

Patient Zero (A Medical Thriller)

"Third year medical student Raj Mok is excited about starting his clinical rotations. Finally, he'll be taking care of real patients instead of just reading about diagnoses and treatments in his countless medical tomes. Unfortunately, Raj quickly learns that patients don't behave like his beloved books led him to believe." -- from publisher's website. A doctor's life gets turned upside by a dangerous new technology in this thought-provoking medical thriller from #1 New York Times bestselling author Robin Cook. George Wilson, M.D., a radiology resident in Los Angeles, is about to enter a profession on the brink of an enormous paradigm shift, foreshadowing a vastly different role for doctors everywhere. The smartphone is poised to take on a new role in medicine, no longer as a mere medical app but rather as a fully customizable personal physician capable of diagnosing and treating even better than the real thing. It is called iDoc. George's initial collision with this incredible innovation is devastating. He awakens one morning to find his fiancée dead in bed alongside him, not long after she participated in an iDoc beta test. Then several of his patients die after undergoing imaging procedures. All of them had been part of the same beta test. Is it possible that iDoc is being subverted by hackers—and that the U.S. government is involved in a cover-up? Despite threats to both his career and his freedom, George relentlessly seeks the truth, knowing that if he's right, the consequences could be lethal.

In his sensational novel *The Descent*, Jeff Long created a world of stunning terror and adventure, "an imaginative tour de force" (Jon Krakauer). Now he imagines a scenario so vivid, so haunting, it anchors his place among storytelling masters. *YEAR ZERO* An archaeological manhunt is raging in the holy land -- a hunt for the historical Jesus. For Nathan Lee Swift, a young American field researcher and expectant father, the line between noble discovery and the plunder of ruins is sacred -- until the night he crosses it. At a Roman landfill beneath the crucifixion grounds known as Golgotha, Nathan Lee yields to his professor's greed and turns common grave robber. His world -- his unborn daughter -- seems lost to him. Hundreds of miles away, on the remote Greek island of Corfu, a wealthy collector pries open his latest black-market purchase -- a fourteen-inch holy relic containing a vial of blood dating back to the first century -- and unleashes a two-thousand-year-old plague. As the pandemic explodes from the Mediterranean basin and threatens to devour humankind, Nathan Lee gets a chance at redemption. He embarks on an Odyssean journey back to the United States to find his family. Skirting the edges of the world, Nathan Lee's path finally leads him to New Mexico, where the greatest minds of science have converged at Los Alamos to find a vaccine. There Nathan Lee meets Miranda Abbot, a nineteen-year-old prodigy. As the cure continues to elude them, Miranda launches a desperate final strategy: the use of human lab rats cloned from the year zero. Nathan Lee, the thief of bones, comes face-to-face with men made from the very relics he looted, one of whom claims to be Jesus Christ, but may also be Patient Zero. Combining the scientific precision of *The Andromeda Strain* with the intensity of classic adventure epics, Jeff Long takes readers on a riveting voyage through the rubble of earthquake-torn Jerusalem, the serenity of the high Himalayas, and the eerie sanctuary of Los Alamos. With Long's characteristic originality, *Year Zero* races against the apocalyptic clock, creating a maze of twists, astonishing atmosphere, and the clash of science and faith.

"At an internment camp in Indonesia, within one week, forty-seven people are pronounced dead with acute hemorrhagic fever. When the microbiologist and epidemiologist Henry Parsons travels there on behalf of the World Health Organization to investigate, what he finds will soon have staggering repercussions across the globe: an infected man is on his way to join the millions of worshippers in the annual Hajj to Mecca. Now, Henry joins forces with a Saudi doctor and prince in an attempt to quarantine the entire host of pilgrims in the holy city"--

Kill Shot

Politics, People, and the AIDS Epidemic

The November Girl

Pandemic

A Shadow Industry, a Deadly Disease

Was it murder? Was it horribly botched surgery - accidental malpractice? Was someone in the great Boston medical centre -violating the Hippocratic oath? No one knows exactly. . . Only one doctor is willing to push his way through the mysterious maze of hidden medical data and shocking secrets to learn the truth. This explosive medical thriller is vintage Michael Crichton - with the breathtaking blend of riveting suspense and authentic medical detail that has made him one of today's most fascinating writers.

