

## The Next Africa: An Emerging Continent Becomes A Global Powerhouse

'A valuable corrective to the fraying narrative of [African] failure.' Foreign Affairs Not so long ago, Africa was being described as the hopeless continent. Recently, though, talk has turned to Africa rising, with enthusiastic voices exclaiming the potential for economic growth across many of its countries. What, then, is the truth behind Africa's growth, or lack of it? In this provocative book, Morten Jerven fundamentally reframes the debate, challenging mainstream accounts of African economic history. Whilst for the past two decades experts have focused on explaining why there has been a 'chronic failure of growth' in Africa, Jerven shows that most African economies have been growing at a rapid pace since the mid nineties. In addition, African economies grew rapidly in the fifties, the sixties, and even into the seventies. Thus, African states were dismissed as incapable of development based largely on observations made during the 1980s and early 1990s. The result has been misguided analysis, and few practical lessons learned. This is an essential account of the real impact economic growth has had on Africa, and what it means for the continent's future.

The Definitive Guide to Doing Business in Africa For global and Africa-based companies looking to access new growth markets, Africa offers exciting opportunities to build large, profitable businesses. Its population is young, fast-growing, and increasingly urbanized--while rapid technology adoption makes the continent a fertile arena for innovation. But Africa's business environment remains poorly understood; it's known to many executives in the West only by its reputation for complexity, conflict, and corruption. Africa's Business Revolution provides the inside story on business in Africa and its future growth prospects and helps executives understand and seize the opportunities for building profitable, sustainable enterprises. From senior leaders in McKinsey's African offices and a leading executive on the continent, this book draws on in-depth proprietary research by the McKinsey Global Institute as well as McKinsey's extensive experience advising corporate and government leaders across Africa. Brimming with company case studies and exclusive interviews with some of Africa's most prominent executives, this book comes to life with the vibrant stories of those who have navigated the many twists and turns on the road to building successful businesses on the continent. Combining an unrivalled fact base with expert advice on shaping and executing an Africa growth strategy, this book is required reading for global business executives looking to expand their existing operations in Africa--and for those seeking a road map to access this vast, untapped market for the first time.

After decades of resting on the world's economic margins, Africa is in the midst of tectonic transformation, redefining itself as a source of innovation and a destination for capital investment.

Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement

Documents the burgeoning Chinese presence in Africa to examine China's potentially world-changing role in reshaping Africa's culture and economy.

If you're an ambitious woman in Africa, Asia, Latin America, or the Middle East, there has never been a better time to be you. Markets are opening up. Businesses everywhere are expanding. Your career or business has unlimited potential. In UNDETERRED, you will find the keys to success, based on four years of research, deep expertise, and interviews with more than 250 relatable businesswomen around the world. These women will inspire you and Rania Anderson will guide you. Despite the obstacles successful women face, they remain undeterred. They persevere by developing the solutions and workarounds that makes sense within the contexts of their cultures. Do you want to be more successful? Do you want to be undeterred? Unlock your potential by cultivating the six success habits identified in this book. The world is waiting for the unique talents and skills you have to offer.

