

## A Power Governments Cannot Suppress

A “well-chosen anthology of the radical historian’s prodigious output,” from A People’s History of the United States and lesser known sources (Kirkus Reviews). When Howard Zinn died in early 2010, millions of Americans mourned the loss of one of the nation’s foremost intellectual and political guides; a historian, activist, and truth-teller who, in the words of the New York Times’s Bob Herbert, “peel[ed] back the rosy veneer of much of American history to reveal sordid realities that had remained hidden for too long.” A collection designed to highlight Zinn’s essential writings, The Indispensable Zinn includes excerpts from Zinn’s bestselling A People’s History of the United States; his memoir, You Can’t Be Neutral on a Moving Train; his inspiring writings on the civil rights movement, and the full text of his celebrated play, Marx in Soho. Noted historian and activist Timothy Patrick McCarthy provides essential historical and biographical context for each selection. With a foreword by Noam Chomsky and an afterword from Zinn’s former Spellman College student and longtime friend, Alice Walker, The Indispensable Zinn is both a fitting tribute to the legacy of a man whose “work changed the way millions of people saw the past,” and a powerful and accessible introduction for anyone coming to Zinn’s essential body of work for the first time (Noam Chomsky).

Since its original landmark publication in 1980, A People’s History of the United States has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the, workplace. Known for its lively, clear prose as well as its scholarly research, A People’s History is the only volume to tell America’s story from the point of view of -- and in the words of -- America’s women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country’s greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women’s rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus’s arrival through President Clinton’s first term, A People’s History of the United States, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new after, word by the author, this special twentieth anniversary edition continues Zinn’s important contribution to a complete and balanced understanding of American history.

In this lively collection of essays, now with a new afterword, Zinn discusses a wide range of historical and political topics, from the role of the Supreme Court in U.S. history to the nature of higher education today.

The landmark alternative history of the Cold War from the perspective of the Global South, reissued in paperback with a new introduction by the author in this award-winning investigation into the overlooked history of the Third World—with a new preface by the author for its fifteenth anniversary—international renowned historian Viji Prashad conjures what Publishers Weekly calls “a vital assertion of an alternative future.” The Darker Nations, praised by critics as a welcome antidote to apologists for empire, has defined for a generation of scholars, activists, and dreamers what it is to imagine a more just international order and continues to offer lessons for the radical political projects of today. With the disastrous U.S. withdrawal from Afghanistan and the rise of India and China on the global scene, this paradigm-shifting book of groundbreaking scholarship helps us envision the future of the Global South by restoring to memory the vibrant though flawed idea of the Third World whose demise, Prashad ultimately argues, has produced an impoverished and asymmetrical international political arena. No other book on the Third World—as a utopian idea and a global movement—can speak so effectively and engagingly to our troubled times.

During the 2016 presidential election, America's election infrastructure was targeted by actors sponsored by the Russian government. Securing the Vote: Protecting American Democracy examines the challenges arising out of the 2016 federal election, assesses current technology and standards for voting, and recommends steps that the federal government, state and local governments, election administrators, and vendors of voting technology should take to improve the security of election infrastructure. In doing so, the report provides a vision of voting that is more secure, accessible, reliable, and verifiable.

These thirteen selections from the polemical writings of Thoreau represent every stage in his 22 years of active writing and serve as a microcosm of his literary career.

Disobedience and Democracy

Why Howard Zinn has become one of the most important and influential American historians is perhaps nowhere more evident than in this new book. Few social critics have been as inspiring as the ever-hopeful Zinn and, unlike many historians, Zinn turns historical details toward deeper observations on the universal truths and struggles of humankind. His remarkable wisdom and insight can be found in his earliest writings through his latest essays, speeches, and plays. Uncommon Sense brings together his most poignant and profound quotations from decades of writing and speaking. The book reveals the philosophical side of Howard Zinn and a consistency of vision over 50 years on topics ranging from government to race, history, law, civil disobedience, and activism. Offering quotations of universal and timeless quality, the book shows why history will regard this historian as a political and moral philosopher in the company of Paine, Jefferson, Frederick Douglass, and Martin Luther King Jr.