Botching a major surgery when his ambition for a prestigious job gets the better of him, Steve Mitchell learns that a patient who died under mysterious circumstances was targeted by a sociopath who holds information capable of destroying Steve's family and career. 100,000 first printing.

An exciting new series based on the hit family game *Pandemic* begins with a deadly disease breaking out in darkest Peru - it's up to a crack team of experts to find the source before it spreads, in this taut airport thriller. Bodhi Patel is the brand new Lead Epidemiologist for the world's top epidemic specialists, Global Health Agency, but there's no time to settle in: his new boss, Helen Taylor, deploys GHA to contain a mysterious new killer virus spreading into Brazil. On the ground they learn that the virus is loose in a region controlled by a heavily armed drug warlord, and the race against time to discover a cure just got a whole lot tougher. Meanwhile, Bodhi finds himself with a newly reshuffled team still smarting from the changes, including his ex - the last person he expected to be working with.

Engrossing true stories of the pioneers of epidemiology who risked their lives to find the source of deadly diseases—now revised to include updated information and a new chapter on Covid-19. More people have died in disease epidemics than in wars or other disasters, but the process of identifying these diseases and determining how they spread is often a terrifying gamble. Epidemiologists have been ignored, mocked, or silenced all while trying to protect the population and identify “ patient zero ” —the first person to have contracted the disease, and a key

piece in solving the epidemic puzzle. Patient Zero tracks the gripping tales of eight epidemics and pandemics—how they started, how they spread, and the fight to stop them. This revised edition combines a brand-new design with updated information and features diseases such as Spanish Influenza, Ebola, and AIDS, as well as a new chapter on Covid-19.

And The Band Played on

The Eye of the Virus

A Case of Need

13 Days to Die

Fevers, Feuds, and Diamonds

Not since Pandemic have we seen a thriller like this from bestselling author Daniel Kalla: The plague has hit Italy. Can Dr. Alana Vaughn find the source in time to save the world? No person is left unscathed, no family untouched. Death grows insatiable. Alana Vaughn, an infectious diseases expert with NATO, is urgently summoned to Genoa by an ex-lover to examine a critically ill patient. She's stunned to discover that the illness is a recurrence of the Black Death. Alana soon suspects bioterrorism, but her WHO counterpart, Byron Menke, disagrees. In their desperate hunt to track down Patient Zero, they stumble across an 800-year-old monastery and a medieval journal that might hold the secret to the present-day outbreak. With the lethal disease spreading fast and no end in sight, it's a race against time to uncover the truth before millions die.

We always want to believe history happened to those in the past. Many aspects of historical events were unforeseen. However, not this one.

Warnings had been issued, yet the world was unprepared for the invisible enemy that threatened to kill us all. WELCOME TO THE NEXT GLOBAL WAR

From the imaginative mind of international bestselling author, Bobby Akart, comes a series ripped from today's headlines. Meet the Virus Hunters, the disease detectives on the front line of a never-ending battle to save humanity from viruses one-billionth our size. "Scientifically accurate, top notch entertainment and electrifying excitement ..." Deadly outbreaks of diseases make headlines, but not at the start. Every pandemic begins small, subtle, and in faraway places. When it arrives, it spreads across oceans and continents, like the sweep of nightfall, killing millions, or even billions. The hunt for a silent killer continues in this heart-pounding, page-turning thriller. Not even a doctor's white coat is protection from this virus that's one-billionth our size. Dr. Harper Randolph searches for evidence and her gut tells her the answers lie in one of the most secretive places on the planet - China. "Characters are well developed, a plot that is intriguing and a novel that educates the reader at the same time. Most highly recommended!" Amazon Hall of Fame Reviewer With the help of a new partner, she follows the clues and enters the mysterious world of China's underground where both allies and enemies await. The stakes get higher the closer she gets to Patient Zero. Will she find the origin of this novel virus threatening the planet? Will she be silenced by those whose secrets resulted in a global pandemic in the recent past? Bobby Akart has delivered up-all-night thrillers to readers in 245 countries and territories worldwide. His new Virus Hunters novels will give you pause and remind you that we're in a global war for survival against an unseen foe. "Bobby Akart writes a scientific thriller better than anyone else." SPECIAL DEDICATION: Finally, this series is dedicated to the Virus Hunters - the disease detectives, shoe-leather epidemiologists of the CDC's Epidemic Intelligence Service who work tirelessly to keep these deadly infectious diseases from killing us all. Thank you!