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers 38 The Crisis-Prone Global Economy 40 The Plight of the West 40 Crunch Time Too for the Emerging Powers 43 A Multipolar Global Economy: Inherently More Fragile? 46 The Governance Gap 48 Governance Starts at Home: Risks and Opportunities 48 INCREASED FOCUS ON EQUALITY AND OPENNESS 53 NEW GOVERNMENTAL FORMS 54 A New Regional Order? 55 Global Multilateral Cooperation 55 The Potential for Increased Conflict 59 INTRASTATE CONFLICT: CONTINUED DECLINE 59 Interstate Conflict: Chances Rising 61 Wider Scope of Regional Instability 70 The Middle East: At a Tipping Point 70 South Asia: Shocks on the Horizon 75 East Asia: Multiple Strategic Futures 76 Europe: Transforming Itself 78 Sub-Saharan Africa: Turning a Corner by 2030? 79 Latin America: More Prosperous but Inherently Fragile 81 The Impact of New Technologies 83 Information Technologies 83 AUTOMATION AND MANUFACTURING TECHNOLOGIES 87 Resource Technologies 90 Health Technologies 95 The Role of the United States 98 Steady US Role 98 Multiple Potential Scenarios for the United States' Global Role 101 Alternative Worlds 107 Stalled Engines 110 FUSION 116 Gini-out-of-the-Bottle 122 Nonstate World 128 Acknowledgements 134 GT2030 Blog References 137 Audience: Appropriate for anyone, from businesses to banks, government agencies to start-ups, the technology sector to the teaching sector, and more. This publication helps anticipate where the world will be: socially, politically, technologically, and culturally over the next few decades. Keywords: Global Trends 2030 Alternative Worlds, global trends 2030, Global Trends series, National Intelligence Council, global trajectories, global megatrends, geopolitics, geopolitical changes Is China a rogue donor, as some media pundits suggest? Or is China helping the developing world pave a pathway out of poverty, as the Chinese claim? In the last few years, China's aid program has leapt out of the shadows. Media reports about huge aid packages, support for pariah regimes, regiments of Chinese labor, and the ruthless exploitation of workers and natural resources in some of the poorest countries in the world sparked fierce debates. These debates, however, took place with very few hard facts. China's tradition of secrecy about its aid fueled rumors and speculation, making it difficult to gauge the risks and opportunities provided by China's growing embrace. This well-timed book, by one of the world's leading experts, provides the first comprehensive account of China's aid and economic cooperation overseas. Deborah Brautigam tackles the myths and realities, explaining what the Chinese are doing, how they do it, how much aid they give, and how it all fits into their "going global" strategy. Drawing on three decades of experience in China and Africa, and hundreds of interviews in Africa, China, Europe and the US, Brautigam shines new light on a topic of great interest. China has ended poverty for hundreds of millions of its own citizens. Will Chinese engagement benefit Africa? Using hard data and a series of vivid stories ranging across agriculture, industry, natural resources, and governance, Brautigam's fascinating book provides an answer. It is essential reading for anyone concerned with China's rise, and what it might mean for the challenge of ending poverty in Africa.

How Chinese Investment Is Reshaping Africa

The Next AfricaAn Emerging Continent Becomes a Global PowerhouseMacmillan

Cities in Sub-Saharan Africa are experiencing rapid population growth. Yet their economic growth has not kept pace. Why? One factor might be low capital investment, due in part to Africa's relative poverty. Other regions have reached similar stages of urbanization at higher per capita income levels, however, identifies a deeper reason: African cities are closed to the world. Compared with other developing cities, cities in Africa produce few goods and services for trade on regional and international markets. To grow economically as they are growing in size, Africa's cities must be able to specialize in manufacturing, along with other regionally and globally tradable goods and services. And to attract global investment in tradables production, cities must develop scale economies, which are associated with successful urban economic development in other parts of the world. How can cities in Africa do this? The book argues that cities can arise in Africa, and they will—if city and country leaders make concerted efforts to bring agglomeration effects to urban areas. Today, potential urban investors and entrepreneurs look at Africa and see crowded, disconnected, and costly cities. Such cities inspire low expectations for growth, and for returns on invested capital. How can these cities become economically dense—not merely crowded? How can they acquire efficient connections? And how can they draw firms and skilled workers with a more affordable, livable urban environment? From a political and economic perspective, the book argues that cities in Africa can be to address the structural problems affecting African cities. Foremost among these problems are institutional and regulatory constraints that misallocate land and labor, fragment physical development, and limit productivity. As long as African cities lack functioning land markets, cities in Africa will remain small and unproductive. To attract investment in coordinated infrastructure investments, they will remain local cities: closed to regional and global markets, trapped into producing only locally traded goods and services, and limited in their economic growth.

The 1990s was a decade of extreme change. Seismic shifts in culture, politics, and technology radically altered the way Americans did business, expressed themselves, and thought about their role in the world. At the center of it all was Bill Clinton, the talented, charismatic, and controversial president. He was a man of passion and of contradictions both revered and reviled, whose complex legacy has yet to be clearly defined. In this unique analysis, historian Gil Troy examines Clinton's presidency alongside the cultural changes that dominated the decade. Troy shows how the culture of the day shaped the Clintons even as the Clintons shaped it. In so doing, he offers answers to two of the enduring questions about Clinton's legacy: how did such a talented politician leave Americans thinking he accomplished so little when he was in power? And, to what extent was Clinton responsible for the catastrophes of the decade that followed his departure from office, specifically 9/11 and the collapse of the housing market? Even more relevant as we head toward the 2016 election, The Age of Clinton will appeal to readers who want to know how Clinton shaped the world we live in today. If you go to live on the Niger River in West Africa, don't forget your pole, your sense of humor, and your camera! Provides answers to these important questions: How do you land an electric fish, and what if you screw up? What happens when a cobra tries to get in the boat? What happens when a cobra tries to get in the boat? Nile perch, catfish, Tilapia, etc? Where do you catch a tigerfish, and then how do you deal with its teeth? When is a fish going to kill you if you eat it? Who might you meet, and what are they saying? A two-year account of sport and traditional fishing by a fish biologist Peace Corps volunteer in Africa. This photo-journal contains 19,000 words and 140 black and white photographs. (Plus, get a FREE full-color ebook when you order from Amazon and select the MatchBook offer) Tigerfish! opens with sport fishing, and details the author's pursuit of tigerfish, Nile perch, and other species. The second part is an account of experiences and observations made during the large community fishing events that take place in the waters of the floodplain during the dry season. The third section provides a brief description and numerous pictures of the life and culture of the Somono fishers. The final section documents two traditional fire hunts on the Niger River floodplain. The quality of photos is better than most pictures of the Loch Ness Monster...

