president of the American Institute of Homeopathy, dean of the New York Homeopathic Medical College, and health commissioner of New York City from 1918 to 1923 (he instituted unique approaches to the deadly flu pandemic). We see how Copeland straddled the worlds of politics (he befriended Calvin Coolidge, Herbert Hoover, and Franklin and Eleanor Roosevelt, among others) and medicine (as senator, he helped get rid of medical “diploma mills”). His crowning achievement was to give homeopathy lasting legitimacy by including all its remedies in the Federal Food, Drug, and Cosmetic Act of 1938. Finally, the author brings the story of clashing medical beliefs into the present, and describes the role of homeopathy today and how some of its practitioners are now adhering to the strictest standards of scientific research—controlled, randomized, double-blind clinical studies.
