This book chronicles 5th and 6th grade writers in a poor, culturally diverse, rural school in the southwest US coming into their voices, cultivating those voices, and using those voices in a variety of venues, beginning with the classroom community and spreading outward. The big ideas of official and unofficial portraits are presented, followed by data and facets of the theoretical construct of counterportraits in each chapter, as a response to official portraits.

A New Companion to Leaders of Their Own Learning Puts Students in Charge of Their Learning and Growth Five years after the publication of Leaders of Their Own Learning, EL Education is back with a new companion guide to help you tackle the common challenges of student-engaged assessment. What a Piece of Work Is Man!

Long before the hydrogen bomb indelibly associated radioactivity with death, many chemists, physicists, botanists, and geneticists were excited thinking that radium held the key to the secret of life. Luis Campos examines the many and varied connections between early radioactivity research and understandings of vitality, both scientific and popular, in the first half of the twentieth century. As some physicists and chemists early on described the wondrous new element and its radioactive brethren in lifelike terms (decay, half-life, and frequent reference to the natural selection and evolution of the elements), many biologists of the period eagerly sought to bring radium into the biological fold. They did so with experiments aimed at elucidating some of the most basic phenomena of life, including metabolism and mutation, and often saw in these phenomena properties that in turn reminded them of the new element. These initially provocative links between radium and life proved remarkably productive in experimental terms and ultimately led to key biological insights into the origin of life, the nature of mutation, and the structure of the gene. "Radium and the Secret of Life" traces the half-life of this connection between the living and the radioactive, while also exploring the approach to history that emerges when one follows a trail of associations that, asymptotically, never quite disappears.'

Lessons are for Learning

Former CIA agent Lemuel Gunn left the battlefield of Afghanistan for early retirement in the desert of New Mexico, where he works as a private investigator from the creature comforts, such as they are, of a mobile home. Into his life comes Ornella Neppi, a thirty-something woman making a hash out of her uncle's bail bonds business. The source of her troubles, Emilio Gava, was arrested for buying cocaine. Ornella has reason to believe he is planning to jump bail. Unless she can find him, her uncle is going to be \$125,000 out of pocket. For \$95-a-day plus expenses (not to mention the pleasure of her company), Gunn agrees to help Ornella track the wayward suspect down. Curiously, no photographs of Gava seem to exist. Once Gunn begins his manhunt, he starts to wonder whether Gava himself existed in the first place. Robert Littell has been widely praised as one of the best espionage writers of our time. Now, he's turned his formidable skills toward crime fiction in A Nasty Piece of Work, a novel that Le Monde has already praised as "one of those page-turning detective tales that feels like an instant classic.... A Chandleresque noir novel, as delightful as it is suspenseful."

Five Writers Discuss Their Revisions

List of members in v. 1-10.

Learning how to revise may well be the most excruciating part of writing - frequently it is what makes or breaks new writers. Now, in this unique and highly useful book, Jay Woodruff gives some of America's finest contemporary writers an opportunity to talk with passion and professionalism about revision - about the hard work of their writing. Books on writing generally offer prescriptions and proscriptions about this "craft so hard to learn" instead of evidence. But in A Piece of Work Woodruff's incisive questions guide five writers - Tobias Wolff, Tess Gallagher, Robert Coles, Joyce Carol Oates, and Donald Hall - through specific examples that enable the reader to see how good writing becomes better. From the first draft through various revisions and finally to the printed version of a single piece of each author's work, Woodruff traces the full course of the revision process. While we might prefer to picture all authors as Coleridge, with the perfectly formed lines and stanzas of "Kubla Khan" emerging from a dream, the truth of the matter is that the development of a final text is often as much a hard-won discovery as it is an initial inspiration. A Piece of Work offers a road map to that discovery.

Becoming a Primary School Teacher

Written for students taking the AQA GCSE drama specification, this text aims to develop the skills, knowledge and understanding students need to succeed in the course. The book takes a "hands-on" approach with activities and practice in both the written and practical elements of the exam.

For the last three years, recluse Takira Perkins hasn't seen anything but the walls of her house. Now she is ready to step back into the real world. With the help of family, she's been slowly but surely making her move. When she meets Jaimer Perkins, her brother's frat brother and the man who will be renting their semi- attached home, her motivation is doubled. Jaimer is sure he can be everything that Takira needs, but he has secrets that would damage any chance of a relationship between them. In an effort to help Takira overcome an illness that he is sure he has caused, Jaimer comes back into her life for a second time in hopes of mending her spirit, heart, and soul. But will the love they form be strong enough to forgive a past betrayal?

Engineering News

We live in a world constantly in need of repair. Our cars break down. Marriages weaken, friendships sour, ties between nations are rent. Yet we fix things and relationships all the time, without giving these activities much thought. Repair is the first book to offer an in-depth exploration of this core aspect of human life.

Practice educators, as social workers are used to being creative and innovative in their demanding roles in practice. But often they can struggle to find the time to integrate this creativity in the teaching and learning with students. To support a student's ability to develop their critical thinking, practice educators need to possess and demonstrate a range of different skills and knowledge around models and strategies of teaching, supervision, and assessment. This concise guide enables practice educators to be more creative in the teaching, supervision and assessment of students. Containing stand-alone, but inter-linked chapters that each cover an innovative or creative approach in social work practice education, provide accessible material and practice guidance to enable practice educators to cultivate a creative approach to learning. This includes contemporary and diverse ideas around the teaching, supervision and assessment of social work students who are undertaking their practice learning placements. Each chapter is written by a qualified practice educator enabling them to draw upon their experiences of effectively supporting the development of students and the building of a learning relationship. The book bridges theory and practice, providing a straightforward and useful resource for practice educators to draw upon, thus supporting their research-mindedness to inform their practice and contribute to their knowledge-base. Both of which are indicative skills within their expert specialist roles. In short, the book provides a range of creative approaches, demonstrates their application in practice and helps to build a "creative toolbox" to use within practice.

This book is essential reading for students just beginning a career in primary school teaching. Written with the needs and questions of the new student teacher in mind, it covers the fundamental aspects of the job of the primary school teacher in an inspiring yet down-to-earth way. Each chapter covers a key issue in primary education. Becoming a Primary School Teacher is the perfect introductory text for the student teacher, helping them to prepare for their first school experience. It will also be of interest to more experienced teachers and teacher trainers.
