As the hospitality industry continues to grow, managers and educators are faced with the task of preparing future hospitality professionals for a rewarding but challenging career. Due to the impact of an ever-changing economy on the industry as a whole, the education of hotel

managers and professionals has become an increasingly important area of study. Educational Strategies for the Next Generation Leaders in Hotel Management combines practical experience with the effective pedagogical approaches being implemented in higher learning institutions and hospitality programs internationally. Highlighting key issues surrounding the current and future scope of hotel management and the skills and knowledge necessary for career success in the hospitality industry, this publication is an essential reference source for hospitality managers, educators, and students interested in the future of the industry and the best practices for hospitality education. This publication features timely, research-based chapters and analysis relevant to topics in the hospitality industry including, but not limited to, craft-based learning, e-learning, higher education, hospitality management, human resources, opening delays, professional development, six sigma, women in global leadership, and work integrated learning.

This book provides a 'no-nonsense' guide to project management which will enable library and information professionals to lead or take part in a wide range of projects from large-scale multi-organization complex projects through to relatively simple local ones. Barbara Allan has fully revised and updated her classic 2004 title, Project Management, to incorporate considerable developments during the past decade, including: the development and wide-scale acceptance of formal project management methodologies; the use of social media to communicate and disseminate information about projects and the large shift in the types of project library and information workers may be involved in. The text is supported by practical case studies drawn from a wide range of LIS organizations at local, regional, national and international levels. These examples provide an insight into good practice for the practitioner, from an individual working in a voluntary organization on an extremely limited budget, to someone involved in an international project. Content covered includes: an introduction to project management, project workers and the library and information professiondifferent approaches to project management, the project cycle, the people side of projects and management of changediscussion of project methodologies, project management software, open source software, collaborative working software and use of social mediaproject initiation, communication, analysis and project briefsdeveloping project infra-structure, scheduling, working out the finances and carrying out a detailed risk analysisworking in partnerships, in diverse and virtual teams, and managing change. If you are an LIS professional involved in project work of any kind, whether on a managerial, practical, academic or research level, this is an invaluable resource for you.

The new edition of Psychiatric and Mental Health Nursing focuses on practice in mental health and psychiatric care integrating theory and the realities of practice. Mental wellness is featured as a concept, and the consideration of a range of psychosocial factors helps students contextualise mental illness and psychiatric disorders. The holistic approach helps the student and the beginning practitioner understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness.

Key Methods in Geography

Managing Large Projects

Using Microsoft Project 2000

How to Plan and Manage a Highly Successful Project

Key Methods in Geography is an introduction for undergraduates to the principal methodological issues involved in the collection, analysis and presentation of geographical information. It provides an accessible primer, which will be used by students as a reference throughout their degree, on all issues from research design to presentation. A unique feature of the book is that it provides definitions of terms from both human geography and physical geography. Organized into four parts: Getting Started in Geographical Research; Data Collection in Human Geography; Data Collection in Physical Geography; Analyzing and Representing Geographical Data. Each chapter is comprised of a short definition, a summary of the principal arguments, a substantive 5,000-word discussion, the use of real-life examples, and annotated notes for further reading. The teaching of research methods is integral in all geography courses. Key Methods in Geography identifies the key analytical and observational strategies with which all geography undergraduates should be conversant.

You've been given a project to run. You know you need to get it right, but you don't know what you need to do and in what order to make sure it all runs smoothly and you come out of it looking great. You need Project Management Step by Step. Almost every manager and businessperson finds at some time that he or she has to complete a task that has sufficient complexity and importance that an ad-hoc approach to getting it done is just not enough. Managers in this common situation need the structure and rigour of a project management approach, yet very few managers are formally trained in project management or have the inclination, time or finances to become trained. They need an approach they can feel confidant is sufficiently robust to ensure their success, but also simple enough to be immediately applicable. Project Management Step by Step provides the solution to this problem; a practical and immediate way to become a competent project manager. This is a comprehensive and authoritative guide written and structured in a practical and rapidly applicable style.

Annotation. This guide can be used as a stand alone or asthe participants booklet with the title Project Management for Workgroups. It is organized around 20 key project manager actions and results with the majority devoted to providing new project managers

with the tools to get quality results.

The No-Nonsense Guide to Project Management

Microsoft Project 2010 offers flexibility and choice for individuals, teams, and the enterprise to effectively manage all types of work - from simple tasks to complex projects and programs. Peel the Banana (with included music CDsee below) is arranged as a sequence of dances and singing games from many traditions that Paul Rosenberg has found to be popular during his years of leading school residencies, family dances and community celebrations. The book provides detailed instructions for each of the dances on the CD, as well as written music (with chords) for all of the tunes. It presents suggested age group (a number of the dances can be taught to children as young as three), formation and notes on each dance which might include background information, teaching tips or variations to make the dance accessible to less experienced or younger dancers. Also included are simple instructions on how to teach the waltz, a list of enrichment activities for the classroom (including a reading list for schoolchildren) and a glossary describing all the dance movements and terms used in the book. For the CD, George Wilson (fiddle, banjo, bass, guitar, percussive feet), Peter Davis (clarinet, guitar, piano, mandolin, pennywhistle) and Paul Rosenberg (recorder) provide wonderful dance-length music for the 20 dances. The collection includes American dances such as the singing square Marching Through Georgia and the Virginia Reel. Other countries represented through their dances are Russia (Sasha), Israel (Zemer Atik), Germany (Kinderpolka) and Denmark (Seven Jumps). There are also dances from Ireland, Belgium, Quebec, England, plus two African-American singing games. For most tracks Paul calls the dance the first two times through. Children are also included singing on several of the cuts.

Provides operating instructions for Microsoft Project 2003, tips for workgroup communication, ideas for handling collaborative projects on the Internet, and tactics for professional presentations of projects.
