This updated edition has been substantially revised throughout, with additional new plant-based recipes, a new introduction and updated chapter introductions.

THE SUNDAY TIMES BESTSELLER 'For bung-it-in-the-oven cooks everywhere, this is a must-have book: Diana Henry has a genius for flavour.' - Nigella Lawson Whether you're short of time or just prefer to keep things simple, From the Oven to the Table shows how the oven can do much of the work that goes into making great food. Diana Henry's favourite way to cook is to throw ingredients into a dish or roasting tin, slide them in the oven and let the heat behind that closed door transform them into golden, burnished meals. Most of the easy-going recipes in this wonderfully varied collection are cooked in one dish; some are ideas for simple accompaniments that can be cooked on another shelf at the same time. From quick after-work suppers to feasts for friends, the dishes are vibrant and modern and focus on grains, pulses and vegetables as much as meat and fish. With recipes such as Chicken Thighs with Miso, Sweet Potatoes & Spring Onions, Roast Indian-spiced Vegetables with Lime-Coriander Butter, and Roast Stone Fruit with Almond and Orange Flower Crumbs, Diana shows how the oven is the most useful bit of kit you have in your kitchen. Praise for How to Eat a Peach: 'This is an extraordinary piece of food writing, pitch perfect in every way. I couldn't love anyone who didn't love this book.' - Nigella Lawson '...her best yet...superb menus evoking place and occasion with consummate elegance' - Financial Times Food Book of the Year at the André Simon Food & Drink Book Awards 2019

In the thirteenth River Cottage Handbook, Steven Lamb shows how to cure and smoke your own meat, fish and cheese. Curing and smoking your own food is a bit of a lost art in Britain these days. While our European neighbours have continued to use these methods on their meat, fish and cheese for centuries, we seem to have lost the habit. But with the right guidance, anyone can preserve fresh produce, whether

living on a country farm or in an urban flat - it doesn't have to take up a huge amount of space. The River Cottage ethos is all about knowing the whole story behind what you put on the table; and as Steven Lamb explains in this thorough, accessible guide, it's easy to take good-quality ingredients and turn them into something sensational. *Curing & Smoking* begins with a detailed breakdown of any kit you might need (from sharp knives to sausage stuffers, for the gadget-loving cook) and an explanation of the preservation process - this includes a section showing which products and cuts are most suitable for different methods of curing and smoking. The second part of the book is organised by preservation method, with an introduction to each one, and comprehensive guidance on how to do it. And for each method, there are, of course, many delicious recipes! These include chorizo Scotch eggs, salt beef, hot smoked mackerel, home-made gravadlax ... and your own dry-cured streaky bacon sizzling in the breakfast frying-pan. With an introduction by Hugh Fearnley-Whittingstall and full-colour photographs as well as illustrations, this book is the go-to guide for anyone who wants to smoke, brine or air-dry their way to a happier kitchen.

Reducing the intake of sodium is an important public health goal for Americans. Since the 1970s, an array of public health interventions and national dietary guidelines has sought to reduce sodium intake. However, the U.S. population still consumes more sodium than is recommended, placing individuals at risk for diseases related to elevated blood pressure. Strategies to Reduce Sodium Intake in the United States evaluates and makes recommendations about strategies that could be implemented to reduce dietary sodium intake to levels recommended by the Dietary Guidelines for Americans. The book reviews past and ongoing efforts to reduce the sodium content of the food supply and to motivate consumers to change behavior. Based on past lessons learned, the book makes recommendations for future initiatives. It is an excellent resource for federal and state public health officials, the processed food and food service industries, health care professionals, consumer advocacy groups, and academic researchers.

Presents recipes ranging in difficulty with the science and technology-minded cook in mind, providing the science behind cooking, the physiology of taste, and the techniques of molecular gastronomy.

