under the bush. Crossing the Red Sea: The water was pushed back by a very strong wind blowing all night. This is a known physical phenomenon called wind setdown. The details given in the Bible mean we can pinpoint where the Red Sea crossing occurred. Drowning Pharaoh's Army: When the very strong wind suddenly stopped blowing, the water rushed back in the form of a rapidly returning "bore" wave, sweeping Pharaoh's army into the sea. Mount Sinai: The real Mount Sinai is in present-day Saudi Arabia, not the Sinai Desert as is generally assumed.

of human foibles. Originally published in 1962, *The Battle of the Frogs and the Mice* tells in words and pictures a classic tale of the foolhardiness of war. When Crum-snatcher, a Mouse, cautiously mounts the back of Puff-jaw, King of the Frogs, to explore the Frogs' pond, the Mouse meets with a disaster which soon brings the two nations into mortal conflict. The course of this tempest in a teapot is developed with wit to assume heroic proportions, and the battle of this small world becomes the story of wars through the ages. George Martin has made an imaginative, free adaptation of a fable originally ascribed to Homer, but now believed to have been written about three hundred years after him by an unknown author. The book's events are brilliantly depicted by the drawings of Fred Gwynne, a versatile artist known for his role as Herman Munster in the sit-com hit *The Munsters*. Gwynne's haunting and unsparingly illustrations portray this chronicle from its pastoral beginning to its bitter end. Together, Martin and Gwynne have made a book of grim delight for adults and young readers alike.

It wasn't too long ago that people tried all sorts of things to help sick people feel better. They tried wild things like drinking a glass full of millipedes or putting some mustard on one's head. Some of the cures worked, and some of them...well, let's just say that millipedes, living or dead, are not meant to be ingested. Carlyn Beccia takes readers on a colorful and funny medical mystery tour to discover that while times may have changed, many of today's most reliable cure-alls have their roots in some very peculiar practices, and so relevant connections can be drawn from what they did then to what we do now.

The Medieval Haggadah

In The Plagues of Egypt, molecular biologist Siro Trevisanato assembles data gleaned from a variety of ancient texts and a wide range of scientific disciplines to assist in a reconsideration of the ten biblical plagues recorded in the Biblical book of Exodus. Trevisanato's reconstruction presents a view of these events that

argues for their historical reality, identifying the series of disasters which befell Egypt as a chain reaction traceable to a single cataclysmic event which for the first time can be dated with certainty.

A Plague of Frogs

Resentful of the sloppy, pregnant, sixteen-year-old who has come to stay in her home, Jo pulls a prank on her that has unexpected and terrifying results.

Examines how the biologist and reformer helped to raise awareness of the natural world, the importance of conservation, and the dangers of synthetic pesticides.

How the 22 letters of the Hebrew Alphabet, the alef-beis, (the construction materials with which G-d built our earthly and spiritual existence) continue as a source of creation, reflection, prayer and inspiration in our everyday lives.

What do contemporary American movies and directors have to say about the relationship between nature and art? How do science fiction films like Steven Spielberg's A.I. and Darren Aronofsky's π represent the apparent oppositions between nature and culture, wild and tame? Steven Dillon's intriguing new volume surveys American cinema from 1990 to 2002 with substantial descriptions of sixty films, emphasizing small-budget independent American film. Directors studied include Steven Soderbergh, Darren Aronofsky, Todd Haynes, Harmony Korine, and Gus Van Sant, as well as more canonical figures like Martin Scorsese, Robert Altman, David Lynch, and Steven Spielberg. The book takes its title and inspiration from Andrei Tarkovsky's 1972 film Solaris, a science fiction ghost story that relentlessly explores the relationship between the powers of nature and art. The author argues that American film has the best chance of aesthetic success when it acknowledges that a film is actually a film. The best American movies tell an endless ghost story, as they perform the agonizing

nearness and distance of the cinematic image. This groundbreaking commentary examines the rarely seen bridge between select American film directors and their typically more adventurous European counterparts. Filmmakers such as Lynch and Soderbergh are cross-cut together with Tarkovsky and the great French director, Jean-Luc Godard, in order to test the limits and possibilities of American film. Both enthusiastically cinephilic and fiercely critical, this book puts a decade of U.S. film in its global place, as part of an ongoing conversation on nature and art.

The Miracles of Exodus

B.P.R.D.: Plague of Frogs #1

Following the Bureau's catastrophic encounter with the monster-god Katha-Hem, Kate heads to France with hopes of bringing Roger back to life, and Daimio reveals the truth about his death in the jungles of Bolivia. The coming frog apocalypse heats up as Abe meets a secret society of Victorian cyborgs with ties to his origins, and Liz's visions grow increasingly dire! From Hollow Earth to King of Fear--the entire war on frogs in

four volumes!

The story of Abe's origins unfolds as the Bureau for Paranormal Research and Defense try to stop the monstrous frog men from the first Hellboy graphic novel, Seed of Destruction. The plague begins its spread across America, lending an apocalyptic new direction to Mignola's stories. In this Pulitzer Prize-finalist biography, the author of Mad at the World examines the little-known life of the man behind the well-known bird survey. John James Audubon is renowned for his masterpiece of natural history and art, The Birds of America, the first nearly comprehensive survey of the continent's birdlife. And yet few people understand, and many assume incorrectly, what sort of man he was. How did the illegitimate son of a French sea captain living in Haiti, who lied both about his parentage and his training, rise to become one of the greatest natural historians ever and the greatest name in ornithology? In Under a Wild Sky this Pulitzer Prize finalist, William Souder reveals that Audubon did not only compose the most famous depictions of birds the world has ever seen, but

he also composed a brilliant mythology of self. In this dazzling work of biography, Souder charts the life of a driven man who, despite all odds, became the historical figure we know today. "A meticulous biography and a fascinating portrait of a young nation."—San Francisco Chronicle "As richly endowed and densely packed as the forests of Audubon's day."—Minneapolis Star-Tribune "Deftly weaves together the story of the self-taught artist and naturalist...with the development of scientific inquiry in the early years of the republic and the lives of ordinary Americans as the new nation spilled westward over the mountains from the Eastern seaboard."—Los Angeles Times

A fun, fantastic, "frog's-eye" view of how the stubborn king Pharaoh and the wicked Egyptians got just what they deserved for being so mean to the Jews. Read this book and you'll never look at those little green hoppers the same way again!