A novella for the times.... WILL IT BE POSSIBLE TO TRACK DOWN THE VERY FIRST CASE OF COVID-19 BEFORE THE UNTHINKABLE OCCURS? "Another Wil Mara sensation! This medical thriller is a fascinating tale right in tune with the pandemic that dominates our lives. A page-turner that will take you through a series of twists and turns and have you guessing right up to the last moment." --Dr. Marty Hewlett, Virologist, Professor Emeritus, University of Arizona After a long run of successful crusades to resolve the most tantalizing mysteries of our age--everything from the disappearance of Amelia Earhart and the assassination of JFK to the death of Princess Diana--billionaire sleuth Jason Hammond has been lying low at his New Hampshire estate. But now, in the midst of the deadliest pandemic in over a century, the US government has arrived on Jason's doorstep seeking the kind of help that only he can provide. They're hoping to mobilize his unmatched investigative skills, the considerable resources of his vast empire, and, most of all, his untarnished goodwill in the eyes of the public, to answer what is now the most pressing question on the planet--what is the true origin of Covid-19, aka the 'coronavirus'? Was it really a mutated product of nature, as some insist, or the creation of unhinged minds looking to plunge humanity into a nightmarish era of bioengineered conflict? Tensions between the giants of the global stage are rising fast, with nearly every human life at risk. Can Jason really find the key to ratcheting down this unprecedented degree of geopolitical hostility before the missiles start flying?

Welcome to the hot zone! Caught in a raging pandemic, disease detectives put it all on the line to find Patient Zero. Through all the coughing, choking and misery of a killer virus on the loose, public health officials must combat Chinese secrecy, U.S. drug company interests and a criminal coverup to stop the disease in its tracks. But are they too late? Enjoy this close-up, clinical look at an unfolding disaster, with a Chinese city in crisis, relationships lost, international criminal justice in action, and a medical community's desperate search for Patient Zero. "This novel sparkles!" - author Henry D. Smith

**Viable Threat
Patient Zero
Virus Hunters 3
Seven Patients
Ebola**

Something dark lurks in the wilds of Southern Nigeria. An experiment has gone horribly wrong and threatens to wipe all traces of humanity from Earth. 3rd Ranger Battalion, Bravo Company is sent in to assist, clean up the mess before it gets out of control. They've vanished. Sean Ryder is an Air Force Pararescueman. Attached to SEAL Team 8, he believes he is on a routine rescue and recovery mission. Less than half an hour after landing in Nigeria, he knows that is not the case. And the further his mission leads him, the harder it becomes to get out alive. Patient Zero is the first book in the zombie apocalypse / post-apocalyptic series Affliction Z. "Estimated Publishing Dates: " Affliction Z: Book Two - May, 2013 Affliction Z: Book Three - Late Summer/Early Fall, 2013 Affliction Z: Book Four - TBD The Sickness of Ronald Winters: A Novella - June, 2013 Untitled: A First Person Account of Affliction Z - TBD

Examines the emergence and causes of new diseases all over the world, describing a process called "spillover" where illness originates in wild animals before being passed to humans and discusses the potential for the next huge pandemic. 70,000 first printing.

**Instant National Bestseller In this explosive new thriller from international bestselling author Daniel Kalla, an experimental vaccine is deployed to battle a lethal outbreak—until patients start dying of unknown causes. An ordinary day The city of Seattle is stunned when a deadly bacteria tears through a nearby Bible camp. Early tests reveal the illness is a form of meningitis, and the camp's residents are among its most vulnerable victims: children and teenagers. A new vaccine Facing a rapidly rising death rate, Seattle's chief public health officer, Lisa Dyer, and her team quickly take all steps necessary to contain the devastating outbreak. And when further testing reveals that the strain of the bacteria is one that caused catastrophic losses in Iceland six months before, Lisa decides to take a drastic step: she contacts Nathan Hull, vice president of a pharmaceutical company that is doing final-phase trials on a viable vaccine, and asks him to release it early for use on the city's population. An epidemic in the making Lisa gets the go-ahead on her controversial plan, despite the protests of dubious government officials, anti-vaxxers, and even those on her own team. Vaccine clinics roll out across the city, and the risky strategy appears to be working, leaving Lisa, Nathan, and thousands of others breathing a sigh of relief. Until people start dying from mysterious and horrific causes—and the vaccine itself is implicated. But what if science isn't to blame?*

