A well-liked, respected, caring pillar of the community - or an outsider, socially inept and with a frightening appearance? Wearing many different masks, serial killers are among the most disturbing and dangerous violent criminals in existence. They are individuals who have a history of multiple murders, normally committed over a long period of time and often with periods of apparent normality in between. With their different appearances and motives serial killers are hard to identify and often much harder to understand. Yet they must be caught because the one unifying characteristic all serial killers share is their inability to feel remorse for their actions, and consequently their need to keep on killing...Some profilers believe that serial killers don't learn from their mistakes. This book explores the greed-factor that sets in and explains how killers come to think that the more they kill and get away with it, the easier it will become.

The Encyclopedia of Mass Murder is a remarkable, revelatory exploration of the world's worst cases of mass murder. This comprehensive has been recently revised and updated for its U.S. debut from two true-crime experts. From this chilling collection, a significantly consistent pattern emerges of the person who commits mass murder: almost always male, a loner lacking in social skills, unable to form stable relationships. Bearing a grudge against society in general or blaming certain individuals in particular, he seeks revenge in the most extreme way. Among the most notorious cases profiled are Timothy McVeigh, responsible for the deaths of 168 people in the Oklahoma City bombing, Eric Harris and David Koehn, two heavily armed students who opened fire at Columbine High School, killing 13 students, and Brenda Spencer, a rare instance of a female mass murderer, who shot dead eleven junior high classmates "because," she said, "I don't like Mondays." Eight pages of black-and-white photographs are included.

A compendium of bizarre, horrifying tales of murder features the world's most brutal serial killers, including a male nurse sentenced in the Southern California Hospital Murders and Waldo Grant, a "quiet loner" who killed with hammers and saws. Original.

America has a long and complicated fascination with serial killers. When we think about the most infamous of these killers, we generally think of men like Ted Bundy, Jeffrey Dahmer, or John Wayne Gacy. Those names make headlines while there's the often-repeated myth that suggests there are no female serial killers. After all, most of us couldn't name a woman on the same scale of infamy as BTK or the elusive Zodiac Killer, can we? As it so often is, the truth is far more complicated. Women kill. While they are less sensationalized than their male counterparts, they are no less deadly. At time of publication, current research shows that one in six serial killers are female, bringing their number to fifteen percent of confirmed serial killers. This reference book includes background information on the killers, their victims, methods, and - where relevant - their arrests, trials, and convictions.

The Life and Mind of a Family Mass Murderer

The Grisly Business Unit

In 1990, a young woman was strangled on a jogging path near the home of Pat Brown and her family. Brown suspected the young man who was renting a room in her house, and quickly uncovered strong evidence that pointed to him--but the police dismissed her as merely a housewife with an overactive imagination. It would be six years before her former boarder would be brought in for questioning, but the night Brown took action to solve the murder was the beginning of her life's work. Pat Brown is now one of the nation's few female criminal profilers--a sleuth who assists police departments and victims' families by analyzing both physical and behavioral evidence to make the most scientific determination possible about who committed a crime. Brown has analyzed many dozens of seemingly hopeless cases and brought new investigative avenues to light. In The Profiler, Brown opens her case files to take readers behind the scenes of bizarre sex crimes, domestic

murders, and mysterious deaths, going face-to-face with killers, rapists, and brutalized victims. It's a rare, up-close, first-person look at the real world of police and profilers as they investigate crimes--the good and bad, the cover-ups and the successes. Serial killers like Seattle's Ted Bundy, Maryland's Beltway Sniper, Atlanta's Wayne Williams, or England's Peter Sutcliffe usually outsmart the task forces on their trail for long periods of time. Keppel and Birnes take readers inside the operations of serial killer task forces to learn why. What is the underlying psychology of a serial killer and why this defeats task force investigations? This is the first book of its kind that combines state-of-the-art psychological assessment experience with the expertise of a homicide investigator who has tracked some of this country's most notorious serial killers. The author also brings to the book hands-on best practices gleaned from the experience of other task forces. Readers, both professionals and students, will benefit from the comprehensive and critical case reviews, the analysis of what went wrong, what went right, and the after-action recommendations of evaluators in the US, UK, and Canada. The book covers: * The nature of the psychology of a serial killer * How crime assessment profiling reveals that psychology * Why psychological profiles fail * How serial killer task forces defeat themselves * How the media can, and usually does, undermine the task force operation * The big secret of all serial killer investigations: police already have the killer's name * The best practices for catching a serial killer * Comprehensive case reviews of some of the US's and UK's most baffling serial killer cases * A list of best practices for serial killer task force investigators * Recommendations for how to manage comprehensive files and computer records * Practical advice on how to manage the media: what to say and not to say * Insight into what a serial killer might be thinking and doing to stay away from police * Recommendations for setting up and administering long-term investigations * Practical tips on how to maintain a task force's psychological edge and avoid defeatism

Presents a historical survey of kidnappings from biblical times to the present.

On November 8, 1985, 18-year-old Tom Odle brutally murdered his parents and three siblings in the small southern Illinois town of Mount Vernon, sending shockwaves throughout the nation. The murder of the Odle family remains one of the most horrific family mass murders in U.S. history. Odle was sentenced to death and, after seventeen years on death row, expected a lethal injection to end his life. However, Illinois governor George Ryan's moratorium on the death penalty in 2000, and later commutation of all death sentences in 2003, changed Odle's sentence to natural life. The commutation of his death sentence was an epiphany for Odle. Prior to the commutation of his death sentence, Odle lived in denial, repressing any feelings about his family and his horrible crime. Following the commutation and the removal of the weight of eventual execution associated with his death sentence, he was confronted with an unfamiliar reality. A future. As a result, he realized that he needed to understand why he murdered his family. He reached out to Dr. Robert Hanlon, a neuropsychologist who had examined him in the past. Dr. Hanlon engaged Odle in a therapeutic process of introspection and self-reflection, which became the basis of their collaboration on this book. Hanlon tells a gripping story of Odle's life as an abused child, the life experiences that formed his personality, and his tragic homicidal escalation to mass murder, seamlessly weaving into the narrative Odle's unadorned reflections of his childhood, finding a new family on death row, and his belief in the powers of redemption. As our nation attempts to understand the continual mass murders occurring in the U.S., *Survived by One* sheds some light on the psychological aspects of why and how such acts of extreme carnage may occur. However, *Survived by One* offers a never-been-told perspective from the mass murderer himself, as he searches for the answers concurrently being asked by the nation and the world.

Serial Killers

There is little more terrifying than those who hunt, stalk and snatch their prey under the cloak of darkness. These hunters search not for animals, but for the touch, taste, and empowerment of human flesh. They are cannibals, vampires and monsters, and they walk among us. These serial killers are not mythical beasts with horns and shaggy hair. They are people living among society, going about their day to day activities until nightfall. They are the Dennis Rader's, the fathers, husbands, church going members of the community. This A-Z encyclopedia of 150 serial killers is the ideal reference book. Included are the most famous true crime serial killers, like Jeffrey Dahmer, John Wayne Gacy, and Richard Ramirez, and not to mention the women who kill, such as Aileen Wuornos and Martha Rendell. There are also lesser known serial killers, covering many countries around the world, so the range is broad. Each of the serial killer files includes information on when and how they killed the victims, the background of each killer, or the suspects in some cases such as the Zodiac killer, their trials and punishments. For some there are chilling quotes by the killers themselves. The Big Book of Serial Killers is an easy to follow collection of information on the world's most heinous murderers.
