

A Man Rides Through Nwdata

A selection of McManus's writings spanning his eight years as associate editor of and contributor to *Field & Stream* offers observations on the hapless victims of camping, fishing, hunting, and hiking Rangeland, forests and riverine landscapes of pastoral communities in Eastern Africa are increasingly under threat. Abetted by states who think that outsiders can better use the lands than the people who have lived there for centuries, outside commercial interests have displaced indigenous dwellers from pastoral territories. This volume presents case studies from Eastern Africa, based on long-term field research, that vividly illustrate the struggles and strategies of those who face dispossession and also discredit ideological false modernist tropes like ‘backwardness’ and ‘primitiveness’. Geographies of children and young people is a rapidly emerging sub-discipline within human geography. There is now a critical mass of established academic work, key names within academia, growing numbers of graduate students and expanding numbers of university level taught courses. There are also professional training programmes at national scales and in international contexts that work specifically with children and young people. In addition to a productive journal of Children’s Geographies, there’s a range of monographs, textbooks and edited collections focusing on children and young people published by all the major academic presses then there is a substantive body of work on younger people within human geography and active authors and researchers working within international contexts to warrant a specific Major Reference Work on children’s and young people’s geographies. The volumes and sections are structured by themes, which then reflect the broader geographical locations of the research. The aim of this book is to contribute to culturally inclusive, equitable and effective wildlife conservation and management in the northern regions--and by extension, in other regions where indigenous systems of co-existing with wildlife also struggle to work with positivistic science-based assessments of conservation needs. Given the diverse worldviews, perspectives, and agendas of all those seeking to influence conservation of the iconic polar bear, it is impossible in a single book to provide a comprehensive treatment of the management problems Inuit residents of the Canadian Arctic and their government co-management partners face at the present time. Consequently, what is presented in this volume are the generally under-reported perspectives of Arctic residents that reflect an experiential understanding of events taking place in the region, and of some others whose views also augment assessments being used to develop polar bear conservation initiatives.

The papers presented in this volume advance the state-of-the-art research on social media and Web 2.0, electronic tourism marketing, website development and evaluation, search engine marketing and optimization, IT adoption and diffusion, virtual travel communities, mobile technologies, management information systems in tourism, eLearning, recommender systems for tourism businesses and destinations and electronic distribution for hospitality and travel products. This book covers the most significant topics contributed by prominent scholars from around the world and is suitable for both academics and practitioners who are interested in the latest developments in e-Tourism.

This book constitutes the refereed proceedings of the 30th International Conference on Advanced Information Systems Engineering, CAiSE 2018, held in Tallinn, Estonia, in June 2018. The 37 papers presented in this volume were carefully reviewed and selected from 175 submissions. The papers are organized in topical sections on Process Execution, User-Oriented IS Development, Social Computing and Personalization, the Cloud and Data Services, Process Discovery, Decisions and the Blockchain, Process and Multi-level Modelling, Data Management and Visualization, Big Data and Intelligence, Data Modelling and Mining, Quality Requirements and Software, and Tutorials.

In 1991, the Oregon Council for the Humanities published The First Oregonians, the only single-volume, comprehensive history of Oregon’s Native Americans. A regional bestseller, this collaborative project between the council, Oregon tribes, and scholars served as an invaluable reference for teachers, scholars, and general-interest readers before it went out of print in 1996. Now revised and expanded for a new generation of Oregonians, The First Oregonians provides a comprehensive view of Oregon’s native peoples from the past to the present. In this remarkable volume, Oregon Indians tell their own stories, with more than half of the book’s chapters written by members of Oregon’s nine federally recognized tribes. Chapters on each tribe examine lifeways--from the traditional to the present day. Using oral histories and personal recollections, these chapters vividly depict not only a history of decimation and decline, but also a contemporary view of cultural revitalization, renewal, and continuity. The First Oregonians also includes essays exploring geography, federal-Indian relations, language, and art written by prominent Northwest scholars. And, as with the first edition, this new edition is richly illustrated with almost two hundred photographs, maps, and drawings. No other book offers as wide a variety of views and stories about the historical and contemporary experience of Oregon Indians. The First Oregonians is the definitive volume for all Oregonians interested in the fascinating story of Oregon’s first peoples.