Dr. Mackenzie Hagan, a disease detective and epidemiologist at the CDC-Atlanta and Nathan Hunter, an off-the-books operative for the mysterious Project Artemis within the Department of Defense, who have crossed the globe in search of clues, have realized that this infectious disease is like no other, and with the jihadists implementing the plague as a tool of bioterror, there is not just one Patient Zero, but thousands. Can a cure be found? Will the politicians who are responsible for protecting our nation from all forms of enemies warn the public? Is it too late? Just a few of the many questions posed in this second book of the Pandemic series.

Profile of a Killer Virus

A Post-apocalyptic Medical Thriller

Blood of the White Bear

Bombay Fever

Patient Zero A Medical Thriller Independently Published

*Special Forces soldier and medic Walter River would give anything to snatch more than a few seconds of down time to see if he can rattle the no-nonsense and incredibly hot Dr. Lloyd he's protecting, but dodging explosions, snipers, and student radicals who've unleashed a lethal bio-engineered microorganism have made that almost impossible. Maybe he'll get a chance—if he can figure out how to keep them both alive. CDC microbiologist Ava Lloyd races to find a cure for a bio-terrorism organism sweeping El Paso. The few stolen moments with her very hunky bodyguard River have been explosive, but no matter how alluring he is, she can't afford to get distracted. The clock is ticking, people are dying by the hundreds, and once this crisis is solved, they'll both be off on their next assignment, thousands of miles apart. Each book in the Outbreak Task Force series is STANDALONE: * Viable Threat * Smoke & Mirrors * Sleight of Hand * Search & Destroy * Hell & Back*

In the bestselling tradition of Richard Preston's now-classic medical thriller The Hot Zone and reminiscent of the blockbuster films Outbreak and Contagion, a fast-paced, page-turning thriller set in India about a deadly disease and the heroic efforts to contain the plague before it's too late... In the courtyard of a Hindu temple in Switzerland, a woman collapses in the arms of a visiting Indian journalist, her body reduced to a puddle of blood. Never before has anyone seen anything like this. Three months later, all over Mumbai, men, women and children are ravaged by a disease that begins with initially mild symptoms—that swiftly progress until an ultimately gruesome death. Who will it hit next? And where did it come from? As the rogue microbe wreaks its bloody havoc—striking rich and poor, young and old—chaos ensues. Thousands try to flee the city, including the most powerful man

in the country. Can this deadly plague be stopped? After all, all that stands between the city and apocalypse is a ragged team of doctors, civil servants, and scientists. But their intervention may be too little, too late. Suspenseful and gripping from the first page to the last, Bombay Fever is a meticulously researched novel—too plausible to ignore and too chilling to put down—from one of India's most talented writers.

It's 1999, and most of the world's computers, according to common belief, are set to regard the coming year as "Year Zero" rather than 2000. The Devil certainly appears to think so, and is planning an apocalypse of evil for New Year's Eve. Unfortunately, Molly, who's having a hard enough time just trying to stay clean and get her kids back from Social Services, becomes accidentally entangled in the Devil's scheme. Her potential allies—Elvis, various fallen angels, little gray men, Britain's Men in Black, the masterminds of Peaslee Pharmaceuticals, and "sanity"—all prove impotent to help her out. It looks as if Molly's going to have to frustrate the Devil's plans all by herself—but it certainly won't be easy! A grand science-fantasy adventure!

Patient Zero (Revised Edition)

Virus Hunters 1

Chromosome 6

Pandemic: Patient Zero

The Vines

A new strain of avian influenza makes its debut in a small village in Vietnam. Like a ricocheting bullet, the virus affects the lives people worldwide until it is stopped by a team of epidemiologists. Myriam is a British PR executive on holiday with her husband when he becomes the first person infected in Hong Kong. Her life is completely changed by the experiences she never predicted. Brian is an American scientist who invents a new antiviral medication, but fakes test data so that it can be released early. Jie is an epidemiologist at the CDC in Beijing, who will solve the puzzle of the new virus. As the unknown virus quickly spreads its way across the globe, entire societies are affected and changed by the outbreak. The reader with the ultimate question: What would be important to you, what would you do, if a pandemic actually occurred?

