The book, Visser's Annotated European Patent Convention, is a commentary on the European Patent Convention and a bestseller in European patent law. The 2022 edition of this preeminent work - the only regularly updated authoritative article-by-article commentary in English on the European Patent Convention (EPC), its implementing regulations, and associated case law provides the complete text of the law annotated with commentary and expert guidance on the interpretation of each paragraph. Since its first edition in 1994 it has provided the European patent community with the necessary insights to practice successfully before the European Patent Office. The EPO recommends the Visser's Annotated European Patent Convention as the first book in its list of non-EPO/WIPO literature to be used for the preparation of the European qualifying examination. In addition to a thorough updating of developments, new material in the 2022 edition includes the following: Amended EPO Guidelines that entered into force on 01.03.2022 Consolidated discussion of procedures relating to oral proceedings held by videoconference Commentary on recent amendments to the Implementing Regulations Recent decisions of the boards of appeal The 2022 edition is suitable for candidates preparing for the EPOE 2023 (pre-examination and main examination); a PDF supplement with an overview of any major legal changes between 01.03.2022 and 31.10.2022 will be made available via this webpage at the end of 2022.

The most up-to-date, comprehensive guide to DataCAD Written for the new 9.0 release by DataCAD staff, the hands-on Official Datacad User's Guide puts at your fingertips a complete A to Z guide to the use of this single most popular architecture-specific CAD program. Authors Michael Smith, Richard Morse, and Shelly Flanigan provide you with a tool that clarifies new features of the software open multiple documents at the same time for cutting and pasting. Among the topics you'll find fully examined are: DataCAD: Settings and display options...printing and plotting 2D: Moving objects...editing...basic and advanced construction drawings...making difficult or repetitive tasks easier...templates and symbols 3D: Basic 3D modeling...creating 3D from 2D...advanced 3D modeling...construction

Files...Customizing dataCAD...Recommended Macros Communicating from DataCAD into AutoCAD and other Programs: Converting File formats...Networking More Provides information on where to go to find detailed guidance on how to use these techniques. Covers: remote sensing & surface geophysical methods; drilling & solids sampling methods; geophysical logging of boreholes; aquifer test methods; ground water sampling methods; Vadose Zone (VZ) hydrologic properties; water state, infiltration, conductivity, & flux; VZ water budget characterization m

This handbook provides a critical review and user's guide to conducting and reporting process tracing studies of decision making. Each chapter covers a specific method that is presented and reviewed by authors who are experts in the method's application to decision research. The book ultimately illustrates and presents a multi-method approach and is essential reading for graduate students and researchers wishing to undertake such studies on decision making.

Magic Lantern Guides Multimedia Workshops The world's best photographic package! Magic Lantern Guides and DVDs have always provided the very best, most in-depth coverage of a camera's ins-and-outs. Now, there's even more "magic" on the market for photographers: the MAGIC LANTERN MULTIMEDIA WORKSHOP. It's a complete class in digital photography with a D-SLR camera--one that enables you to learn the essentials at your own pace, in the comfort in your own home. The attractive package includes: - Specific 80-minute DVD: An authoritative DVD guide made just for your model. Created by photographers for photographers, it covers specific camera features and functions. The format allows you to navigate easily between different topics and review chapters any time. - Taking Great Digital Photos: This full-color, 64-page book gets newcomers to the digital world started right. Packed with picture-taking tips and information on digital file formats, it explains how f/stops and shutter speeds work together to create an exposure, which focal lengths are best for various subjects, and how to get accurate color with white balance. - Great Photos with Your Digital SLR 60-minute DVD: This live-action tutorial demystifies digital shooting, and shows how to compose photos; choose the best picture-quality settings; improve results with the built-in flash; and interpret your histogram. Plus, see when to trust your camera's automatic settings...or change them yourself. - Quick Reference Wallet Card: This laminated take-along is an ideal in-the-field key to camera and menu operations. There's nothing else like this on the market!

Completely updated guide for students, scientists and engineers who want to use Microsoft Excel 2013 to its full potential. Electronic spreadsheet analysis has become part of the everyday work of researchers in all areas of engineering and science. Microsoft Excel, as the industry standard spreadsheet, has a range of scientific functions that can be utilized for the modeling, analysis and presentation of quantitative data. This text provides a straightforward guide to using these functions of Microsoft Excel, guiding the reader from basic principles through to more complicated areas such as formulae, charts, curve-fitting, equation solving, integration, macros, statistical functions, and presenting quantitative data. Content written specifically for the requirements of science and engineering students and professionals working with Microsoft Excel, brought fully up to date with the new Microsoft Office release of Excel 2013. Features of Excel 2013 are illustrated through a wide variety of examples based in technical contexts, demonstrating the use of the program for analysis and presentation of experimental results. New to this edition: The Backstage is introduced (a new Office 2013 feature); all the 'external' operations like Save, Print etc. are now in one place The chapter on charting is totally revised and updated - Excel 2013 differs greatly from earlier versions Includes many new end-of-chapter problems Most chapters have been edited to improve readability

Fluorinated Coatings and Finishes Handbook: The Definitive User's Guide, Second Edition, addresses important, frequently posed questions by end-user design engineers, coaters, and coatings suppliers on fluorinated coatings and finishes, thus enabling them to achieve superior product qualities and shorter product and process development times. The book provides broad coverage of these fluorinated polymer coatings, including the best known PTFE, polytetrafluoroethylene, first trademarked as Teflon® and ePTFE (GoreTex®). Their inherent qualities of low surface tension, non-stick, low friction, high melting point, and chemical inertness make fluoropolymer coatings widely desirable across thousands of industrial and consumer applications, but these properties also make it difficult to convert fluoropolymers to coatings that have sufficient adhesion to the substrate to be protected. In this book, readers learn how fluoropolymer coatings are used and made, about their pigments and fillers, binders, dispersion processes, additives, and solvents. The book includes substrate preparation, coating properties, baking and curing processes, performance tests, applications, and health and safety. Provides a practical handbook that covers the theory and practice of fluorinated coatings, including the structure and properties of binders and how to get a non-stick coating to stick to the substrate Covers liquid and power fluorocoatings, their applications methods, curing and baking processes, and their commercial end uses Presents detailed discussions of testing methods related to fluorocoatings, common coating defects, how they form, how to eliminate them, and the health and safety aspects of using and applying fluorocoatings Includes substrate preparation, coating properties, baking and curing processes, performance tests, applications, and health and safety
