What's going on? Lino Squagliace has been sent to Brazil to report on Excet, a sprawling financial complex which may be ripe for an American takeover. He is overwhelmed by a seemingly random labyrinth of technology, sex, luxury, drugs and financial genius which could be either a mine or a land mine. How can Lino cope with a society where the street muggers are young and pretty, adults legally adopt other adults, men fight with guns over the right to a parking space? Will he become used to having personal bodyguards, before and behind, who slip away into the shadows as he explores this most exotic of cultures? And what will Lino's billionaire patron think of company executives who so readily embrace Lino (intimately as well as figuratively) but at other times seem bent on manipulating his trusted auditor into being the front man in a complicated financial scam?

All scheduling software is difficult to learn for a number of reasons. None have the optimal settings when installed and templates, views and default options need to be adjusted to obtain the best possible performance. Usually the Help files do not connect the user to real life situations and do not explain the practical use of functions. These issues make learning the software very difficult without a comprehensive guide written by an experienced user. Investing in a