The world is grappling with an issue of enormous scale and human impact. In the arms race with deadly pathogens, there can be no final peace. The only question is whether we fight poorly. Defeat means massive disruptions to our daily lives, huge losses economically, and death. From the imaginative mind of international bestselling author, Bobby Akart, comes a series ripped from today's headlines. Meet the Virus Hunters, the disease detectives on the front line of a never-ending battle to save humanity from viruses one-billionth our size. Coming in the Virus Hunters trilogy. "Few books or writers have captured my attention like Bobby Akart." Mr. Akart has delivered up-all-night thrillers in his forty-plus novels. His new Virus Hunters will give you pause and remind you that we're in a global war for survival against an unseen foe. With a Bobby Akart novel, "You are there. Feeling what they feel. Anger, joy, love, mystery. You feel it all. Not everyone can write a book like this. It takes a special writer to make you feel a book." The entire Virus Hunters trilogy is available for preorder and will release this fall from May through August. SPECIAL DEDICATION: Finally, this series is dedicated to the Virus Hunters - the disease detectives, shoe-leather epidemiologists of the CDC's Epidemic Intelligence Service who work tirelessly to keep these deadly infectious diseases from killing us all. Thank you!

The fight to defeat new, deadly pathogens never ends. Each time we achieve a victory, the battleground shifts. There is a new outbreak, a new virus, a new enigma. The microbes are lurking in search of human prey. We find them. From the imaginative mind of international bestselling author, Bobby Akart, comes a series ripped from today's headlines. Meet the Virus Hunters, the disease detectives on the front line of a never-ending battle to save humanity from viruses one-billionth our size. "Akart is a master of suspense, keeping us on the edge of our seats. But, he does it with fact-based fiction that would scare even the most hardened readers." The hunt for Patient Zero sends Dr. Harper Randolph to a faraway land. As she presses forward to discovering the truth, she's chased by a government trying to hide the truth. She follows the evidence to the first kill, but are all the answers there? "There are very few authors who consistently deliver novels that I simply have to finish within 48 hours of their release, but Bobby Akart is one of those authors." From Beijing to Tibet to Kathmandu, the Virus Hunters get closer to revealing the origin of the mysterious, deadly disease. Dr. Harper Randolph and her new partner, Dr. Li Kwon will soon learn the dead keep their secrets. Secrets that should be buried as deep as possible. "Bobby Akart has a knack for making you want to keep turning those pages to see what happens next, right to the end of the book!" Mr. Akart has delivered up-all-night thrillers to readers in 245 countries and territories worldwide. His new Virus Hunters novels will give you pause and remind you that we're in a global war for survival against an unseen foe. SPECIAL DEDICATION: Finally, this series is dedicated to the Virus Hunters - the disease detectives, shoe-leather epidemiologists of the CDC's Epidemic Intelligence Service who work tirelessly to keep these deadly infectious diseases from killing us all. Thank you!

An award-winning investigative journalist's horrifying true crime story of America's deadliest drug contamination outbreak and the greed and deception that fueled it. Two pharmacists in a Boston courtroom accused of murder. The weapon: the fungus *Exserohilum rostratum*. The death count: 100 and rising. Kill Shot is the story of their hubris and fraud, discovered by medical detectives who raced against the clock to hunt the killers and the fungal meningitis they'd unleashed. "Bloodthirsty" is how doctors described the fungal microbe that contaminated thousands of drug vials produced by the New England Compounding Center (NECC). Though NECC chief Barry Cadden called his company the "Ferrari of Compounders," it was a slapdash operation of unqualified staff, mold-ridden lab surfaces, and hastily made medications that were injected into approximately 14,000 people. Once inside some of its human hosts, the drug traveled through the tough tissue around the spine and wormed upward to the "deep brain," our control center for balance, breath, and the vital motor functions of life. Now, inves

journalist Jason Dearen turns a spotlight on this tragedy--the victims, the heroes, and the perpetrators--and the legal loopholes that allowed it to occur. Kill Shot forces a powerful unchecked industry out of the shadows.

