

Psychoanalytic Understanding Of Violence And Suicide (The New Library Of Psychoanalysis)

Although there is a vast literature on aggression, comparatively little has been written on the issue of violence and even fewer clinical discussions have been published on the violent patient. This pioneering book presents a collection of case studies on the intensive psychoanalytic treatment of patients who have committed serious acts of violence against themselves or others. Each detailed clinical account demonstrates the effectiveness of the psychoanalytic treatment and furthers our understanding of the nature of violence. The Psychoanalytic Understanding of Violence and Suicide also contains a comprehensive review of the existing literature on aggression and violence from America, England and France, presenting major themes contained in this literature which will be of interest to all those working with violent and suicidal patients. Murdered Father, Dead Father: Revisiting the Oedipus Complex examines the progressive construction of the notion of paternal function and its central relevance in psychoanalysis. The distinction between the murdered (narcissistic) father and the dead father is seen as providing a

paradigm for the understanding of different types of psychopathologies, as well as works of literature, anthropology and historical events. New concepts are introduced, such as "a father is being beaten", and a distinction between the descriptive après coup and the dynamic après coup that provides a model for a psychoanalytic understanding of temporality. The book includes a reflection on how the concepts of the death instinct and the negative, in their connection with that which is at the limits of representability, are an aid to an understanding of Auschwitz, a moment of rupture in European culture that the author characterizes as " the murder of the dead father". Perelberg ' s book is an important clinical and intellectual marker, and will be required reading for psychoanalysts, psychotherapists, anthropologists, and historians, as well as students in all these disciplines.

Torture, Psychoanalysis and Human Rights contributes to the development of that field of study called ' psycho-social ' that is presently more and more committed to providing understanding of social phenomena, making use of the explicative perspective of psychoanalysis. The book seeks to develop a concise and integrated framework of understanding of torture as a socio-political phenomenon based on psychoanalytic thinking, through which different dimensions of the subject of study become more comprehensible.

Monica Luci argues that torture performs a covert emotional function in society. In order to identify what this function might be, a profile of ‘ torturous societies ’ and the main psychological dynamics of social actors involved – torturers, victims, and bystanders – are drawn from literature.

Accordingly, a wide-ranging description of the phenomenology of torture is provided, detecting an inclusive and recurring pattern of key elements. Relying on psychoanalytic concepts derived from different theoretical traditions, including British object relations theories, American relational psychoanalysis and analytical psychology, the study provides an advanced line of conceptual research, shaping a model, whose aim is to grasp the deep meaning of key intrapsychic, interpersonal and group dynamics involved in torture. Once a sufficiently coherent understanding has been reached, Luci proposes using it as a groundwork tool in the human rights field to re-think the best strategies of prevention and recovery from post-torture psychological and social suffering. The book initiates a dialogue between psychoanalysis and human rights, showing that the proposed psychoanalytic understanding is a viable conceptualisation for expanding thinking of crucial issues regarding torture, which might be relevant to human rights and legal doctrine, such as the responsibility of perpetrators, the reparation of

victims and the question of ' truth ' . Torture, Psychoanalysis and Human Rights is the first book to build a psychoanalytic theory of torture from which psychological, social and legal reflections, as well as practical aspects of treatment, can be mutually derived and understood. It will appeal to psychoanalysts, psychoanalytic psychotherapists and Jungians, as well as scholars of politics, social work and justice, and human rights and postgraduate students studying across these fields. The author brings together a generous selection derived from her many literary gems, in which she illustrates her groundbreaking-and sometimes explosive-studies of female sexuality and perversions, perverse transference, malignant bonding, perverse motherhood, and the impact upon children of viewing domestic violence. Along with these are vivid descriptions of group analytic psychotherapy with forensic patients and, uniquely, of the joint group treatment of incest survivors and perpetrators. She also outlines the development of forensic psychotherapy as a new field of clinical and academic endeavour and her involvement in this. In a series of interviews with Brett Kahr she describes her professional journey, from being trained by Horacio Etchegoyen in her native Argentina, followed by an eye-opening period at the Menninger Clinic, then eventually to London and a distinguished career at the Portman Clinic.

