## ***Digital Black Feminism***

Young people are told that college is a place where they will “find themselves” by engaging with diversity and making friendships that will last a lifetime. This vision of an inclusive, diverse social experience is a fundamental part of the image colleges sell potential students. But

what really happens when students arrive on campus and enter this new social world? *The Cost of Inclusion* delves into this rich moment to explore the ways students seek out a sense of belonging and the sacrifices they make to fit in. Blake R. Silver spent a year immersed in student life at a large public university. He trained

Through these day-to-day interactions, he witnessed how students sought belonging and built their social worlds on campus.

Over time, Silver realized that these students only achieved inclusion at

significant cost. To fit in among new peers, they clung to or were pushed into raced and gendered cultural assumptions about behavior, becoming “the cool guy,” “the nice girl,” “the funny one,” “the leader,” “the intellectual,” or “the mom of the group.” Instead of developing dynamic identities, they crafted and adhered to a

Silver found that these students were ill-prepared for the challenges of a diverse college campus, and that they had little guidance from their university on how to navigate the trials of social engagement or the pressures to conform. While colleges are focused on
