**In these turbulent times, Britain is rediscovering a passion for gardening and home produce - and the nation's favourite gardener is here to provide the definitive book on the subject. Alan Titchmarsh's comprehensive guide will tell you everything you need to know about fruit and veg and how to grow it, from herbs, baby veg, salads, and every-day fruits to gourmet and unusual varieties. As well as providing the key facts needed to yield good results and what to do when things go wrong, the text is sprinkled with Alan's personal observations, anecdotes, culinary tips and quirky historical uses. Alan's practical approach starts from scratch for those who've never grown their own before, but is also ideal for those with some experience who might be growing edibles in a new way - perhaps in a small space that needs to look attractive, or on a new allotment. Lavishly illustrated throughout, *Grow Your Own Fruit and Veg* offers inspiration, in-depth knowledge and practical advice, whether you are looking to be self-sufficient or just to grow a few items on your patio or window box. The treatment of each plant is described from start to finish with sense, relish and humour; there are many fascinating analyses of vitamin and mineral contents and nutritional values, of different vegetables and fruits; and there is excellent advice on***

*picking, harvesting, as well as on cooking ... it is the best practical guide to the subject that has appeared for years, and the author is not concerned with argument or philosophy, only with growing produce well.' Country Life 'There is no better guide to non-chemical gardening than Lawrence D. Hills ... He is exceptionally well read and a good practical gardener into the bargain, not a very common combination, and no doubt because of his wide-ranging knowledge he is more balanced in his views than some advocates of all-organic gardening ... Where I find Mr Hills most stimulating is in his highly personal approach to fruit and vegetable varieties and his recommendations based on such commercially unfashionable criteria as flavour and food value. There is a wealth of information here which would be difficult to find in any other single book.'* A. G. L. Hellyer in the Financial Times

We LOVE potatoes, and why not? At only 100 calories per spud, they're an incredible source of vitamins and minerals (they pack more vitamin C than tomatoes and oranges), and contain 60 different kinds of phytochemicals and vitamins in their skins and flesh. They are also one of the most popular of foods, whether it's a bowl of buttery mash, a cone of salty chips at the seaside or a baked spud with melting cheese on top. But perhaps the most amazing thing about potatoes is how useful they are. This book looks at every aspect of this humble vegetable, from its origins and how it spread around the world, to how to grow them, cook and eat them. From comfort food to eye watering poteen, we can also use them to clean silverware, remove rust, shine shoes, create a decorative stamp and alleviate arthritis, heartburn, and even cure scurvy!

Monty Don made a triumphant return to our screens as presenter of Gardeners' World. A firm favourite with viewers, Monty's infectious enthusiasm for plants, attention to the finer details of gardening technique and easy charm have seen the ratings soar. Here Monty invites us into the garden at Longmeadow, to show us how he created this beautiful garden, and how we can do the same in our own. Following the cycle of the seasons, Gardening at Longmeadow will introduce readers to the garden from the earliest snowdrops of January through the first splashes of colour in the Spring Garden, the electric summer displays of the Jewel Garden, the autumn harvest in the orchard, and on to a Christmas feast sourced from the vegetable gardens. Describing the magic of each area at different times of the year, Monty will explain the basics of what to do when and how to get the most from each plant. He'll talk through the essential techniques and more complex processes, accompanied by easy-to-follow, step-by-step photography. Longmeadow is a gardeners' garden, but this will be a book for gardening enthusiasts of all skill levels who have been inspired by what they've seen, and who would like to achieve something similar for themselves.

Allotment and small-scale gardeners seeking to gain the most productivity from their land will benefit from the advice in this 1918 work.

*Introduction It was in 1914 and in the beginning of World War I, when people suffering from the ravages of war decided that they would not go hungry. And that is why when the menfolk were away fighting, the old people, the children and the women decided that they would grow their own vegetables in their own gardens or in every available free space where they could get 4 inches of soil. These gardens were called victory gardens and the produce of these gardens made sure that during the war, absolutely no family starved, there was even enough extra to be sold in the market, and also to be sent to feed the whole British army fighting abroad! So just imagine that every family decided that even if it was living in a city or far away from wide-open spaces and farm area, they could grow their own vegetables, right there, in their suburban houses, on their terraces, balconies, or even in their kitchens. It is surprising to know that by World War II, even though Britain was still very much in the habit of making victory gardens to feed its people, and its army, other countries in the West did not follow this very sensible idea of growing your own food. One wonders why. However, today you can consider yourself on just such an emergency footing. With the world's economic condition being what it is, and not many people bothering much about working their lands to grow food, no wonder they would rather eat unhealthy food, which they buy wholesale in tins and cans, rather than eat healthy nourishing food. Canning your own food to preserve it has been done all over the world for millenniums. So why are we buying foodstuffs, in cans and tins, full of artificial preservatives, fresh off supermarket shelves? I remember a friend of mine visiting a country, which had been hard hit by the Great Depression of 2004. She was surprised to see many people of the city, just getting depressed, because they had lost their jobs, and they expected their government to spoonfeed them and give them money for food and clothing. She said, "why do not the states put these people to work on land and help them grow food, doing something useful for a change, instead of just sitting by the side of the road in a self pitying binge?" I told her that that was not the culture in this particular society. People were used, to having other people take on the responsibilities since childhood, and they were not willing to take on any responsibility on their own, or do anything on their own initiative, because all of that meant going out and working.*