outlines the clinical features of the act and explores the possible role that psychopathology and personality might play in the build up to murder. These observations raise a number of questions about the so-called 'normality' of the individual alongside the capacity to commit murder, and how we might understand the stability of such offenders. Psychoanalysis, Violence and Rage-Type Murder will be of great interest to psychotherapists, forensic psychotherapists, psychoanalysts, psychologists, criminologists and health care workers. How do we bring the law into line with people's psychological experience? How can psychoanalysis help us understand irrational actions and bad choices? Our legal system relies on the idea that people act reasonably and of their own free will, yet some still commit crimes with a high likelihood of being caught, sign obviously one-sided contracts, or violate their own moral codes—behavior many would call fundamentally irrational. Anne Dailey shows that a psychoanalytic perspective grounded in solid clinical work can bring the law

into line with the reality of psychological experience. Approaching contemporary legal debates with fresh insights, this original and powerful critique sheds new light on issues of overriding social importance, including false confessions, sexual consent, threats of violence, and criminal responsibility. By challenging basic legal assumptions with a nuanced and humane perspective, Dailey shows how psychoanalysis can further our legal system's highest ideals of individual fairness and systemic justice.

Everyday Evils takes a psychoanalytic look at the evils committed by "ordinary" people in different contexts – from the Nazi concentration camps to Stockholm Syndrome to the atrocities publicized by Islamic State – and presents new perspectives on how such evil deeds come about as well as the extreme ways in which we deny the existence of evil. Concepts of group behaviour, morality, trauma and forgiveness are reconsidered within a multi-disciplinary framework. The psychodynamics of dissociation, and the capacity to witness evil acts while participating in them, raise questions about the origin of morality, and about the role of the observing ego in maintaining psychic equilibrium. Coline Covington examines how we demonize the "other" and how violent actions become normalized within communities, such as during the Rwandan genocide and Polish pogroms. The recent attraction of the millenarian theocracy of the Islamic State also highlights our fascination with violence and death. Covington emphasizes that evil comes about through a variety of causes and is highly contextual. It is our capacity to acknowledge the evils we live

with, witness and commit that is vital to how we manage and respond to violence within ourselves and others and in mitigating our innate destructiveness. In conclusion, the book addresses how individuals and societies come to terms with evil, along with the problematic concept of forgiveness and the restoration of good. *Everyday Evils* blends psychoanalytic concepts together with the disciplines of sociology, history, anthropology, philosophy, theology and studies of violence in order to develop a richer, deeper and more comprehensive understanding of evil. Intending to make the unthinkable thinkable, this book will appeal to scholars from across those disciplines, as well as psychoanalysts, psychotherapists and anyone who has ever asked the question: "How could anyone do something like that?"

The role of psychotherapists in creating change for survivors of sexual violence can extend far wider than the rooms in which appointments are provided. *Psychotherapy with Survivors of Sexual Violence* aims to provide psychotherapists with practical guidance that will enable them to work with the prolific societal issue of sexual violence, both in the privacy of clinical practice and the wider world as activists. Erene Hadjiioannou outlines the components of relational psychotherapy necessary to counter the trauma that brings survivors to services, with a particular focus on empowerment

and the freedoms that constitute it. The book defines the neurophysiological systems involved in surviving traumatic experiences and common psychological presentations, including post-traumatic stress disorder. Hadjiioannou explains the long-standing challenges of delivering psychotherapy to survivors who have reported to the police from various perspectives: understanding the criminal justice system, note-keeping, and survivors' experiences of reporting. Barriers to accessing support, including myths, are examined and the book includes interview quotes from a range of survivors as well as fictional case studies throughout. Psychotherapy with Survivors of Sexual Violence will be a key text for psychotherapists of all backgrounds working with survivors, and for mental health professionals in training.

