The Titanic Sinks! (Totally True Adventures)

The first modern work to give a comprehensive picture of the RMS Titanic and the people intertwined with her fate, from disaster to recovery. Drawn from primary sources and contemporary accounts and updated to coincide with the April 2012 anniversary, this new heart-rending narrative allows readers to come to their own conclusions about this legendary vessel. Daniel Allen Butler spent more than 30 years researching the work, delving into the lives of every principal participant. In addition to examining the roles played by individual, he also looks into the problems of equipment and errors in technical data that resulted in the deaths of 1502 people. Rather than focussing on the night of the tragedy alone, he also investigates the events leading up to and following the fateful night.

A Step 4 HISTORY reader. "The drama of natural disasters provides prime material to entice young independent readers. In this volume, the account of the eruption of Mount Vesuvius describes village life 2,000 years ago, the eruption itself and its aftermath, and the excitement when the buried town is rediscovered centuries later. A lively and factual glimpse of a devastating moment in history, in an accessible, attractive package."--Publishers Weekly. Step 4 Readers use challenging vocabulary and short paragraphs to tell exciting stories. For newly independent readers who read simple sentences with confidence. With full-color illustrations.

In this New York Times bestseller, the author of *A Night to Remember* and *The Miracle of Dunkirk* revisits the Titanic disaster. Walter Lord's *A Night to Remember* was a landmark work that recounted the harrowing events of April 14, 1912, when the British ocean liner RMS Titanic went down in the North Atlantic Ocean, a book that inspired a classic movie of the same name. In *The Night Lives On*, Lord takes the exploration further, revealing information about the ship's last hours that emerged in the decades that followed, and separating myths from facts. Was the ship really christened before setting sail on its maiden voyage? What song did the band play as water spilled over the bow? How did the ship's wireless operators fail so badly, and why did the nearby Californian, just ten miles away when the Titanic struck the iceberg, not come to the rescue? Lord answers these questions and more, in a gripping investigation of the night when approximately 1,500 victims were lost to the sea.

*Black Beauty*, published in 1877 and set in Victorian London, was Anna Sewell's only novel. Yet it has remained a classic for 140 years. Now the beloved story of *Black Beauty* is retold for beginning readers with full-color illustrations on every page.

The events surrounding the sinking of the Titanic did not look the same to everyone involved. Step back in time and into the shoes of a crewmember, a first-class passenger, and a steerage passenger as readers act out scenes that took place in the midst of this historic event. Written with simplified, considerate text to help struggling readers, books in this series are made to build confidence as readers engage and read aloud. This book includes a table of contents, glossary, index, author biography, sidebars, and timelines.

Sailing to America on board the Titanic, young Albert faces grown-up decisions about life and death when the magnificent ship is struck by an iceberg and begins to sink. Reprint.

This tale of an Irish teenager aboard the doomed ship, from a Caldecott Medal winner, is a "taut disaster story . . . nearly impossible to put down" (Publishers Weekly). Fifteen-year-old Barry O'Neill is journeying to New York to reunite with his parents on the maiden voyage of the great ship Titanic. He's homesick, and worried about the Flynn boys traveling in steerage, who have threatened to throw him overboard. Little does Barry know that a struggle with the Flynns is the least of the dangers that await him. This "fast-paced" and suspenseful young adult adventure story is based on the true and terrible events that occurred as the Titanic sank, and "immerses readers in the many human tragedies" (Booklist).

On 14 April 1912, the largest and finest ocean liner of the age struck an iceberg and sank to icy depths. Discover all the glory and tragedy of the Titanic in this recreation of her fated maiden voyage. It traces its history from blueprint to ocean dream, and uncovers the factors that led to her tragic end.

*A young woman leaves Appalachia for life as a classical musician—or so she thinks. When aspiring violinist Jessica Chiccehitto Hindman lands a job with a professional ensemble in New York City, she imagines she has achieved her lifelong dream. But the ensemble proves to be a sham. When the group “performs,” the microphones are never on. Instead, the music blares from a CD. The mastermind behind this scheme is a peculiar and mysterious figure known as The Composer, who is gaslighting his audiences with music that sounds suspiciously like the Titanic movie soundtrack. On tour with his chaotic ensemble, Hindman spirals into crises of identity and disillusionment as she “plays” for audiences genuinely moved by the performance, unable to differentiate real from fake. Sounds Like Titanic is a surreal, often hilarious coming-of-age story. Hindman writes with precise, candid prose and sharp insight into ambition and gender, especially when it comes to the difficulties young women face in a world that views them as silly, shallow, and stupid. As the story swells to a crescendo, it gives voice to the anxieties and illusions of a generation of women, and reveals the failed promises of a nation that takes comfort in false realities.*

Here is the exciting true story about the "unsinkable" Titanic! Dramatic accounts, white-knuckle suspense, and fast-paced action of how the world's biggest, safest ship sank on its maiden voyage. Includes black-and-white photos and full-color underwater photos of the wreck.