Covid Patient Zero

A Beautiful Poison

We All Fall Down

Ebola and the Ravages of History

Solving the Mysteries of Deadly Epidemics

LOCUS Magazine: A Best Book of 2017! I am Anda, and the lake is my mother. I am the November storms that terrify sailors and sink ships. With their deaths, I keep my little island on Lake Superior alive. Hector has come here to hide from his family until he turns eighteen. Isle Royale is shut down for the winter, and there's no one here but me. And now him. Hector is running from the violence in his life, but violence runs through my veins. I should send him away, to keep him safe. But I'm half human, too, and Hector makes me want to listen to my foolish, half-human heart. And if I do, I can't protect him from the storms coming for us.

First discovered in 1976, and long regarded as an easily manageable virus affecting isolated rural communities, Ebola rocketed to world prominence in 2014 as a deadly epidemic swept through Guinea, Sierra Leone, and Liberia in West Africa. Thousands of people died as the extraordinarily contagious disease spread rapidly from villages to urban centres. Initial quarantine responses proved often too little and too late, and the medical infrastructure of the affected countries struggled to cope. By August 2014, several months after the start of the outbreak, the WHO declared the epidemic a public health emergency and international aid teams and volunteers began to pour in. But halting the epidemic proved to be hugely challenging, not only in terms of the practicalities of dealing with the sheer numbers of patients carrying the highly infectious virus, but in dealing with social and cultural barriers. The author, Dorothy Crawford, visited Sierra Leone while the epidemic was ongoing and met with those on the frontline in the fight against the virus. In Ebola Crawford combines personal accounts from these brave medical workers with the latest scientific reports to tell the story of the epidemic as it unfolded, and how it has changed our understanding of the virus. She looks at its origin and spread, the international response, and its devastating legacy to the health of those living in the three worst affected countries. She describes the efforts to prevent international spread, the treatment options for Ebola, including the drug and vaccine trials that eventually got underway in 2015, and the sensitive issue of running trials of experimental therapies during a lethal epidemic. Our understanding of the Ebola virus continues to develop as long-term health problems and complications following recovery from the disease are being identified. Epidemics of Ebola or other dangerous microbes will continue to threaten the world regularly. Already concerns have been raised by the possible impact of the Zika virus. What lessons have been learnt from Ebola? How, asks Crawford, might we prevent a repeat of the awful suffering seen in 2014-16?

Dr. Rachel Bisette is drawn to the Four Corners to lead the search for a vaccine against a lethal pandemic. One elusive indigenous woman, Eva Yellow Horn, carries the gift of immunity. In her search for Eva, Rachel discovers power beyond science, the secret of an environmental disaster, and the truth of her parents' death.

An examination of the AIDS crisis exposes the federal government for its inaction, health authorities for their greed, and scientists for their desire for prestige in the face of the AIDS pandemic.

Patient Zero and the Making of the AIDS Epidemic

Lost Immunity

A Joe Ledger Novel

Imagine a killer with the infectiousness of the common cold and power of the Black Death. Imagine something so deadly that it wipes out 90% of those it touches. Imagine an organism against which there is no defence. But you don't need to imagine. Such a killer exists: it is a virus and its name is Ebola. The Hot Zone tells what happens when the unthinkable becomes reality: when a deadly virus, from the rain forests of Africa, crosses continents and infects a monkey house ten miles from the White House. Ebola is that reality. It has the power to decimate the world's population. Try not to panic. It will be back. There is nothing you can do...

Award-Winner of the Cross Genre category and Award-Winning Finalist of the Mystery/Suspense, Historical Fiction, and General Fiction categories of the 2021 International Book Awards In the shadows of New York City lies the abandoned, forbidden North Brother Island, where the remains of a shuttered hospital hide the haunting memories of century-old quarantines and human experiments. The ruins conceal the scarred and beautiful Cora, imprisoned there by contagions and the doctors who torment her. When Finn, a young urban explorer, arrives on the island and glimpses this enigmatic woman through the foliage, intrigue turns to obsession as he seeks to uncover her past--and his own family's dark secrets. By unraveling these mysteries, will he be able to save Cora? Or will she meet the same tragic ending as the thousands who've already perished on the island? The Vines intertwines North Brother Island's horrific and elusive history with a captivating tale of love, betrayal, survival, and loss.

Three friends go against their parents' wishes and enter the old house that's been sitting abandoned on the edge of town for over a hundred years, and quickly realize getting back out isn't simply a matter of turning around.