Africa's Business Revolution

From the visionary bestselling author of The Second World and How to Run the World comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected powers—and people—will win. Connectivity is the most revolutionary force of the twenty-first century. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and communications infrastructure linking the world's burgeoning megacities together. This has profound consequences for geopolitics, economics, demographics, the environment, and social identity. Connectivity, not geography, is our destiny. In Connectography, visionary strategist Parag Khanna travels from Ukraine to Iran, Mongolia to North Korea, Pakistan to Nigeria, and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet. He shows how militaries are deployed to protect supply chains as much as borders, and how nations are less at war over territory than engaged in tugs-of-war over pipelines, railways, shipping lanes, and Internet cables. The new arms race is to connect to the most markets—a race China is now winning, having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads. The United States can only regain ground by fusing with its neighbors into a super-continental North American Union of shared resources and prosperity. Connectography offers a unique and hopeful vision for the future. Khanna argues that new energy discoveries and technologies have eliminated the need for resource wars; ambitious transport corridors and power grids are unscrambling Africa's fraught colonial borders; even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war-torn landscape. At the same time, thriving hubs such as Singapore and Dubai are injecting dynamism into young and heavily populated regions, cyber-communities empower commerce across vast distances, and the world's ballooning financial assets are being wisely invested into building an inclusive global society. Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together. Praise for Connectography "Incredible . . . With the world rapidly changing and urbanizing, [Khanna's] proposals might be the best way to confront a radically different future."—The Washington Post "Clear and coherent . . . a well-researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies. . . . [He] has succeeded in demonstrating that the forces of globalization are winning."—Adrian Woolridge, The Wall Street Journal "Bold . . . With an eye for vivid details, Khanna has . . . produced an engaging geopolitical travelogue."—Foreign Affairs "For those who fear that the world is becoming too inward-looking, Connectography is a refreshing, optimistic vision."—The Economist "Connectivity has become a basic human right, and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future. Connectography charts the future of this connected world."—Marc Andreessen, general partner, Andreessen Horowitz "Khanna's scholarship and foresight are world-class. A must-read for the next president."—Chuck Hagel, former U.S. secretary of defense This title has complex layouts that may take longer to download.

2001-2010 proved to be a transitional decade for Africa, ushering in a new image and status for the continent. Africa began to show it was truly shaking the shackles of its colonial and chaotic past. Now that the New Africa has arrived, what does that mean? And, what does it mean for business? On almost every issue that has been pegged a negative for Africa - population boom, poverty, disease, governance, economic instability, and conflicts - there is evidence of a growing shift in the other direction. Businesses need to wake up and proactively shift to this new reality, or paradigm. While business principles apply across any market, businesses need to adapt their strategies to the context of Africa to be successful and understand that Africa is one of the key regional markets in the next generation of business. "Redefining Business in the New Africa" sets out to establish a new baseline and framework for engagement in Africa, which reflects the current and future trends of a region headed for emerging market status. While Africa still has to deal with legacy issues, the power of its "now" and future is greater. In this book you will learn about: - A new context and framework for business in Africa - A few major future trends and sectors in Africa - Strategic approaches to doing business and investing in the New Africa - How to tackle, or respond, to some of the challenges in the New Africa Get ready to rock and roll in this new era for business in Africa!

