

Surviving The Evacuation, Book 11: Search And Rescue

Whoever wins the election, humanity will lose. Nine months after the outbreak, ten thousand survivors from across the globe have found a refuge on the Welsh island of Anglesey. Hordes of the undead ravage the wastelands of Britain and Ireland. Satellite images show that the rest of the world is no better. Food, fuel, and ammunition are running low and there are no more old-world supplies with which to replace them. Intended as an alternative to a slide into despotism, an election is called. It is hoped the contest will bring forth solutions to the myriad crises facing this last bastion of humanity. After the favoured candidate is hospitalised, suspicion falls on the new frontrunner, a publican who purchased his support with an impossible promise of a return to the pre-apocalyptic world. With no viable candidate, and no way of calling off the election, those who still have access to a ship plan their departure; others plan to rig the contest; a few give up on all plans for a future beyond tomorrow. Anglesey is on the verge of collapse, and humanity is on the brink of extinction. Set in Belfast, the Isle of Man, and Wales during the run-up to the election on Anglesey, this is the sixth volume of Bill Wright ' s journals.

For good or ill, the future has begun. After the outbreak came the nuclear war. The blasts killed millions. Chaos followed. Most of those unlucky enough not to succumb to starvation and disease joined the ranks of the living dead. Fleeing the impossible nightmare, ten thousand, from nations across the Atlantic seaboard, found refuge on the Welsh island of Anglesey. There, they should have been safe. There, they should have been able to rebuild. There, they were betrayed. Forced to flee once more, a hasty exodus was planned, but those plans were sabotaged. The survivors became scattered across the island of Ireland. Old-world supplies are scarce, hope is running out, and safety is just a memory. The snow has come, and though rain will soon follow, winter has truly begun. In Dundalk, eight hundred survivors have occupied a local college, but the campus is too dispersed to defend. As they scour the snow-covered town for a safe route to the sea, they find signs of long-fled survivors and answers to a question they hadn ' t asked. In Belfast, the situation is increasingly precarious. There are saboteurs in their midst. As the investigation into their identity slowly progresses, the terrorists continue to plot. Rumours of a mutiny escalate into a riot, while an unseen clock ticks ever closer towards humanity ' s destruction. Set in Belfast and Dundalk, over three days that change everything.

published transcripts, recently declassified documents, and original interviews and stories from nearly five hundred government officials, first responders, witnesses, survivors, friends, and family members. Here is a vivid, profound, and searing portrait of humanity on a day that changed the course of history, and all of our lives.

Perfect for fans of Hatchet and the I Survived series, this harrowing middle grade debut novel-in-verse from a Pushcart Prize-nominated poet tells the story of a young girl who wakes up one day to find herself utterly alone in her small Colorado town. When twelve-year-old Maddie hatches a scheme for a secret sleepover with her two best friends, she ends up waking up to a nightmare. She's alone—left behind in a town that has been mysteriously evacuated and abandoned. With no one to rely on, no power, and no working phone lines or internet access, Maddie slowly learns to survive on her own. Her only companions are a Rottweiler named George and all the books she can read. After a rough start, Maddie learns to trust her own ingenuity and invents clever ways to survive in a place that has been deserted and forgotten. As months pass, she escapes natural disasters, looters, and wild animals. But Maddie's most formidable enemy is the crushing loneliness she faces every day. Can Maddie's stubborn will to survive carry her through the most frightening experience of her life?

Life and Death in a Storm-Ravaged Hospital

It took three weeks to destroy civilisation. It won't be rebuilt in a day. A year after the outbreak, a sharp winter is followed by a sudden thaw. Spring has come early to Nova Scotia, bringing new hope. For the thirteen thousand survivors who've found sanctuary in northern Canada, and for the first time since the apocalypse, extinction isn't imminent. But it looms large in the near future, a legacy of the nuclear war that destroyed civilisation. As the weather improves, some survivors quit the small community. Even more plan their departure. The old-world supplies of food, oil, and ammunition have been consumed. More will have to be grown, drilled, and made. Medicine, paper, clothes: in a few years there will be none left to salvage. If it can't be manufactured, it will have to be forged. What knowledge can't be preserved will be lost. Humanity's future appears bleak unless more people can be found. Hoping there is some truth in the rumours of a redoubt in Vancouver, an expedition to the Pacific is launched. The journey will be perilous as North America was ground zero for the outbreak, and for the nuclear war. Set in Canada and beyond, as survivors from the Atlantic and Pacific meet. Please note, this book features places and events, and heroes and villains from the saga of the Pacific survivors told in the series Life Goes On.