No other radical historian has reached so many hearts and minds as Howard Zinn. It is rare that a historian of the Left has managed to retain as much credibility while refusing to let his academic mantle change his beautiful writing style from being anything but direct, forthright, and accessible. Whether his subject is war, race, politics, economic justice, or history itself, each of his works serves as a reminder that to embrace one's subjectivity can mean embracing one's humanity, that heart and mind can speak with one voice. Here, in six sections, is the historian's own choice of his shorter essays on some of the most critical problems facing America throughout its history, and today.

Governments fail to provide the public goods needed for development when its leaders knowingly and deliberately ignore sound technical advice or are unable to follow it, despite the best of intentions, because of political constraints. This report focuses on two forces—citizen engagement and transparency—that hold the key to solving government failures by shaping how political markets function. Citizens are not only queuing at their polling booths, but are also taking to the streets and using diverse media to pressure, sanction and select the leaders who wield power within government, including by entering as contenders for leadership. This political engagement can function in highly nuanced ways within the same formal institutional context and across the political spectrum, from autocracies to democracies. Unhealthy political engagement, when leaders are selected and sanctioned on the basis of their provision of private benefits rather than public goods, gives rise to government failures. The solutions to these failures lie in fostering healthy political engagement within any institutional context, and not in circumventing or suppressing it. Transparency, which is citizen access to publicly available information about the actions of those in government, and the consequences of these actions, can play a crucial role by nourishing political engagement.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule’s purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Widely heralded as a “masterful” (Washington Post) and “essential” (Slate) history of the modern American metropolis, Richard Rothstein’s *The Color of Law* offers “the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation” (William Julius Wilson). Exploding the myth of *de facto* segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, “virtually indispensable” study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.*

As a World War II combat soldier, Howard Zinn took part in the aerial bombing of Royan, France. Two decades later, he was invited to visit Hiroshima and meet survivors of the atomic attack. In this short and powerful book, Zinn offers his deep personal reflections and political analysis of these events, their consequences, and the profound influence they had in transforming him from an order-taking combat soldier to one of our greatest anti-authoritarian, antiwar historians. This book was finalized just prior to Zinn’s passing in January 2010, and is published on the sixty-fifth anniversary of the bombing of Hiroshima. Simultaneous publication this August in the U.S. and Japan commemorates the 65th anniversary of the USA’s two atomic bombings of Japan by calling for the abolition of all nuclear weapons and an end to war as an acceptable solution to human conflict. “Zinn writes with an enthusiasm rarely encountered in the leaden prose of academic history...” —New York Times Book Review “This collection of essays is a great book for anybody who would like to better inform themselves about history, regardless of their political point of view.” —O. The Oprah Magazine “Zinn collects here almost three dozen brief, passionate essays...Readers seeking to break out of their ideological comfort zones will find much to ponder here.” —Publishers Weekly “A bomb is highly impersonal. The dropper can kill hundreds, and never see any of them. The Bomb is the memoir of Howard Zinn, a bomber in World War II who dropped bombs along the French countryside while campaigning against Germany. After learning of Hiroshima and Nagasaki, Zinn now speaks out against the use of bombs and what it can do to warfare. Thoughtful and full of stories of an old soldier who regrets what he has done. The Bomb is a fine posthumous release that shares much of the lost wisdom of World War II.” —James A. Cox, The Midwest Book Review “Throughout his academic career, his popular writings and work as an activist Zinn consistently, and often successfully, threw a wrench in the works of the US war machine. He may be gone, but through his powerful and passionate body of work—of which *The Bomb* is an excellent introduction—thousands of others will be educated and inspired to work for a more humane and peaceful world.” —Jan Sinclair, Morning Star “The path that Howard Zinn walked—from bombardier to activist—gives hope that each of us can move from clinical detachment to ardent commitment, from violence to nonviolence.” —Frida Berrigan, WIN Magazine Howard Zinn (1922–2010) was raised in a working-class family in Brooklyn, and flew bombing missions for the United States in World War II, an experience he now points to in shaping his opposition to war. Under the GI Bill he went to college and received his Ph.D. from Columbia University. In 1956, he became a professor at Spelman College in Atlanta, a school for black women, where he soon became involved in the civil rights movement, which he participated in as an adviser to the Student Nonviolent Coordinating Committee (SNCC) and chronicled, in his book SNCC: The New Abolitionists. Zinn collaborated with historian Staughton Lynd and mentored a young student named Alice Walker. When he was fired in 1963 for insubordination related to his protest work, he moved to Boston University, where he became a leading critic of the Vietnam War. In his lifetime, Zinn received the Thomas Merton Award, the Eugene V. Debs Award, the Upton Sinclair Award, and the Lannan Literary Award. He is perhaps best known for A People’s History of the United States. CityLights Booksellers and Publishers previously published his essay collection A Power Governments Cannot Suppress.