A Wall Street Journal bestseller and a USA Today Best Book of 2020 Named Energy Writer of the Year for The New Map by the American Energy Society "A master class on how the world works." —NPR Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The "shale revolution" in oil and gas has transformed the American economy, ending the "era of shortage" but introducing a turbulent new era. Almost overnight, the United States has become the world's number one energy powerhouse. Yet concern about energy's role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in the search for a low-carbon future. All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is pivoting east toward Beijing. Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map. He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead.

The real story of AIDS - how it originated with a virus in a chimpanzee, jumped to one human and infected more than 60 million people - is very different from what most of us think we know. Recent research has revealed dark surprises and yielded a radically new scenario of how AIDS began and spread. Excerpted and adapted from Spillover, with a new introduction by the author, Quammen's hair-raising investigation tracks the virus from chimp population s in the jungles off the southeastern Cameroon to laboratories across the globe, as he unravels the mysteries of when, where and how such a consequential 'spillover' can happen. An audacious search for answers amid more than a century of data, The Chimp and the River tells the haunting tale of one of the most devastating pandemics of our time.

How a Million Migrants are Building a New Empire in Africa

"The Kid Who Beat Wall Street...and Saved Africa," is a story that takes place on six different continents where our hero, Marco, invests in a gold mine stock, corners the market in corn, and makes over \$500,000. That's right, over half a million dollars. By the way, he's only 12 years old and his parents have no idea. However, it is also the story of children in war torn Africa, of marauding gangs of thugs, burning and pillaging. It's a story of disease, of the lack of food, clean water, and medicine. Marco, along with his pen-pals from all over the world, learns of the plight of these less fortunate children in Africa. A daring way is devised to come to their rescue. "The Kid Who Beat Wall Street...and Saved Africa," tells of courage, of adventure, and of how one boy can begin to save the world, one small step at a time.

This publication considers options for strengthening institutional capacity within the public sector in African countries, by drawing on the experiences of public sector reform programmes in over a dozen African states. Issues discussed include: the relationship between governance and economic development, public expenditure and accountability, anti-corruption reforms, the politics of decentralisation, political structures and public service delivery.

Africa welcomes business investment and offers some of the world’s highest returns and impacts Africa has tremendous economic potential and offers rewarding opportunities for global businesses looking for new markets and long-term investments with favorable returns. Africa has been one of the world’s fastest-growing regions over the past decade, and by 2030 will be home to nearly 1.7 billion people and an estimated \$6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier, and business expansion will generate jobs for women and youth, who represent the vast majority of the population. Current economic growth and poverty-alleviation efforts mean that more than 43 percent of the continent’s people will reach middle- or upper-class status by 2030. Unlocking Africa’s Business Potential examines business opportunities in the eight sectors with the highest potential returns on private investment—the same sectors that will foster economic growth and diversification, job creation, and improved general welfare. These sectors include: consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking, and infrastructure and construction. The book’s analysis of these sectors is based on case studies that identify specific opportunities for investment and growth, along with long-term market projections to inform decision-making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments, including how to remove barriers to business and accelerate development of the private sector.

In the battle for the streets of Mosul in Iraq, drones in the hands of ISIS terrorists made life hell for the Iraq army and civilians. Today, defense companies are racing to develop the lasers, microwave weapons, and technology necessary for confronting the next drone threat. Seth J. Frantzman takes the reader from the midnight exercises with Israel’s elite drone warriors, to the CIA headquarters where new drone technology was once adopted in the 1990s to hunt Osama bin Laden. This rapidly expanding technology could be used to target nuclear power plants and pose a threat to civilian airports. In the Middle East, the US used a drone to kill Iranian arch-terrorist Qasem Soleimani, a key Iranian commander. Drones are transforming the battlefield from Syria to Libya and Yemen. For militaries and security agencies—the main users of expensive drones—the UAV market is expanding as well; there were more than 20,000 military drones in use by 2020. Once the province of only a few militaries, drones now being built in Turkey, China, Russia, and smaller countries like Taiwan may be joining the military drone market. It’s big business, too—\$100 billion will be spent over the next decade on drones. Militaries may soon be spending more on drones than tanks, much as navies transitioned away from giant vulnerable battleships to more agile ships. The future wars will be fought with drones and won by whoever has the most sophisticated technology.

