This is the true story behind Wall Street legend Richard Dennis, his disciples, the Turtles, and the trading techniques that made them millionaires. What happens when ordinary people are taught a system to make extraordinary money? Richard Dennis made a fortune on Wall Street by investing according to a few simple rules. Convinced that great trading was a skill that could be taught to anyone, he made a bet with his partner and ran a classified ad in the Wall Street Journal looking for novices to train. His recruits, later known as the Turtles, had anything but traditional Wall Street backgrounds; they included a professional blackjack player, a pianist, and a fantasy game designer. For two weeks, Dennis taught them his investment rules and philosophy, and set them loose to start trading, each with a million dollars of his money. By the time the experiment ended, Dennis had made a hundred million dollars from his Turtles and created one killer Wall Street legend. In The Complete Turtle Trader, Michael W. Covel, bestselling author of Trend Following and managing editor of TurtleTrader.com, the leading website on the Turtles, tells their riveting story with the first ever on the record interviews with individual Turtles. He describes how Dennis interviewed and selected his students, details their education and experiences while working for him, and breaks down the Turtle system and rules in full. He reveals how they made astounding fortunes, and follows their lives from the original experiment to the present day. Some have grown even wealthier than ever, and include some of today's top hedge fund managers. Equally important are those who passed along their approach to a second generation of Turtles, proving that the Turtles' system truly is reproducible, and that anyone with the discipline and the desire to succeed can do as well as—or even better than—Wall Street's top hedge fund wizards. In an era full of slapdash investing advice and promises of hot stock tips for "the next big thing," as popularized by pundits like Jim Cramer of Mad Money, the easy-to-follow objective rules of the TurtleTrader stand out as a sound guide for truly making the most out of your money. These rules worked—and still work today—for the Turtles, and any other investor with the desire and commitment to learn from one of the greatest investing stories of all time.

If you have no time to follow the market closely, then Trend Trading is the book for you. Trend trading is one of the most effective and easy-to-use methods for making money in the market. Success depends on identifying the trend with confidence and catching the trend after it has started, and on getting out as soon as possible after the uptrend turns into a downtrend. The book examines in detail the steps in finding, assessing, selecting, managing and monitoring a long-term trend trade. These are proven, successful methods which are easy to understand and apply. Included are the most recent updates and developments in using the count back line and the Guppy Multiple Moving Average. Daryl Guppy also includes a practical look at setting stop loss conditions to protect capital and profits, and a bonus section on Darvas-style trend trading which is the first significant update of this technique in forty years. Trend Trading shows readers how to use and apply the analysis tools to find effective long-term trades. These can be applied to any group of selected stocks, whether chosen on fundamental criteria, from stock tip newsletters, or found using database technical scans. From this starting point, Guppy shows how the better trades are identified, how risk is managed, and how the trades are closed successfully. The book includes examples of Daryl's personal trades.

Achieve higher returns with lower risk and take your profits globally. A leading hedge fund trader offers a solid and profitable trading approach to the world markets. "This is the best stock market book that I have read in a long time. Boucher lays it out clearly, concisely, and in a most interesting manner. A 'must read' for anyone who invests in the equities market." -Dan Sullivan Editor, The Chartist "A leading practitioner offers rich theoretical insights and sound practical advice based on years of successful trading. Mark Boucher is that rare investment analyst who knows what really works in trading and can communicate it with authority and grace." -Nelson Freeburg Editor and Publisher, Formula Research, Inc. The Hedge Fund Edge is an indispensable guide for any investor or trader who wants to consistently profit from the markets without having to undergo huge risks. Mark Boucher, hedge fund manager and well-known speaker on trading, provides readers with a solid methodology for achieving market-beating, long-run returns with risk that is substantially below the long-run risk of U.S. and global equities. Boucher first looks at the limitations of traditional stock and bond investing, and then explains how to determine the safest and most profitable periods for investing in stocks in any country. He explains this strategy both conceptually and with an objective model that has been used to manage money successfully since the 1950s. He shows how to allocate funds among global equities at any given time while following safe, reliable, and profitable trends. The book also provides a thorough discussion of the Austrian Liquidity Cycle, an original combination of Austrian Economics, Economic Alchemy, and Liquidity Cycle Theory. Boucher explains how to use this theory to understand the major moves behind the markets and determine the most profitable market in which to invest. The Hedge Fund Edge provides critical valuation and technical models as well as essential information on stock selection techniques to help readers identify which markets and stocks are both lower-risk and higher-performing. Boucher also describes, in detail, the impact of governmental policies on the markets and the connection between macroeconomic performance and investment performance. Also included are essential timing models for determining when to invest in gold, bonds, commodities, and other asset classes, as well as methods for allocating a portfolio with the goal of investing in the very best trends at any one point in time across all asset classes. The book emphasizes the power of diversification among asset classes, such as arbitrage funds, global hedge funds, different types of futures funds, distressed bonds, and other market-uncorrelated investments. Boucher explains how this diversification can be used to build a bullet-proof and highly profitable portfolio that returns consistently high profits with much lower than market risk. Boucher provides examples from his own real-time hedge fund trading experience and offers his performance as proof of what can be achieved via these techniques. The Hedge Fund Edge melds market timing, vehicle selection, risk management techniques, economic insight and understanding, and tactical asset allocation into a totally new philosophy and approach that has been proven to produce spectacular gains with relatively low risk.