Here in their own words are Frederick Douglass, George Jackson, Chief Joseph, Martin Luther King Jr., Plough Joggler, Sacco and Vanzetti, Patti Smith, Bruce Springsteen, Mark Twain, and Malcolm X, to name just a few of the hundreds of voices that appear in Voices of a People’s History of the United States, edited by Howard Zinn and Anthony Arnove. Paralleling the twenty-four chapters of Zinn’s A People’s History of the United States, Voices of a People’s History is the long-awaited companion volume to the national bestseller. For Voices, Zinn and Arnove have selected testimonies to living history—speeches, letters, poems, songs—left by the people who make history happen but who usually are left out of history books—women, workers, nonwhites. Zinn has written short introductions to the texts, which range in length from letters or poems of less than a page to entire speeches and essays that run several pages. Voices of a People’s History is a symphony of our nation’s original voices, rich in ideas and actions, the embodiment of the power of civil disobedience and dissent wherein lies our nation’s true spirit of defiance and resilience.

Collects articles penned by the author for “Progressive” magazine from 1980 to 2009, offering critiques of the government, encouragement for citizens to organize, and a voice on behalf of the working class.

A sobering account of a disenfranchised American working class and important policy solutions to the nation’s economic inequalities. One of the country’s leading scholars on economics and social policy, Isabel Sawhill addresses the enormous divisions in American society—economic, cultural, and political—and what might be done to bridge them. Widening inequality and the loss of jobs to trade and technology has left a significant portion of the American workforce disenfranchised and skeptical of governments and corporations alike. And yet both have a role to play in improving the country for all. Sawhill argues for a policy agenda based on mainstream values, such as family, education, and work. Although many have lost faith in government programs designed to help them, there are still trusted institutions on both the local and the federal level that can deliver better job opportunities and higher wages to those who have been left behind. At the same time, the private sector needs to reexamine how it trains and rewards employees. This book provides a clear-headed and middle-way path to a better-functioning society in which personal responsibility is honored and inclusive capitalism and more broadly shared growth are once more the norm.

Why our workplaces are authoritarian private governments—and why we can’t see it. One in four American workers says their workplace is a “dictatorship.” Yet that number almost certainly would be higher if we recognized employers for what they are—private governments with sweeping authoritarian power over our lives. Many employers minutely regulate workers’ speech, clothing, and manner. Many extend their authority to the off-duty lives of workers, who can be fired for their political speech, recreational activities, diet, and almost anything else employers care to govern. *A bracingly provocative challenge to one of our most cherished ideas and institutions Most people believe democracy is a uniquely just form of government. They believe people have the right to an equal share of political power. And they believe that political participation is good for us—it empowers us, helps us get what we want, and tends to make us smarter, more virtuous, and more caring for one another. These are some of our most cherished ideas about democracy. But Jason Brennan says they are all wrong. In this trenchant book, Brennan argues that democracy should be judged by its results—and the results are not good enough. Just as defendants have a right to a fair trial, citizens have a right to competent government. But democracy is the rule of the ignorant and the irrational, and it all too often falls short. Furthermore, no one has a fundamental right to any share of political power, and exercising political power does most of us little good. On the contrary, a wide range of social science research shows that political participation and democratic deliberation actually tend to make people worse—more irrational, biased, and mean. Given this grim picture, Brennan argues that a new system of government—epistocracy, the rule of the knowledgeable—may be better than democracy, and that it’s time to experiment and find out. A challenging critique of democracy and the first sustained defense of the rule of the knowledgeable.*