*The New York Times* bestseller “A clear and concise account of the history, diplomacy, economics, and societal forces that have molded the modern global system.” —Foreign Affairs An invaluable primer from Richard Haass, president of the Council on Foreign Relations, that will help anyone, expert and non-expert alike, navigate a time in which many of our biggest challenges come from the world beyond our borders. Like it or not, we live in a global era, in which what happens thousands of miles away has the ability to affect our lives. This time, it is a Coronavirus known as Covid-19, which originated in a Chinese city many had never heard of but has spread to the corners of the earth. Next time it could well be another infectious disease from somewhere else. Twenty years ago it was a group of terrorists trained in Afghanistan and armed with box-cutters who commandeered four airplanes and flew them into buildings (and in one case a field) and claimed nearly three thousand lives. Next time it could be terrorists who use a truck bomb or gain access to a weapon of mass destruction. In 2016 hackers in a nondescript office building in Russia traveled virtually in cyberspace to manipulate America’s elections. Now they have burrowed into our political life. In recent years, severe hurricanes and large fires linked to climate change have ravaged parts of the earth; in the future we can anticipate even more serious natural disasters. In 2008, it was a global financial crisis caused by mortgage-backed securities in America, but one day it could well be a financial contagion originating in Europe, Asia, or Africa. This is the new normal of the 21st century. The World is designed to provide readers of any age and experience with the essential background and building blocks they need to make sense of this complicated and interconnected world. It will empower them to manage the flood of daily news. Readers will become more informed, discerning citizens, better able to arrive at sound, independent judgments. While it is impossible to predict what the next crisis will be or where it will originate, those who read *The World* will have what they need to understand its basics and the principal choices for how to respond. In short, this book will make readers more globally literate and put them in a position to make sense of this era. Global literacy—knowing how the world works—is a must, as what goes on outside a country matters enormously to what happens inside. Although the United States is bordered by two oceans, those oceans are not moats. And the so-called Vegas rule—what happens there stays there—does not apply in today’s world to anyone anywhere. U.S. foreign policy is uniquely American, but the world Americans seek to shape is not. Globalization can be both good and bad, but it is not something that individuals or countries can opt out of. Even if we want to ignore the world, it will not ignore us. The choice we face is how to respond. We are connected to this world in all sorts of ways. We need to better understand it, both its promise and its threats, in order to make informed choices, be it as students, citizens, voters, parents, employees, or investors. To help readers do just that, *The World* focuses on essential history, what makes each region of the world tick, the many challenges globalization presents, and the most influential countries, events, and ideas. Explaining complex ideas with wisdom and clarity, Richard Haass’s *The World* is an evergreen book that will remain relevant and useful as history continues to unfold.

The best-selling author of *The New Christendom* continues his study of the growth of Christianity in the southern regions of the world, examining the influence of the Bible on the peoples of Africa, Asia, and Latin America, including the impact on growing liberation movements and the rise of women’s rights.

This new and substantially expanded edition of Philip Jenkins’s influential book *The Next Christendom* tracks the remarkable expansion of Christianity in the global South, in Africa, Asia and Latin America, and the implications of that shift in numbers and influence away from the traditional Christian heartlands of Europe and North America.

Three little known facts: Africa is now the world’s fastest growing continent, with average GDP growth of 5.5% the past 10 years. Malaria deaths have declined by 30% and HIV infections by 74%. Nigeria produces more movies than America does. The Lion Awakes is the true story of today’s Africa, one often overshadowed by the dire headlines. Traveling from his ancestral home in Uganda, East Africa, to the booming economy and (if chaotic) new democracies of West Africa, and down to the "Silicon Savannahs" of Kenya and Rwanda, Ashish J. Thakkar shows us an Africa that few Westerners are aware exists. Far from being a place in need of our pity and aid, we see a continent undergoing a remarkable transformation and economic development. We meet a new generation of ambitious, tech savvy young Africans who are developing everything from bamboo bicycles to iPhone Apps; we meet artists, film makers and architects thriving with newfound freedom and opportunity, and we are introduced to hyper-educated members of the Diaspora who have returned to Africa after years abroad to open companies and take up positions in government. They all tell the same story: 21st Century Africa offers them more opportunity than the First World. Drawing from his business experience, and his own family’s history in Africa, which include his parents’ expulsion from Uganda by Idi Amin in the 70s and his own survival of the Rwandan genocide in 1994, Ashish shows us how much difference a decade can make.