Just beyond the Gilded Age, in the mist-covered streets of New York, the deadly Spanish influenza ripples through the city. But with so many victims in her close circle, young socialite Allene questions if the flu is really to blame. All appear to have been poisoned—and every death was accompanied by a mysterious note. Desperate for answers and dreading her own engagement to a wealthy gentleman, Allene returns to her passion for scientific discovery and recruits her long-lost friends, Jasper and Birdie, for help. The investigation brings her closer to Jasper, an apprentice medical examiner at Bellevue Hospital who still holds her heart, and offers the delicate Birdie a last-ditch chance to find a safe haven before her fragile health fails. As more of their friends and family die, alliances shift, lives become entangled, and the three begin to suspect everyone—even each other. As they race to find the culprit, Allene, Birdie, and Jasper must once again trust each other, before one of them becomes the next victim.

The Gemini Virus

The Innocents

A Novel

Affliction Z

Cell

New York Times-bestselling author Robin Cook takes on the cutting-edge world of gene-modification in this pulse-pounding new medical thriller. When an unidentified, seemingly healthy young woman collapses suddenly on the New York City subway and dies upon reaching the hospital, her case is an eerie reminder for veteran medical examiner Jack Stapleton of the 1918 flu pandemic. Fearful of a repeat on the one hundredth anniversary of the nightmarish contagion, Jack autopsies the woman within hours of her demise and discovers some striking anomalies: first, that she has had a heart transplant, and second, that, against all odds, her DNA matches that of the transplanted heart. Although the facts don't add up to influenza, Jack must race against the clock to identify the woman and determine what kind of virus could wreak such havoc—a task made more urgent when two other victims succumb to a similar rapid death. But nothing makes sense until his investigation leads him into the fascinating realm of CRISPR/CAS9, a gene-editing biotechnology that's captured the imagination of the medical community. . . and the attention of its most unethical members. Drawn into the dark underbelly of the organ transplant market, Jack will come face-to-face with a megalomaniacal businessman willing to risk human lives in order to conquer a lucrative new frontier in medicine—and if Jack's not careful, the next life lost might be his own.

The search for a “patient zero”—popularly understood to be the first person infected in an epidemic—has been key to media coverage of major infectious disease outbreaks for more than three decades. Yet the term itself did not exist before the emergence of the HIV/AIDS epidemic in the 1980s. How did this idea so swiftly come to exert such a strong grip on the scientific, media, and popular consciousness? In *Patient Zero*, Richard A. McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries-old ideas—and fears—about contagion and social disorder. McKay presents a carefully documented and sensitively written account of the life of Gaétan Dugas, a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV/AIDS epidemic developed—and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American outbreak. McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis; how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS; and how many individuals grappled with the notion of patient zero—adopting, challenging and redirecting its powerful meanings—as they tried to make sense of and respond to the first fifteen years of an unfolding epidemic. With important insights for our interconnected age, *Patient Zero* untangles the complex process by which individuals and groups create meaning and allocate blame when faced with new disease threats. What McKay gives us here is myth-smashing revisionist history at its best.

#1 AMAZON BESTSELLING MEDICAL THRILLER Red Sparrow meets Inferno in Matt Miksa's debut which electrifies a Cold War spirit with fresh, modern-day expertise as our heroes wrestle society's darkest nightmares. In a far-flung Tibetan village, prayer flags flap against whitewashed houses and a majestic monastery stretches to heaven. It's Shangri-La--the earthly paradise--until a stranger staggers out of the forest and collapses into a bloody, lifeless mass. He's the first victim of a crippling epidemic, but he's no ordinary man. Olen Grave, an American intelligence officer, heads directly into the hot zone to investigate. Posing as a journalist, he joins the Chinese research team, led by a headstrong female virus hunter, Dr. Zhou Weilin. Together, the unlikely allies discover that Patient Zero was a spy who deliberately infected himself. But why? Who did he work for? As Olen and Dr. Zhou rush to uncover the shocking truth behind the epidemic, they unravel a twisted conspiracy that reaches from Beijing's great halls to Washington's corridors of power. With the superpowers now at the brink of war, the fate of the world will rest on the duo's shoulders.

