*He is the favorite artist of both George Lucas and Steven Spielberg and the artist behind some of the most iconic images of our time... he is Drew Struzan. Struzan has worked on the posters for the biggest films of the last 30 years. Blade Runner, Back to the Future, Jurassic Park and E.T: The Extraterrestrial to name but a few. The first ever book to cover Struzan's iconic poster artwork in depth, with the final artwork for each piece accompanied by background and anecdotes from an exclusive interview with the artist. With an introduction to Struzan's philosophies and techniques, this stunning hardcover will include photos, sketches and reference material, plus closeups and a brief history of each poster featured, from Star Wars to The Goonies.*

*BPP Learning Media's status as official ACCA Approved Learning Provider - Content means our DipIFR Study Texts and Practice & Revision Kits are reviewed by the ACCA examining team. BPP Learning Media products provide you with the up-to-date material you need for exam success.*

*Miller's name appears first on the ealier editions.*

*Changing Cultures in Higher Education*

*Dare to be Creative!*

*Ethnopharmacology of Wild Plants*

*Psychology and Neurobiology of Empathy*

*AAT Advanced Bookkeeping*

Our unique Passcards make the best use of your revision time. They summarise key topics in your module to jog your memory when it matters, and are packed with rapid bites of exam-relevant guidance. Revise at a glance and accelerate revision with summaries and visual aids.

Offers a thorough, evenhanded review of contemporary empathy research. Davis' approach is explicitly multidimensional, and he presents a novel organizational model to help classify and interpret previous findings. Valuable to advanced undergraduate and graduate courses on altruism, helping, and moral development.

SHORTLISTED FOR 'BEST COMMUTER READ', CMI MANAGEMENT BOOK OF THE YEAR 2017 How do you ask for a promotion, deliver tough news to clients, or secure investment for your new business? The answer is negotiation. It is the most important skill you can develop to get what you want in business and life.

No matter how much experience you've got, We Have a Deal can help you to improve your negotiation skill – developing an awareness of your habits and abilities, recognising what's really going on in a deal, and building a flexible approach that is confident and appropriate to each situation. Negotiation expert Natalie Reynolds moves beyond the old-fashioned rules of deal making to explore why people react the way they do in certain situations and how can we use that knowledge to get a good deal. Her five-step DEALS method has helped individuals and organisations to excel at all kinds of negotiation, from clinching a pay rise to resolving disputes, from developing partnerships to shaking hands on multi-million dollar deals. We Have a Deal will help you to overcome obstacles, work with different personalities and in varied cultures, and develop an intelligent and flexible approach will empower you to get the best deal, every time.

***The concept of the 'smart city' as the confluence of urban planning and technological innovation has become a predominant feature of public policy discourse. Despite its expanding influence, however, there is little consensus on the precise meaning of a 'smart city'. One reason for this ambiguity is that the term means different things to different disciplines. For some, the concept of the 'smart city' refers to advances in sustainability and green technologies. For others, it refers to the deployment of information and communication technologies as next generation infrastructure. This volume focuses on a third strand in this discourse, specifically technology driven changes in democracy and civic engagement. In conjunction with issues related to power grids, transportation networks and urban sustainability, there is a growing need to examine the potential of 'smart cities' as 'democratic ecologies' for citizen empowerment and user-driven innovation. What is the potential of 'smart cities' to become platforms for bottom-up civic engagement in the context of next generation communication, data sharing, and application development? What are the consequences of layering public spaces with computationally mediated technologies? Foucault's notion of the panopticon, a metaphor for a surveillance society, suggests that smart technologies deployed in the design of 'smart cities' should be evaluated in terms of the ways in which they enable, or curtail, new urban literacies and emergent social practices. The book covers a variety of topics in Information and Communications Technology (ICT) and their impact on innovation and business. The authors discuss various innovations, business and industrial motivations, and impact on humans and the interplay between those factors in terms of finance, demand, and competition. Topics discussed include the convergence of Machine to Machine (M2M), Internet of Things (IoT), Social, and Big Data. They also discuss AI and its integration into technologies from machine learning, predictive analytics, security software, to intelligent agents, and many more. Contributions come from academics and professionals around the world. Covers the most recent practices in ICT related topics pertaining to technological growth, innovation, and business; Presents a survey on the most recent technological areas revolutionizing how humans communicate and interact; Features four sections: IoT, Wireless Ad Hoc & Sensor Networks, Fog Computing, and Big Data Analytics.***

*BPP Learning Media delivers a range of accessible and focused study materials covering AAT's QCF standards. Our paper materials and online equivalents will help ensure you are ready for your assessments and prepared for your career in accounting.*

