It is literally a catalogue of sins committed by some of the most celebrated names on the planet.Within these covers are startling stories of scandals during a century when screen idols seemed to vie with each other in outraging public decency. It was an age when fan fever was at its height and an endless supply of shocking revelations emerged to fuel the frenzy.Because of the perpetrators superstar status, the shame of exposure was often heightened, not only wrecking reputations but often harming careers and, at least, ensuring very public humiliation.The lessons learned from these cases of celebrity scandal (though often, it seems, not by the celebrities themselves) is that the bigger the star, the harder the fall and that deceit and intrigue so often turn hard-won fame into instant infamy.

Attempting to get more information about the Yeerks, the Human Controllers, Jakes is suddenly taken over by one of the parasitic aliens and becomes one of them, and the Animorphs launch a rescue mission. Original.

The stunning new thriller from one of the fastest-growing stars of the genre. 2008: deep in the mountain forests of Wyoming, Julian Cooke stumbles across the rotting remains of a wooden wagon. He's discovered what's left of the Preston Group, a convoy of settlers that vanished in the winter of 1856. It's clear that something horrific happened here all those years ago, but Cooke can only find a few tantalising clues. 1856: as early snows descend, the eclectic group of settlers that form the Preston wagon train are forced to dig in. Miles from any kind of true danger is. When a woman is found murdered, one of the Indian party stragglers wounded back to camp, whispering of unspeakable evil as he dies. United by fear, the settlers and the Indians must protect themselves against whatever is lurking in the woods. But as suspicion and panic grow, perhaps their own terror will be just as dangerous. Or maybe, whatever's out there is worse than anything they can imagine. Back in the present day, as Cooke unravels the mystery, he must question if the horror he is uncovering was in fact only the start of something. Liam O'Connor should have died at sea in 1912. Maddy Carter should have died on a plane in 2010. Sal Vikram should have died in a fire in 2026. But all three have been given a second chance - to work for an agency that no one knows exists. Its purpose: to prevent time travel destroying history . . . Hunted by cyborg assassins from the future, the TimeRiders must abandon New York and go on the run. They escape to Victorian London and the streets where Jack the Ripper roams. But, before they can establish their new base, they make their most shattering Victorian London's Jack the Ripper get a time-travel makeover! ** Perfect for fans of Doctor Who and Sherlock Holmes. ** TimeRiders (Book 1) won the Red House Book Award older readers category, and was Penguin UK's first ever number one on the iBookstore.