**Argues that the War on Drugs and policies that deny convicted felons equal access to employment, housing, education and public benefits create a permanent under-caste based largely on race. Reprint. 12,500 first printing.**

**Completely revised and updated, this guide to international investment by “the King of the Emerging Market Funds” reveals how to identify the most promising foreign businesses and invest in them. Original.**

**From the author of the #1 New York Times best-selling How to Avoid a Climate Disaster: The COVID-19 pandemic isn’t over, but even as governments around the world strive to put it behind us, they’re also starting to talk about what happens next. How can we prevent a new pandemic from killing millions of people and devastating the global economy? Can we even hope to accomplish this? Bill Gates believes the answer is yes, and in this book he lays out clearly and convincingly what the world should have learned from COVID-19 and what all of us can do to ward off another disaster like it. Relying on the shared knowledge of the world’s foremost experts and on his own experience of combating fatal diseases through the Gates Foundation, he first helps us understand the science of infectious diseases. Then he shows us how the nations of the world, working in conjunction with one another and with the private sector, can not only ward off another COVID-like catastrophe but also eliminate all respiratory diseases, including the flu. Here is a clarion call—strong, comprehensive, and of the gravest importance—from one of our greatest and most effective thinkers and activists.**

**Describes the state of postwar development policy in Africa that has channeled billions of dollars in aid but failed to either reduce poverty or increase growth, offering a hopeful vision of how to address the problem.**

- Redefining Business in the New Africa

The Next Africa, an Axiom Best Business Book Award winner, will change the way people think about the continent. The old narrative of an Africa disconnected from the global economy, depicted by conflict or corruption, and heavily dependent on outside donors is fading. A wave of transformation driven by business, modernization, and a new cadre of remarkably talented Africans is thrusting the continent from the world’s margins to the global mainstream. In the coming decades the magnitude of Africa’s markets and rising influence of its people will intersect with other key trends to shape a new era, one in which Africa’s progress finally overshadows its challenges, transforming an emerging continent into a global powerhouse. The Next Africa captures this story. Authors Jake Bright and Aubrey Hruby pair their collective decades of Africa experience with several years of direct research and interviews. Packed with profiles; personal stories, research and analysis, The Next Africa is a paradigm-shifting guide to the events, trends, and people reshaping Africa’s relationship to the world. Bright and Hruby detail the cross-cutting trends prompting Silicon Valley venture capital funds and firms like GE, IBM, and Proctor & Gamble to make major investments in African economies, while describing how Africans are stimulating Milan runways, Hollywood studios, and London pop charts. The Next Africa introduces readers to the continent’s burgeoning technology movement, rising entrepreneurs, groundbreaking philanthropists, and cultural innovators making an impact in music, fashion, and film. Bright and Hruby also connect Africa’s transformation to its contemporary immigrant diaspora, illustrating how this increasingly affluent group will serve as the thread that pulls the continent’s success together. Finally, The Next Africa suggests a fresh framework for global citizens, public policy-makers, and CEOs to approach Africa. It will no longer be “The Hopeless Continent”, nor will it become an overnight utopia. Bright and Hruby offer a more nuanced, net-sum, and data-rich approach to analyzing an increasingly complex continent, reconciling its continued challenges with rapid progress. The Next Africa describes a future of a more globally-connected Africa where its leaders and citizens wield significant economic, cultural, and political power—a future in which Americans will be more likely to own African stocks, work for companies doing business in Africa, buy African hits from iTunes, see Nigerian actors win Oscars, and learn new African names connected to tech moguls and billionaires.

Our Time Is Now We have entered an age of disruption. Financial collapse, climate change, resource depletion, and a growing gap between rich and poor are but a few of the signs. Otto Scharmer and Katrin Kaufer ask, why do we collectively create results nobody wants? Meeting the challenges of this century requires updating our economic logic and operating system from an obsolete “ego-system” focused entirely on the well-being of oneself to an eco-system awareness that emphasizes the well-being of the whole. Filled with real-world examples, this thought-provoking guide presents proven practices for building a new economy that is more resilient, intentional, inclusive, and aware. “A watershed! An inspiring, practical weaving of the inner and outer dimensions of the systemic changes so many around the world are now working toward.” —Peter Senge, Senior Lecturer, MIT Sloan School of Management; Founding Chair, Society for Organizational Learning; and author of *The Fifth Discipline* “Scharmer and Kaufer have succeeded in writing the book that has the potential to transform civilization from one based on a rapacious, ego-driven economics to a viable, ecological, awareness-based model. This is a must-read for anyone who cares. It may well be the single most important book you ever read.” —Arthur Zajonc, President, Mind and Life Institute, and author of *Meditation as Contemplative Inquiry* “Scharmer and Kaufer provide a creative and practical approach to shifting our economies. I see business as a movement, and this book shares that movement with the world, offering us inspiration to tap into the deeper levels of our humanity and urging us to transform the crises of our times.” —Eileen Fisher, founder, Eileen Fisher, Inc.