The Chronicle of King Galawdewos (r. 1540-1559), reporting the nineteen years of the king’s reign, is one of the most useful and significant historical sources for the history of Christian-Muslim relation in the sixteenth century of Ethiopia and the Horn. It represents a peculiar text in Gə’əz historiography both because of its narrative structure and the underlying sources used by the chronicler. Numerous Arabisms appear in the text, which eventually suggest that the Chronicle was written by a person with an outstanding knowledge of Arabic, in 1561. The book presents a new critical edition based on all available manuscripts and provides some detailed introductory notes and an English translation. The new edition yields philological findings concerning the Chronicle of King Galawdewos in particular and new inputs that call for re-editing the Ethiopian royal chronicles in general. It also adds valuable by now not recorded items for Gə’əz lexicography and corrects historical distortions resulted from the previous edition. Above all, the work provides a text-critically established edition of the Chronicle of King Galawdewos accompanied by an up-to-date concisely annotated translation, which offer new insights into the late medieval history and historiography of Ethiopia and the Horn of Africa.

Local, National and International Perspectives

The relationship between politicians and broadcasters has always been fraught with tension. Today, every word and act of those who wield power is instantly broadcast and dissected on 24-hour rolling news channels, blogs and Twitter. But in the past, broadcasters were banned by law from debating anything newsworthy and Parliament imprisoned those who dared to report what MPs had said. Since that censorship ended, the two sides have clashed repeatedly. Live From Downing Street takes us on an absorbing journey through the history of this power struggle, dwelling in fascinating detail on the charismatic key players from radio and television - the Dimplebys, Day, Frost, Walden, Paxman, Humphrys - and those who fought back - Churchill, Wilson, Thatcher and Blair. As the BBC's Political Editor, Nick Robinson is uniquely placed to add his own perceptive insights into the controversial issue of impartial reporting, providing a colourful and gripping account of the hard-fought battles for the right to tell the public about the decisions taken on their behalf. These 15th Proceedings provide an overview of the ongoing research and management activities on polar bears in the circumpolar Arctic. Together with the previous 14 proceedings, they provide an historic record of the international effort in protecting, studying, and managing polar bears. The document addresses more recent concerns of threats arising as a consequence of increased human activities in both the Arctic and in regions far beyond the Arctic. Previous proceedings included a Status Report for each of the world s subpopulations, which focused largely on the known or unknown status as it related to harvest. In the Status Report of the 15th Proceedings, we provide a more comprehensive assessment of all threats to the status of each polar bear subpopulation." This book is concerned with the ways in which crops might be developed, or improved, for soils that are agriculturally unproductive because of excesses- high salinity and metal toxicity - and/or deficiencies of certain minerals. The aim is that those working to derive crops for growth on these problem soils should be aware of the many diverse avenues that areavailable. The methods discussed are conventional breeding, selection based on knowledge of the physiological basis of tolerance, the use of cell culture and cytogenetics, and the exploitation of native flora.

The Inside Story Of The Battle Over Britain’s Future And My Personal Battle To Report It

This book provides a comprehensive examination of water resource management in the Omo-Turkana Basin, linking together biophysical, socioeconomic, policy, institutional and governance issues in a solutions-oriented manner. The Omo-Turkana Basin is one of the most important lake basins in Africa, and despite the likely transboundary impacts associated with the management of dams, it is the largest lake basin in Africa without a cooperative water agreement. This volume provides a foundation for integrated decision-making in the management of development in the Lake Turkana Basin. Chapters cover water-related conditions, hydropower, agriculture, ecosystems, resilience and transboundary governance. The final chapter proposes ways forward in light of the potential benefits that can be achieved through cooperation, and practical realities that cooperation is slow and may take time to achieve. This book will be of great interest to students and scholars of water and natural resource management, environmental policy, sustainable development and African studies. It will also be relevant to water management professionals.

This book examines the theoretical and methodological research issues that underlie the design and use of interactive technology. The analysis directs attention to three human capacities: cognition, communication and interaction. The examination of these capacities is embedded in understanding concepts of communication and interaction and their application; conceptions of knowledge and cognition; and the role of aesthetics and ethics in design.

The 1991 government change in Ethiopia ushered in a centralised system of governance, aimed to bring about harmony and cooperation between different groups and to promote local self-rule. It has proceeded in two phases: 1991-2001 centred on creating and powering National/Regional Governments, termed mid-level decentralisation. Further powers were devolved in 2001 through the District Level Decentralization Program and Urban Management Profram. This volume brings together studies by the Forum for Social Studies and others, with the aim of identifying knowledge gaps for further research and to generate debate on the issues in Ethiopia. The study is in two parts: a literature review seeking to document existing studies and highlight research gaps; and field work which involved a rapid assessment of eight weredas and two kifle ketemas in Addis Ababa. The other three studies are synopses of master theses submitted to the Institute of Regional and Local Development Studies of Addis Ababa University.

Should you build wide roads that promote safety or narrow ones that minimize slope disturbance? Should you preserve native plant life for aesthetic purposes or irrigate the landscape to help prevent fires? This report will help planners advise community leaders on these and other issues involved in planning for hillside development. Drawing on documents gathered from almost 200 local governments in 22 states, it addresses the most common challenges encountered by planners who have drafted hillside plans and ordinances. Planning for Hillside Development includes excerpts of guidelines and ordinances currently in place in 13 communities.