*More and more educational scenarios and learning landscapes are developed using blogs, wikis, podcasts and e-portfolios. Web 2.0 tools give learners more control, by allowing them to easily create, share or reuse their own learning materials, and these tools also enable social learning networks that bridge the border between formal and informal learning. However, practices of strategic innovation of universities, faculty development, assessment, evaluation and quality assurance have not fully accommodated these changes in technology and teaching. Ehlers and Schneckenberg present strategic approaches for innovation in universities. The contributions explore new models for developing and engaging faculty in technology-enhanced education, and they detail underlying reasons for why quality assessment and evaluation in new – and often informal – learning scenarios have to change. Their book is a practical guide for educators, aimed at answering these questions. It describes what E-learning 2.0 is, which basic elements of Web 2.0 it builds on, and how E-learning 2.0 differs from Learning 1.0. The book also details a number of quality methods and examples, such as self-assessment, peer-review, social recommendation, and peer-learning, using illustrative cases and giving practical recommendations. Overall, it offers a step-by-step guide for educators so that they can choose their own quality assurance or assessment methods, or develop their own evaluation methodology for specific learning scenarios. The book addresses everyone involved in higher education – university leaders, chief information officers, change and quality assurance managers, and faculty developers. Pedagogical advisers and consultants will find new insights and practices for the integration and management of novel learning technologies in higher education. The volume fosters in lecturers and teachers a sound understanding of the need and strategy for change, and it provides them with practical recommendations on competence and quality methodologies.*

*Passcards provide all the knowledge required for the Business Tax unit. Passcards are A6, spiral bound revision aids which students can carry to revise wherever, whenever. Features include: topics presented in the same order as the Course Book, ability to focus on tricky syllabus areas, aid revision by giving clear, visual emphasis to key points, suitable for both paper and computer based exams.*

*Our materials and online equivalents will help ensure you are ready for your assessments and prepared for your career in accounting.*

Prior to the military conflicts in Iraq and Afghanistan, wars and conflicts have been characterized by such injuries as infectious diseases and catastrophic gunshot wounds. However, the signature injuries sustained by United States military personnel in these most recent conflicts are blast wounds and the psychiatric consequences to combat, particularly posttraumatic stress disorder (PTSD), which affects an estimated 13 to 20 percent of U.S. service members who have fought in Iraq or Afghanistan since 2001. PTSD is triggered by a specific traumatic event - including combat - which leads to symptoms such as persistent re-experiencing of the event; emotional numbing or avoidance of thoughts, feelings, conversations, or places associated with the trauma; and hyperarousal, such as exaggerated startle responses or difficulty concentrating. As the U.S. reduces its military involvement in the Middle East, the Departments of Defense (DoD) and Veterans Affairs (VA) anticipate that increasing numbers of returning veterans will need PTSD services. As a result, Congress asked the DoD, in consultation with the VA, to sponsor an IOM study to assess both departments' PTSD treatment programs and services. Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations: Initial Assessment is the first of two mandated reports examines some of the available programs to prevent, diagnose, treat, and rehabilitate those who have PTSD and encourages further research that can help to improve PTSD care.

The Question Bank provides all the knowledge required for the Management Accounting: Costing unit. Question Banks allow students to test knowledge by putting theory into practice and refine exam technique. Features include: assessment standard practice questions and answers, guidance of revision technique, hints and tips. ***Human rights violations and traumatic events often comingle in victims' experiences; however, the human rights framework and trauma theory are rarely deployed together to illuminate such experiences. This edited volume explores the intersection of trauma and human rights by presenting the development and current status of each of these frameworks, examining traumatic experiences and human rights violations across a range of populations and describing efforts to remediate them. Individual chapters address these topics among Native Americans, African Americans, children, women, lesbian/gay/bisexual/transgender individuals, those with mental disabilities, refugees and asylees, and older adults, and also in the context of social policy and truth and reconciliation commissions. The authors demonstrate that the trauma and human rights frameworks each contribute invaluable and complementary insights, and that their integration can help us fully appreciate and address human suffering at both individual and collective levels.***

The scientific study of empathy has exploded in the past decade. Practically all of the relevant sciences -- from various neuroscientific, psychological and sociological perspectives -- are now vigorously participating in the emerging conversations about the nature of this essential, pro-social process. Empathy is also emerging as a critical topic in medical education and practice, in terms of its essential relevance for not only the patient - physician relationship and bed-side practice, but also for diverse psychiatric problems and syndromes that demonstrate a fundamental disordering of empathy, particularly conduct disorder/sociopathy and autistic spectrum disorders. Consistent with these multidisciplinary trends and interests, this volume reflects contributions from many disciplines and summarizes the impact of diverse empathy studies. It also discusses the perspectives of individuals participating in the scientific discussion and scholarship about this critical frontier topic. Contributions in the present volume range from detailed neuroscientific reviews of empathy concepts and processes, to a diversity of evolutionary and developmental perspectives looking at empathy in both phylogeny and ontogeny. Likewise, an examination of how helping and medical disciplines are impacted

by such issues are included -- a wide ranging and comprehensive list of topics that are typically not covered elsewhere in a single volume. In summary, this book covers diverse but related approaches to understanding empathy from evolutionary, developmental, sociological and clinical viewpoints across the life cycle. Various contributors from around the world merge scientific and practical viewpoints in depth to provide readers a comprehensive picture of this emerging field, ranging from basic scientific knowledge to practical medical perspectives. This book should be a valuable resource to those interested in the diverse facets of empathy, from advanced students in psychology and related fields, to educators, to various medical and healthcare professionals. It may appeal to anyone interested not only in scientific studies of empathy, but also those curious about how a deeper understanding of empathy might inform and illuminate problems related to our daily human social interactions and their vicissitudes.