In this important book, esteemed psychoanalyst Otto F. Kernberg reviews some of the recent developments and controversies in psychoanalytic theory and technique. Gathering together both previously published articles and extensive new material, Dr. Kernberg examines such issues as the new psychoanalytic views of homosexuality, bisexuality, and the influence of gender in the analytic relationship. He explores the application of psychoanalysis to non-clinical fields, including the problem of psychoanalytic research and its clinical implications, the validation of psychoanalytic

interventions in the clinical process, and the challenges of psychoanalytic education. He shows how psychoanalysis can be helpful in addressing such cultural problems as socially sanctioned violence. And he asserts the continued relevance of object relations theory and its compatibility with Freud's dual drive theory.

This volume provides information about domestic violence in today's society. Chapters explore the current landscape; issues of domestic violence in ethnic, racial, and cultural contexts; treatment issues; and intervention recommendations. Features include discussion questions, resources for domestic violence intervention, and legal precedents.

psychoanalysis, and focuses on the differences between the Freudian, Kleinian, Bionian and Lacanian schools of thought on this topic, as well as drawing on findings from neuroscience. The book explores topics including the inaccessibility of the unconscious, dreams, body issues, issues of personality, the influence of field theory and the clinical implications of this theorising. It contains innovative comparison between Freudian metapsychology and the Bionian theory on thinking, and novel use of Bion's hallucinosis as an important new technical tool. An internationally recognised author, Civitarese provides fresh ideas throughout on a challenging subject, supported with vivid clinical material. Truth and the Unconscious in Psychoanalysis will be of interest to anyone following the growing post-Bionian movement within contemporary psychoanalysis, enabling them to familiarize themselves with some of the most important current issues in psychoanalytic research. Truth and the Unconscious in Psychoanalysis will appeal to psychotherapists,

psychologists and psychoanalysts, as well as undergraduate and postgraduate students studying in the field. *Gender, Violence, and Justice* is a volume of collected essays by an expert in the field of violence against women and pastoral theology. It represents over three decades of research, advocacy, and pastoral theological reflection on the subject of sexual and domestic violence. Topics include intimate partner violence, sexual abuse and trauma, and clergy sexual misconduct; controversial theological issues such as forgiveness; and, as well, positive frameworks for fostering well-being in families, church, and society. Framed by a foreword and an introduction that place this work in the context of new and contemporary challenges in theory and practice, these essays show an evolution of issues and frameworks for theology, care, and activism arising over time from the movement to end violence against women (both within and beyond religious communities)--while at the same time demonstrating an unchanging core commitment to gender justice.

In *The Violence of Emotions* the author marries an ability to introduce the reader to the intimate climate of an analytic session with a passionate rereading of Bion. To emphasize both the empirical nature of psychoanalysis and its extraordinary capacity to engender illuminating hypotheses concerning the functioning of the mind, clinical examples alternate with theoretical argument. The psychoanalytic model espoused by Giuseppe Civitarese in his approach to both is analytic field theory. Developed by various authors, including Ferro, commencing with Bion and continued with contributions from the Barangers, Grotstein and Ogden, the theory of the analytic field reveals the social nature of subjectivity and, in clinical work, the intersubjective and dreamlike climate in which a psychoanalytic session unfolds. This leads to a new way of interpreting the facts of analysis. As such, topics of discussion include: transcending the caesura as Bion's theoretical method hypochondria as de-subjectivation and narrative genre in analysis the

How do we know when what is happening between two people should be called psychoanalysis? What is a psychoanalytic process and how do we know when one is taking place? *Psychoanalysis Comparable and Incomparable* describes the rationale and ongoing development of a six year programme of highly original meetings conducted by the European Psychoanalytic Federation Working Party on Comparative Clinical Methods. The project comprises over seventy cases discussed by more than five hundred experienced psychoanalysts over the course of sixty workshops. Authored by a group of leading European psychoanalysts, this book explores ways for psychoanalysts using different approaches to learn from each other when they present their work to fellow psychoanalysts, and provides tools for the individual practitioner to examine and improve his or her own approach. As described in detail in its pages, sticking to the task led to some surprising experiences, raising fundamental questions about the way clinical discussion and supervision are conducted in psychoanalysis. Well known by many in the psychoanalytic community and the object of much interest and debate, this project is described by