The outbreak changed everything, but there are some bonds even the undead can't break. It's been six years since Pete Guinn last saw his sister, Corrie. He always hoped to see her again, but feared she was dead. When an elusive billionaire reveals Corrie is living under an assumed name in the Australian outback, Pete unquestioningly jumps at the chance of a reunion. But you can't win the lottery without buying a ticket, and billionaires don't do favours for free. Corrie is in hiding from her old employer, and from the Rosewood Cartel. Now that they've both found her, only a miracle can save the two siblings, and what happens in Manhattan can't be described as miraculous. What begins as a viral outbreak soon turns into an impossible horror. People are infected and die, only to rise up and continue transmitting the infection. Even as the army is

mobilised, the virus spreads beyond the borders of the United States. Nowhere is safe from the living dead. As Australia is quarantined, the mining town of Broken Hill becomes a transit hub for the relief effort. Tourists are evacuated while civilians are conscripted, Pete and Corrie among them. Together with a bush pilot, a flying doctor, and an outback cop, the struggle to maintain civilisation begins. Supplies run low. Looting is rampant. Laws are forgotten, especially by the cartel who haven't abandoned their search for Corrie and their quest for revenge. Set in Broken Hill and beyond as the Australian quarantine begins. As this book returns to the beginning of the outbreak, it can be considered a good entry point for readers new to the series.

When the terrorist attacks struck New York City on September 11, 2001, boat operators and waterfront workers quickly realized that they had the skills, the equipment, and the opportunity to take definite, immediate action in responding to the most significant destructive event in the United States in decades. For many of them, they were “doing what needed to be done.”

American Dunkirk shows how people, many of whom were volunteers, mobilized rescue efforts in various improvised and spontaneous ways on that fateful date. Disaster experts James Kendra and Tricia Wachtendorf examine the efforts through fieldwork and interviews with many of the participants to understand the evacuation and its larger implications for the entire practice of disaster management. The authors ultimately explore how people—as individuals, groups, and formal organizations—pull together to respond to and recover from startling, destructive events. American Dunkirk asks, What can these people and lessons teach us about not only surviving but thriving in the face of calamity?

Save Australia, Save the World. Three weeks after the outbreak, most nations have collapsed. An ever-increasing number of refugees flee, by boat and air, to the perceived safety of the remote Pacific nations. In Australia, every able body is conscripted, local and newcomer alike. The lucky few are put to work in the new factories, farms, and mines. The unlucky many are given tools for weapons, put aboard cruise-ships and cargo freighters, and returned to the ever-moving frontline. But even though the death toll rises, victory is still within reach. The recordings made in North America by Pete and Corrie Guinn contained more than the siblings realised. The footage from Canada and Michigan is further confirmation the outbreak was no accident. The Canadian scientist, Dr Avalon, can prove it. As Commissioner Tess Qwong takes justice to the increasingly lawless outback, Anna Dodson brings order to the chaos of Parliament House, and Dr Avalon works on a weapon to finally destroy the undead. But no plans can survive the impact of a nuclear bomb. From a lawless natural gas refinery in Queensland to the once golden coast of New South Wales. Behind the barricaded streets of Canberra and in the bunker beneath Parliament House, there is still hope for Australia, the Pacific, the world, as long as the lights remain on.

Discover how human beings react to danger—and what makes the difference between life and death “Fascinating and useful . . . [shows that] the most important variable in an emergency is your own behavior.”—The New York Times Today, nine out of ten Americans live in places at significant risk of earthquakes, hurricanes, tornadoes, terrorism, or other disasters. Tomorrow, some of us will have to make split-second choices to save ourselves and our families. How will we react? What will it feel like? Will we be heroes or victims? In her quest to answer these questions, award-winning journalist Amanda Ripley traces human responses to some of recent history’s epic disasters, from the explosion of the Mont Blanc munitions ship in 1917—one of the biggest explosions before the invention of the atomic bomb—to the journeys of the 15,000 people who found their way out of the World Trade Center on September 11, 2001. To understand the science behind the stories, Ripley turns to leading brain scientists, trauma psychologists, and other disaster experts. She even has her own brain examined by military researchers and experiences, through realistic simulations, what it might be like to survive a plane crash into the ocean or to escape a raging fire. Ripley comes back with precious wisdom about the surprising humanity of crowds, the elegance of the brain’s fear circuits, and the stunning inadequacy of many of our evolutionary responses. Most unexpectedly, she discovers the brain’s ability to do much, much better—with just a little help.

