The book is about user interfaces to applications that have been designed for social and physical interaction. The interfaces are

Online Library Play Doh Fun And Games

'playful', that is, users feel challenged to engage in social and physical interaction because that will be fun. The topics that will be present in this book are interactive playgrounds, urban games using mobiles, sensor-equipped

Online Library Play Doh Fun And Games

environments for playing, child-computer interaction, tangible game interfaces, interactive tabletop technology and applications, full-body interaction, exertion games, persuasion, engagement, evaluation and user experience.

Online Library Play Doh Fun And Games

Readers of the book will not only get a survey of state-of-the-art research in these areas, but the chapters in this book will also provide a vision of the future where playful interfaces will be ubiquitous, that is, present and integrated in

Online Library Play Doh Fun And Games

home, office, recreational, sports
and urban environments,
emphasizing that in the future in
these environments game elements
will be integrated and welcomed.