Trade the trend and you can trade for a living If you're going to play the stock market, play to win by using a fundamental strategy of most hedge fund managers—trend trading. In Trend Trading for a Living, the trading coach and hedge fund manager known on Wall Street as "Dr. Stoxx" shares his personal strategies for analyzing markets, picking stocks, and knowing when to buy and sell. This step-by-step book offers a practical road map to get yourself familiarized with the stock market and into the driver's seat of your financial future. In five progressive parts, Trend Trading for a Living helps you: Configure your platform: setup your home computer to trade online with the best brokers Learn the basics: understand trend trading, select stocks to watch, and interpret market signs Get in the game: select the most profitable bullish and bearish stocks and pick your entry and exit prices Leverage your portfolio: learn how to trade with options to increase your financial rewards Turn pro: with patience, determination, and a strategy grounded in fundamentals, you can "trade for a living" The empowering story of Larry Hite's unlikely rise to the top of the hedge fund world—with critical insights and lessons you can take to the bank In The Rule, legendary trader and hedge fund pioneer Larry Hite recounts his working-class upbringing in Brooklyn as a dyslexic, partially blind kid who was anything but a model student—and how he went on to found and run Mint Investment Management Company, one of the most profitable and largest quantitative hedge funds in the world. Hite's wild success is based on his deep understanding that markets are flawed—just like people. Through his early-life struggles and failures, Hite came to know himself well—his fears, his frustrations, his self-doubt, and his tolerance for all of the above. This motivational book reveals that by accepting the facts of his life and of himself, he was able to accept markets as they are. And that was the key to his success. In these pages, you'll walk of the footsteps of an investing legend, who imparts smart, practical trading lessons throughout the journey. Making a successful living in trading isn't about beating the markets. It's about meeting markets where they are, embracing the fact of risk, knowing yourself, and playing it strictly by the numbers. The Rule shows that investing decisions are not only bets or gambles, but investments in time, energy, and attention. By focusing on realistic returns on your investments—versus what you expect or hope to get—you immediately improve your probability for success.

During bull and bear markets, there is a group of hedge funds and professional traders which have been consistently outperforming traditional investment strategies for the past 30 odd years. They have shown remarkable uncorrelated performance and in the great bear market of 2008 they had record gains. These traders are highly secretive about their proprietary trading algorithms and often employ top PhDs in their research teams. Yet, it is possible to replicate their trading performance with relatively simplistic models. These traders are trend following cross asset futures managers, also known as CTAs. Many books are written about them but none explain their strategies in such detail as to enable the reader to emulate their success and create their own trend following trading business, until now. Following the Trend explains why most hopefuls fail by focusing on the wrong things, such as buy and sell rules, and teaches the truly important parts of trend following. Trading everything from the Nasdaq index and T-bills to currency crosses, platinum and live hogs, there are large gains to be made regardless of the state of the economy or stock markets. By analysing year by year trend following performance and attribution the reader will be able to build a deep understanding of what it is like to trade futures in large scale and where the real problems and opportunities lay. Written by experienced hedge fund manager Andreas Clenow, this book provides a comprehensive insight into the strategies behind the booming trend following futures industry from the perspective of a market participant. The strategies behind the success of this industry are explained in great detail, including complete trading rules and instructions for how to replicate the performance of successful hedge funds. You are in for a potentially highly profitable roller coaster ride with this hard and honest look at the positive as well as the negative sides of trend following.

"We're going to raise traders just like they raise turtles in Singapore." So trading guru Richard Dennis reportedly said to his long-time friend William Eckhardt nearly 25 years ago. What started as a bet about whether great traders were born or made became a legendary trading experiment that, until now, has never been told in its entirety. Way of the Turtle reveals, for the first time, the reasons for the success of the secretive trading system used by the group known as the "Turtles." Top-earning Turtle Curtis Faith lays bare the entire experiment, explaining how it was possible for Dennis and Eckhardt to recruit 23 ordinary people from all walks of life and train them to be extraordinary traders in just two weeks. Only nineteen years old at the time-the youngest Turtle by far-Faith traded the largest account, making more than \$30 million in just over four years. He takes you behind the scenes of the Turtle selection process and behind closed doors where the Turtles learned the lucrative trading strategies that enabled them to earn an average return of over 80 percent per year and profits of more than \$100 million.