“The shift to an eco-system economy is emerging everywhere around us. Otto’s and Katrin’s clarity in identifying that this shift requires change-makers to expand our thinking from the head to the heart has helped me to be more intentional in designing processes to awaken the hearts of entrepreneurs everywhere. This is a necessary condition for the emergence of the new economy.” —Michelle Long, Executive Director, Business Alliance for Local Living Economies “The purpose of business is to enhance the well-being of society. The 4.0 framework for transforming capitalism matters because it addresses a blind spot in our current discourse: how to create institutional innovations that could shift our economy from ego- to eco-system awareness at the scale of the whole.” —Guilherme Peirão Leal, founder and Cochairman, Natura Cosméticos

\*A Financial Times Best Book of the Year\* A “provocative” (Booklist) and compelling look at the powerful global forces that will cause billions of us to move geographically over the next decades, ushering in an era of radical change. In the 60,000 years since people began colonizing the continents, a recurring feature of human civilization has been mobility—the ever-constant search for resources and stability. Seismic global events—wars and genocides, revolutions and pandemics—have only accelerated the process. The map of humanity isn’t settled—not now, not ever. As climate change tips toward full-blown crisis, economies collapse, governments destabilize, and technology disrupts, we’re re-entering a new age of mass migrations—one that will scatter both the dispossessed and the well-off. Which areas will people abandon and where will they resettle? Which countries will accept or reject them? As today’s world population, which includes four billion restless youth, votes with their feet, what map of human geography will emerge? In *Move*, celebrated futurist Parag Khanna provides an illuminating and authoritative vision of the next phase of human civilization—one that is both mobile and sustainable. As the book explores, in the years ahead people will move people to where the resources are and technologies will flow to the people who need them, returning us to our nomadic roots while building more secure habitats. “An urgent, powerful argument for more open international borders” (Kirkus Reviews, starred review). *Move* is a fascinating look at the deep trends that are shaping the most likely scenarios for the future. Most important, it guides each of us as we determine our optimal location on humanity’s ever-changing map.

**A Best Business Book of 2017 -- The Financial Times China is now the biggest foreign player in Africa. It's Africa's largest trade partner, the largest infrastructure financier, and the fastest-growing source of foreign direct investment. Chinese entrepreneurs are flooding into the continent, investing in long-term assets such as factories and heavy equipment. Considering Africa's difficult history of colonialism, one might suspect that China's activity there is another instance of a foreign power exploiting resources. But as author Irene Yuan Sun vividly shows in this remarkable book, it is really a story about resilient Chinese entrepreneurs building in Africa what they so recently learned to build in China—a global manufacturing powerhouse. The fact that China sees Africa not for its poverty but for its potential wealth is a striking departure from the attitude of the West, particularly that of the United States. Despite fifty years of Western aid programs, Africa still has more people living in extreme poverty than any other region in the world. Those who are serious about raising living standards across the continent know that another strategy is needed. Chinese investment gives rise to a tantalizing possibility: that Africa can industrialize in the coming generation. With a manufacturing-led transformation, Africa would be following in the footsteps of the United States in the nineteenth century, Japan in the early twentieth, and the Asian Tigers in the late twentieth. Many may consider this an old-fashioned way to develop, but as Sun argues, it's the only one that's proven to raise living standards across entire societies in a lasting way. And with every new Chinese factory boss setting up machinery and hiring African workers—and managers—that possibility becomes more real for Africa. With fascinating and moving human stories along with incisive business and economic analysis, *The Next Factory of the World* will make you rethink both China's role in the world and Africa's future in the globalized economy.**

