This book looks at contemporary issues facing financial markets in Eastern and Southern Africa. The book addresses strategies for capital market integration and development on a region-wide basis. An argument is made that the establishment of a regional stock exchange and the promotion of multiple listings and cross-border trade in securities would stimulate increased liquidity on national stock exchanges in Eastern and Southern Africa. Lessons of experience are drawn from other regions and a case is made against transplanting models of a regional stock exchange from one region to another. The book argues that African countries may, however, use lessons of experience from other regions as points of reference, while pursuing their own discourse of self-determination. Each case is unique and is thus surrounded by different variables. The book covers developments in regions such as the European Union, francophone West Africa and Eastern and Southern Africa. Indeed, an international and comparative perspective is provided.

Bankruptcy is often seen as the end of the road for a broken business: an admission of failure. But despite the stigma surrounding it, bankruptcy can actually allow a company to restart, renew, and improve--as long as it's done right. When Gregory K. McDonough faced his own professional "death spiral," he took a deep dive into the bankruptcy process and realized that bankruptcy could help revive his business. Now, he draws on his knowledge as a Certified Insolvency and Restructuring Advisor and his personal experiences to create a practical guide to staying mentally and strategically strong while navigating bankruptcy. The Turnaround provides vital information and coaching on the key elements of the process, including the following: What bankruptcy means When to declare bankruptcy How to make hard decisions From whom to get help When to dissolve How to protect your personal life What plans to put in place to rebuild Going bankrupt does not mean giving in. With the right plan of action, commitment, and mind-set, it can be the first step in turning a bad situation into a positive outcome.

In the United Kingdom, adjudication is available as a right for parties to a construction contract, following the enactment of the Housing Grants Construction and Regeneration Act 1996. In general, within a comparatively short period of time, parties in dispute will have a decision from an adjudicator, which, except in limited circumstances, the courts will enforce. Adjudication has become the number one method of dispute resolution in the construction industry. The short timescale means that a party needs to know what to do, when to do it and be able to check that the other party and the adjudicator are following the right steps. A Practical Guide to Construction Adjudication gives parties the necessary information to achieve this. It provides a straightforward overview of the process and

procedure of adjudication by reference to legislation and case law, augmented with practical guidance including suggestions on what to do or not to do, drafting tips and checklists. Separate chapters for Scotland and Northern Ireland identify and explain the differences in procedure and judicial interpretation between those jurisdictions and England and Wales, and further detailed explanations of the adjudication regimes in Australia, Ireland, Malaysia, New Zealand and Singapore are included. Each of the chapters on jurisdictions outside England and Wales has been written by senior experts in those jurisdictions to ensure the content is accurate and insightful. There are a range of helpful appendices including a bank of model form adjudication documents and tabulated detailed comparisons of the Scheme for Construction Contracts, the other major adjudication rules, the major adjudicator nominating bodies and the UK and international regimes. Readers will particularly appreciate the most comprehensive index of adjudication cases available, sorted into 260 subject headings providing immediate access to all the reported cases on any adjudication topic.