Fish can be smoked, salted, dehydrated, and preserved in oil. Pork becomes jerky. Cucumbers become pickles. 'Thrust this book into the hands of anyone who thinks they can't cook' - the Sunday Times Diana Henry shows you how to turn everyday ingredients into something special with the minimum of effort. Cook Simple is packed with over 150 recipes and ideas - many of which Diana has harvested from her world travels - that offer simple ways to make every meal spectacular. Diana dedicates a chapter to each of 12 everyday ingredient groups: chicken, chops, sausages, leg of lamb, fish, leaves, summer veg, winter veg, pasta, summer fruit, winter fruit, flour and eggs. Each recipe takes only minutes to prepare with ingredients easily sourced from your local supermarket. Features stunning pictures by award-winning photographer Jonathan Lovekin.

No-one is better than Diana Henry at turning the everyday into something special. Here is a superb collection of recipes that you can rustle up with absolutely no fuss, but which will knock your socks off with their flavor. Peppered throughout the book are ingenious ideas such as no-hassle starters and sauces that will lift any dish. From Turkish Pasta with Caramelized Onions, Yoghurt and Dill and Paprika-baked Pork Chops with Beetroot, Caraway and Sour Cream to Parmesan-roasted Cauliflower with Garlic and Thyme, Diana takes the kind of ingredients we are most likely to find in our cupboard and fridge - or be able to pick up on the way home

from work - and provides recipes that will become your friends for life. From a Pulitzer Prize-winning investigative reporter at The New York Times comes the troubling story of the rise of the processed food industry -- and how it used salt, sugar, and fat to addict us. Salt Sugar Fat is a journey into the highly secretive world of the processed food giants, and the story of how they have deployed these three essential ingredients, over the past five decades, to dominate the North American diet. This is an eye-opening book that demonstrates how the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). Salt Sugar Fat is the story of how we got here, and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, "Enough already."

them up. With 250 tried and tested recipes, Canning for a New Generation: Updated and Expanded Edition is a must-own, essential reference guide for casual canners, modern home preservers, and traditional food preservationists. "This book is the best of a bunch of new guides on modern canning techniques and recipes." —Boing Boing

This comprehensive book takes a fresh look at preserving, offering all the basic information you need, but also featuring inspirational recipes from the store cupboards of the world. It covers everything from jams to cures, and shows you that you don't have to have lots of kit and produce to make delicious preserves - or wait forever before eating them. There are sections filled with expert advice on choosing ingredients and cooking every type of preserve, from marmalades to jellies to relishes to foods preserved in oil. All the classic recipes are included and Diana often gives tips for how to make a version of a classic that suits your palette. For example, she includes a sweet and sticky strawberry jam, a more-fruity and less sweet version, and a Swedish 'nearly' strawberry jam (which is more like a conserve and keeps in the fridge for only a couple of weeks). But this is also a treasure trove of recipes taken from the world's store cupboards. And most of them are luxuries that can be made from cheap ingredients - such as Thai spiced rhubarb relish, Alsace pear and Riesling jam and tea-smoked trout. Many recipes will also offer alternative ingredients - for example, make sloe gin with cranberries or plums.

Millions of Americans use e-cigarettes. Despite their popularity, little is known about their health effects. Some suggest that e-cigarettes likely confer lower risk compared to combustible tobacco cigarettes, because they do not expose users to toxicants produced through combustion. Proponents of e-cigarette use also tout the potential benefits of e-cigarettes as devices that could help combustible tobacco cigarette smokers to quit and thereby reduce tobacco-related health risks. Others are concerned about the exposure to potentially toxic substances contained in e-cigarette emissions, especially in individuals who have never used tobacco products such as youth and young adults. Given their relatively recent introduction, there has been little time for a scientific body of evidence to develop on the health effects of e-cigarettes. Public Health Consequences of E-Cigarettes reviews and critically assesses the state of the emerging evidence about e-cigarettes and health. This report makes recommendations for the

improvement of this research and highlights gaps that are a priority for future research.