those who have had the closest contact with it and will satisfy a widely held curiosity in psychoanalysts and psychotherapists throughout the world. David Tuckett is winner of the 2007 Sigourney Award. This book offers a psychosocial perspective on political violence, employing a strong current of psychoanalytic thinking. In the course of its chapters an international roster of researchers and scholars offers a richly complex and insightful view of diverse forms of political violence and its build-ups. The authors discuss the processes by which the ground for political violence is prepared, and how violent acts are facilitated. They question how social, cultural and political constellations can develop in such a way that, for certain people in this constellation, violence becomes a logical – perversely reasonable – response. This collection demonstrates what a psychoanalytic perspective can bring to existing approaches to political violence, going beyond the social movement approach by unfolding the inherent ambiguity in accepted concepts within the study of political violence. Is psychoanalysis a type of literature? Can telling 'stories' help us to get at the truth? Psychoanalysis as Therapy and Storytelling examines psychoanalysis from two perspectives - as a cure for psychic suffering, and as a series of stories told between patient and analyst. Antonino Ferro uses numerous clinical examples to investigate how narration and interpretation are interconnected in the analytic session. He draws on and develops Bion's

theories to present a novel perspective on subjects such as: psychoanalysis as a particular form of literature sexuality as a narrative genre or dialect in the analyst's consulting room delusion and hallucination acting out, the countertransference and the transgenerational field play: characters, narrations and interpretations. Psychoanalytic clinicians and theoreticians alike will find the innovative approach to the analytic session described here of great interest. Winner of the 2007 Sigourney Award.

New Horizons in Forensic Psychotherapy: Exploring the Work of Estela V. Welldon, edited by the author, contains many rich contributions by some of Welldon's most distinguished former students and proteges. The book consists of important chapters on the creative ways in which colleagues have utilised and expanded upon Welldon's work in the field of forensic psychotherapy in a variety of settings, including in hospitals, prisons, community mental health clinics, and, also, in private practice.

This book increases the reader's understanding of violent children and the value and vicissitudes of their psychoanalysis and psychoanalytic psychotherapy. It explores various aspects of violence and the attendant emotional, psychological, biological, and social features in children.

Training in psychoanalysis is a long and demanding process. However, the quality of education available is hugely variable across the world. The structure of psychoanalytic education, centered on the hierarchical "training analysis" system, reflected a concerted effort to maintain a stable and high quality educational process. However, throughout time this system has become a major source of institutional contradictions that affect the training of candidates, the scientific developments within psychoanalysis, and the nexus of psychoanalytic theory and practice with the surrounding scientific, social and cultural world. **Psychoanalytic Education at the Crossroads** examines the ways in which group processes, the hierarchal culture in institutes, the influence of individual personalities, the lack of research and the faults in supervision can all stifle creativity and hinder candidates' progress. In this compelling work, Otto Kernberg sets out clear suggestions for how these issues can be addressed, and how he sees the future of psychoanalytic education across all psychoanalytic settings and schools of thought. The first part of this volume is focused primarily on the analysis of the nature of these problems and their effects on the personal analysis and supervision of candidates; on theoretical and clinical seminars; on selection, progression, and graduation; on

educational principles and requirements, developments of theory and technique and, in particular, limitation versus expansion of the realm of interests and applications of psychoanalysis. The second part of this volume deals with proposals of solutions to the problems encountered, and major suggestions for innovation in psychoanalytic education. The author's work in this area has been hugely influential. Kernberg has made a substantive difference in the development of psychoanalytic institutes and education, and continues to do so. Psychoanalytic Education at the Crossroads will be essential reading to anyone involved in psychoanalytic education, whether as a psychoanalyst, psychoanalytic psychotherapist, trainee, trainer, or supervisor.