The America of the near future will look nothing like the America of the recent past. America is in the throes of a demographic overhaul. Huge generation gaps have opened up in our political and social values, our economic well-being, our family structure, our racial and ethnic identity, our gender norms, our religious affiliation, and our technology use. Today’s Millennials -- well-educated, tech savvy, underemployed twenty-somethings -- are at risk of becoming the first generation in American history to have a lower standard of living than their parents. Meantime, more than 10,000 Baby Boomers are retiring every single day, most of them not as well prepared financially as they’d hoped. This graying of our population has helped polarize our politics, put stresses on our social safety net, and presented our elected leaders with a daunting challenge: How to keep faith with the old without bankrupting the young and starving the future. Every aspect of our demography is being fundamentally transformed. By mid-century, the population of the United States will be majority non-white and our median age will edge above 40 -- both unprecedented milestones. But other rapidly-aging economic powers like China, Germany, and Japan will have populations that are much older. With our heavy immigration flows, the US is poised to remain relatively young. If we can get our spending priorities and generational equities in order, we can keep our economy second to none. But doing so means we have to rebalance the social compact that binds young and old. In tomorrow’s world, yesterday’s math will not add up. Drawing on Pew Research Center’s extensive archive of public opinion surveys and demographic data, *The Next America* is a rich portrait of where we are as a nation and where we’re headed -- toward a future marked by the most striking social, racial, and economic shifts the country has seen in a century.

A multigenerational tale forms a portrait of a people’s passage to a new world, following the voices, as one flows into the next, of six African Americans, beginning with Ampofo, who is brought as slave cargo to America. A first novel.

**“An interactive and empowering book” to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans “are affected by serious diseases and health conditions at far greater rates than other Americans.” In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, “I wrote this book to empower our community to solve our own health problems and save our own lives.”**

*Africa’s Embrace* is author Mark Wentling’s fictional account about the adventures of a young man from Kansas who travels to Africa and becomes caught up in a mystical larger-than-life adventure. This well-crafted novel revolves around the main character of “David,” who abruptly leaves his home in Kansas in order to follow his destiny in Africa. Upon arrival, he is renamed “Bobovovi” and chosen by the spirit world to ride the “mountain moonbeam” and become “transformed” by an ancient baobab tree. Bobovovi does his best to make his goodwill prevail, but his humanitarian work is fraught with unforeseen, unusual challenges. He moves from one surprising adventure to another, telling an African story unlike any the reader has ever heard before. Africa changes him in unimaginable ways, and those changes are inculcated into the reader and teach a variety of lessons. Although *Africa’s Embrace* is literary fiction, the novel is, in actuality, a thinly-veiled autobiographical account of the author’s three years of working in an African village back in the 1970s. The clever and gripping plot of the novel is a powerful, emotional story, combining magical realism with a colorful description of the practical challenges of living and working in Africa. The book introduces a cast of unforgettable characters and forces the reader to enter deep into the heart of Africa, and to consider the spiritual implications of introducing change. Mark Wentling is one of the rare people on Earth who has visited or worked in all fifty-four African countries. Examines the emergence and causes of new diseases all over the world, describing a process called “spillover” where illness originates in wild animals before being passed to humans and discusses the potential for the next huge pandemic. 70,000 first printing.

Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the “New World.” Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe’s dehumanizing engagement with the “dark” continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe’s yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloed and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic “rise of the West” theories that have endured to this day. “Capacious and compelling” (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest “commodity” of them all, the twelve million people who were brought in chains from Africa to the “New World,” whose reclaimed lives shed a harsh light on our present world.

*Education, which has been at the heart of the Middle East and North Africa (MENA) region’s history and civilizations for centuries, has a large untapped potential to contribute to human capital, well-being, and wealth. The region has invested heavily in education for decades, but it has not been able to reap the benefits of its investments. Despite a series of reforms, MENA has remained stuck in a low-learning, low-skills level. Expectations and Aspirations: A New Framework for Education in the Middle East and North Africa identifies four key sets of tensions that are holding back education in the region: credentials and skills, discipline and inquiry, control and autonomy, and tradition and modernity. These tensions are shaped by society and are reflected in classrooms. If they are not addressed, MENA will continue to operate at a level below its potential. This report outlines a new framework with a three-pronged approach that can help address these tensions and unleash the potential of education in MENA:*

- A concerted push for learning that starts early for all children regardless of background, with qualified and motivated educators, and that leverages technology, uses modern approaches, and monitors learning outcomes
- A stronger pull for skills by all stakeholders in the labor market and society that involves coordinated multisystem reforms within and beyond the education system
- A new pact for education at the national level with a unified vision, shared responsibilities, and accountabilities. Education is not just the responsibility of the education system—it is everyone’s business. The push, pull, and pact framework offers an opportunity for MENA to move forward to reclaim its heritage of a learned region and to meet the expectations and aspirations of its people. The current situation in MENA requires a renewed focus on education, not just as a national priority for economic growth and social development, but as a national emergency for stability, peace, and prosperity.