There has been a need for a comprehensive one-volume reference on the manufacture of meats and sausages at home. There are many cookbooks loaded with recipes which do not build any foundation for the serious hobbyist to follow. This leaves him with little understanding of the sausage making process and afraid to introduce his own ideas. There are professional books that are written for meat plant managers or graduate students, unfortunately, these works are written in such difficult technical terms, that most of them are beyond the comprehension of an average person. Home Production of Quality Meats and Sausages bridges the gap that exists between highly technical textbooks and the requirements of the typical hobbyist. In order to simplify this gap to the absolute minimum, technical terms were substituted with their equivalent but simpler terms and many photographs, drawings and tables were included. The book covers topics such as curing and making brines, smoking meats and sausages, U.S. Standards, making fresh, smoked, emulsified, fermented and air dried products, making special sausages such as head cheeses, blood and liver sausages, low salt, low fat and Kosher products, hams, bacon, butts and loins, poultry, fish and game, creating your own recipes and much more... To get the reader started 172 recipes are provided which were chosen for their originality and historical value. They carry an enormous value as a study material and as a valuable resource on making meat products and sausages. Although recipes play an important role in these products, it is the process that ultimately decides the sausage quality. It is perfectly clear that the authors don't want the reader to copy the recipes only: "We want him to understand the sausage making process and we want him to create his own recipes. We want him to be the sausage maker." 100 vegan recipes that riff on Southern cooking in surprising and delicious ways, beautifully illustrated with full-color photography. Jenné Claiborne grew up in Atlanta eating classic Soul Food—fluffy biscuits, smoky sausage, Nana's sweet potato pie—but thought she'd have to give all that up when she went vegan. As a chef, she instead spent years tweaking and experimenting to infuse plant-based, life-giving, glow-worthy foods with the flavor and depth that feeds the soul. In *Sweet Potato Soul*, Jenné revives the long tradition of using fresh, local ingredients creatively in dishes like Coconut Collard Salad and Fried Cauliflower Chicken. She improvises new flavors in Peach Date BBQ Jackfruit Sliders and Sweet Potato-Tahini Cookies. She celebrates the plant-based roots of the cuisine in Bootylicious Gumbo and savory-sweet Georgia Watermelon & Peach Salad. And she updates classics with Jalapeño Hush Puppies, and her favorite, Sweet Potato Cinnamon Rolls. Along the way, Jenné explores the narratives surrounding iconic and beloved soul food recipes, as well as their innate nutritional benefits—you've heard that dandelion, mustard, and turnip greens, okra, and black eyed peas are nutrition superstars, but here's how to make them super tasty, too. From decadent pound cakes and ginger-kissed fruit cobblers to smokey collard greens, amazing crabcakes and the most comforting sweet potato pie you'll ever taste, these better-than-the-original takes on crave-worthy dishes are good for your health, heart, and soul.

North Carolina is home to the longest continuous barbecue tradition on the North American mainland. Authoritative, spirited, and opinionated (in the best way), *Holy Smoke* is a passionate exploration of the lore, recipes, traditions, and people who have helped shape North Carolina's signature slow-food dish. Three barbecue devotees, John Shelton Reed, Dale Volberg Reed, and William McKinney, trace the origins of North Carolina 'cue and the emergence of the heated rivalry between Eastern and Piedmont styles. They provide detailed instructions for cooking barbecue at home, along with recipes for the traditional array of side dishes that should accompany it. The final section of the book presents some of the people who cook barbecue for a living, recording firsthand what experts say about the past and future of North Carolina barbecue. Filled with historic and contemporary photographs showing centuries of North Carolina's "barbecue culture," as the authors call it, *Holy Smoke* is one of a kind, offering a comprehensive

Salt Sugar SmokeHow to preserve fruit, vegetables, meat and fish**Mitchell Beazley**
Chicken is one of the most popular foods we love to cook and eat: comforting, quick, celebratory and casual. Plundering the globe, there is no shortage of brilliant ways to cook it, whether you need a quick supper on the table after work, something for a lazy summer barbecue or a feast to nourish family and friends. From quick

Vietnamese lemon grass and chilli chicken thighs and a smoky chicken salad with roast peppers and almonds, through to a complete feast with pomegranate, barley and feta stuffed roast chicken with Georgian aubergines, there is no eating or entertaining occasion that isn't covered in this book. In *A Bird in the Hand*, Diana Henry offers a host of new, easy and not-so-very-well-known dishes, starring the bird we all love.