This book provides school teachers, counselors, administrators, therapists, and parents an accessible and evidence-based approach to reduce violence in schools. The work outlines how self-esteem controls emotions and helps regulate expression of aggressive and violent feelings and behavior. The work demonstrates in three distinct parts how faculty can reduce and prevent violence in their schools by using the student-teacher relationship: theory, case

studies, and learning activities. Anger and violence are reduced through increasing children's self-esteem, which is developed through important relationships with adults. The book invites teachers, school counselors, school psychologists, and other school administrators to rethink their relationships with children and to incorporate the relational ingredients needed to increase children's self-esteem by adopting features of evidence-based psychotherapy and demonstrating how such approaches can be applied in schools.

Few topics elicit greater controversy within psychoanalysis today than the role of research in justifying or expanding upon analytic theory. The text collects papers from a London conference, along with additional material, to explore the work of discussants Daniel Stern and Andre Green. Stern, whose work and psychoanalysis and infant observation is world-renowned, and Green, the French psychoanalyst whose trenchant views on

the limitations of research are equally well known, each focus on the issue of infant research and its long history within the psychoanalytic movement. Additional discussions by three prominent British psychoanalysts, Anne Alvarez, Irma Brenman Pick, and Rozine Jozef Perelberg, expose a different point of view from that of Green and Stern. Also included is a previous debate on this topic between Andre Green and Robert S. Wallerstein, former president of the International Psychoanalytic Association. An illuminating introductory chapter by Riccardo Steiner further describes the main points of the debate with marvelous clarity. This book will be invaluable for all those who wish to involve themselves with contemporary views on this important topic.

This book draws on interviews carried out over a period of eight years, as well as novels, films, and domestic violence literature, to explain the role of storytelling in the history of the battered women's movement. The author shows how cultural contexts shape how stories about domestic abuse get told, and offers critical tools for bringing psychology into discussions of group dynamics in the domestic violence field. The book enlists psychoanalytic-feminist theory to analyse storytelling practices and to re-visit four areas of tension in the movement where signs of battle fatigue have been most acute. These areas include the conflicts that emerge between the battered women's movement and the state, the complex relationship between domestic violence and other social problems, and

the question of whether woman battering is a special case that differs from other forms of social violence. The volume also looks at the tensions between groups of women within the movement, and how to address differences based on race, class or other dimensions of power. Finally, the book explores the contentious issue of how to acknowledge forms of female aggression while still preserving a gender analysis of intimate partner violence. In attending to narrative dynamics in the history of domestic violence work, *Hard Knocks* presents a radical re-reading of the contribution of psychology to feminist interventions and activism. The book is ideal reading for scholars, activists, advocates and policy planners involved in domestic violence, and is suitable for students of psychology, social work, sociology and criminology.

Despite mounting references to the "transgenerational transmission of violence," we still lack a compelling understanding of the linkage between the interpersonal violence of early life and the criminal violence of adulthood. In *Prologue to Violence*, Abby Stein draws on the gripping narratives of 65 incarcerated subjects and extensive material from law enforcement files to remedy this lacuna in

both the forensic and psychodynamic literature. In the process, she calls into question prevailing beliefs about criminal character and motivation. For Stein the early trauma to which adult criminals are subjected remains unformulated and, as such, unavailable for reflection. Contrary to common belief, these criminals, especially sex murderers, do not commit their crimes in a rational or fully conscious way. They are not driven by deviant fantasy, their psychopathy is not inborn, and they rarely commit acts of violence "without conscience." Stein's interdisciplinary analysis of her data infuses contemporary relational psychoanalysis with the insights of neuroscience, traumatology, criminology, and cognitive and narrative psychology. A powerful challenge to offender treatment programs to address the shaping impact of childhood trauma rather than merely to "correct" the cognitions of violent offenders, *Prologue to Violence* will be equally compelling to researchers and academics investigating child abuse and adult violence. Its mental health readership will be broad and deep, ranging beyond clinicians who work with offender populations to all therapists who wrestle with experiences of dissociation and