Step into Reading Step 5.

Was the ship doomed by a faulty design? Was the hull's steel too brittle? Was the captain negligent in the face of repeated warnings? On the night of April 14, 1912, the "unsinkable" RMS Titanic, with over 2,200 passengers onboard, struck an iceberg in the North Atlantic and plunged to a watery grave. For nearly a century, the shocking loss has haunted the world. Now the same CSI techniques that are used to solve modern murder cases have been applied to the sinking of history's most famous ship. Researchers Jennifer Hooper McCarty and Tim Foecke draw on their participation in expeditions to the ship's wreckage and experiments on recovered Titanic materials to build a compelling new scenario. The answers will astound you. . . Grippingly written, What Really Sank the Titanic is illustrated with fascinating period photographs and modern scientific evidence reflecting the authors' intensive study of Titanic artifacts for more than ten years. In an age when forensics can catch killers, this book does what no other book has before: fingers the culprit in one of the greatest tragedies ever. "A fascinating trail of historical forensics." --James R. Chiles, author of Inviting Disaster>/I> "An essential facet of Titanic history. Five stars!" --Charles Pellegrino, author of Her Name Titanic With 16 pages of photos

"I have read dozens of books on starting companies, but this is the first that accurately captures why startups fail and provides a tool for entrepreneurs and investors to measure and manage these sources of failure." Michael Hatfield, Co-Founder, Cerent, Calix, Cienna, and Carium. What makes a startup successful? This book, from award-winning business school professors and a tech serial entrepreneur, tells

what makes startups successful. Instead of telling startups what to do, like most startup books, they share what startups should avoid. Along the way, they share small business startup success stories gleaned from the How Built This Podcast and their firsthand experiences. These stories of startup success are contrasted with stories of startup failure from startup graveyards and most notably, the Titanic. Like many of today's startups, the Titanic hoped to disrupt the transportation industry of its time. It fell short, to a disastrous outcome, from the same sources that prevent startup success today. Get a startup game plan! This startup book uses the Titanic and a sailing metaphor to provide a startup roadmap template. It shows what makes startups successfully navigate through challenges in startup investing, founding, and hiring with a game plan to get through the Human Ocean. It offers a startup guide to customer success in working through the Marketing Ocean. It even highlights what startups need to invest in to get through the Technical and Strategy Oceans. Its Iceberg Index gives entrepreneurs, startups, and small businesses a way to track their progress on the startup roadmap template. It also helps investors assess what startups to invest in. Many entrepreneurs assume that the Titanic was sunk by a single iceberg. The Titanic Effect shows, that like many startups, it's not a single misstep but a series of mistakes that keep a startup from being successful. This combination of missteps is called the Titanic Effect. Who can benefit from this startup roadmap? Entrepreneurs in the early stages of building a startup. They will learn what makes a startup successful. They will develop a to-do list of decisions to make and actions to take. Small business owners will also identify key next steps to building their startup game plan. Investors can identify what to avoid in startup investments and what startups to invest in. Students will learn how to evaluate the success potential of a startup and will read small business and startup success stories. These three co-authors have witnessed firsthand what leads to startup success. They have made it their mission to help entrepreneurs, startup founders and startup investors succeed. Drs. Todd and M. Kim Saxton bring more than two decades of academic and professional experience in business strategy, entrepreneurship, marketing, and angel investing. Serial tech entrepreneur, Michael Cloran, adds his two decades' of experiences in launching his own startups as well as building software products for other startups. In addition, the co-authors serve on various boards of entrepreneurial ventures and startup advisory associations. They have shared their expertise from the stage to dozens of audiences, including students, entrepreneurship and professional development associations, academic societies, and global companies like Roche Diagnostics and Pfizer Pharmaceuticals.