Behind the headlines on cloning--Dr. Robin Cook blends fact with fiction in one of his most terrifying bestsellers... *Chromosome 6* is a prophetic thriller that challenges the medical ethics of genetic manipulation and cloning in the jungles of equatorial Africa, where one mistake could bridge the gap between man and ape--and forever change the genetic map of our existence...

A Thriller

A Pandemic Novel

Spillover: Animal Infections and the Next Human Pandemic

The End of October

"Paul Farmer brings his considerable intellect, empathy, and expertise to bear in this powerful and deeply researched account of the Ebola outbreak that struck West Africa. It's hard to imagine a more timely or important book." —Bill and Melinda Gates "[The] history is as powerfully conveyed as it is tragic . . . Illuminating . . . Invaluable." —Steve

New York Times Book Review In 2014, Sierra Leone, Liberia, and Guinea suffered the worst epidemic of Ebola in history. The brutal virus spread rapidly through a clinical basic health-care facilities were few and far between. Causing severe loss of life and economic disruption, the Ebola crisis was a major tragedy of modern medicine. But what can we learn from it? Paul Farmer, the internationally renowned doctor and anthropologist, experienced the Ebola outbreak firsthand—Partners in Health, the founded, was among the international responders. In Fevers, Feuds, and Diamonds, he offers the first substantive account of this frightening, fast-moving episode and in vibrant prose, Farmer tells the harrowing stories of Ebola victims while showing why the medical response was slow and insufficient. Rebutting misleading claims about why it spread so rapidly, he traces West Africa's chronic health failures back to centuries of exploitation and injustice. Under formal colonial rule, disease containment care was not – and the region's health care woes worsened, with devastating consequences that Farmer traces up to the present. This thorough and hopeful narrative is a reportage, history, and advocacy, and a crucial intervention in public-health discussions around the world.

In the wake of a pandemic virus that rapidly spreads throughout the world killing millions of people, Dennis and Andi Jensen flee the ensuing panic and escape to the mountains. Scientist Cara Porter makes a potentially fatal mistake in her laboratory. By the author of Wave. 12,500 first printing.

We always want to believe history happened to those in the past. Many aspects of historical events were unforeseen. However, not this one. Warnings had been issued but we were unprepared for the invisible enemy that threatened to kill us all. WELCOME TO THE NEXT GLOBAL WAR From the imaginative mind of international bestselling author, Bobby Akart comes a series ripped from today's headlines. Meet the Virus Hunters, the disease detectives on the front line of a never-ending battle to save humanity from viruses of the future. "Scientifically accurate, top notch entertainment and electrifying excitement ..." Deadly outbreaks of diseases make headlines, but not at the start. Every pandemic begins in faraway places. When it arrives, it spreads across oceans and continents, like the sweep of nightfall, killing millions, or even billions. The hunt for a silent killer continues. A pounding, page-turning thriller. Not even a doctor's white coat is protection from this virus that's one-billionth our size. Dr. Harper Randolph searches for evidence and answers lie in one of the most secretive places on the planet - China. "Characters are well developed, a plot that is intriguing and a novel that educates the reader at the same time. Highly recommended!" - Amazon Hall of Fame Reviewer With the help of a new partner, she follows the clues and enters the mysterious world of China's underground world where enemies await. The stakes get higher the closer she gets to Patient Zero. Will she find the origin of this novel virus threatening the planet? Will she be silenced by those in power? In a global pandemic in the recent past? Bobby Akart has delivered up-all-night thrillers to readers in 245 countries and territories worldwide. His new Virus Hunters novels will pause and remind you that we're in a global war for survival against an unseen foe. "Bobby Akart writes a scientific thriller better than anyone else." SPECIAL DEDICATION This series is dedicated to the Virus Hunters - the disease detectives, shoe-leather epidemiologists of the CDC's Epidemic Intelligence Service who work tirelessly to keep the world safe from diseases from killing us all. Thank you!

When you have to kill the same terrorist twice in one week there's either something wrong with your world or something wrong with your skills... and there's nothing you can do about it. Skills. And that's both a good, and a bad thing. It's good because he's a Baltimore detective that has just been secretly recruited by the government to lead a new task force to solve the problems that Homeland Security can't handle. This rapid response group is called the Department of Military Sciences or the DMS for short. It's bad because his first mission is to stop a group of terrorists from releasing a dreadful bio-weapon that can turn ordinary people into zombies. The fate of the world hangs in the balance....