The horror of Hurricane Katrina is brought vividly to life in this fictional account of a boy, a dog, and the storm of the century. Barry's family tries to evacuate before Hurricane Katrina hits their home in New Orleans. But when Barry's little sister gets terribly sick, they're forced to stay home and wait out the storm. At first, Katrina doesn't seem to be as bad as predicted. But overnight the levees break, and Barry's world is literally torn apart. He's swept away by the floodwaters, away from his family. Can he survive the storm of the century -- alone?

The battle might be lost, but the war isn’t over. Once it was home to half a billion people. A year after the nuclear war, Europe is a radioactive, storm-ravaged wasteland through which a hundred million undead inexorably march. In their wake, they leave nothing but ruins. Ahead of them flee those few who managed to survive this long. Chasing them are the dregs of humanity. Once known as the Rosewood Cartel, they kill, loot, and destroy as indiscriminately as the living dead. Hope might be lost, but it could still be found, as can a future for the last remnant of humanity. Those who built a sanctuary on Anglesey, in Dundalk, in Creil are the help that came to others. In this, their darkest hour, but with a new dawn so close, they will not give up. Set in the Faroe Islands, France, Denmark, and elsewhere, the battle has begun, but the war hasn’t yet been lost.

Not all people died. Not all gave up hope. The outbreak was in February. By the end of November, Earth has become a hellish wasteland ravaged by the undead.

Survivors from across the Atlantic seaboard took refuge on the Welsh island of Anglesey. Beset by dangers from within, they departed to establish a new refuge in Belfast. Not all of them arrived. Six took the last plane on its last flight, but crashed in France. Expecting a sprinting battle through the ruins of Belfast, they packed light. With few weapons and barely any food, their chances of survival are slim. The chances of rescue are slimmer. There was no evacuation in France. No quarantine. No rationing. But there are zombies, and there are people who believe they, alone, are the last survivors of the old-world. So begins a frantic race against the undead, through the snow and storm ravaged ruins of Northern France.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Anglesey became a refuge for survivors from across the world, but living in the shadow of a decrepit nuclear power station was always a precarious existence. There is only one destination for their final exodus from Britain, but Belfast won't become their new home. There are fewer undead on the island of Ireland, but their numbers still count in the millions. With farming impossible, with the weather worsening, with ammunition exhausted, desperation turns to despair. All seems bleak, but the survivors don't know how truly desperate their situation is. During the chaos that ensued after the calamitous election, they misjudged the evidence. Their true enemy is still among them, and that enemy is about to act. Set nine months after the outbreak, in Britain and the island of Ireland, when humanity is at a crossroads. Either all will survive, or our species will die.

There is nothing a mother won't do to protect her son. "There are no reported outbreaks in the UK or Ireland." That is what the government broadcast. Nilda didn't believe it. Not trusting the authorities, she, and her son, Jay, stay behind when Penrith is evacuated. Vindicated when she learns the extent of the government's betrayal, they search for supplies, but after weeks of rationing, there is little left in the small town in Northern England. Soon, she discovers that there are many other survivors competing for it. Choosing diplomacy over violence, she attempts to forge a community out of a disparate group, but as the number of the undead grow, she realises that they will have to seek sanctuary elsewhere. Abandoned and betrayed, Nilda travels north into Scotland, but death follows her and she discovers that not all those who survived the evacuation have the same motives. Some only want to help. Others only want to help themselves. Whilst the new Mayor of Anglesey has her own agenda, one at odds with Nilda's quest; to find a safe haven for her son. Trapped. Alone. Unconcerned. Eight months after the outbreak, Bill Wright is trapped during a survey mission in Ireland. Surrounded by the undead, low on food and lower on water, he's been in this situation before. Unlike before, help is only a rifle shot away. While waiting for the rescue he's sure will come, he records the turbulent events since his last entry. The Welsh island of Anglesey has become a sanctuary for survivors from across the zombie-infested world. It has electricity, wheat, and not much else.

