fighting a powerful addiction. It wasn't drugs, alcohol or fame. It was an addiction to certainty. If she didn't know what the future would bring - and who

Gift of Maybe. Maybe is a simple yet powerful philosophy that has transformed Allison's life, and the life of her many clients (now that she has ditched her

Saving Us is one of the more important books about climate change to have been written.” –The Guardian United Nations Champion of the Earth, climate scientist, and

evangelical Christian Katharine Hayhoe changes the debate on how we can save our future. Called "one of the nation's most effective communicators on climate

change” by The New York Times, Katharine Hayhoe knows how to navigate all sides of the conversation on our changing planet. A Canadian climate

scientist living in Texas, she negotiates distrust of data, indifference to imminent threats, and resistance to proposed solutions with ease. Over the past

Where To Download A Gift Of Hope Helping The Homeless

fifteen years Hayhoe has found that the most important thing we can do to address climate change is talk about it—and she wants to teach you how. In Saving

Us, Hayhoe argues that when it comes to changing hearts and minds, facts are only one part of the equation. We need to find shared values in

order to connect our unique identities to collective action. This is not another doomsday narrative about a planet on fire. It is a multilayered look at

science, faith, and human psychology, from an icon in her field—recently named chief scientist at The Nature Conservancy. Drawing on

interdisciplinary research and personal stories, Hayhoe shows that small conversations can have astonishing results. Saving Us leaves us with the tools

to open a dialogue with your loved ones about how we all can play a role in pushing forward for change.