aggressive enactment in everyday life. Shortly before and during World War II many European psychoanalysts found refuge in South America, concentrated in Buenos Aires. Here, together with local professionals, they created a strong, creative and productive psychoanalytic movement that in turn gave birth to theoretical and clinical contributions that transformed psychoanalysis, psychology, medicine and culture in South America. The Pioneers of Psychoanalysis in South America is a collection of those pioneers' papers, and introduces the reader to a body of ideas and advancements, many of which have had limited and piecemeal exposure within the psychoanalytic community in the rest of the world until now. The editors Nydia Lisman-Pieczanski and Alberto Pieczanski present original papers and essays, many of which have never before been published in English; those that have been translated were rarely presented in context. Each one of the chapters is accompanied by a scholarly introduction written by psychoanalysts, many of whom personally knew the pioneers and their oeuvres in depth, tracing the roots of their ideas in the European analytic schools. Psychoanalysis has not examined violence as such since it is a sociological and criminological concept; psychoanalysis is concerned with speech. *On Psychoanalysis and Violence* brings together noted Lacanian psychoanalysts and scholars to fill an important gap in psychoanalytic scholarship that addresses what the contributors term the "angwash" of our current time. Today violence is everywhere. We are inundated with it, exhausted by it, bombarded by images and reports of it on a daily, even hourly basis. This book examines how psychoanalysis can account for the many manifestations of violence in contemporary society. Drawing on a broadly Lacanian perspective, the authors explore violence in war, terrorism, how the media portrays violence, violent video games, questions of identity, difference and the 'other'; violence narratives and violence and DSM, and explain how to account for how violence arises and the effect it has on us on

both an individual and social level. These are just some of the daily social realities of the present day whose aggression are felt by everyone, which horrify us and which we often feel powerless to change. The contributors have therefore coined a term for this cultural malaise: "angwash", arguing that we are awash in angoisse or anxiety, in a constant panic regarding the impossible and contradictory demands of a "civilization" in crisis. On Psychoanalysis and Violence will be of great interest to Lacanian psychoanalysts and psychoanalytic psychotherapists.

In recent years there has been a surge in awareness of the many arenas in which violence against women occurs. There is a growing attention to human and sex trafficking and femicide throughout the world. Female genital mutilation along with childhood marriage and rape occur regularly in many societies. Sexual victimization of women in custody is now exposed. College campus violence against women has been a serious problem and only recently acknowledged. In this edited book psychoanalysts show how violence can be seen, known and represented on the world stage and in psychoanalytic treatment. The editors bring psychoanalytic ideas and understanding in an effort to comprehend violence against women. Observing the active witnessing of the contributors to this book elucidates the way trauma is transformed into resilience and healing. Published in English for the first time, this is a seminal work by an original and creative analytical thinker. Piera Aulagnier's *The Violence of Interpretation* bridges the work of Winnicott and Lacan, putting forward a theory of psychosis based on children's early experiences. The author's analysis of the relationship between the other's communications and the infant's psychic experience, and of the pre-verbal stage of development of unconscious fantasy starting from the 'pictogram', have fundamental implications for the psychoanalytic theory of development. She developed Lacan's ideas to enable the treatment of severe psychotic states. Containing detailed discussion of clinical material, and written in the author's precise yet provocative style, *The Violence of Interpretation* is a welcome addition to the New Library of Psychoanalysis.

an introduction by Richard Rusbridger, is brought together in a collection which demonstrates the contribution that O' Shaughnessy has made to many areas of psychoanalysis, from personality organisations, the superego, psychic refuges and the Oedipus complex to the subject of whether a liar can be psychoanalysed. Inquiries in Psychoanalysis is a record of clinical work and thinking over sixty years of psychoanalytic practice with children and adults. This wide-ranging selection of work will be essential reading for psychoanalysts, psychotherapists and students.