Medicines and equipment, plants and fertiliser, books and batteries, and so much more are needed if this last bastion of civilisation is to survive. Scavenging expeditions depart for Svalbard, Liverpool, and the southern Atlantic, but a discovery is made far nearer, one which will change the fate of all those who've come to call Anglesey home.

J. Barton Mitchell's The Razor is a riveting science fiction thriller about a man struggling to survive the chaos on a prison planet. Brilliant engineer Marcus Flynn has been sentenced to 11-H37 alongside the galaxy's most dangerous criminals. A hard labor prison planet better known as the Razor, where life expectancy is short and all roads are dead ends. At least until the Lost Prophet goes active... In a few hours, prison guards and staff are evacuated, the prisoners are left to die, and dark mysteries begin to surface. Only Flynn has the skills and knowledge to unravel them, but he will have to rely on the most unlikely of allies--killers, assassins, pirates and smugglers. If they can survive each other they just might survive the Razor...and claim it for their own.

Billions were infected. Nations fell. The evacuation failed. Bill Wright's journey has only one destination, the research facility that created the virus. As he meets other survivors in his struggle across the wasteland to reach it, he discovers that it is not just the undead who need to be feared. This is the second volume of his journal.

Billions died during the global civil war that followed the outbreak. Anarchy took grip. Chaos ruled. The world collapsed. In Britain, the evacuation failed. Nowhere was safe from the undead. Four months after the outbreak Bill Wright has found safety in a ruined Abbey in southern England, but he is still alone. All he has for company are the files sent to him by his shadowy contact, Sholto. On those, he believes he has found the origins of the undead, and the vast conspiracy in which he discovers he played an unwitting part. He needs answers, and knows the only place they will be found is at the facility that created the virus. As he journeys through the desolate ruins of a dead civilisation, he meets other survivors. He rescues some, is rescued by others, but ultimately discovers that zombies are not the most deadly threat in an undead wasteland. This is the second volume of his journal. (76,000 words)

"New York Times" reporters Jim Dwyer and Kevin Flynn capture the

little-known stories of ordinary people who took extraordinary steps to save themselves and others inside the World Trade Center on September 11--the saga of the nearly 12,000 who escaped and the 2,749 who perished.

As one year ends, and our old world fades into memory, a new future is born. On a frozen archipelago, where it is too cold to farm, a few thousand survivors from across the Atlantic have found a refuge. The arduous process of turning a sanctuary into a home begins once more for these weary travellers who've been chased from Britain, from Ireland, from France and Denmark. But their work is not yet done. The missing Marines cannot be left behind. The French and Ukrainians cannot be abandoned. The cartel can never be forgotten. As soldiers once again become civilians, the dangers of malnutrition replace the everyday spectre of starvation. Potential mutiny supersedes being overrun by the undead. Boredom replaces fear. Slowly, they relax, allowing themselves to enjoy the simple pleasure of music and plays, of weddings and births, of life without the imminent prospect of death. But all is not what it seems in the snowy wastes surrounding their town. While Europe is a zombie-filled radioactive wasteland, there are other continents. Other oceans. Other survivors. Other communities, just like their own, who will fight to keep what they've clawed from the grip of the apocalyptic nightmare. Set in Northern Europe, Eastern Canada, and the tumultuous seas between, as one year ends, and a new civilisation dawns.

Sheri Fink's landmark investigation of patient deaths at a New Orleans hospital ravaged by Hurricane Katrina—and her suspenseful portrayal of the quest for truth and justice. In the tradition of true
investigative journalism, physician and reporter Sheri Fink reconstructs 5 days at Memorial Medical
Center and draws the reader into the lives of those who struggled mightily to survive and make sense
amid chaos. After Katrina struck and the floodwaters rose, the power failed, and the heat climaxed
exhausted caregivers chose to designate certain patients last for rescue. Months later, a doctor and
nurses were arrested and accused of injecting some of those patients with life-ending drugs.
at Memorial, the culmination of six years of reporting, unspools the mystery of what happened over
days, bringing the reader into a hospital fighting for its life and into a conversation about the
terrifying form of health care rationing. In a voice at once involving and fair, masterful and intimate,
Fink exposes the hidden dilemmas of end-of-life care and reveals just how ill-prepared we are for the
impact of large-scale disasters—and how we can do better. A remarkable book, engrossing from

