“My body is filled with poison...” The first man that Seika falls in love with in the purest way possible is a researcher that she calls Doctor Ryo. Growing up in a small enclosed world, he was the first person to make her happy both as a person and as a woman. With him by her side, she can do anything. She can even wander the night and use her body to transmit poison to its intended victims. The problem is, no matter how strongly she feels for Ryo, she can never touch him because of the poison she carries. The bittersweet mystery you’ve been waiting for starts now. Vol.2, 80 pages. For the first time, the controversial issue of physical contact in the consulting room is explored by distinguished psychoanalysts and psychotherapists representing a diverse range of psychoanalytic viewpoints. The contributors focus on the unconscious meanings of touch, or absence of touch, or unwelcome touch, or accidental touch in the psychoanalytic clinical situation. There are plenty of clinical vignettes and the discussions are grounded in clinical experience. Out of all medical and therapeutic treatments,

psychoanalysis remains one of the very few that uses no physical contact. Sigmund Freud stopped using the 'pressure technique' in the late 1890s, a technique whereby he would press lightly on his patient's head while insisting that they remembered forgotten events. He gave up this procedure in favour of encouraging free association, then listening and interpreting without touching his patient in any way. Psychoanalysis was born and the use of touch, as a technique reminiscent of hypnosis, was explicitly prohibited. The avoidance of physical contact between the analyst and patient was established as a key component of the classical rule of abstinence.

The paradoxical logic of transparency and mediation Transparency is the metaphor of our time. Whether in government or corporate governance, finance, technology, health or the media - it is ubiquitous today, and there is hardly a current debate that does not call for more transparency. But what does this word actually stand for and what are the consequences for the life of individuals? Can knowledge from the arts, and its play of visibility and invisibility, tell us something about the paradoxical logics of transparency and mediation? This Obscure Thing Called Transparency gathers

contributions by international experts who critically assess the promises and perils of transparency today.

Katharine Tait, daughter of Bertrand and Dora Russell, here vividly portrays the extraordinary

and stimulating environment she grew up in. In refreshing contrast to the interpretation of Russell as philosopher and public figure, Tait's is a close personal account of her deep love and admiration for her father and its gradual tempering by the imperfections she came to see in him. Touchingly written and beautifully described, the book shows Russell to be a man of great warmth, charm and humour, but is also a testament to the traumas created when he applied his views on marriage and education to his own home. My Father Bertrand Russell is essential reading for those seeking to understand the private background to Russell's ideas, the personal effects of his lifestyle prescriptions, and what it was like to live with a man of such genius. A bittersweet, seriously funny novel of a life, a small town, and a key to our troubled times traced through a newspaper columnist's half-century of taking in, and taking on, the world The curmudgeon who wrote the column "Ramblin" by Walt in the Granite Creek Gazette dismissed his successor as "puking on paper." But when Haze Evans first appeared in the small-town newspaper, she earned fans by writing a story about her bachelor uncle who brought a Queen of the Rodeo to Thanksgiving dinner. Now, fifty years later, when the beloved columnist suffers a massive stroke and falls into a coma, publisher Susan McGrath fills the void (temporarily, she hopes) with Haze's past columns, along with the occasional reprinted responses from readers. Most letters were favorable, although Haze did have her trolls; one Joseph Snell in particular dubbed her "liberal" ideas the "chronicles of a radical hag." Never censoring herself, Haze chose to mollify her critics with homey recipes—recognizing, in her constantly practical approach to the world and her community, that buttery Almond Crescents will certainly "melt away any

misdirected anger. Framed by news stories of half a century and annotated with the town's chorus of voices, Haze's story unfolds, as do those of others touched by the Granite Creek Gazette, including Susan, struggling with her troubled marriage, and her teenage son Sam, who—much to his surprise—enjoys his summer job reading the paper archives and discovers secrets that have been locked in the files for decades, along with sad and surprising truths about Haze's past. With her customary warmth and wit, Lorna Landvik summons a lifetime at once lost and recovered, a complicated past that speaks with knowing eloquence to a confused present. Her topical but timeless *Chronicles of a Radical Hag* reminds us—sometimes with a subtle touch, sometimes with gobsmacking humor—of the power of words and of silence, as well as the wonder of finding in each other what we never even knew we were missing.

Chronicles of a Radical Hag (with Recipes)

The first five chapters of Aristotle's De Generatione et Corruptione distinguish creation and destruction from mere qualitative change and from growth. But what inspires Philoponus most in his commentary on these chapters is the topic of organic growth. How does it take place without ingested matter getting into the same place as the growing body? And how is personal identity preserved, if our matter is always in flux, and our form depends on our matter? If we do not depend on the persistence of matter why are we not immortal? Analogous problems of identity arise also for inanimate beings. These topics of identity over time and the principles of causation are still matters of intense philosophical discussion.