Being a home to more than 80 ethnic groups, Ethiopia has to balance normative diversity with efforts to implement state law across its territory. This volume explores the co-existence of state, customary, and religious legal forums from the perspective of legal practitioners and local justice seekers. It shows how the various stakeholders' use of negotiation, and their strategic application of law can lead to unwanted confusion, but also to sustainable conflict resolution, innovative new procedures and hybrid norms. The book thus generates important knowledge on the conditions necessary for stimulating a cooperative co-existence of different legal systems.

Whether they're decorating Easter trees or celebrating Wagner's birthday by playing recordings of his Ring cycle operas and incinerating a model of Valhalla on an outdoor barbecue to the closing strains of "Gotterdamering," Americans know both how to create and how to celebrate holidays. Jack Santino's guide to such frivolity is a wonderfully readable exploration of holidays, periods of festivity, and life-cycle rituals and celebrations. Santino draws on history, anthropology, popular culture, and folklore to show the intricate relationships between holidays and the roles that celebrations and rituals play in people's lives.

Interior designer Frank Fontana offers hundreds of tips for decorating a home, covering planning, walls, entryways, living spaces, bedrooms, kitchens, and other areas; and includes instructions for a number of do-it-yourself projects.

This book constitutes the refereed proceedings of the 10th International Conference on Blended Learning, ICBL 2017, held in Hong Kong, China, in June 2017. The 42 papers presented were carefully reviewed and selected from 100 submissions. The papers are organized in topical sections named: Keynotes; Experiences in Blended Learning; Strategies in Blended Learning; Assessment for Blended Learning; Computer-Support Collaborative Learning; Improved Flexibility of Learning Processes; Open Educational Resources; Pedagogical and Psychological Issues.

Combining science with humor, this in-your-face modern guide to manners for regular people provides a new set of rules for our 21st century lives that show us how to avoid being rude and stand up to those who are. Original. 50,000 first printing.

These proceedings provide an overview of the ongoing research and management activities on polar bears in the circumpolar arctic. Together with the previous 13 proceedings, they provide an historic record of international efforts in protecting, studying and managing polar bears. With recent documentation of how warmer arctic climate might affect the sea ice habitat of polar bears, the predictions of even warmer climate in the next decades, and documentation of effects on polar bears subpopulations, an evaluation of the red list status of polar bear subpopulations was followed by an increased conservation designation of vulnerable. In the complexity of possible interactions between climate change, local harvest, and in some areas high levels of pollutants, an increased level of international cooperation was advocated.

This book constitutes the thoroughly refereed papers of the Second International Conference on Applied Informatics, ICAI 2019, held in Madrid, Spain, in November 2019. The 37 full papers and one short paper were carefully reviewed and selected from 98 submissions. The papers are organized in topical sections on bioinformatics; data analysis; decision systems; health care information systems; IT Architectures; learning management systems; robotic autonomy; security services; socio-technical systems; software design engineering.

The voyage of a lifetime. It was the early 1970s and the wild, delirious Sixties were fading into the past. But the craziness lingered, enough to infect three young men with the craving for a real adventure. And the adventure they chose was to build their own sailboat for a voyage to the South Seas. It was an improbable dream inspired by gallons of draft

beer gulped down at one of Vancouver's classic beer parlours, the Cecil. But amazingly, they made it happen, sailed there and back, and lived to tell the tale!

This book constitutes the refereed proceedings of the Second International Conference on Data Mining and Big Data, DMBD 2017, held in Fukuoka, Japan, in July/August 2017. The 53 papers presented in this volume were carefully reviewed and selected from 96 submissions. They were organized in topical sections named: association analysis; clustering; prediction; classification; schedule and sequence analysis; big data; data analysis; data mining; text mining; deep learning; high performance computing; knowledge base and its framework; and fuzzy control.

The aim of the series called Acta Aethiopica is to collect, translate, annotate and publish nineteenth-century letters, treaties and other brief documents which throw light on the emergence and development of modern Ethiopia. For the Horn of Africa as for the rest of the continent, the nineteenth century was a period of great change. Many aspects of the developments are still little known or dominated by euro-centred views and interpretations. One reason for this is that our sources of knowledge consist mainly of letters, reports and other documents written by Europeans.

A handbook on sailing classic boats by the 'guru of gaff-rig sailors', replete with illustrations and clear descriptions of techniques that are unique to the classic boat world.