*“No single book is as relevant to the present moment.”—Claudia Rankine, author of Citizen “One of the defining books of the decade.”—Elizabeth Hinton, author of From the War on Crime NEW YORK TIMES BOOK REVIEW EDITORS’ CHOICE • With a new preface • Fascist politics are running rampant in America today—and spreading around the world. A Yale philosopher identifies the ten pillars of fascist politics, and charts their horrifying rise and deep roots. As the child of refugees of World War II Europe and a renowned philosopher and scholar of propaganda, Jason Stanley has a deep understanding of how democratic societies can be vulnerable to fascism. Nations don’t have to be fascist to get from fascist politics. In fact, fascist’s roots have been present in the United States for more than a century. Alarmed by the pervasive rise of fascist tactics both at home and around the globe, Stanley focuses on the structures that unite them, laying out and analyzing the ten pillars of fascist politics—the language and beliefs that separate people into an “us” and a “them.” He knits together reflections on history, philosophy, sociology, and critical race theory with stories from contemporary Hungary, Poland, India, Myanmar, and the United States, among other nations. He makes clear the immense danger of underestimating the cumulative power of these tactics, which include exploiting a mythic version of a nation’s past; propaganda that twists the language of democratic ideals against themselves; anti-intellectualism directed against universities and experts; law and order politics predicated on the assumption that members of minority groups are criminals; and fierce attacks on labor groups and welfare. These mechanisms all build on one another, creating and reinforcing divisions and shaping a society vulnerable to the appeals of authoritarian leadership. By uncovering disturbing patterns that are as prevalent today as ever, Stanley reveals that the staff of politics—charged by rhetoric and myth—can quickly become policy and reality. Only by recognizing fascist politics, he argues, may we resist its most harmful effects and return to democratic ideals. “With unsettling insight and disturbing clarity, How Fascism Works is an essential guidebook to our current national dilemma of democracy vs. authoritarianism.”—William Jelani Cobb, author of The Substance of Hope*

Never before published, an extraordinarily inspiring and radical conversation between Howard Zinn and PBS/NPR journalist Ray Suarez, wherein American history is turned upside down—published to coincide with the tenth anniversary of Zinn’s death Truth Has a Power of Its Own is an engrossing collection of never-before-published conversations with Howard Zinn, conducted by the distinguished broadcast journalist Ray Suarez in 2007, that covers the course of American history from Columbus to the War on Terror from the perspective of ordinary people—including slaves, workers, immigrants, women, and Native Americans. Viewed through the lens of Zinn’s own life as a soldier, historian, and activist and using his paradigm-shifting People’s History of the United States as a point of departure, these conversations explore the American Revolution, the Civil War, the labor battles of the nineteenth and twentieth centuries, U.S. imperialism from the Indian Wars to the War on Terrorism, World Wars I and II, the Cold War, and the fight for equality and immigrant rights, all from an unapologetically radical standpoint. Longtime admirers and a new generation of readers alike will be fascinated to learn about Zinn’s thought processes, rationale, motivations, and approach to his now-iconic historical work. Suarez’s probing questions and Zinn’s humane (and often humorous) voice—along with his keen moral vision—shine through every one of these lively and thought-provoking conversations, showing that Zinn’s work is as relevant as ever.