Recovery of the Lost Good Object brings together the hugely influential papers and seminars of Eric Brenman, revealing his impact on the development of psychoanalysis and allowing a better understanding of his distinctive voice amongst post-Kleinian analysts. Gathered together for the first time in one volume, Eric Brenman's papers give the reader a unique insight into the development of his clinical and theoretical thinking. They highlight many issues which are relevant to the present debate about psychoanalytic technique, including: The Narcissism of the Analyst Hysteria The Recovery of the Good Object Relationship Meaning and Meaningfulness Cruelty and Narrowmindedness The Value of Reconstruction in Adult Psychoanalysis The second

half of the book documents three of the clinical seminars and covers the transgenerational transmission of trauma, the analysis of borderline pathology and the psychoanalytical approach to severely deprived patients. This collection will be welcomed by all psychoanalysts and psychotherapists, and other members of the helping professions interested in investigating the valuable contribution that Eric Brenman has made to contemporary psychoanalysis.

Set alongside The Analects and Mencius, these two texts make up the 'Four Books' of Chinese Confucian tradition. Their depiction of the 'Way of Great Learning' focuses on the moral tenets of Confucian thinking, establishing a universal framework that links individuals with the cosmos. By drawing together key ethical and philosophical, and metaphysical issues, the essays deal with the individual's development of moral character. They have long occupied a central position in the educational and political infrastructure of China, Korea and Japan, and their influence and popularity continues to grow, in the East and in the West.

Buddhism is in many ways a visual tradition, with its well-known practices of visualization, its visual arts, its epistemological writings that discuss the act of seeing, and its literature filled with images and metaphors of light. Some Buddhist traditions are also visionary, advocating practices by which meditators seek visions that arise before their eyes. Naked Seeing investigates such practices in the context of two major

esoteric traditions, the Wheel of Time (Kalacakra) and the Great Perfection (Dzogchen). Both of these experimented with sensory deprivation, and developed yogas involving long periods of dwelling in dark rooms or gazing at the open sky. These produced unusual experiences of seeing, which were used to pursue some of the classic Buddhist questions about appearances, emptiness, and the nature of reality. Along the way, these practices gave rise to provocative ideas and suggested that, rather than being apprehended through internal insight, religious truths might also be seen in the exterior world—realized through the gateway of the eyes. Christopher Hatchell presents the intellectual and literary histories of these practices, and also explores the meditative techniques and physiology that underlie their distinctive visionary experiences. The book also offers for the first time complete English translations of three major Tibetan texts on visionary practice: a Kalacakra treatise by Yumo Mikyo Dorjé, The Lamp Illuminating Emptiness, a Nyingma Great Perfection work called The Tantra of the Blazing Lamps, and a Bön Great Perfection work called Advice on the Six Lamps, along with a detailed commentary on this by Drugom Gyalwa Yungdrung.

Metaethics occupies a central place in analytical philosophy, and the last forty years has seen an upsurge of interest in questions about the nature and practice of morality. This collection presents original and ground-breaking research on metaethical issues from some of the very best of a new generation of philosophers working in this field. We humans are faced with an interesting problem: That which we think we understand

the most-our own behavior-we probably understand the least. On the eve of a new millennium. the planet is beset by a host of problems that are. for the most part. caused by human behavior. Ironically. although it seems that the greatest impact of our behavior is on the planet and its other inhabitants. we may actually be threatening our own future the most. For example. we have caused untold harm to the air we breathe. to the water we drink. and. by extension. to much of the food we eat. More important perhaps. we have created a society in which. among other things. many people are anxious and depressed. young women starve themselves. and alcohol and cigarette use are responsible for hundreds of thousands of cases of illness and death every year. And humans still murder one another at an astounding rate. while at the same time continuing to affirm the value of human life. At a time when it is critical that our children become educated. more and more children are not learning the basic skills they will need to think logically so that they can begin to solve the world's problems. The question may be not "Can the planet survive?" but. rather. "Can we humans survive and change our own destructive actions?" Although many scholars. philosophers.

Arsic unpacks Ralph Waldo Emerson's repeated assertion that our reality and our minds are in constant flux. Her readings of a broad range of Emerson's writings are guided by a central question: what does it really mean to maintain that everything fluctuates, is relational, and so changes its identity?

More than any other sport, baseball has developed its own niche in America's culture and psyche. Some researchers spend years on detailed statistical analyses of minute parts of the game, while others wax poetic about its players and plays. Many trace the beginnings of the civil rights movement in part to the Major Leagues' decision to integrate, and the words and phrases of the game (for example, pinch-hitter and out in left field) have become common in our everyday language. From AARON, HENRY onward, this book covers all of what might be called the cultural aspects of baseball (as opposed to the number-rich statistical information so widely available elsewhere). Biographical sketches of a Hall of Fame players, owners, executives and umpires, as well as many of the sportswriters and broadcasters who have won the Spink and Frick awards, join entries for teams, owners, commissioners and league presidents. Advertising, agents, drafts, illegal substances, minor leagues, oldest players, perfect games, retired uniform numbers, superstitions, tripleheaders, and youngest players are
