

## *A Guide To Michigan Medicaid Health Plans*

The Center for Medicare and Medicaid Innovation (the Innovation Center) has awarded 15 states contracts of up to \$1 million each to design systems of integrated care for "dual eligibles"--People who are enrolled in both Medicare and Medicaid. Since neither Medicare nor Medicaid is responsible for coordinating care and benefits, dual eligibles often find themselves in a highly fragmented system. The Innovation Center requires states to engage both beneficiaries and advocates in the design of systems to integrate Medicare and Medicaid. To help advocates in this process, Families USA has put together a Guide for Advocates: State Demonstrations to Integrate Medicare and Medicaid. The guide explains the requirements for state demonstrations to integrate care for dual eligibles, discusses possible models of integration and issues to consider with each model, and provides guidance to advocates on how to get involved in the planning process. For your reference, we are also providing copies of some states' initial proposals listed below. \* California \* Oklahoma \* Colorado Oregon \* Connecticut \* South Carolina \* Massachusetts \* Tennessee \* Michigan \* Vermont \* Minnesota \* Washington \* New York \* Wisconsin \* North Carolina. It is our understanding that these are the final draft versions of the proposals submitted by the states. However, if they are not in fact the official final draft, they are very close draft version of the final copy.

*Catastrophic injury in an automobile accident is a very serious life altering event. Are you prepared? Have you ever considered it? Can you imagine the impact on you or your loved ones if this very unfortunate event visited you?! According to a Harvard Medical School study, medical bills cause an average of 2 million personal bankruptcies per year. What kind of automobile insurance do you have? What is your coverage for personal injury? What kind of health insurance coverage do you have? Does it cover in home Nursing care after a catastrophic automobile accident? MICHIGAN is the only state in America that provides unlimited medical benefits for injuries sustained in an automobile accident! Why doesn't your state? Brain injury is a silent epidemic in America, every year there are over 1.5 million brain injuries in America and 44% are from auto mobile accidents! Are you an automobile accident away from bankruptcy? In every other state than Michigan, you spend down your limited auto insurance benefit, then exhaust your Health insurance benefit, then discover you have NO in home nursing care coverage, then you spend your assets to provide care to your loved ones, then you can qualify for Medicaid, then you can file for bankruptcy, then you can discover the massive nursing shortage, and the massive hemorrhaging of state budgets due to escalating Medicaid costs, then discover any Medicaid coverage you can qualify for are very limited compared to your need, and there are too few personnel to do the work! THE MICHIGAN MODEL FOR AUTOMOBILE INSURANCE, is a solution that that will serve to provide a quality of life for accident victims, and save states billions in Medicaid costs! Start today, get educated, then lobby your State Governor and State Legislators to adopt the Michigan Model in your state, you already pay for auto insurance, why aren't you getting unlimited medical benefits for life, like Michigan?*

**A citizen's guide to America's most debated policy-in-waiting There are few issues as consequential in the lives of Americans as health care--and few issues more politically vexing. Every single American will interact with the health care system at some point in their lives, and most people will find that interaction less than satisfactory. And yet for every dollar spent in our economy, 19 cents go to health care. What are we paying for, exactly? Health care policy is notoriously complex, but what Americans want is quite simple: good health care that's easy to use and doesn't break the bank. Polls show that as many as 70 percent of Americans want the government to provide universal health coverage to all Americans. What's less clear is how to get there. Medicare for All is the leading proposal to achieve to universal health coverage in America. But what is it exactly? How would it work? More importantly, is it practical or practicable? This book goes beyond partisan talking points to offer a serious examination of how Medicare for All would transform the way we give, receive, and pay for healthcare in America.**
