

The Times History Of The War In South Africa, 1899 1902 (Volume 2)

Geoff Manaugh and Nicola Twilley have been researching quarantine since long before the COVID-19 pandemic. With *Until Proven Safe*, they bring us a book as compelling as it is definitive, not only urgent reading for social-distanced times but also an up-to-the-minute investigation of the interplay of forces---biological, political, technological--that shape our modern world. Quarantine is our most powerful response to uncertainty: it means waiting to see if something hidden inside us will be revealed. It is also one of our most dangerous, operating through an assumption of guilt. In quarantine, we are considered infectious until proven safe. *Until Proven Safe* tracks the history and future of quarantine around the globe, chasing the story of emergency isolation through time and space—from the crumbling lazarettos of the Mediterranean, built to contain the Black Death, to an experimental Ebola unit in London, and from the hallways of the CDC to closed-door simulations where pharmaceutical execs and epidemiologists prepare for the outbreak of a novel coronavirus. But the story of quarantine ranges far beyond the history of medical isolation. In *Until Proven Safe*, the authors tour a nuclear-waste isolation facility

beneath the New Mexican desert, see plants stricken with a disease that threatens the world's wheat supply, and meet NASA's Planetary Protection Officer, tasked with saving Earth from extraterrestrial infections. They also introduce us to the corporate tech giants hoping to revolutionize quarantine through surveillance and algorithmic prediction. We live in a disorienting historical moment that can feel both unprecedented and inevitable; Until Proven Safe helps us make sense of our new reality through a thrillingly reported, thought-provoking exploration of the meaning of freedom, governance, and mutual responsibility.

A brand-new edition of the most comprehensive world history available, The Times Complete History of the World has been fully updated, and together with the addition of new material, remains truly the ultimate work of historical reference. This is a collection of essays on current questions of historiography, illustrated with reference to Islamic historiography. The main concerns are conceptions of time and temporality, the uses of the past, historical periodisation, historical categorisation, and the constitution of historical objects, not least those called "civilisation" and "Islam". One of the aims of the book is to apply to Islamic materials the standard conceptual equipment used in historical study, and to exercise a large-scale comparativist outlook.

The bestselling author of *Intern and Doctored* tells the story of the thing that makes us tick For centuries, the human heart seemed beyond our understanding: an inscrutable shuddering mass that was somehow the driver of emotion and the seat of the soul. As the cardiologist and bestselling author Sandeep Jauhar shows in *Heart: A History*, it was only recently that we demolished age-old taboos and devised the transformative

procedures that have changed the way we live. Deftly alternating between key historical episodes and his own work, Jauhar tells the colorful and little-known story of the doctors who risked their careers and the patients who risked their lives to know and heal our most vital organ. He introduces us to Daniel Hale Williams, the African American doctor who performed the world's first open heart surgery in Gilded Age Chicago. We meet C. Walton Lillehei, who connected a patient's circulatory system to a healthy donor's, paving the way for the heart-lung machine. And we encounter Wilson Greatbatch, who saved millions by inventing the pacemaker—by accident. Jauhar deftly braids these tales of discovery, hubris, and sorrow with moving accounts of his family's history of heart ailments and the patients he's treated over many years. He also confronts the limits of medical technology, arguing that future progress will depend more on how we choose to live than on the devices we invent. Affecting, engaging, and beautifully written, Heart: A History takes the full measure of the only organ that can move itself.

This impressive publishing landmark traces the history of the world from the beginning of the pyramids to the war on terrorism. Vibrant prose bring to life each epoch in this majestic account of the story of mankind. With nearly one million words, this book is the ultimate resource for historians, teacher and students alike. It is a rare book that speaks so artfully to such a wide range of topics including the history of art, politics, religion, philosophy, science, technology and literature. Divided both chronologically and geographically, *History of the World* is a compelling reference guide filled with more than vivid illustrations and over 60 maps.