Book 3: Family The undead rose. Nations collapsed. Some people survived. Three months after the outbreak, Bill Wright, a man from London, discovers the true extent of the global war that followed the outbreak. Most of the world has been destroyed, but though ruined farmland and abandoned cities are filled with zombies, there are other survivors and there is a safe haven, so he is told, in a small village on the Irish coast. Before he can go there, he must find and rescue the children. Then he will have to battle his way through the infected wastelands of England and Wales in the hope that their really is a boat waiting for them. Even then, his journey won't be over. When he is told of the sanctuary awaiting them, he also discovers that the scientist who created the virus escaped from New York. In order for any of them to be safe, Bill will have to head north to confront the man, discover the truth behind the outbreak, and choose between his old family and his new one. This is the final volume of his journal. **Zombies vs Living Dead** The outbreak began in New York. Within days it had spread throughout the world. Nowhere is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The press was nationalised, martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and the Irish Republic. For George Tull and the other residents of the Waverly-Price Retirement Home, walking to the coast is not an option. Abandoned by the staff, they wait for rescue. It doesn't come. When George leaves the illusory security of The Home and ventures into the nearby village, he finds it deserted. He is not alone, his unhappy retirement is broken by the undead. George is left with a terrible choice: stay and fight to save the people he loathes, or leave and abandon the woman he has come to love. **Zombies** The outbreak began in New York. Soon it had spread to the rest of the world. People were attacked, infected, and they died. Then they came back. No one is safe from the undead. As a civil war took grip across the globe, Britain was quarantined. The British press was nationalised. Martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. Bill Wright, a Westminster insider and an advisor to a future Prime Minister, broke his leg on the day of the outbreak. Unable to join the evacuation, he watched from his window as the streets filled with refugees. He watched as the streets emptied once more. He watched as they filled up again, this time with the undead. The power went out. He is trapped. He is alone. He is running out of food and water. He knows that to reach the safety of the enclaves he will have to venture out into the wasteland that once was England. On his journey he will ultimately discover the horrific truth about the outbreak, a decades old conspiracy in which he was his unwitting part in it. This is the first volume of his journal. There is always hope. Northern France is a frozen morass of mud and snow across which rampages a horde of the undead, a hundred million strong. That won't stop Chester Carson and his comrades. Seeking a way across the Channel, they make for the coast, unaware that Britain has been abandoned, Belfast is a ruin, and that radiation is seeping into the Irish Sea. If they knew, that wouldn't stop them either. They're on a quest to save their family, their friends, and humanity itself; failure is not an option. As they journey through war-ravaged ports and storm-wrecked beaches, a new truth becomes clear. The flotilla that found refuge on Anglesey wasn't the only group of sea-borne refugees to have survived the outbreak. There are other survivors. Some good, some evil, some just determined to do their duty no matter the cost. Danger lurks along the French and Belgian coasts. So do answers, and hope that humanity now has a future. Not all survivors are to be trusted. Not all the conspirators are dead. February: Within hours of the outbreak, the quarantine was sabotaged. Within days, the world was gripped by civil war. March: When the lights finally went out, billions were dead. Millions more had joined the ranks of the undead. May: Anglesey has become home to nearly ten thousand survivors from across the Atlantic. While there is still danger from the undead on the mainland, there is hope. Hope that the zombies might die, hope that the electricity supply might be restored, and hope that more survivors will be found. Hope is not enough. Sergeant Branofski and Chester Carson venture into northern Wales to set up a network of safe houses that will provide a route to Anglesey for those still trapped in the wasteland. Though they find survivors, they discover something far worse. September: Nowhere is safe from the living dead, not even The Tower of London. The ancient fortress has become home to nearly a hundred people. Food is scarce and the undead are many. The survivors are doomed unless help can be found, but the only place it can come from is Anglesey. Eamonn Finnegan sets out alone to seek their salvation. He never reaches Wales. November: In her heart, Greta knows that Eamonn is dead, yet she has to look for her lost love because he would look for her. Chester joins her in the futile quest to ensure the search doesn't cost Greta her life. Before their journey has barely begun, they discover an old

foe that they thought was dead. Set on Anglesey and in London, near Wrexham and in Birmingham, while hope is fading for the last survivors of humanity.