How a Humble Home-Built Ferro-Cement Sailboat Changed My Life Forever

The international conference People, Wildlife, and Hunting: Emerging Conservation Paradigms brought together hunters, outfitters, community representatives, wildlife managers, researchers and conservationists from across Canada and overseas to explore the relationship linking trophy hunting, wildlife conservation, large-mammal management, community economies, and community sustainability in rural areas. This report focuses more particularly (but not exclusively) upon community-based conservation hunting programs operating in the Canadian North. Papers by: William A. Wall; Peter J. Ewins; James Pokiak; Sylvia Birkholz, Naomi Krogman, Marty Luckert and Kelly Semple; Jon Hutton; George W. Wenzel and Martha Dowsley; H. Dean Cluff and Ernie Campbell; Frank Pokiak; Kai Wollscheid; Lee Foote; Graham Van Tighem, Thomas S. Jung, and Michelle Oakley; Drikus Gissing; Marco Fiesta-Bianchet; Barney Smith and Harvey Jessup;

Proceedings of the NATO Advanced Study Institute, Erice, Italy, November 3--15, 1992

One of the four core phases of emergency management, hazard mitigation is essential for reducing disaster effects on human populations and making communities more resilient to the impacts of hazards. Presenting an up-to-date look at the changing nature of disasters, Natural Hazard Mitigation offers practical guidance on the implementation and selection of hazard mitigation programs and projects. Based on real-world applications, the book includes case studies that present a thorough explanation of the various issues involved. The contributors describe the value and potential of mitigation efforts and explain how to convince public officials and communities of that value. They also discuss how to better involve the community and uniquely tailor solutions to regional and local situations. The book begins with an overview of the history of hazard mitigation with a focus on the Disaster Mitigation Act of 2000. It examines where hazard mitigation fits into emergency management and addresses some of the challenges that can arise in navigating the various intergovernmental relationships involved in hazard mitigation. The remaining chapters explore: Public-private partnerships for hazard mitigation at the local level The role currently played by the private sector and how communities can best make use of contractors How to maximize the use of the National Flood Insurance Program and the Community Ratings System Risk communications as a key component of encouraging hazard mitigation Legal issues relevant to hazard mitigation Ways to actively engage the community and how to advocate for hazard mitigation policy How state and local governments can promote and fund mitigation without utilizing federal dollars The challenges associated with volunteers and how to best make use of this resource The area analysis as an innovative means of addressing flood risk at the block or neighborhood level The book includes learning objectives, key terms, and end-of-chapter questions to enhance comprehension. It concludes with a discussion of tools that local practitioners can use and provides an appendix with additional links and resources. This volume is an essential reference for both students and professionals in the ongoing effort to better prepare communities against the effects of natural hazards.

Just after ten o'clock on Thursday, 7 May 2015 Nick Robinson stared down the lens of camera 5 in the BBC's Election Night Studio to explain to millions the significance of an exit poll that shocked the country and heralded an earthquake in British politics. That moment was a personal milestone for the BBC's Political Editor, who had been discharged from hospital just hours earlier following weeks of treatment for cancer and the loss of his voice after surgery. In the year leading up to that night Nick kept a journal recording the events he reported on day after day to millions of viewers and listeners, and which he continued to monitor, often from his hospital bed as he fought to get fit in time for election night. This is Nick's behind-the-scenes account of his encounters with David Cameron, who many wrote off before the shock victory he called his 'sweetest'; Ed Miliband, who turned abuse & ridicule into respect before leading Labour to its worst defeat in a generation; Nick Clegg, who led his party into power and then to humiliation and near oblivion; Nigel Farage, who rose so fast and then fell at the final hurdle; Alex Salmond, whose public clash with Nick led to thousands protesting outside the BBC's Scottish HQ, and Nicola Sturgeon, whose stunning success as SNP leader has put Scottish independence back on the map. The result is an extraordinary narrative, characterized by Nick Robinson's trademark insight, analysis and backstage gossip, of an adrenaline-fuelled year which culminated in a captivating election that transformed Britain's political landscape.

National broadcast journalist Hugh Hewitt warns how a Clinton "reign" would damage the fundamental, foundational traditions upon which America is built. In THE QUEEN, Hugh Hewitt's in-depth examination of the career and accomplishments -epic failures, really- of the real Hillary Clinton will show you why-after her decades of working so hard, after surviving Bill and his antics, after losing to an upstart in 2008, submerging her boiling anger and wounded pride, and after enduring the real predations of the "vast right-wing conspiracy" that has been dogging her throughout-Hillary is on the brink of achieving it all as the 2016 Democratic Presidential Nominee. Not since the publication of The Prince by Niccolo Machiavelli 500 years ago has a member of the political opposition written so candidly about the strengths and weaknesses of the strongest member of his opposing political party. Brilliant and insightful, THE QUEEN is simply unique among political books of our era.