A New York Times bestseller In this triumphant memoir, Carl Bernstein, the Pulitzer Prize-winning coauthor of *All the President's Men* and pioneer of investigative journalism, recalls his beginnings as an audacious teenage newspaper reporter in the nation's capital—a winning tale of scrapes,

gumshoeing, and American bedlam. In 1960, Bernstein was just a sixteen-year-old at considerable risk of failing to graduate high school. Inquisitive, self-taught-and, yes, truant-Bernstein landed a job as a copyboy at the Evening Star, the afternoon paper in Washington. By nineteen, he was a reporter there. In *Chasing History: A Kid in the Newsroom*, Bernstein recalls the origins of his storied journalistic career as he chronicles the Kennedy era, the swelling civil rights movement, and a slew of grisly crimes. He spins a buoyant, frenetic account of educating himself in what Bob Woodward describes as "the genius of perpetual engagement." Funny and exhilarating, poignant and frank, *Chasing History* is an extraordinary memoir of life on the cusp of adulthood for a determined young man with a dogged commitment to the truth.

unsung but extraordinary everyday tool, with an illustrious but little-known past. Here, for the first time, its story is told. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Dennis Duncan reveals how the index has saved heretics from the stake, kept politicians from high office and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and - of course - indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart, and we have been for eight hundred years. *A Financial Times and History Today Book of the Year*

also internet-linked. Readers can follow the weblinks in the book to access the most up to date information permitting further in-depth exploration of key subjects. With fully up-to-date text, including material on Iraq and Afghanistan, terrorism, Israel and the EU, this book, edited by leading modern historian Professor Richard Overby, is broad-ranging and more visually enticing than ever. Updates for the eighth edition include: - New material on the United States - The most up-to-date research on prehistory - Reworked spreads on the Middle East, including a new spread on Iran - Current information on the global economy, the global environment, warfare and world terrorism - New introduction - Short biographies of 100 key figures in world history.

In the decades since the end of the Second World War, it has been widely assumed that the western model of liberal democracy and free trade is the way the world should be governed. However, events in the early years of the twenty-first century - first, the 2003 war with Iraq and its chaotic aftermath and, second, the financial crash of 2008 -

have threatened the general acceptance that continued progress under the benign (or sometimes not so benign) gaze of the western powers is the only way forwards. And as America turns inwards and Europe is beset by austerity politics and populist nationalism, the post-war consensus looks less and less secure. But is this really the worst of times? In a forensic examination of the world we now live in, acclaimed historian Michael Burleigh sets out to answer that question. Who could have imagined that China would champion globalization and lead the battle on climate change? Or that post-Soviet Russia might present a greater threat to the world's stability than ISIS? And while we may be on the cusp of still more dramatic change, perhaps the risks will - in time - bring not only change but a wholly positive transformation. Incisive, robust and always insightful, *The Best of Times, The Worst of Times* by Michael Burleigh is both a dazzling tour d'horizon of the world as it is today and a surprisingly optimistic vision of the world as it might become.

This is the frank and absorbing history of the power struggles, triumphs, and gaffes that shaped Murdoch's Times in the closing decades of the 20th century. Behind the venerable façade the paper presented to the outside world, Graham Stewart reveals an institution as divided, uncertain, and varied as the news events it covered. It is the story of the editors who—with differing degrees of success—sought to steer the paper with wit, intelligence, integrity and, sometimes, intimidation. It is also the tale of the journalists who have reported, analyzed and interpreted the news to a reading public as often outraged as it was approving.

"The history of the world is replete with conflict, change, revolution and innovation. Yet, there are points in history at which we can draw close parallels between our past and present. Our history shapes the way we live today, even as we might strive to break away from the bounds of the past."

"With a narrative scope beginning with human origins around 5 million years ago, and ending with global communications

and the economy and environment in the modern age, The Times History of the World is a superb accomplishment. The body of the text is a chronological sweep across the history of the world, split geographically and thematically." "In addition, historian Richard Overy gives us his opinions in an exclusive extended article which enables him to freely explore the lessons the world has learnt from history, as well as the ways in which the world is constantly changing. He shows how the world has in a sense, become smaller, as communications and technology become more and more prevalent, but how wars and conflicts, poverty and religion, can still drive us apart. Concluding with thoughts on what will be the dominant factors driving the world in the future, Richard Overy gives us a rare opportunity to consider world history in one magnificent sweep."--BOOK JACKET.