The instant #1 New York Times bestseller. In time for the twentieth anniversary of 9/11, master storyteller Alan Gratz (Refugee) delivers a pulse-pounding and unforgettable take on history and hope, revenge and fear -- and the stunning links between the past and present. September 11, 2001, New York City: Brandon is visiting his dad at work, on the 107th floor of the World Trade Center. Out of nowhere, an airplane slams into the tower, creating a fiery nightmare of terror and confusion. And Brandon is in the middle of it all. Can he survive -- and escape? September 11, 2019, Afghanistan: Reshmina has grown up in the shadow of war, but she dreams of peace and progress. When a battle erupts in her village, Reshmina stumbles upon a wounded American soldier named Taz. Should she help Taz -- and put herself and her family in mortal danger? Two kids. One devastating day. Nothing will ever be the same.

A brilliant satire of mass culture and the numbing effects of technology, White Noise tells the story of Jack Gladney, a teacher of Hitler studies at a liberal arts college in Middle America. Jack and his fourth wife, Babbette, bound by their love, fear of death, and four ultramodern offspring, navigate the rocky passages of family life to the background babble of brand-name consumerism. Then a lethal black chemical cloud, unleashed by an industrial accident, floats over their lives, an "airborne toxic event" that is a more urgent and visible version of the white noise engulfing the Gladneys—the radio transmissions, sirens, microwaves, and TV murmurings that constitute the music of American magic and dread.

Fourteen months after the outbreak, thirteen months after the nuclear war, the old world is gone, but a new world is emerging. The evacuation of Britain failed, but other evacuations were a success. In Canberra, a new civilisation is being born, but in Canada, the survivors bid a last and final farewell to the Atlantic. While a final evacuation of Nova Scotia is planned, the search for lost communities begins. The journey takes Bill and Kim to the very end of the Earth, and to a meeting with familiar strangers.

Crossing the border, Sholto endures a bittersweet return to the country he'd embraced so many decades ago. The United States he remembered is gone, and yet he can see its shadow among the burned ruins and desolate towns of the American Northeast. But the rains soon turn to a flood that washes away the few bridges not destroyed during the failed quarantine. With no other escape from the deluge, they take to the river. On the Hudson, they sail into the middle of a civil war. When they learn one faction is led by the last surviving member of the political conspiracy that spawned the apocalypse, it is obvious which side to take. Set among the thawing wilderness of Quebec and Ontario, the swollen rivers and flooded roads of

New York, and in the courtrooms of Canberra, this novel includes characters and events from the five-part Pacific-based series Life Goes On. White Noise

The 9/11 Commission Report

Zombies. The outbreak began in New York. Soon it had spread to the rest of the world. People were attacked, infected, and they died. Then they came back. No one is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The British press was nationalised. Martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. Bill Wright, a Westminster insider and an advisor to a future Prime Minister, broke his leg on the day of the outbreak. Unable to join the evacuation, he watched from his window as the streets filled with refugees. He watched as the streets emptied once more. He watched as they filled up again, this time with the undead. Then the power went out. He is trapped. He is alone. He is running out of food and water. He knows that to reach the safety of the enclaves he will have to venture out into the wasteland that once was England. On that journey he will ultimately discover the horrific truth about the outbreak, a decades old conspiracy, and his unwitting part in it. This is the first volume of his journal. (73,000 words)

