Viagra was discovered by accident in the early nineties. During trials of a potentially new angina drug named UK-92480, scientists at a Pfizer (a pharmaceutical company) discovered the powers of the main ingredient in Viagra (sildenafil citrate). Angina is a health condition in which

there is a constriction of the vessels which supply blood to the heart; thus, causing chest pain and difficulty in breathing. When UK-92480 was unable to relieve the pain and the company was about to abandon the drug, they received reports that the male volunteers who took the drug experienced erections. Chris Wayman discovered a dramatic effect of the drug on the penile tissue samples from impotent men when he tested the drug on them. In 1998, the food and drug administration in the U.S. approved Viagra. Thus, it became the first oral drug for treating erectile dysfunction. In just the first ten years, more than 30 million men from all over the world have used Viagra with the drug's sales exceeding 1 billion dollars in the process. To treat erectile dysfunction in men, Viagra relaxes muscles found in the walls of the blood vessels and increases blood flow to specific parts of the body.

Life is Short! Make the Most of the Joy in Your Sex Life and Relationship New evidence suggests that over 90% of men with erectile dysfunction in the United States have used this drug to solve sexual dysfunction problems . Uses, Dosage, Side Effect. How to Use the Female Enhancement Supplement for Improving Sex Urge and Enhancing Libido Ever. Viagra have the ability to transform the love lives of women who have stopped enjoying sex, a study indicates this fact. The drug has been used to enhance men's sexual performance since 1998. However, comparatively few women have taken it and evidence that the little blue tablet should improve their enjoyment of lovemaking has till now been largely anecdotal. Numerous preceding studies shows no large benefit but within the modern-day tests more than half the women given viagra reported heightened pride at some stage during intercourse. The research may bring fulfilment to hundreds of thousands who admit of been afflicted by sexual frustration. 40% of British women are believed to experience sexual problems however few approach their doctor for help because they're either too embarrassed or unaware. The pink Viagra is used for treating hypoactive sexual desire disorder (HSDD) in women just as the normal male Viagra (Sildenafil) is alternatively used for treating erectile dysfunction in men which has been a contributing factor to various challenges in many marriages and relationships today.