Our Lives & Times

Arranged in a chronological narrative accompanied by maps, charts, illustrations and photographs, this is a celebration of one of the world's great cities. Its themes are as diverse as they are relevant, covering social and economic conditions, transport and trade, leisure, education and religion. The book traces London's history from the earliest evidence of human settlement over 40,000 years up to the end of the millennium.

Hundreds of stunning images from black history have long been buried in The New York Times archives. None of them were published by The Times--until now. UNSEEN uncovers these never-before published photographs and tells the stories behind them. It all started with Times photo editor Darcy Eveleigh discovering dozens of these photographs. She

and three colleagues, Dana Canedy, Damien Cave and Rachel L. Swarns, began exploring the history behind them, and subsequently chronicling them in a series entitled Unpublished Black History, that ran in print and online editions of The Times in February 2016. It garnered 1.7 million views on The Times website and thousands of comments from readers. This book includes those photographs and many more, among them: a 27-year-old Jesse Jackson leading an anti-discrimination rally of in Chicago, Rosa Parks arriving at a Montgomery Courthouse in Alabama a candid behind-the-scenes shot of Aretha Franklin backstage at the Apollo Theater, Ralph Ellison on the streets of his Manhattan neighborhood, the firebombed home of Malcolm X, Myrlie Evans and her children at the funeral of her slain husband , Medgar, a wheelchair-bound Roy Campanella at the razing of Ebbets Field. Were the photos--or the people in them--not deemed newsworthy enough? Did the images not arrive in time for publication? Were they pushed aside by words at an institution long known as the Gray Lady? Eveleigh, Canedy,

You mean this place we go to five days a week has a history? Cubed reveals the unexplored yet surprising story of the places where most of the world's work—our work—gets done. From "Bartleby the Scrivener" to The Office, from the steno pool to the open-plan cubicle farm, Cubed is a fascinating, often funny, and sometimes disturbing anatomy of the white-collar world and how it came to be the way it is—and what it might become. In the mid-nineteenth century clerks worked in small, dank spaces called "counting-houses." These were all-male enclaves, where work was just paperwork. Most Americans considered clerks to be questionable dandies, who didn't do "real work." But the joke was on them: as the great historical shifts from agricultural to industrial economies took place, and then from industrial to information economies, the organization of the workplace evolved along with them—and the clerks took over. Offices became rationalized, designed for both greater efficiency in the accomplishments of clerical work and the enhancement of worker productivity. Women entered the office by the millions, and revolutionized the social world from within. Skyscrapers filled with office space came to tower over cities everywhere. Cubed opens our eyes to what is a truly "secret history" of changes so obvious and ubiquitous that we've hardly noticed them. From the wood-paneled executive suite to the advent of the cubicles where 60% of Americans now work (and 93% of them dislike it) to a not-too-distant future where we

might work anywhere at any time (and perhaps all the time), Cubed excavates from popular books, movies, comic strips (Dilbert!), and a vast amount of management literature and business history, the reasons why our workplaces are the way they are—and how they might be better.

The Times History of the World is an enduring classic of world publishing. First published in 1978, this remarkable book has changed our way of viewing history. It brings the drama of history to the page in a way often imitated but never matched. The New Edition marks the most radical and comprehensive revision of the book since its original publication. Every spread has been redesigned and rewritten, every map and chart extensively reviewed and updated. There is expanded treatment of China, Japan and southeast Asia from the earliest civilizations to today's rapidly evolving regions. The coverage of the United States has been strengthened to allow more material on the post-War period while that on the 20th century has been reorganized to reflect new historical perspectives and the dramatic events of this turbulent century. The result is a work unequalled in its authority, quality and imagination, a masterly overview of the endlessly absorbing story of humanity. Page by page, continent by continent, era by era, the full sweep of human history is revealed in enthralling detail. * Over 520 computer-generated colour maps * Contributions from over 100 leading historians from around the