What happened when one of today's best-loved food writers had a change of appetite? Here are the dishes that Diana Henry created when she started to crave a different kind of diet - less meat and heavy food, more vegetable-, fish-, and grain-based dishes - often inspired by the food of the Middle East and Far East, but also drawing on cuisines from Georgia to Scandinavia. In her year of good eating, Diana lost weight, but this was about much more than weight loss - lead by taste, it was about discovering a healthier, fresher way of eating. From a Cambodian salad of shrimps, grapefruit, toasted coconut, and mint or North African mackerel with cumin to blood orange and cardamom sorbet, the magical dishes in this book are bursting with flavor, with goodness and with color. Peppering the recipes is Diana's inimitable writing on everything from the miracle of broth to the great carbohydrate debate. Above all, this is about opening up our palates to new possibilities. There is no austerity here, simply fabulous food that nourishes body and soul.

She kept this book for years. Putting a menu together is still her favourite part of cooking. Menus aren't just groups of dishes that have to work on a practical level (meals that cooks can manage), they also have to work as a succession of flavours. But what is perhaps most special about them is the way they can create very different moods - menus can take you places, from an afternoon at the seaside in Brittany to a sultry evening eating mezze in Istanbul. They are a way of visiting places you've never seen, revisiting places you love and celebrating particular seasons. How to Eat a Peach contains many of Diana's favourite dishes in menus that will take you through the year and to different parts of the world.

New York Times Bestseller Named "22 Essential Cookbooks for Every Kitchen" by SeriousEats.com Named "25 Favorite Cookbooks of All Time" by Christopher Kimball Named "Best Cookbooks Of 2016" by Chicago Tribune, BBC, Wired, Epicurious, Leite's Culinaría Named "100 Best Cookbooks of All Time" by Southern Living Magazine For succulent results every time, nothing is more crucial than understanding the science behind the interaction of food, fire, heat, and smoke. This is the definitive guide to the concepts, methods, equipment, and accessories of barbecue and grilling. The founder and editor of the world's most popular BBQ and grilling website, AmazingRibs.com, "Meathead" Goldwyn applies the latest research to backyard cooking and 118 thoroughly tested recipes. He explains why dry brining is better than wet brining; how marinades really work; why rubs shouldn't have salt in them; how heat and temperature differ; the importance of digital thermometers; why searing doesn't seal in juices; how salt penetrates but spices don't; when charcoal beats gas and when gas beats charcoal; how to calibrate and tune a grill or smoker; how to keep fish from sticking; cooking with logs; the strengths and weaknesses of the new pellet cookers; tricks for rotisserie cooking; why cooking whole animals is a bad idea, which grill grates are best; and why beer-can chicken is a waste of good beer and nowhere close to the best way to cook a bird. He shatters the myths that stand in the way of perfection. Busted misconceptions include:

- Myth:

Bring meat to room temperature before cooking. Busted! Cold meat attracts smoke better. • Myth: Soak wood before using it. Busted! Soaking produces smoke that doesn't taste as good as dry fast-burning wood. • Myth: Bone-in steaks taste better. Busted! The calcium walls of bone have no taste and they just slow cooking. • Myth: You should sear first, then cook. Busted! Actually, that overcooks the meat. Cooking at a low temperature first and searing at the end produces evenly cooked meat. Lavishly designed with hundreds of illustrations and full-color photos by the author, this book contains all the sure-fire recipes for traditional American favorites and many more outside-the-box creations. You'll get recipes for all the great regional barbecue sauces; rubs for meats and vegetables; Last Meal Ribs, Simon & Garfunkel Chicken; Schmancy Smoked Salmon; The Ultimate Turkey; Texas Brisket; Perfect Pulled Pork; Sweet & Sour Pork with Mumbo Sauce; Whole Hog; Steakhouse Steaks; Diner Burgers; Prime Rib; Brazilian Short Ribs; Rack Of Lamb Lollipops; Huli-Huli Chicken; Smoked Trout Florida Mullet – Style; Baja Fish Tacos; Lobster, and many more.

