Explores the biographical and textual evidence of Russia's importance in shaping the writer Rainer Maria Rilke's aesthetic perception. Christmas is often associated with special memories, but for some it brings shadows of things that should not have been. Things like unearthly visitors who open their eyes to new worlds and new experiences. Pantomime coats, robot dogs, and a big blue box parked beneath the Christmas tree. Some think these fleeting guests are apparitions, angels, or demons. But all know that Christmas will never be the same again. The Doctor and his companions travel to Christmas past, Christmas present, and those Christmases yet to come. They bring festive laughter and Yuletide joy, creeping dread and screaming horror, slipping in and out of time like the ghosts of Christmas. "Darkheart: a faded neutron star surrounded by dead planets. But there is life on one of these icy rocks -- the last enclave of the Earth Empire, frozen in the image of another time. As the rest of the galaxy enjoys the fruits of the fledgling Federation, these isolated Imperials, bound to obey a forgotten ideal, harbour a dark obsession. The Doctor, Jamie and Victoria arrive to find that the Federation has at last come to reintegrate this lost colony, whether they like it or not. But all is not well in the Federation camp: relations and allegiances are changing. The fierce Veltrochni -- angered by the murder of their kinsmen -- have an entirely different agenda. And someone else is manipulating the mission for his own mysterious reasons -- another time traveler, a suave and assured master of his work. The Doctor must uncover the terrible secret which brought the Empire to this desolate sector, and find the source of the strange power maintaining their society. But can a Time Lord, facing the ultimate temptation, control his own desire? This adventure takes place between the television stories The Web of Fear and Fury from the Deep, and after the Missing Adventure Twilight of the Gods."--Page 4 of cover.

Doctor Who: The New Audio Adventures is a no-holds-barred account of the making of every Big Finish Doctor Who play, from 1999's The Sirens of Time to 2003's anniversary special, Zagreus. The Interzone is a fearsome nether-world protecting a zone ruled by the Kromon. Theirs is an arid land of dust and dying trees. Across the landscape are spheres that look like giant anthills. The Doctor believes that within one of these structures lie the clues that will lead him to his lost TARDIS. The spheres are ruled by the insect-like Kromon who covet the TARDIS. When Charley is captured she is forced to metamorphosise into a hybrid-insect Queen and so to save her, the Doctor must barter his knowledge of space-travel technology, all the while knowing that he risks opening up all the realms of space to a rapacious race whose creed is not to create, only to plunder.

*The characters in Novikov's work are predominantly people of the Russian North: Pomors, Karelians and Komi. In 2013 Novikov, along with other Karelian writers, proclaimed the Manifesto on a New Northern Prose, the mission of which Novikov described as: "Though these are trying times for Russian literature, there is light, there is hope that it will retain its key underlying principles of honesty, faith, beauty. How great it is that these principles fully fit with and correspond to the old and new, living, and strong direction of Russia's Northern Prose!" *** The protagonist of A Flame Out at Sea heads to the shores of the northern lakes and the White Sea in search of its present, which unexpectedly proves to be inseparable from its recent past. Against the backdrop of the powerful northern elements, the drama of a single individual in the here and now begins to seem tiny and insignificant but the tragedy of the nation irredeemably large. "The novel is a confession, a travelogue and a doorway into a great historical era." A Flame Out at Sea is about going beyond the boundaries of the big city, about overcoming the fetters of one's private and family past, leaving aside one's resentment, squashing one's pride, unclenching one's fists and turning one's life around. It is about a journey to the origins of speech, personality, courage and love made by a modern man in the harsh, sacred, nourishing and draining circumstances of the Russian North. Doctor Who - new dawn explores the latest cultural moment in this long-running BBC TV series: the casting of a female lead. Analysing showrunner Chris Chibnall and Jodie Whittaker's era means considering contemporary Doctor Who as an inclusive, regendered brand. Featuring original interview material with cast members, this edited collection also includes an in-depth discussion with Segun Akinola, composer of the iconic theme tune's current version. The book critically address the series' representations of diversity, as well as fan responses to the thirteenth Doctor via the likes of memes, cosplay and even translation into Spanish as a grammatically gendered language. In addition, concluding essays look at how this moment of Who has been merchandised, especially via the 'experience economy', and how official/unofficial reactions to UK lockdown helped the show to further re-emphasise its public-service potential.

When the Doctor last visited the city of Excelis, its citizens were about to enter an age of enlightenment and reason. But some centuries later, he discovers a vicious totalitarian regime at war with the rest of Artaris, living off the efforts of a drugged and broken underclass.

The prehistoric Earth is dying. Thunderclouds roll across the skies, cloaking the land in darkness. The seas crash and boil as the rain turns to acid. The remnants of the Silurian race place themselves in suspended animation, deep below the surface. One day they will awaken and reclaim their world. The TARDIS has landed on the Galapagos Islands, a desolate outcrop of rocks shrouded in mist and fear. In the settlement of Baquerizo Moreno, there are rumours that prisoners have been mysteriously disappearing from the gaolhouse. A fisherman has been driven insane by something he saw in the caves. And the Doctor and Evelyn are not the only new arrivals; there is also a young natural philosophe by the name of Charles Darwin. This story takes place between "The Trial of a Time Lord" and "Time and the Rani."

The Doctor and Lucie visit nineteenth-century Sweden and become embroiled in an attempt to steal the infamous Black Diamond. It began with a key. One afternoon in 1956, in the home of the Hitchings family in Battersea, south London, a small silver key appeared on Shirley Hitchings' bed. This seemingly insignificant event heralded the beginning of one of the most terrifying, incredible and mysterious hauntings in British history. The spirit, who quickly became known as 'Donald', began to communicate, initially via tapping sounds, but over time - and with the encouragement of psychical researcher Harold Chibbett, whose case-files appear here - by learning to write. Soon, the spirit had begun to make simply incredible claims about his identity, insisting that he was one of the most famous figures in world history - but what was the truth? Here, for the first time, is the full story, told by the woman right at the heart of it all - Shirley herself.