This is a provocative collection exploring the different types of violence and how they relate to one another, examined through the integration of several disciplines, including forensic psychotherapy, psychiatry, sociology, psychosocial studies and political science. By examining the 'violent states' of mind behind specific forms of violence and the social and societal contexts in which an individual act of human violence takes place, the contributors reveal the dynamic forces and reasoning behind specific forms of violence including structural violence, and conceptualise the societal structures themselves as 'violent states'. Other research often stops short at examining the causes and risk factors for violence, without considering the opposite states that may not only mitigate, but allow for a different unfolding of individual and societal evolution. As a potential antidote to violence, the authors prescribe an understanding of these 'creative states' with their psychological origins, and their importance in human behaviour and meaning-seeking. Making a call to move beyond merely mitigating violence to the opposite direction of fostering creative potential, this book is foundational in its capacity to cultivate social consciousness and effect positive change in areas of governance, policy-making, and collective responsibility. Volume 2: Human Violence and Creative Humanity explores violent states of

mind, behavioural or subjective, interpersonal violence (including self-injury) and the fine distinctions between violent and creative states of mind.

This important book provides a bridge between psychoanalytic perspectives and socio-cultural issues to shine a spotlight on the experiences of women in India today. Women 's well-being and security has often depended upon their gender positioning while other binaries like rural-urban, class, and caste have also played a crucial role globally and especially in India. Historically, women have been subjected to various forms of oppression that include sex selective abortions, domestic violence, bride burning for dowry, and acid attacks. Threats to women 's security have recently increased with progressive polarization and hardening of socio-political and cultural ideologies. This book assesses how women 's lives are impacted by these social and cultural conventions and stigma, including ideas around motherhood, religion, intimacy and femininity itself, and the psychological implications these have. Topics include the seduction of religion, motherhood in contemporary times, intimacy and violence, and fundamentalist states of mind in the clinical space. While the book echoes a regional specificity, it simultaneously resonates a backdrop of global change of affairs that has its impact on ideological freedom and the concept of inclusivity in terms of gender, race, culture, and politics across the world. For this comprehensive perspective, the effort is to create a platform of authors comprising psychoanalysts, social scientists, scholars from the liberal arts discipline, as well as social activists. In a country where women have been historically subjected to both psychological and physical oppression, this timely and original book will interest a range of scholars interested in gender, mental health and contemporary Indian society, as well as clinicians in the field.

David Gray Carlson and Peter Goodrich argue that the postmodern legal mind can be characterized as having shifted the focus of legal analysis away from the modernist understanding of law as a system that is unitary and separate from other aspects of culture and society. In exploring the various "other dimensions" of law, scholars have developed alternative species of legal analysis and recognized the existence of different forms of law. Carlson and Goodrich assert that the postmodern legal mind introduced a series of "minor jurisprudences" or partial forms of legal knowledge, which both compete with and subvert the modernist conception of a unitary system of law. In doing so scholars from a variety of disciplines pursue the implications of applying the insights of their disciplines to law. Carlson and Goodrich have assembled in this volume essays from some of our leading thinkers that address what is arguably one of the most fundamental of interdisciplinary encounters, that of psychoanalysis and law. While psychoanalytic interpretations of law are by no means a novelty within common law jurisprudence, the extent and possibilities of the terrain opened up by psychoanalysis have yet to be extensively addressed. The intentional subject and "reasonable man" of law are disassembled in psychoanalysis to reveal a chaotic and irrational libidinal subject, a sexual being, a body and its drives. The focus of the present collection of essays is upon desire as an inner law, upon love as an interior idiom of legality, and represents a significant and at times surprising development of the psychoanalytic analysis of legality. These essays should appeal to scholars in law and in psychology. The contributors are Drucilla Cornell, Jacques Derrida, Peter Goodrich, Pierre Legendre, Alain Pottage, Michel Rosenfeld, Renata Salecl, Jeanne L. Schroeder, Anton Schutz, Henry Staten, and Slavoj Zizek. David Gray Carlson is Professor of Law, Benjamin Cardozo School of Law, Yeshiva University.
