She covers a range of subjects including transfer fees, voluntary surcharges, seller financing, revolving funds, and Project Related Investment programs (PRIs). "Over my career I have led more than 30 snow expeditions, taught snow science in the classroom at the undergraduate and graduate level, and run more than a dozen field method classes all over the U.S. In the field with my students, we have worked shoulder-to-shoulder in snow pits measuring the density, grain size, and stratigraphy of the snow pack. In that setting I have tried to teach people how to read in the snow the story of the winter. Most beginners at first have trouble seeing the story: it is all just white and the same. But with time, and a little guidance, the winter world has opened up for them. That is what this book is about: just a little guidance for those who might not get a chance to dig a snow pit with me, but who want to know more about the snow"--

'Ridiculously enjoyable' Tom Holland A Book of the Year for The Times, Mail on Sunday and BBC History Magazine The 'Mermaid of Morwenstow' excommunicated a cat for mousing on a Sunday. When he was late for a service, Bishop Lancelot Fleming commandeered a Navy helicopter. 'Mad Jack' swapped his surplice for leopard skin and insisted on being carried around in a coffin. And then there was the man who, like Noah's evil twin, tried to eat one of each of God's creatures... In spite of all this they saw the church as their true calling. These portraits reveal the Anglican church in all its colourful madness.

Appendixes include maps of the island groups and a thorough bibliography.

William C. Morris YA Debut Award Winner! A hilarious YA contemporary realistic novel about a witty Black French Canadian teen who moves to Austin, Texas, and experiences the joys, clichés, and awkward humiliations of the American high school experience—including falling in love. Perfect for fans of Nicola Yoon, When Dimple Met Rishi, and John Green. Norris Kaplan is clever, cynical, and quite possibly too smart for his own good. A Black French Canadian, he knows from watching American sitcoms that those three things don't bode well when you are moving to Austin, Texas. Plunked into a new high school and sweating a ridiculous amount from the oppressive Texas heat, Norris finds himself cataloging everyone he meets: the Cheerleaders, the Jocks, the Loners, and even the Manic Pixie Dream Girl. Making a ton of friends has never been a priority for him, and this way he can at least amuse himself until it's time to go back to Canada, where he belongs. Yet against all odds, those labels soon become actual people to Norris...like loner Liam, who makes it his mission to befriend Norris, or Madison the beta cheerleader, who is so nice that it has to be a trap. Not to mention Aarti the Manic Pixie Dream Girl, who might, in fact, be a real love interest in the making. But the night of the prom, Norris screws everything up royally. As he tries to pick up the pieces, he realizes it might be time to stop hiding behind his snarky opinions and start living his life--along with the people who have found their way into his heart.

Drawing explicit lines, across time and a broad spectrum of violent acts, to provide the definitive field guide for understanding and opposing white supremacy in America Hate, racial violence, exclusion, and racist laws receive breathless media coverage, but such attention focuses on distinct events that gain our attention for twenty-four hours. The events are presented as episodic one-offs, unfortunate but uncanny exceptions perpetrated by lone wolves, extremists, or individuals suffering from mental illness--and then the news cycle moves on. If we turn to scholars and historians for background and answers, we often find their knowledge siloed in distinct academic subfields, rarely connecting current events with legal histories, nativist insurgencies, or centuries of misogynist, anti-Black, anti-Latino, anti-Asian, and xenophobic violence. But recent hateful actions are deeply connected to the past--joined not only by common perpetrators, but by the vast complex of systems, histories, ideologies, and personal beliefs that comprise white supremacy in the United States. Gathering together a cohort of researchers and writers, A Field Guide to White Supremacy provides much-needed connections between violence present and past. This book illuminates the career of white supremacist and patriarchal violence in the United States, ranging across time and impacted groups in order to provide a working volume for those who wish to recognize, understand, name, and oppose that violence. The Field Guide is meant as an urgent resource for journalists, activists, policymakers, and citizens, illuminating common threads in white supremacist actions at every scale, from hate crimes and mass attacks to policy and law. Covering immigration, antisemitism, gendered violence, lynching, and organized domestic terrorism, the authors reveal white supremacy as a motivating force in manifold parts of American life. The book also offers a sampling of some of the most recent scholarship in this area in order to spark broader conversations between journalists and their readers, teachers and their students, and activists and their communities. A Field Guide to White Supremacy will be an indispensable resource in paving the way for politics of alliance in resistance and renewal.

Full-color illustrations introduce readers to more than 30 genera of native bees, noting each one's needs and habits and placing them in their wider context. The author highlights bees' ties to our own lives, the food we eat, and the habitat we provide, and suggests ways to support bees in our own backyards. In addition to helping readers understand and distinguish among major groups of bees, this guide reveals how bees are an essential part of healthy ecosystem and how many plants, including important crop plants, depend on the pollination they provide. As growing evidence points to declining bee populations, this book offers critical information about the bond between plants and pollinators, and between humans and nature.