NEW YORK TIMES BESTSELLER • From the author of Salt Sugar Fat comes a “gripping” (The Wall Street Journal) exposé of how the processed food industry exploits our evolutionary instincts, the emotions we associate with food, and legal loopholes in their pursuit of profit over public health. “The processed food industry has managed to avoid being lumped in with Big Tobacco—which is why Michael Moss’ s new book is so important.” —Charles Duhigg, author of The Power of Habit Everyone knows how hard it can be to maintain a healthy diet. But what if some of the decisions we make about what to eat are beyond our control? Is it possible that food is addictive, like drugs or alcohol? And to what extent does the food industry know, or care, about these vulnerabilities? In Hooked, Pulitzer Prize – winning investigative reporter Michael Moss sets out to answer these questions—and to find the true peril in our food. Moss uses the latest research on addiction to uncover what the scientific and medical communities—as well as food manufacturers—already know: that food, in some cases, is even more addictive than alcohol, cigarettes, and drugs. Our bodies are hardwired for sweets, so food giants have developed fifty-six types of sugar to add to their products, creating in us the expectation that everything should be cloying; we’ ve evolved to prefer fast, convenient meals, hence our modern-day preference for ready-to-eat foods. Moss goes on to show how the processed food industry—including major companies like Nestlé, Mars, and Kellogg’ s—has tried not only to evade this troubling discovery about the addictiveness of food but to actually exploit it. For instance, in response to recent dieting trends, food manufacturers have simply turned junk food into junk diets, filling grocery stores with “diet” foods that are

hardly distinguishable from the products that got us into trouble in the first place. As obesity rates continue to climb, manufacturers are now claiming to add ingredients that can effortlessly cure our compulsive eating habits. A gripping account of the legal battles, insidious marketing campaigns, and cutting-edge food science that have brought us to our current public health crisis, *Hooked* lays out all that the food industry is doing to exploit and deepen our addictions, and shows us why what we eat has never mattered more.

Indulge your naughtiest food fantasies and satisfy your gluttony and lust with this succulent cook-and-look book, from a self-described “burger pervert” and creator of the notorious PornBurger blog. PornBurger is Washington, DC, chef, food stylist, and creative producer Mathew Ramsey’s orgasmic experiment: ingredient-driven, flavor-intense, sensually divine excess that caters to the food fetishist in all of us. Shamelessly health-unconscious and ready to entertain (or offend), Ramsey’s recipes deliver the ultimate in debauched burger stackography—handcrafted buns, patties, toppings, and sides, even some boozy beverages—expertly designed and lusciously photographed in a set of bombshell burger pinups. But don’t be fooled by raunchy descriptions and Ramsey’s signature burger puns, like the Bill U Murray Me?, Spamela Anderson, and the Willem DaFoe–nut. This burger freak is a culinary-school-educated chef devoted to the dark arts of hamburgery. Ramsey shows you how to master as many essential cooking techniques as he offers graphically delicious images to ogle. Whet your appetite with delectable concoctions like the Horn Dog: clover honey, whole kernel corn jalapeño batter, slow-roasted pork belly, pickled hot dog, two smash-cooked PornBurger beef patties; the James Francophile: quick pickled beets, truffled demi-glace, Gruyère de Comté, one PornBurger beef patty, bone marrow onion jam, potato-chip-crustéd fois gras gougère; and I Woke Up Like This: sriracha mustard, arugula, smoked bacon, American cheese, fried chicken thigh, quick-pickled hamburger dills, White Castle cheeseburger waffle. Combining tantalizing meat blends, grinds, and cooking methods, a tempting range of vegetarian and pescatarian delights, and lip-smacking custom ketchups and pickles, PornBurger offers the ultimate dining experience and entices you to create your own culin-aughty adventure. Every element of every burger is open to reinterpretation—with PornBurger, get weird, get wild, and leave no burger fantasy unimagined . . . or uneaten.

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.
