La Vocazione Più Alta

Mozart wrote Idomeneo when he was twenty-four years old, and the opera was described by Albert Einstein as "e;one of those works that even a genius like Mozart could write only once in his life"e;. It is one of most astonishing achievements of an altogether astonishing career.In this newly commissioned guide, Julian Rushton explains the special nature of the music in a detailed analysis of its themes and development, while Nicholas Till places the opera in its context as an expression of the Enlightenment. Gary Kahn explores the performance history of an opera which, although largely ignored for over a hundred and fifty years, has now taken its place as part of the international operatic repertoire. A selection of the unique letters between Mozart and his father written during the opera's composition is also included.Contains:Idomeneo and the Background of the Enlightenment, Nicholas TillIdomeneo, re di Creta, the Music, Julian RushtonA Brief Performance History, Gary KahnThe Composition of Idomeneo in Mozart's LettersIdomeneo: Libretto by Giambattista Varescoldomeneo: English Translation by Charles Johnston The Decrees of Memphis and Canopus: Vol. II (Routledge Revivals)

This is the second of three volumes exploring some of the most remarkable insights into Ancient Egypt to have come to light in modern times. The first two volumes deal with the Rosetta Stone, an outstanding archaeological discovery which has supplied the basis for Egyptian decipherment; the final volume explores the "Stele of Canopus", discovered in 1866. The significance of the Rosetta Stone lies in the three different languages inscribed on it: Koine Greek, Demotic Egyptian, and, crucially, Hieroglyphic. This has facilitated a vast increase in our understanding of the sacred language of Ancient Egypt, as well as enhancing our understanding of the nature of kingship at a time of immense cultural transformation. First published in 1904, this title provides an accessible general introduction to this fascinating subject, useful for the amateur enthusiast as well as undergraduate students.

Many request have been made for the publication of these studies in book form. Much of this material has already appeared as articles in The Way. In the first section I discuss the distinction between the forms of consecrated life, following a classification which is also taken up by the Secon Vatican Council in its decree Perfectae Caritatis. It is by distinguishing between these different ways of the Spirit, and by seeking to enter more deeply into them, that all who lead that life - whether they be monks or nuns, or religious dedicated to the apostolate of the priestly ministry or of charitable works, or those leading a consecrated life in the midst of the world - will gain a better understanding of their vocation and of their special mission in the Church. The sccond study is an attempt to express the profound meaning of the secular vocation proper to those institutes which were approved by Pope Pius XII in 1947, and of which the Motu Proprio Primo Feliciter laid down the essential characteristics. The third section is a discussion of the role of the priest in approved Secular Institutes. This has relevance today, when special questions arise concerning those Institutes whose secular character is less apparent, who live in community and are occupied in their own special works. In the opinion of many who follow the fully secular vocation, those Institutes would do better to revise their statutes or to choose another denomination - for example, that of Apostolic Institute or Society.

This book focuses on a simple dynamic: the taking in hand of a heritage, the variety of changes induced within it, and the handing on of that legacy to new generations. Our contributors suggest, from different standpoints, that this dynamic represented the essence of 'late antiquity'. As Roman society, and the societies by which it was immediately bounded, continued to develop, through to the late sixth and early seventh centuries, the interplay between what needed to be treasured and what needed to be explored became increasingly self-conscious, versatile, and enriched. By the time formerly alien peoples had established their 'post-classical' polities, and Islam began to stir in the East, the novelties were more clearly seen, if not always welcomed, and one witnesses a stronger will to maintain the momentum of change, of a forward reach. At the same time, those in a position to play now the role of heirs were well able to appreciate how suited to their needs the Roman past might be, but how, by taking it up in their turn, they were more securely defined and yet more creatively advantaged.

'Transformation' is a notion apposite to essays in honour of Peter Brown. The transformation of the classical heritage' is a theme to which he has devoted, and continues to devote, much energy. All the essays here in some way explore this notion of transformation; the late antique ability to turn the past to new uses, and to set its wealth of principle and insight to work in new settings. To begin, there is the very notion of what it meant to be 'Roman', and how that notion changed. Subsequent chapters suggest ways in which fundamental characteristics of Roman society were given new form, not least under the impact of a Christian polity. Augustine, naturally, finds his place; and here the emphasis is on the unfettered stance that he took in the face of more broadly held convictions - on miracles, for example, and the errors of the pagan past. The discussion then moves on to