Not all survivors are to be trusted. Not all the conspirators are dead. February: Within hours of the outbreak, the quarantine was sabotaged. Within days, the world was gripped by civil war. March: When the lights finally went out, billions were dead. Millions more had joined the ranks of the undead. May: Anglesey has become home to nearly ten thousand survivors from across the Atlantic. While there is still danger from the undead on the mainland, there is hope. Hope that the zombies might die, hope that the electricity supply might be restored, and hope that more survivors will be found. Hope is not enough. Sergeant Branofski and Chester Carson venture into northern Wales to set up a network of safe houses that will provide a route to Anglesey for those still trapped in the wasteland. Though they find survivors, they discover something far worse. September: Nowhere is safe from the living dead, not even The Tower of London. The ancient fortress has become home to nearly a hundred people. Food is scarce and the undead are many. The survivors are doomed unless help can be found, but the only place it can come from is Anglesey. Eamonn Finnegan sets out alone to seek their salvation. He never reaches Wales. November: In her heart, Greta knows that Eamonn is dead, yet she has to look for her lost love because he would look for her. Chester joins her in the futile quest to ensure the search doesn't cost

Greta her life. Before their journey has barely begun, they discover an old foe that they thought was dead. Set on Anglesey and in London, near Wrexham and in Birmingham, while hope is fading for the last survivors of humanity.

A field-tested guide to surviving a nuclear attack, written by a revered civil defense expert. This edition of Cresson H. Kearny's iconic Nuclear War Survival Skills (originally published in 1979), updated by Kearny himself in 1987 and again in 2001, offers expert advice for ensuring your family's safety should the worst come to pass. Chock-full of practical instructions and preventative measures, Nuclear War Survival Skills is based on years of meticulous scientific research conducted by Oak Ridge National Laboratory. Featuring a new introduction by ex-Navy SEAL Don Mann, this book also includes: instructions for six different fallout shelters, myths and facts about the dangers of nuclear weapons, tips for maintaining an adequate food and water supply, a foreword by "the father of the hydrogen bomb," physicist Dr. Edward Teller, and an "About the Author" note by Eugene P. Wigner, physicist and Nobel Laureate. Written at a time when global tensions were at their peak, Nuclear War Survival Skills remains relevant in the dangerous age in which we now live.

Sixty years ago the world was wrecked during a terrible war. The soil was poisoned. The air became toxic. Billions died. Those who survived took refuge in great towered cities, and began constructing giant colony ships that would enable them to escape the ruined Earth. The work wasn't completed in their lifetime. The seas rose to swamp the diseased land, and lap against the city walls. Their descendants laboured on, and now the first of the spaceships is nearing completion. But these cities aren't dictatorships. An election is scheduled to choose a leader for this last exodus of humanity. With twenty-four hours until voting is due to begin, two workers are murdered. It is the first serious crime in generations, and it is down to the young Constable Ely to solve it. The election must take place. The ships must be launched. Above all, production must come first. The Andromeda Strain meets The Stand in this startling and stunning thriller that brings to life a unique vision of the apocalypse and plays brilliantly with vampire mythology, revealing what becomes of human society when a top-secret government experiment spins wildly out of control. At an army research station in Colorado, an experiment is being conducted by the U.S. Government: twelve men are exposed to a virus meant to weaponize the human form by super-charging the immune system. But when the experiment goes terribly wrong, terror is unleashed. Amy, a young girl abandoned by her mother and set to be the thirteenth test subject, is rescued by Brad Wolgast, the FBI agent who has been tasked with handing her over, and together they escape to the mountains of Oregon. As civilization crumbles around them, Brad and Amy struggle to keep each other alive, clinging to hope and unable to comprehend the nightmare that approaches

A new book to help senior executives and boards get smart about risk management The ability of businesses to survive and thrive often requires unconventional thinking and calculated risk taking. The key is to make the right decisions—even under the most risky, uncertain, and turbulent conditions. In the new book, Surviving and Thriving in Uncertainty: Creating the Risk Intelligent Enterprise, authors Rick Funston and Steve Wagner suggest that effective risk taking is needed in order to innovate, stay competitive, and drive value creation. Based on their combined decades of experience as practitioners, consultants, and advisors to numerous business professionals throughout the world, Funston and Wagner discuss the adoption of 10 essential and practical skills, which will improve agility, resilience, and realize benefits: Challenging basic business assumptions can help identify "Black Swans" and provide first-mover advantage Defining the corporate risk appetite and risk tolerances can help reduce the risk of ruin. Anticipating potential causes of failure can improve chances of survival and success through improved preparedness. Factoring in velocity and momentum can improve speed of response and recovery. Verifying sources and the reliability of information can improve insights for decision making and thus decision quality. Taking a longer-term perspective can aid in identifying the potential unintended consequences of short-term decisions.
